90mm	2341	**14-386-9**	10/472.56	1324.95

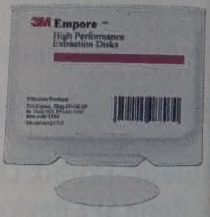
SDB-XC Extraction Disks

- Approved for use in EPA Method 515.2
- Provide the next step in environmental sample preparation, soluble polar compound extraction; ideal for phenol compounds having poor recoveries by almost any known extraction technique

Size	Mfr. No.	Cat. No.	Pack of	Case of 3 Pk.
47mm	2240	**14-386-4**	20/236.08	661.92
90mm	2340	**14-386-5**	10/472.56	1324.95

3M* Empore* Rad Disks

Effective alternative to conventional radiochemical sample preparation methods that use wet chemistry or packed columns



14-388-9 Series

- Thin membranes with densely packed, element-selective particles held in a stable inert matrix of polytetrafluoroethylene (PTFE) fibrils that separate, collect, and concentrate target surface radioisotopes
- Marked with sorbent type, lot number, and individual disk number
- Diameter: 47mm (nominal); suggested flowrate: 50mL/minute (nominal)

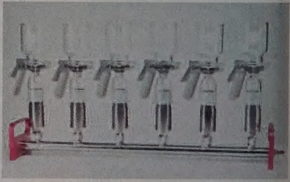
Choice of Three Disk Types

- **Strontium** disks quantitatively determine radiostrontium in aqueous samples; reduce sample manipulations by 90%
- **Radium** disks quantitatively determine radium isotopes 226 and 228 from aqueous samples; reduce sample manipulations by 50%
- **Technetium** disks selectively adsorb technetium when present with other common ions for quantitative determination of technetium in aqueous samples; reduce sample manipulations to just two steps

Disk Type	Size	Mfr. No.	Cat. No.	Pack of 20	Case of 3 Pk.
Strontium	0.5mm	3290	**14-388-91**	965.69	2707.53
Radium	0.5mm	3291	**14-388-92**	803.32	2252.29
Technetium	0.5mm	3292	**14-388-93**	403.31	1130.77

Kontes* Extraction Manifolds

Specially designed for use with solid-phase extraction disks—including 3M* Empore* extraction disks in 47mm diameters



K971000-6047

- Funnels are Type I, Class A borosilicate glass
- TFE-coated stainless-steel support screen reduces sample-to-sample cross-contamination and resists corrosion caused by acid-preserved samples
- Valves have stainless-steel bodies, PTFE plugs, and three-way operation to allow venting without affecting vacuum in the rest of the system
- Corrosion-resistant, stainless-steel manifolds are available with one, three, or six places in 47mm size

INCLUDES:

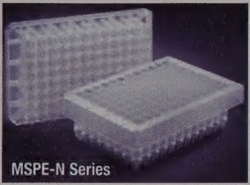
All sets have a manifold, plus the number of glassware sets indicated in the chart below. Each glassware set includes a 47mm dia./300mL capacity funnel, support base, PTFE-coated stainless-steel screen, and anodized aluminum clamp. Replacement parts are available on our Web site.

No. of Sets	Manifold Places	Cat. No.	Each
1	1	**K971000-1047**	905.57
3	3	**K971000-3047**	1839.54
6	6	**K971000-6047**	3512.61

*Trademark. See Trademark Reference.

Millipore* Multi-SPE Extraction Plates

High performance sample preparation in a 96-well format for reliable LC-MS/MS results



- High extraction efficiency eliminates steps for high throughput sample processing
- Small bed volume allows efficient recovery of retained analytes in a small volume of elution solvent, yielding a clean, concentrated sample
- Contain 3M* Empore* extraction membranes that are produced by trapping sorbent particles within an inert matrix of polytetrafluoroethylene (PTFE)—resulting in a clean recovered eluant and longer column life
- Dense particle packing and uniform distribution within Empore extraction membranes allows the use of less sorbent mass and lower elution volumes and capture analytes more efficiently than packed bed columns
- Adaptable to a variety of automated liquid handling and robotic workstations

Variety of Sorbent Types

- **C18 (Octadecyl Bonded Silica):** Strongly nonpolar for reversed phase applications
- **C8 (Octyl Bonded Silica):** Moderately nonpolar for reversed phase applications; can be more selective than C18
- **C2 (Ethyl Bonded Silica):** Weakly nonpolar for reversed phase applications
- **MPC (Mixed Phase Cation):** C8 bonded silica for reversed phase interactions; benzosulfonic acid groups for strong cation exchange interactions
- **UR (Universal Resin):** Styrene divinylbenzene terpolymer with polar functional groups; high retention of a wide range of analytes; used for rapid method development

Material	Cat. No.	Each
C18	**MSPE-N18-01**	253.00
C2	**MSPE-N02-01**	253.32
C8	**MSPE-N08-01**	253.32
MPC	**MSPE-NMP-01**	253.32
UR	**MSPE-NUR-01**	276.35

TYPICAL CHARACTERISTICS

Membrane Diameter	5.5mm
Reservoir Volume	1.2mL
Membrane Thickness	0.75mm
Bed Volume	18µL
Sorbent Mass	Bonded Silicas: 10mg (Nominal); Universal Resin: 5mg (Nominal)
Mean Particle Size	Bonded Silicas: 50µm; Universal Resin: 44µm
Membrane Composition	Bonded Silicas: Nominally 92% Sorbent, 8% PTFE (w/w); Universal Resin: Nominally 90% Sorbent, 10% PTFE (w/w)

Millipore* Multiscreen*HTS Vacuum Manifold

For vacuum filtration using 96- and 384-well MultiScreenHTS, MultiScreen* Solvinert, and Solvinert Deep Well filter plates

- Accepts deep well or standard receiver plates
- Suitable for use with manual or automated protocols; ANSI/SBS compliant footprint allows for easy robotic deck integration
- Easily configured for both flow-to-waste and analyte collection
- DirectStack* technology for crosstalk-free filtrate collection
- Manifold components are resistant to solvents

INCLUDES:

Manifold base, standard collar, gaskets and gasket inserts, tubing, valves, pressure gauge

Description	Cat. No.	Each
MultiScreen$_{HTS}$ Vacuum Manifold	**MSV MHT S00**	1250.00

Environmental Express* StepSaver* Device for Solid-Phase Extraction

Simplifies U.S. EPA Method 1664

09-735-116

- Positions the collection vessel outside of the filter flask or manifold and utilizes a vacuum bridge to connect the vacuum source
- Luer adapter, located in the solvent collection arm, permits the use of an inline Na_2SO_4 drying cartridge
- Allows the collection of the solvent with eluted oil or grease directly into a preweighed collection flask, thus eliminating the disassembly or assembly of glassware
- Already dried with the Na_2SO_4, the eluent can be directly evaporated to obtain the weight of the extracted oil or grease
- Two-way, 120° PTFE-resin stopcock prevents accidental sample loss; attaches to a filter manifold or filtration flask through the ₸ 40/35 ground glass joint on the bottom of the apparatus
- Designed for use with 47mm solid-phase extraction disks
- Manufactured of borosilicate glass with a stainless-steel filter screen

INCLUDES:

1000mL funnel reservoir, two-way base with 120° PTFE stopcock, stainless-steel filter plate, ₸ 40/35 ground glass joint, large thomas clamp, 100mL collection flask, Keck clip

REQUIRED ACCESSORIES:

Manifold and Na_2SO_4 drying cartridge must be purchased separately.

Description	Cat. No.	Pack of
StepSaver Kit, 47mm	**09-735-116**	1/700.23
Na_2SO_4 Drying Cartridge, 5.5g	**09-735-133**	50/106.06

EMD Chemicals TLC, HPTLC, and PLC Plates and Sheets

All plates and sheets are manufactured with ISO 9001-certified processes to ensure reproducibility of results and resolution of separations

Standard TLC Plates

- Average particle size is 15µm with a 5-20µm distribution

HPTLC Plates

- Average particle size is 5µm with a 4-7µm distribution
- Smaller size and distribution of the HPTLC media yields improved resolution, shorter analysis times, and higher detection sensitivity

Preparative Layer Chromatography (PLC) Plates

- Used to purify substances in milligram quantities
- Can have adsorbent layers of up to 2mm thick

Choose from several media to match separation requirements:

- **Silica Gel:** Untreated, chemically modified, and reversed-phase silica gel with a pore size of 60Å is suitable for all common gel separations, including weak to strong polar analytes; can also be used for applications requiring charring procedures
- **Aluminum Oxide:** Ideal for separating hormones, alkaloids, and antibiotics
- **Cellulose:** Cellulose and cellulose PEI (polyethyleneimine cellulose) with acid-stable fluorescent indicator for partition chromatography, and for separation of weak anion exchangers, including peptide and amino acids

NOTE: PEI should be stored at 4°C [39°F]. If stored at room temperature, PEI plates may turn slightly yellow, which could affect separation. To minimize yellow color, predevelop in distilled water.

Other features

- Sorbents also are offered with fluorescent indicators F_{254} (254nm excitation wavelength), $F_{254+366}$ (254 and 366nm excitation wavelengths), and F_{254s} (acid-stable with a 254nm excitation wavelength)
- Prescored plates can be broken down into smaller plates

Whatman* TLC and HPTLC Plates

High-Performance TLC (HPTLC) Plates

05-713-1 Series

- 4.5µm particle size silica gel with an inert binder in a uniform 200µm layer on glass
- Short development distances (3 to 7cm) and times (1 to 10 minutes)
- Exhibit narrow particle size distribution, homogeneity, and uniformity; low band diffusion
- Use smaller samples than conventional plates
- Some with Linear-K* preadsorbent strips to maximize sample volume, ease of application, and permit high-efficiency TLC without requiring special spotting apparatus
- Use with conventional linear development techniques or automated U-chamber radial HPTLC apparatus
- See comparison table for typical results of conventional TLC and HPTLC

Adsorption Plates

- Provide quality separation of moderately to strongly polar compounds, including carbohydrates, antibiotics, proteins, amino acids, and phospholipids
- With organic binder and moderate layer hardness for convenient spot recovery with a sample recovery tube
- Plates with 250µm thick layer for analytical work; plates with 500 and 1000µm thick layers for preparative applications
- Versions with Linear-K preadsorbent strip have a 3cm strip of inert material that acts as an inactive blotter or staging area for rapid application of samples along the edge of standard silica plate

Flexible-Backed TLC Plates

- 20 × 20cm gel plates can be trimmed to match requirements
- Ideal for applications for rapid sample isolation or elution prior to techniques, such as scintillation counting or spectrophotometry
- Adsorption silica gel plates are widely applicable for moderately to strongly polar analytes; available with aluminum or polyester backing material (use aluminum backing for applications requiring charring; polyester-backed plates can be used up to 110°C [230°F] and in solvent systems containing strong acids and alkalis)
- Ion-exchange plates (DEAE: diethylaminoethyl tertiary amine) are used for anionic polyelectrolytes such as proteins, peptides, hormones, and enzymes—available with polyester backing only

Comparison of TLC and HPTLC Plates

Plate Type	TLC	HPTLC
Typical Plate Size (for comparison)	20 × 20cm	10 × 10cm
Sample Vol. (capillary application)	1 to 5µL	0.1 to 0.5µL
Diameter of Spots	3 to 6mm	1 to 2mm
Diameter of Separated Spots	6 to 15mm	2 to 5mm
Solvent migration	10 to 15cm	3 to 6cm
Detection Limits		
Absorption	~0.1µg	~20ng
Fluorescence	~0.1µg	~0.1µg

Selecto* Flexible-Backed TLC Plates

Select from four media to match your separation needs

05-719-8 Series

- Polymeric (cellulose, cellulose PEI, and alumina) and "G" (silica plates) binders are stable in aqueous solvents and virtually all mobile phases, and withstand many aggressive detection reagents
- Flexible plastic backing for high durability— can be cut to any size required and stapled into a lab notebook; backing also makes it easy to isolate one spot for subsequent isolation/detection
- **Silica-gel plates** separate weakly to strongly polar substances by adsorption chromatography
- **Cellulose plates** for partition chromatography
- **Cellulose PEI plates** separate weak anion exchangers such as amino acids and peptides (Store PEI plates at 4°C [39°F]; if stored at room temperature, plates may turn slightly yellow, affecting separation. Predevelop in distilled water to minimize yellow color.)
- **Alumina plates** separate alkaloids, antibiotics, and hormones

*Fisherbrand** Pure Cellulose Chromatography Paper

Pure cellulose papers with smooth surfaces are tested to assure uniformity and reproducibility, and offer optimum separation and sample resolution

05-714 Series

- **Thin paper** (05-714-1) is recommended for analytical separations
- **Thick paper** (05-714-4) is recommended for electrophoresis and general chromatography
- Both grades are carefully tested for spot formation, capillary action, water flowrate, and adsorption speed
- Supplied in 46 × 57cm (18 × 22") sheets

Thickness	Cat. No.	Pack of 100
0.19mm (thin)	**05-714-1**	104.98
0.35mm (thick)	**05-714-4**	205.86

SPECIFICATIONS

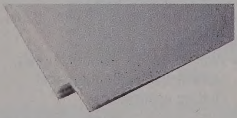
Cat. No.	05-714-1	05-714-4
Thickness	Thin, 0.19mm	Thick, 0.35mm
Flowrate (Water)[1]	96 seconds	262 seconds
Wet Strength[2]	33cm	35cm

[1] *Flowrate is time in seconds required to filter 100mL of distilled water at 20°C (68°F) under pressure supplied by a 10cm water column through a $10cm^2$ (1.6 sq. in.) section of filter paper.*

[2] *Wet strength is the height in cm of water column that will rupture a $10cm^2$ (1.6 sq. in.) section of filter paper.*

Whatman* Grade DE81 Ion Exchange Cellulose Chromatography Paper

Manufactured from pure cellulose and ion-exchange cellulose fibers to permit highly efficient, rapid separations of charged organic or inorganic substances



05-717-1A and -2A

- Thin (0.20mm) paper with diethylaminoethyl (DEAE) cellulose functional groups
- Weakly basic anion exchanger for separation of anions, nucleotides, and amino acids; also for enzyme assays and RNA fingerprinting
- Flowrate: 95mm/30 min. (in water)
- Ion-exchange capacity is 1.7µEq/cm^2

Size	Mfr. No.	Cat. No.	Pack of

Whatman* Grade P81 Ion Exchange Cellulose Chromatography Paper

- Thin (0.23mm) paper with cellulose phosphate functional groups
- High-capacity, strong cation exchanger for separation of biogenic amines, antibiotics, histamines, and certain metallic cations at very low concentrations
- Flowrate: 125mm/30 min. (in water)
- Ion exchange capacity is 18.0µEq/cm^2

Whatman* 1 Chr Chromatography Paper

Pure cellulose produced from cotton linters with no additives

- Thickness: 0.18mm
- Linear flow rate: 130mm/30 min.
- Smooth surface
- For general analytical separations

Size	Mfr. No.	Cat. No.	Pack of
46 × 58cm	3001-917	**05-714**	100/177.65
20 × 20cm	3001-861	**05-716-2S**	100/43.68
2 × 100m	3001-614	**05-716-2A**	1/23.76
1.5cm × 100m	3001-651	**05-716-2B**	1/42.38

Whatman* 3MM Chr Chromatography Paper

Relatively thick (0.34mm) grade 3MM chromatography paper manufactured entirely from high-quality cotton linters that have an alpha cellulose content of at least 98%

- Smooth surface
- No "paper making" additives—the final organic purity of these chromatography grades represents the highest level that can be achieved without oxidation and degradation of the cellulose fibers
- Medium flowrate: 130mm/30 min. (water)
- Widely used for electrophoresis, general chromatography, and blotting applications

- Thickness: 0.50mm
- Linear flow rate: 225mm/30 min.
- Soft surface
- Principal application in electrophoresis of large molecules

Size	Mfr. No.	Cat. No.	Pack of 25
46 x 47cm	3031-915	**05-714-6**	274.14

*Fisherbrand** Rectangular TLC Developing Tank

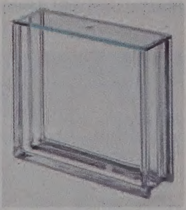
Accommodates a variety of plate sizes

- Can be used with 10 x 10cm, 5 x 10cm or 10 x 20cm plates
- Centering baffle to support plates during development
- Supplied with lid
- Beveled edges and tops and bottoms ground flat

Description	Cat. No.	Each
Rectangular Developing Tank	**K4161801020**	120.17

Kontes* Thin Layer Chromatography Tanks with Lids

Molded glass, rectangular tank with flat glass lid for development of any size TLC plate up to 20 × 20cm



K416180-0000

- Clear sides for visual inspection or photography
- Bottom ridge allows simultaneous development of two 20 × 20cm or four 5 × 20cm plates
- Dimensions (L × W × D): 4 × 11¾ × 10¾" (10 × 30 × 27cm)
- Tank lids are available in three styles: standard, nonslip, and latch
- Nonslip lids have PTFE retainers and a knob; latch lids have latches that hold the lid firmly to the tank and improve the saturated environment for developing TLC plates; also have PTFE retainers and knob

Description	Cat. No.	Each
Developing Tank with Standard Lid	**K416180-0000**	131.61
Developing Tank with Nonslip Lid	**K416185-0000**	180.52
Developing Tank with Latch Lid	**K416190-0000**	239.95
Standard Lid	**K416181-0000**	25.01
Nonslip Lid	**K416186-0000**	59.47
Latch Lid	**K416191-0000**	62.65

Kontes* Chromatography TLC Developing Tank with Ground Glass Lid

Supplied complete with ground glass joints

For Plate Size	\$ Joint	Cat. No.	Each
3 × 8cm	34/12	**K416181-0308**	66.89
3 × 10cm	34/12	**K416181-0310**	93.85
5 × 10cm	60/12	**K416181-0001**	100.38

Kontes* Chromatography Cylindrical TLC Developing Tank Lids

Lids for cylindrical glass tanks

Description	Material	Cat. No.	Pack of
Lid for cylindrical TLC developing tank, 5 × 20cm	Glass	**K416170-0520**	1/94.51
Lid for cylindrical TLC developing tank, 10 × 20cm	Glass	**K416170-1020**	1/129.19
Lid for cylindrical TLC developing tank, 1 × 3 in.	Polyethylene	**K416170-1118**	1/43.25
Lid for cylindrical TLC developing tank, 1 × 3 in.	Polyethylene	**K416170-1119**	12/377.56

Kontes* Replacement Parts for TLC Equilibration Apparatus

For use with Kontes* rectangular developing tank (K416190-4900)

Description	Cat. No.	Each
Latch for Kontes rectangular developing tank (K416190-4900)	**K416192-0000**	157.10
Hard-anodized aluminum rack, six 20 × 20cm plates	**K416175-0000**	148.84

Kontes* Reagent Sprayers with Screw Thread Ground Joint

Provide uniform spray mist of visualization reagents for TLC and paper chromatography; use with all standard TLC reagents and most corrosive liquids

K422530-0250

- Liquid touches only nonreactive borosilicate glass atomizing sprayer head and flask
- Sprayer head-to-flask connection consists of screw-thread ST ground joint, connecting cap, and loosening ring
- Operate sprayer at 3 to 5psi (0.021 to 0.035MPa)
- Adjust spray pattern by varying the position of thumb on vent hole
- Autoclavable (after cap, loosening ring, and O-ring are removed)

Capacity	Height x Diameter	\$ Joints	Cat. No.	Each
10mL	155 x 22mm (6⅛ x ⅞")	19/22	**K422530-0010**	140.57
25mL	147 x 40mm (5 13/16 x 1 9/16")	19/22	**K422530-0025**	140.57

500mL	273 x 105mm (10¾ x 4⅛")	24/40	**K422530-0500**	157.10

Kontes* Chromatography TLC Reagent Sprayer with Standard Ground Joint

Working Capacity	\$ Joint	Height × Diameter	Cat. No.	Each
5mL	14/20	130 × 17mm	**K422550-0000**	85.21
25mL	24/40	175 × 25mm	**K422540-0000**	146.08
250mL	24/40	225 × 85mm	**K422500-0250**	157.88

Castaloy* Clamps

Extra strong ... won't rust ... nonskidding

Castaloy clamps and holders are die cast from high-tensile-strength zinc alloy. Tough material is backed up with tough construction details in all clamps. Where strain is greatest (jaw housing and anvil), we've built in extra strength. Strong stainless-steel spring takes abuse of prolonged compression.

- Can't rust—copper plated, then heavily nickel plated for a bright, corrosion-resistant surface
- Nonslip gripping surfaces—most clamps come with heavy, nonskid vinyl and fiberglass insulating sleeves
- Jaws clamp large cylinders or small capillaries with equal firmness
- Pressure distributed over broad area reduces chance of breaking fragile pieces, yet holds well
- Machined threads on lock-in adjustment screws allow precise application of pressure
- Clamping action of jaws is smooth and strong
- Precision, spun rivet fasteners won't collapse or crimp like swaged tubular fasteners in other clamps

COMPLIANCE:

Castaloy clamps and holders meet ASTM* Specifications E 784 and B 86 requirements in all major areas of design and construction, including base metal, fittings, springs, sleeves, overall lengths, opening diameters, tolerances, and types of jaws.

WARNING

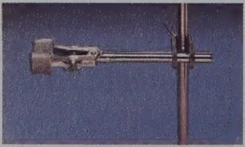
Castaloy* clamps and holders should not be subjected to direct flame or other intense heat sources. At continuous temperatures in excess of 150°C (302°F), some significant distortion can occur. Fiberglass sleeves are recommended for all applications above 100°C (212°F).

Castaloy* Two-Prong Extension Clamps

Flat, vinyl- or fiberglass-covered jaws

Hold beakers and flasks firmly at any angle, variable distance from support.

- One jaw is fixed, other opens against a stainless-steel compression spring
- Opening is gradual to maximum angle, without binding
- Noncorrosive, easy-to-clean clamps are nickel-plated zinc with seamless brass extension tube, brass compressing screw, and pivot pin
- Without clamp holder



05-769-4Q with fiberglass sleeves (included) and 14-666-18Q clamp holder (not supplied).

INCLUDES:

Vinyl and fiberglass sleeves

Maximum Grip Size	Overall Length	Extension Arm	Extension Arm O.D.	Cat. No.	Each
1½" (38mm)	8" (20cm)	4¼" (11cm)	7⁄16" (1.1cm)	**05-769-4Q**	24.89
2½" (64mm)	9" (23cm)	5⅛" (13cm)	7⁄16" (1.1cm)	**05-769-3Q**	27.19

Castaloy* Three-Prong Extension Clamps

Hold irregular shapes at any angle, surely and safely

- Two separate adjustment screws ensure even, precise pressure on glass and minimize chance of breakage
- Clamps are easily adjustable to vary holding angle, distance from stand
- Without clamp holder

05-769-7Q with vinyl sleeves (included) and 14-666-18Q holder (sold separately)

ORDERING INFORMATION:

Replacement sleeves are available online.

INCLUDES:

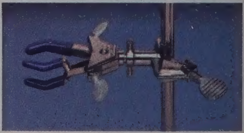
Fiberglass and vinyl sleeves

Maximum Grip Size	Overall Length	Extension Arm	Extension Arm O.D.	Cat. No.	Each
1" (25mm)	6½" (17cm)	4¼" (11cm)	5⁄16" (0.8cm)	**05-769-6Q**	31.74
2¼" (57mm)	8¾" (22cm)	5⅛" (13cm)	7⁄16" (1.1cm)	**05-769-7Q**	33.79
3½" (89mm)	10½" (27cm)	6" (15cm)	½" (1.3cm)	**05-769-8Q**	44.03

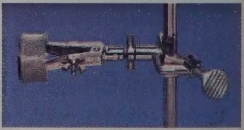
Castaloy* Adjustable-Angle Clamps

Grip rods up to ¾" diameter (19mm)

- Holding angle of jaw is adjustable, locked with a wingnut
- Wingnut also allows length adjustment
- Two-prong flat jaws for test tubes
- Three-prong for irregular shapes



05-7690Q with vinyl sleeves



05-769-5Q with fiberglass sleeves

ORDERING INFORMATION:

Replacement sleeves are available online.

INCLUDES:

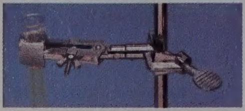
Vinyl and fiberglass sleeves

Max. Grip Size	Clamp Extension	Jaw Type	Cat. No.	Each
1½" (38mm)	½" (13mm)	Flat	**05-769-5Q**	24.90
2¼" (57mm)	⅝" (16mm)	Three-prong	**05-769Q**	35.41

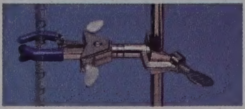
Castaloy* Fixed-Angle Clamps

One-piece clamp/holder with fixed jaw angle

- Use for snug vertical alignment of burets, thermometers, reflux condensers
- Flat jaws or three-prong grip
- Grip rods up to ¾" diameter (19mm)



05-769-1Q with fiberglass sleeves



05-769-2Q with vinyl sleeves

ORDERING INFORMATION:
Replacement sleeves are available online at **www.fishersci.com.**

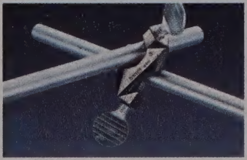
INCLUDES:
Vinyl and fiberglass sleeves

Maximum Grip Size	Jaw Type	Cat. No.	Each
1½" (38mm)	Flat	**05-769-1Q**	23.79
2¼" (57mm)	Three-prong	**05-769-2Q**	29.30

Castaloy* Clamp Regular Holder

Attaches clamp at right angles

- With 45° angle thumbscrews
- Grips rods up to ¾" diameter (19mm)



05-754Q

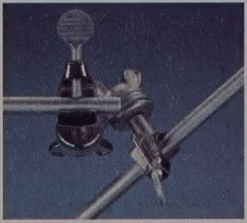
Cat. No.	Each
05-754Q	16.38

Castaloy* Clamp Contort Holder

Connects at any angle in any plane

Consists of two holders connected by double plate joint which sets holders 90° from each other.

- Each holder can be rotated 360°
- With 45° angle thumbscrews
- Grips rods up to ¾" diameter (19mm)



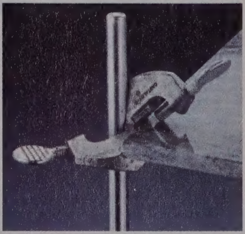
05-764Q

Cat. No.	Each
05-764Q	43.90

Castaloy* Clamp Jumbo Holder

Safest for heavy loads

- Grips in variety of positions
- Grips rods up to ⅞" diameter (22mm)
- Holds flat shelf or panel to ¾" thick (19mm)
- Made of diecast aluminum
- With 45° angle thumbscrews



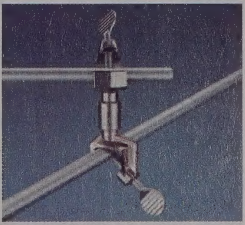
05-757Q

Cat. No.	Each
05-757Q	25.04

Castaloy* Clamp Swivel Holder

Tilt clamp at any angle in parallel planes

- Holder will not fall apart when setscrew is loosened to permit one end to swivel
- With 45° angle thumbscrews
- Grips rods up to ¾" diameter (19mm)



05-762Q

Cat. No.	Each
05-762Q	21.53

Castaloy* Double-Buret Clamp

Holds two burets from micro to 100mL size

Simply compress scissor-like mechanism, insert buret, and release.

- Numbers and graduations on burets are easy to read
- For height adjustments, just recompress mechanism, slide buret up or down, release
- Clamp unit attaches to standard support rod with convenient hook clamp
- Wingnut for tightening on front for easy access

05-779Q

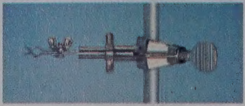
Max. Buret O.D.	Cat. No.	Each
1¹⁄₁₆" (18mm)	**05-779Q**	46.08

WARNING
Castaloy* clamps and holders should not be subjected to direct flame or other intense heat sources. At continuous temperatures in excess of 150°C (302°F), some significant distortion can occur. Fiberglass sleeves are recommended for all applications above 100°C (212°F).

Castaloy* Thermometer Clamps

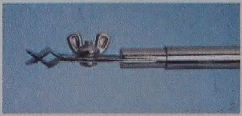
Hold ¼ to ½" diameter (6 to 13mm) glass tubes and thermometers

- Adjust to any angle
- Won't rust
- Jaws are nickel-plated phosphor bronze



05-809Q

Standard clamp. Holds thermometers 3⅞" (10cm) from support rod. Integral clamp holder. Large thumbscrew holds clamp securely to support rod.



05-809-10Q

Extension clamp. Holds thermometers up to 7" (18cm) from support rod. Overall length, 7¾" (20cm). Extension arm is 7⁄16" diameter (11mm). Use with 05-754Q clamp holder.

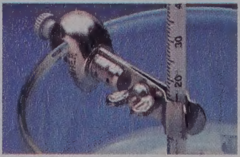
Type	Cat. No.	Each
Standard	05-809Q	29.70
Extension	05-809-10Q	25.00

Castaloy* Water Bath Clamps

C-shaped end with thumbscrew attaches securely to wall of bath ⅛ to 5⁄16" thick (3 to 8mm)

15-445-70Q

Three-prong clamp. Jaws are controlled independently by two thumbscrews, making the clamp adjustable for irregular shapes and for aligning large and small diameter objects. Accepts objects to 1" diameter (2.5cm). Won't rust or corrode. With vinyl sleeves. Overall length, 3⅞" (10cm).



15-445-80Q

Small clamp. Suspends thermometers 3⁄16 to ⅜" diameter (4.8 to 9.5mm). Clamp jaws tighten with wingnut; hold firmly. Overall length, 3¼" (8cm).

Type	Cat. No.	Each
Three-prong	15-445-70Q	32.77
Small	15-445-80Q	23.55

Castaloy* Regular or Heavy-Duty Pinchcocks

Complete closure

- Won't cut tubing, rust, or corrode
- Regular pinchcock opens when plunger is compressed to accommodate ¼" O.D. (6mm) heavy-wall tubing
- Heavy-duty model works well with stiff tubing used in gas and water connections

05-849AQ

Type	Cat. No.	Each
Regular	05-849AQ	19.04
Heavy Duty	05-849BQ	19.09

Castaloy* VariFlow* Pinchcock

Flowrates duplicable time after time

Same as 05-849AQ (below, left), but with thumbscrew and locking nut for selecting degree of closure.

- Use effectively on up to ⅜" O.D. (9.5mm) flexible tubing
- Won't cut tubing, rust, or corrode

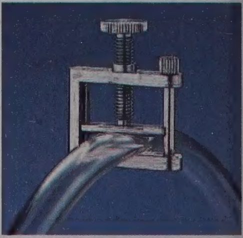
05-849-5Q

Cat. No.	Each
05-849-5Q	23.93

Castaloy* Hosecock Clamp

Fine-machined adjustment screw for very accurate regulation of flow

- Threaded keeper screw on side of clamp can be raised to allow easy positioning of tubing, then screwed back into base of clamp
- For tubing up to ¾" O.D. (19mm)
- Concave lower bearing surface, convex upper, reduces amount of pressure required for complete closure



05-847Q

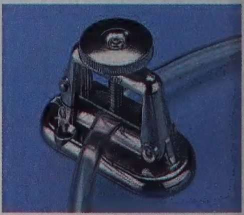
Type	Cat. No.	Each
Regular	05-847Q	16.84
With Mounting Bracket	05-848Q	32.73

Castaloy* Jumbo Hosecock

Regulates flow from full-on to completely off

- Easily compresses heaviest tubing up to ¾" O.D. (19mm)
- Hinged on one side to allow positioning of tubing without removal from apparatus
- With two countersunk holes for attaching to shelf, wall, or table

ORDERING INFORMATION:
Dimensions: 3½L × 1½W × 2¾"H (8.9 × 3.8 × 7cm)

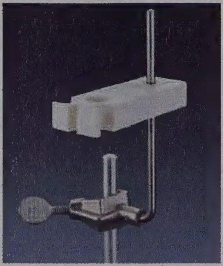


05-846Q

Cat. No.	Each
05-846Q	44.19

*Trademark. See Trademark Reference.

Castaloy* Chain and Electrode Support Clamps



13-640-282Q shown with 13-636-8Q electrode holder (not included).

Chain Clamp

- Holds 3 to 6½" (76 to 165mm) bottles and large objects
- Fast, sure way to secure large equipment to rods and lattices
- Loop steel chain around object; attach to hook on movable slide; tighten slide with large, nonslip knob
- Holds equipment firmly in place at any angle, variable distance from support
- Arm is 6" long (15cm) and ½" diameter (13mm)
- Use with 05-754Q clamps holder

Electrode Support Clamp

- Permits suspension of electrodes over beaker for potentiometric titrations
- Includes ¼" diameter (6.4mm) support rod mounted at right angle
- Secures any electrode holder at desired level
- Grips support rods up to 11⁄16" diameter (18mm)
- Resists corrosion

05-745Q

Type	Cat. No.	Each
Chain Clamp	**05-745Q**	44.03
Support Clamp and Rod	**13-640-282Q**	47.72

CLAMPS — GLASS JOINT

Plastic Joint Clips

Made of plastic for use on ₸ glass joints

- Color coded for easy size identification
- Cost less than metal clips
- Do not corrode; will not scratch glass

05-880 Series

Joint Size	Color	Cat. No.	Pack of 10
For Standard Taper Joints (of any length)

29	Dark red	**05-882E**	75.18
35	Light orange	**05-882G**	77.80

Stainless-Steel Pinch Clamps for Joints

Easy, secure way to marry ball-and-socket joints

Spring-loaded pinch clamp with forked jaws on both sides of the joint ensures tight fit.

- 05-885C and 05-885E through K have screw-locking device, work well on both O-ring and ball-and-socket joints
- Others are intended for ball-and-socket joints only

05-885B

CLAMPS — TUBE

Lunge Clamp

Supports two tubes

05-795

- Distance between tubes is adjustable
- Jaw opening is ⅜ to 1⅜"
- Each clamp is individually adjustable through angles up to 180°
- Adjustable, spring-loaded, Plastisol*-coated jaws, hold ¼ to 1¾" diameter (6 to 44mm) tubing
- Attaches to rods up to ¾"
- Black enamel finish resists corrosion
- Length: 6¾"

Cat. No.	Each
05-795	41.60

CLAMPS—TUBING

Fisher*brand** Polypropylene Clamp with Flow Control

Regulates flow through tubing from fully open to closed

05-869

- Fits ⅛ to ½" O.D. (3.2 to 13mm) tubing
- Molded white polypropylene construction
- Autoclavable
- With 15-position control
- Will not distort, rust, or corrode

Cat. No.	Pack of 12	Case of 12 Pk.
05-869	8.94	89.39

*Fisherbrand** Tight-Seal* Clamps

One-piece, reusable nylon clamps for hoses and tubing

05-815-1 Series

- Chemical and corrosion resistant, with wide temperature tolerance
- Squeeze shut for leakproof seal; press on side to release
- Ideal for pressure, vacuum, and liquid applications
- Can be gas or chemically sterilized for biomedical or food applications
- Twelve sizes accommodate tubing with an O.D. of 0.246 to 1.425" (6.25 to 36.19mm)

Clamp I.D. Range	Cat. No.	Pack of 100
6.25–7.97mm (0.246–0.290")	**05-815-1A**	33.44
9.14–10.31mm (0.360–0.406")	**05-815-1B**	33.44

18.54–21.08mm (0.730–0.830")	**05-815-1H**	41.65
22.10–24.76mm (0.870–0.975")	**05-815-1J**	41.65
24.21–27.76mm (0.953–1.093")	**05-815-1K**	49.92
26.19–30.15mm (1.031–1.187")	**05-815-1L**	49.92
31.75–36.19mm (1.250–1.425")	**05-815-1M**	56.64

*Fisherbrand** Hose/Tubing Clamp Assortment

Kit ensures that proper size is always handy. Includes five each of the 12 sizes of Fisherbrand* Tight-Seal* Clamps, plus five clamps with a range of 35.71 to 40.89mm (1.406 to 1.610")—65 in all.

Cat. No.	Pack of 65
05-815	55.47

Scienceware* Acetal Screw Clamp

Complete ON/OFF and fine control with enough accuracy to replace stopcocks in many applications

- Hinged side permits installation of clamp without disconnecting tubing from apparatus or interrupting operation
- Molded of Delrin* plastic
- Easy to clean, autoclavable and resistant to weak acids and alkalis and organic solvents
- Accepts any type of flexible tubing up to ½" O.D. (13mm)

05-830

Mfr. No.	Cat. No.	Pack of 3
F18212 0000	**05-830**	15.75

Scienceware* Acetal Tubing Clamp

Molded of strong, durable acetal plastic

05-832

- Serrated jaws 1 1/16" long (27mm) make a positive closure on thin-walled tubings such as catheter tubes (1/32" wall or thinner [0.82mm])
- Can be operated with one hand, has a positive lock, and springs open when released
- Open side permits installation at any point along the tube without threading through
- Overall length, 2 5/16" (59mm)

Mfr. No.	Cat. No.	Pack of 12	Case of 6 Pk.
F18218 0000	**05-832**	16.97	87.00

Scienceware* Steel Swing Jaw* Tubing Clamps

Strong, simple, and safe to use

- Made of zinc-plated steel
- Knurled adjusting nut bears on a swinging jaw which permits full opening without removal
- Removable from tubing without disconnecting apparatus
- Smooth bearing surfaces will not damage tubing; tubing cannot slip out of clamp
- Strong enough to use with heavy wall vacuum lines

05-833

For Tubing Max. O.D.	Mfr. No.	Cat. No.	Pack of	Case of

5⁄16 to ⅞" (7.9 to 22.2mm)	**14-198-5B**	25.78

SUPPORTS — FUNNEL

*Fisherbrand** Six-Funnel Support

Slotted wooden support allows easy mounting and removing

- Adjustable for various funnel lengths from 5½ to 10" (14 to 25cm)
- With no posts projecting above support to interfere

ORDERING INFORMATION:
Dimensions: 36L × 4¾W × 5½ to 10"H (91 × 12 × 14 to 25cm)

14-735

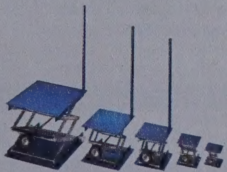
Cat. No.	Each
14-735	180.13

SUPPORTS — LAB JACKS

*Fisherbrand** Lab-Jack*

Ideal for supporting hotplates, baths, glassware and other items requiring stable regulation

- Nonsparking anodized aluminum plates for maximum safety in the lab
- Models 14-673-51, -52, and -53 have threaded holes to accommodate an 18⅞" long (48cm) aluminum rod for mounting ring stands and other lab apparatus



14-673-53, -52, -51, -50, and -15

ORDERING INFORMATION:
Rod available separately; contact your Fisher Scientific Customer Service Representative.

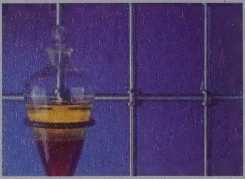
SUPPORTS–LATTICE

*Fisherbrand** Flexaframe* Support Sets

Durable aluminum lattice is easy to disassemble and store



Attach all kinds of apparatus with Castaloy* Clamps and Holders.

- Frames made of ½" diameter (13mm) aluminum rods held together with corrosion-resistant Castaloy Hook Connectors (14-666-18Q)
- Choose from three standard sets, or use accessory rods to custom build a setup that fits your individual needs
- Made from nickel-plated zinc castings

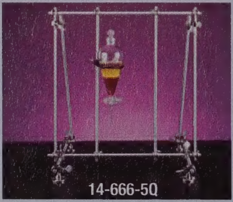
Set 1—Vertical Mounting

Great for glassware setups, etc., in small laboratories

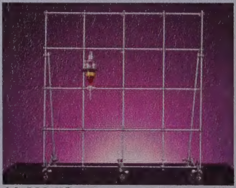


14-666-5Q

With wide, 18" (46cm) base extending out from lattice for maximum stability. Base can be permanently secured to benchtop with screws. Frame is 24L × 24"H (61 × 61cm). Contents listed in "Contents of Flexaframe* Sets" chart above.

Cat. No.	Each
14-666-5Q	328.64

Set 2—Large Capacity



14-666-7Q

48 × 48" (122 × 122cm) frame is excellent for complex glassware setups. Base is 18" wide (46cm) for stability. Contents listed in "Contents of Flexaframe* Sets" chart above.

Cat. No.	Each
14-666-7Q	632.41

Set 3—Ultimate Versatility Supports

14-666-8Q

Measures 48L × 72"H (122 × 183cm). Can be used vertically or horizontally. Includes six 12" (31cm) rods and feet for securing frame to wall. Apparatus mountable on either side of frame. Contents listed in "Contents of Flexaframe* Sets" chart left.

Cat. No.	Each
14-666-8Q	878.00

ACCESSORIES

Rods for Custom Frames

14-666-10GQ

- Hard aluminum rods exactly ½" diameter (13mm) for smooth fit with Fisherbrand* Flexaframe* lattice
- Corrosion resistant

Length	Cat. No.	Each

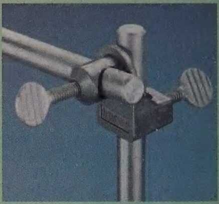
96" (244cm)	**14-666-10HQ**	44.03

Swivel Connector

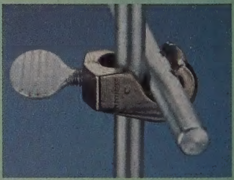


14-666-26Q

- Rotates 360°
- Mounts anywhere on lattice without having to disassemble rods
- Secures two rods at any relative angle
- Rods won't twist or slip
- Connector made of strong, diecast Castaloy* metal

Cat. No.	Each
14-666-26Q	20.48

Castaloy* Hook Connector



14-666-18Q

- Locks two Fisherbrand* Flexaframe* rods at a 90° angle
- Can't slip
- Install without disassembling frame
- Supplied with Flexaframe sets

Cat. No.	Each
14-666-18Q	19.46

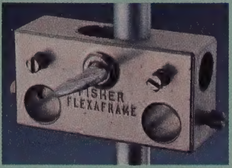
Prices subject to change.

ACCESSORIES

Multiclutch Connector

Permits lattice adjustment after construction

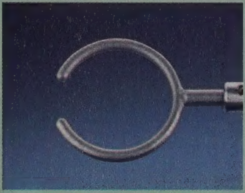


14-666-22Q

- Holds Fisherbrand* Flexaframe* rods at 90° angle in lattice
- Allows horizontal and vertical adjustment after lattice is built
- Two adjacent rods fit into oval hole in connector, prevent turning when tightened
- ½" diameter (13mm) holes in side and front of connector allow many different rod configurations
- Castaloy* metal

Cat. No.	Each
14-666-22Q	30.44

Open Rings

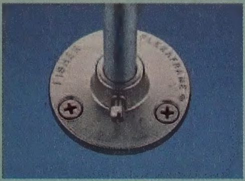


14-666-23BQ

- Hold leveling bulbs, funnels
- Mount in connectors 14-666-20Q and -22Q for use on lattices
- Not for use with burners or containers to be heated
- Cast-aluminum, ½" O.D. (13mm) stem
- Connector is not included

Ring O.D.	Cat. No.	Each
3" (76mm)	14-666-23AQ	22.09
4" (100mm)	14-666-23BQ	29.25
5" (127mm)	14-666-23CQ	39.65

Foot Plate

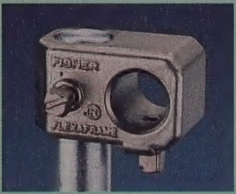


14-666-25Q

- Mounts lattice permanently
- Holds Fisherbrand* Flexaframe* poles
- Secures them to floors, walls and tables with screws
- Castaloy* metal

Cat. No.	Each
14-666-25Q	18.43

Connector for Rod Ends



14-666-20Q

- Holds rods firmly at 90° angle
- ½" diameter (13mm) holes carefully sized to eliminate play
- Castaloy* metal

Cat. No.	Each
14-666-20Q	11.26

SUPPORTS–RINGS

Fisherbrand* Cast-Iron Rings

Cast-iron construction prevents breakage under normal use

14-050CQ

- Sturdy 5⁄16" (7.9mm) setscrew in integral clamp locks ring tightly to support stands, lattices, etc.
- Ring center is standard 4½" (11cm) from support rod center
- 2" (51mm) size ring has lugs for holding crucibles

O.D.	I.D.	Cat. No.	Each
2" (51mm)	1 7⁄16" (36mm)	14-050AQ	16.38
3" (76mm)	2⅜" (60mm)	14-050BQ	16.38
4" (100mm)	3 5⁄16" (84mm)	14-050CQ	17.41
5" (130mm)	4¼" (110mm)	14-050DQ	20.48
6" (150mm)	5¼" (130mm)	14-050EQ	29.70

Fisherbrand* Split Cast-Brass Rings

Hold leveling bulbs safely with these cast-brass rings

14-052AQ

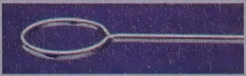
- Split ring allows easy placement and removal of bulb
- Vinyl-coated sheath on ring protects bulb from breakage
- Integral clamp holds ring tightly to support rods

O.D.	Cat. No.	Each
2" (51mm)	14-052AQ	39.92
3" (76mm)	14-052BQ	42.42

Fisherbrand* Extension Rings

Shank of extension ring clamps to support rods with clamp holder

Manufactured from steel wire; zinc-plated for corrosion resistance.



14-055C

ORDERING INFORMATION:

Supports can be mounted with 05-754Q or 05-764Q Castaloy* Clamp Holders.

Size	I.D.	Overall Length	Cat. No.	Each	Pack of
2"	2 1⁄16" (52mm)	8½" (220mm)	14-055A	18.55	5/78.85

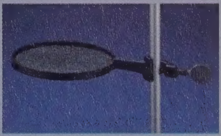
Fisherbrand* Cast-Iron Plate

Use support plate as a hotplate



14-750Q

- Containers held on 4¾" diameter (12cm) cast-iron plate can be heated with a burner
- 3⁄16" (4.8mm) raised rim keeps containers from slipping off accidentally
- Plate can be locked firmly to support rods or lattices with its integral clamp

Diameter	Cat. No.	Each
4¾" (12cm)	14-750Q	40.07

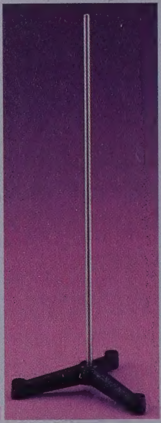
SUPPORT–STANDS

*Fisher*brand* Support Stands

Tough Rectangular Epoxyn* Stands

- Base made of Epoxyn solid epoxy resin for maximum resistance to chemicals and mechanical abuse
- With nickel-plated steel support rod

14-670 Series



14-675CQ

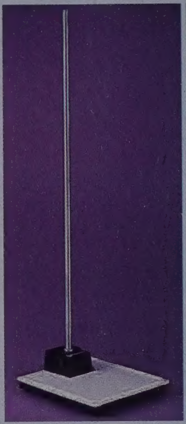
Low-Cost Cast-Iron Tripod Base Supports

- Base is heavy, rugged cast iron for stability
- Finished with chemical-resistant, baked, black enamel
- Support rods and base precisely threaded to eliminate instability

Rod Length	Rod Diameter	Cat. No.	Each
18" (46cm)	5⁄16" (7.9mm)	**14-675AQ**	54.83
20" (51cm)	3⁄8" (9.5mm)	**14-675BQ**	61.58
24" (61cm)	7⁄16" (11mm)	**14-675CQ**	63.89
36" (91cm)	½" (13mm)	**14-675DQ**	70.85

Heavy-Duty Rectangular Cast-Iron Support

- Cast-iron base for maximum stability, molded polyethylene tray for spillage protection
- Concentric rings on tray provide convenient guide for positioning containers
- Height to top of rod is 35" (89cm)
- With steel rod and rubber feet to prevent sliding



14-679Q

11-474-207

Base L × W	Cat. No.	Each
9¾ × 9 9⁄16" (25 × 23cm)	**14-679Q**	223.69

Cast-Iron L-Shaped Base Support

- Jackson support
- With three mounting holes for supporting groups of equipment concentrated in a small space
- Heavy cast-iron base has two 6¾" (17cm) legs that impart stability
- Three mounting holes tapped for ½" diameter (13mm) support rods
- Bases can be nested for easy storage

INCLUDES:

One 24L × ½" dia. (610 × 13mm) nickel-plated steel rod.

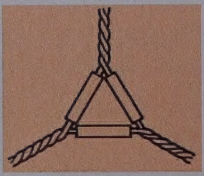
Cat. No.	Each
11-474-207	66.40

SUPPORTS–TRIANGLES

*Fisher*brand* Iron-Wire Triangles

For heating crucibles

Iron wire with ceramic coverings.



15-280B

CLEANERS

DETERGENTS

*Fisherbrand** Sparkleen* 1 Detergent

Removes proteins, fats, oils, media, wax pencil marks, dried blood and other organic-inorganic deposits from glassware

Especially valuable in exacting titrations and analyses. Excellent for presterilization cleaning and as soak solution to loosen frozen glass joints.

- Fast-dissolving powder
- For manual washing
- Free-rinsing
- Contains phosphates
- Softens water, removes stains

Fisherbrand
Sparkleen 1
For Manual Washing

04-320-4

Size	Cat. No.	Each	Case of 12
3¼ lb. Box (1.5kg)	**04-320-4**	29.45	301.75
100 lb. Drum (45kg)	**04-320-5**	469.95	----

*Fisherbrand** Sparkleen* 2 Detergent

Removes dried blood and stubborn organic deposits quickly and safely

- Concentrated, chlorinated powder
- For use in automated glassware washers
- High-alkaline formula
- Free-rinsing, even in hard water
- Contains phosphates

Fisherbrand
Sparkleen 2
For Machine Washing

04-320-6

Size	Cat. No.	Each	Case of 12
3¼ lb. Box (1.5kg)	**04-320-6**	23.75	243.25

*Fisherbrand** Versa-Clean* Concentrate

Penetrates, breaks up, and effectively removes oils, soils, dirt, and grime from almost any washable surface

Versatile, biodegradable, and ecologically safe because emulsifier system incorporates blends of synthetic detergents and wetting agents. Recommended for critical cleaning; trace analysis available.

Fisherbrand
Versa-Clean

04-343

- Controlled foaming liquid
- Can be used in automatic labware and glassware washers, ultrasonic cleaners, high-pressure sprayers, automatic scrubbers, and soak tank
- Safe for use on plastics, glass, glassware, labware, rubber, vinyl, and most metals
- Free-rinsing and soluble in hot or cold water
- Biodegradable, nontoxic, noncaustic, nonflammable, and ozone-friendly
- Outstanding deflocculating and dispersing properties

CERTIFICATIONS:
USDA approved for use in federally inspected meat and poultry plants. Passes inhibitory residue test.

Size	Cat. No.	Each	Case of
33⅞ oz. (1L)	**04-342**	18.20	12/186.60
1¹⁄₁₆ gal. (4L)	**04-343**	50.15	4/171.45

Decon* Dri-Clean* Detergent Powder

For manual, soak, or ultrasonic cleaning of all labware

- Powdered formula
- Effectively removes protein, dried blood, oil, grease, and most other contaminants from glassware, plasticware, ceramic, and metal
- Completely free-rinsing, residue-free, and biodegradable

Cat. No.	Pack of 10
04-345-20	167.00

DECONTAMINANTS

Decon* NoCount* Radioactive Decontaminants

Available for use on hard surfaces or for use on hands and skin

04-355-68

For Hard Surfaces

- Ideal for removing radioactive contaminants from sinks, benchtops, acrylic shields, glassware, plasticware, electrophoresis gel boxes, sequencing units, and other hard surfaces
- Foaming action helps lift and trap particles so they can be easily wiped or rinsed away
- **Warning:** Do not spray 04-355-67 on skin; avoid contact with eyes

For Hands and Skin

- Ideal for situations involving accidental contamination of skin
- Foam formula lifts and traps particles so they can be easily rinsed off hands and skin with water

Description	Size	Cat. No.	Each	Case of 12
For hard surfaces	18 oz. (510mL)	**04-355-67**	16.00	164.06
For hands and skin	18 oz. (510mL)	**04-355-68**	18.03	184.92

ELIMINase* Decontaminant

Eliminates RNase, DNase, and DNA from laboratory surfaces

ELIMINase
ELIMINase
04-355-32, 04-355-31

- Safe on glass, plastics, stainless steel, pipetters, gel boxes, and benchtops
- Also acts as a radioactive decontaminant
- Leaves no residue that could degrade RNA and DNA samples or interfere with subsequent enzymatic reaction
- Works instantly
- Nontoxic

Size	Cat. No.	Each	Case of 12
8½ oz. (250mL)	**04-355-31**	27.15	271.10
32 oz. (950mL)	**04-355-32**	42.02	427.94

Molecular BioProducts DNA Away* Surface Decontaminant

Eliminates unwanted DNA and DNase from glassware and plasticware without affecting subsequent DNA samples

21-236-28

Degrades DNA more quickly and effectively than autoclaving.

- Suitable for gel boxes, pipetters, benchtops, thermal cyclers, or other apparatus
- Use before performing PCR or working with DNA for a DNA-free work area
- Simply apply the ready-to-use formula to the surface to be decontaminated; wipe dry or rinse clean

Description	Mfr. No.	Cat. No.	Each	Case of

Box of 35, individually wrapped	7009	**14-754-43**	----	16/552.00

Molecular BioProducts RNase Away* Surface Decontaminant

Eliminates RNase and DNA from laboratory surfaces

21-236-21

Reduces dependency on carcinogenic DEPC treatments and saves time needed to bake glassware.

- Perfect for decontaminating apparatus, benchtops, glassware, and plasticware
- Use on pipetters, gel boxes, or RNA and DNA prep areas
- Leaves no residue to interfere with gel polymerization or staining
- Chemically stable and nonabrasive
- Contains no strong acids
- Apply to the surface to be decontaminated and rinse

- Designed for cleaning and disinfecting surfaces in labs, production areas, and equipment
- Effective against a wide range of pathogenic organisms, including TB, HIV-1, bacteria, viruses, and fungi in the presence of 1000ppm hard water and 10% organic soil
- Dilution ratio: 1 oz. (30mL) per gallon (3.8L) of water

COMPLIANCE:

- EPA registered
- Meets OSHA's Bloodborne Pathogen Standard

Size	Cat. No.	Each	Case of 4
1 gal. (3.8L)	**04-355-64**	42.12	143.99

Decon* CiDecon* Q Aerosol Foam Disinfectant

04-355-93

Ready-to-use foaming disinfectant for hard, nonporous surfaces

- Broad spectrum quaternary ammonium disinfectant; effective against HIV-1
- Cleans, disinfects, and deodorizes in one step
- Clings to vertical surfaces, allowing longer contact time

Size	Mfr. No.	Cat. No.	Each	Case of 12
20 oz. (591mL)	8618	**04-355-93**	11.24	112.37

Decon* CiDecon* ST Detergent Disinfectant

04-355-59, 04-355-120

For cleanroom use

- Same as 04-355-64, except double-bagged, gamma-irradiated, and sterility-tested
- The 2 oz. single-serve size is premeasured to make 2 gal. of working solution

Size	Cat. No.	Each	Case of
2 oz. (59mL)	**04-355-120**	----	24/133.22
1 gal. (3.8L)	**04-355-59**	59.33	4/209.99

Decon* HypoSol* ST Sterile Concentrated Bleach Solution

Sterile sodium hypochlorite solution 5% for dilution

- Solution is filtered to 0.2µm and individually double-bagged in an ISO Class 5 (Class 100) environment
- Each lot undergoes testing for sterility and percentage available chlorine, calcium, and phosphate
- Each case is shipped with a lot-specific document that details QC and sterility testing

Size	Cat. No.	Case of 4
1 gal. (3.8L)	**04-356-100**	151.13

Decon* Iradecon* Bleach-Based Disinfectant

One-year expiration

04-355-150

Premixed and stable Iradecon disinfectant is a safer, more convenient alternative than self-made bleach solutions that are inherently unstable and often lose their efficacy in 24 to 48 hours.

- Prediluted, stabilized bleach (sodium hypochlorite) solution
- Consists of 0.525% sodium hypochlorite (10% bleach), which is the strength recommended by CDC and OSHA for inactivating HIV, HBV, and other pathogens
- Ideal for disinfecting hard surfaces in labs and production areas

Size	Cat. No.	Each	Case of 12
32 oz. (946mL) Trigger spray	**04-355-150**	24.18	248.03

Decon* LopHene* Detergent Disinfectant

Concentrated low pH phenolic disinfectant

- For cleaning and disinfecting surfaces in labs and for production areas and equipment
- Ideal for rotational disinfection program when used with CiDecon* Detergent Disinfectant (04-355-64)
- Effective against a wide range of pathogens and organisms, including TB, HIV-1, bacteria, viruses, and fungi, in the presence of 400ppm hard water and 5% organic soil
- Diluted to ½ oz. (15mL) per gallon (3.8L) of water

COMPLIANCE:
EPA registered. Conforms to OSHA's Bloodborne Pathogen Standard.

04-355-70

Size	Cat. No.	Each	Case of 4
1 gal. (3.8L)	**04-355-70**	60.73	214.96

Decon* LopHene* ST Sterile Detergent Disinfectant

For cleanroom use

- Same features as 04-355-70
- Double-bagged, gamma-irradiated, and sterility-tested
- 1 oz. single-serve size is premeasured to make 2 gal. of working solution

04-355-101, 04-355-127

Size	Cat. No.	Each	Case of
1 oz. (30mL)	**04-355-127**	----	24/133.22
1 gal. (3.8L)	**04-355-101**	91.14	4/322.62

Decon* SporGon* Sporicidal Disinfectant

Ready-to-use peracetic acid-based disinfecting solution effective against spores

- Tuberculocidal, bactericidal, virucidal, and fungicidal
- Achieves high-level disinfection in 15 minutes and complete sterilization in three hours
- Completely biodegradable and decomposes into oxygen, water, and acetic acid

COMPLIANCE:
FDA 510K clearance. Conforms to OSHA's Bloodborne Pathogen Standard.

04-355-72

Size	Cat. No.	Each	Case of 4
1 gal. (3.8L)	**04-355-72**	42.50	145.29

Looking for Decon* Disinfectant Wipes?
CiDecon* Disinfectant Wipes, CiDecon Plus Wipes, CiDehol ST Sterile Wipes, and CiDehol* 70 Wipes can be found in the Wipers section.

Decon* CiDehol* 60 Isopropyl Alcohol

Ready-to-use 60% isopropyl alcohol (IPA) solution

- Filtered to 0.22µm
- Evaporates completely; no rinsing required
- Ideal for filter-integrity testing and for disinfecting labs, production areas, and equipment

04-355-41

Steris* Coverage Plus NPD* Cleaner Disinfectant

One-step concentrate cleans, disinfects, and deodorizes hard, nonporous surfaces

- Consists of four quaternary ammonium compounds formulated with a compatible detergent system
- Effective in hard water up to 400ppm hardness as $CaCO_3$ and in the presence of 5% blood serum
- Provides broad spectrum germicidal activity; effective against influenza, HIV-1 virus, and Hepatitis B and C
- Contains no dyes or perfumes that could interfere with critical research studies or manufacturing processes
- Phosphate-free
- Used at a 1:256 dilution

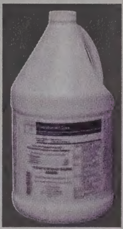
14-415-18

Size	Cat. No.	Each	Case of 4
1 gal. (3.8L)	**14-415-18**	57.35	202.46

Steris* Vesphene* IIse Cleaner and Disinfectant

One-step alkaline disinfectant cleaner and deodorizer for use on hard, nonporous surfaces

- Contains phenols blended with synthetic detergents and builders
- Kills a broad spectrum of common bacteria at a use dilution rate of 1:128 (1 oz. per gal. [30mL per 3.8L]) without harming surfaces
- Also effective against fungi and viruses, including the HIV-1 virus, Herpes Simplex Type 2, and Influenza A_2
- Effective with soft water or hard water up to 400ppm hardness (as $CaCO_3$) and in the presence of 5% serum
- Advanced detergent system provides superior cleaning and disinfecting
- Suitable for use in institutions such as pharmaceutical plants, veterinary clinics, and industrial plants
- Ideal for use in a rotation program with LpH* se One-Step Germicidal Disinfectant (14-415-10)



14-415-11

ACCESSORIES

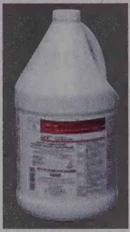
Decon* Gooseneck Trigger Sprayers

Spray solutions directly from one gallon containers

- Available sterile and regular
- Attached to flexible tubing that extends 22" from container
- Sterile trigger sprayer is double-bagged, gamma-irradiated, and comes with Certificate of Sterility
- For use with gallon sizes of Decon cleaners

Description	Cat. No.	Each	Case of 24
Sterile	**04-354-20**	----	186.75
Nonsterile	**04-356-12**	5.46	104.74

Steris* LpH* se One-Step Germicidal Detergent



14-415-10

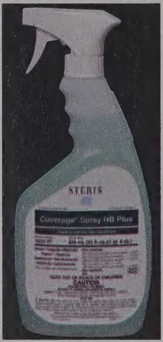
One-step nonalkaline disinfectant cleaner and deodorizer for use on hard, nonporous surfaces

- Phenolic-based germicidal detergent
- Kills a broad spectrum of common bacteria at a use dilution rate of 1:256 without harming surfaces
- Also tuberculocidal and HIV-effective
- Effective with soft water or hard water up to 400ppm hardness (as $CaCO_3$) and in the presence of 5% serum
- Ideal for use in a rotation program with Vesphene* IIse Disinfectant (14-415-11)

COMPLIANCE:
Meets OSHA guidelines for cleaning and disinfecting blood spills.

Size	Cat. No.	Each	Case of 4
1 gal. (3.8L)	**14-415-10**	64.13	227.00

Steris* Coverage* Spray HB Plus Ready-to-Use Disinfectant Cleaner



14-415-19

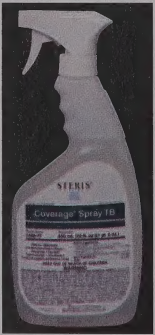
Quaternary-based, one-step disinfectant for hard surfaces

- Provides a broad range of activity against gram-positive and gram-negative bacteria, viruses, and fungi
- Effective in 5% organic soil

COMPLIANCE:
Complies with OSHA Bloodborne Pathogen Standard (29 CFR Part 1910.1030).

Description	Cat. No.	Each	Case of 12
22 oz. (651mL) Trigger spray bottle	**14-415-19**	12.41	127.25

Steris* Coverage* Spray TB Ready-to-Use Disinfectant



14-415-20

Quaternary-based disinfectant cleans, deodorizes, and disinfects

- Effective against *Mycobacterium tuberculosis* (BCG) and other bacteria, the HIV-1 virus, and pathogenic fungi in the presence of 5% organic soil (5% blood serum)
- Deodorizes areas that are difficult to keep fresh smelling, such as garbage storage areas and restrooms
- Recommended for use on metal, stainless steel, plastic, porcelain, glazed ceramic tile, and other nonporous environmental surfaces
- Ideal for use in laboratories, hospitals, doctors' offices, nursing homes, schools, and veterinary clinics

Size	Cat. No.	Each	Case of 12
22 oz. (651mL)	**14-415-20**	12.97	133.05

Steris* Coverage* Spray TB Plus Ready-to-Use Disinfectant Cleaner

Hard surface quaternary-based disinfectant kills a broad range of bacteria, viruses, and fungi within three minutes

14-415-12, 14-415-13

- Tuberculocidal and HIV-1 effective
- Leaves no hazardous residue
- Contains no dangerous phenols or chlorine
- Compatible for use on inanimate surfaces including plastics, stainless steel, chrome, vinyl, acrylic, glass, Plexiglas* resin, and baked-on painted surfaces
- Ideal for use in laboratories, hospitals, surgical centers, medical and dental offices, and other patient-care facilities
- Uses a sprayer head on the 24 oz. (710mL) bottle that allows application without producing aerosolized airborne particles that may be aspirated

COMPLIANCE:
Conforms to OSHA Guidelines (21CFR Part 1910, 1030).

Size/Description	Cat. No.	Each	Case of
24 oz. (710mL) Trigger spray bottle	**14-415-12**	18.05	12/185.10

SoftGUARD* Extra-Strength Barrier Hand Cream

Prevents skin irritation caused washing and gloving

Unique barrier feature helps prevent the occlusion of the skin. Protects and moisturizes, allowing damaged skin to heal.

- Compatible with latex, nitrile, vinyl, PCMX, CHG, and antimicrobial soap—petroleum- and mineral oil-free
- Utilizes an extra-strength antimicrobial preservative to prevent cross-contamination
- Absorbs immediately
- Nongreasy, fragrance-free and pH balanced with the skin

SoftGUARD Extra-Strength Barrier Hand Cream

Description	Cat. No.	Each	Case of

CLONING AND EXPRESSION

ENZYMES

Fisher BioReagents* Restriction Enzymes

Provide the high performance and product dependability expected from Fisher BioReagents

- Each enzyme is subjected to stringent purity, activity, and functional assays
- For information on other convenient enzyme packaging sizes, contact your Fisher Scientific Customer Service Representative or visit our Web site.

Specifications for Restriction Enzyme Buffers (1X)

Buffer	pH (at 37°C)†	Tris-HCl	NaCl	KCl	MgCl$_2$	DTT
A	7.5	6mM	6mM	----	6mM	1mM
B	7.5	6mM	50mM	----	6mM	1mM
C	7.9	10mM	50mM	----	10mM	1mM
D	7.9	6mM	150mM	----	6mM	1mM
E	7.5	6mM	100mM	----	6mM	1mM
F	8.5	10mM	100mM	----	10mM	1mM
G	8.2	50mM	----	----	5mM	----
H	7.5	90mM	50mM	----	10mM	----
J	7.5	10mM	----	50mM	7mM	1mM
K	7.4	10mM	----	150mM	10mM	----
L	9.0	10mM	100mM	----	3mM	----

† Universal Buffer (1X) = 25mM Tris-acetate (pH 7.5 at 37°C), 100mM potassium acetate, 10mM magnesium acetate, 1mM DTT.

‡ For each 10°C rise in temperature between 0° and 25°C, the pH of the Tris buffers decreases 0.31 pH units. For each 10°C rise in temperature between 25° and 37°C, the pH of the Tris buffers decreases 0.25 pH units.

Promega* Restriction Enzymes

- Enzymes will perform to 100% of certified activity in the supplied 10X buffer indicated by letter in parentheses following the enzyme name
- Multi-Core* buffer provided unless the enzyme exhibits less than 25% of optimal activity when the buffer is used
- Most enzymes are supplied at 8 to 12 units/µL; higher concentrations of 40 to 80 units/µL are available for selected enzymes and are designated by (HC)

STORAGE CONDITIONS:

Store as detailed on label.

Specifications for Restriction Enzyme Buffers

Buffers are supplied as 10X stocks. The concentrations shown are for the 1X concentrations. **Note:** BSA is not included in the buffers supplied, but the user may add BSA to a final concentration of 0.1mg/mL.

Buffer	pH at 37°C†	Tris-HCl	NaCl	KCl	$MgCl_2$	DTT

Fisher BioReagents* Modifying Enzymes

Provide the high performance and dependability expected from Fisher BioReagents

- Each enzyme is subjected to stringent purity, activity, and functional assays
- For information on other convenient enzyme packaging sizes, contact your Fisher Scientific Customer Service Representative or visit our Web site.

Promega* Modifying Enzymes

Available in convenient, cost-effective concentrations that are economical and easy to pipet

PR-M Series

- The activity of each enyzme is 100% guaranteed through the expiration date on the vial
- Selected enzymes are available at high concentration and are designated by (HC)
- Many items have 24-month lifetimes
- Enzymes are rigorously tested for performance in the actual applications for which they are commonly used

STORAGE CONDITIONS:

Store as detailed on label.

Fisher BioReagents* Optizyme Ribonuclease Inhibitor, Recombinant

Protects RNA from degradation by RNases

- Supplied as a recombinant product from *E. coli* (originally isolated from rat lung) and provides superior protection of RNA from degradation by RNases
- Commonly added to all solutions used during the isolation of RNA, and will not interfere with the performance of most enzymes in downstream applications
- Active over a broad temperature range, and even provides some RNase inhibition at 60°C, which is useful when performing reverse transcription reactions at elevated temperatures to overcome secondary structure in RNA
- Storage Buffer Components: 20mM HEPES-KOH (pH 7.6 at 4°C), 50mM KCl, 8mM DTT, and 50% glycerol (v/v)
- Displays a broad spectrum of inhibitory activity against RNases and does not have activity against other polymerases and reverse transcriptases
- Suitable for use in common molecular biology applications such as isolation and purification of RNA, cDNA synthesis, RT-PCR, in vitro RNA transcription/translation, ribonuclease protection assay, and preparation of RNase-free antibodies

NOTE:

Inactivates RNase A, RNase B, and RNase T2; No activity against SP6, T7, or T3 RNA polymerases, AMV or MMLV reverse transcriptases, and *Taq* DNA polymerase.

Quantity	Concentration	Cat. No.	Each
2500U	20–40U/µL	**BP3222-1**	102.44
10,000U	20–40U/µL	**BP3222-5**	256.89

Takara* Ribonuclease Inhibitor from Human Placenta

Noncompetitively inhibits a variety of eukaryotic RNases, including RNase A, B, and C

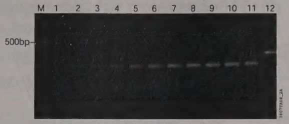
- Active over a wide range of pH in the presence of 1mM DTT
- Supplied in 20mM HEPES-KOH pH 7.5, 50mM KCl, 5mM DTT, and 50% glycerol

Source	Quantity	Concentration	Cat. No.	Each
Human Placenta	2500U	40U/µL	**TAK 2310S**	64.26
	5000U	40U/µL	**TAK 2310A**	106.58
	5 × 5000U	40U/µL	**TAK 2310B**	476.84

Promega* RNasin* Ribonuclease Inhibitor

Ideal for any application where eukaryotic RNase contamination is a potential problem

- Inhibits a broad spectrum of RNases, including RNase A, RNase B, RNase C, and human placental RNase
- Does not inhibit RNase T1, S1 nuclease, RNase from *Aspergillus*, RNase H, or RNase ONE* Ribonuclease
- Compatible with the use of other enzymes, including SP6, T7 or T3 RNA Polymerase, ImProm-II*, AMV or M-MLV Reverse Transcriptase, and *Taq* DNA Polymerase
- Available as both natural[1] and recombinant[2] preparations



RT-PCR Analysis of bcr-abl transcript in K562 cells lysed in a Recombinant RNasin Ribonuclease Inhibitor solution without prior RNA isolation. Lanes 1–11 represent amplification signals from K562 cells numbering 0, 1, 5, 10, 20, 50, 100, 200, 500, 1000, and 5000, respectively. Lane 12 positive control primers. Lane M, 100bp DNA Ladder. Reprinted from Shultz, J., *et al* (2001) *Promega Notes* 77, 12-15.

STORAGE CONDITIONS:

Store at -20°C.

[1] *U.S. Patents 4,966,964, 5,019,556, and 5,266,687; Australian Patents 616881 and 641261 and other pending and issued patents, which claim vectors encoding a portion of human placental ribonuclease inhibitor, are exclusively licensed to Promega Corporation.*

[2] *U.S. Patent 5,552,302, Australian Patent 646803 and other patents.*

Patents for the foundational PCR process, European Patents 201,184 and 200,362, expired on March 28, 2006. In the U.S., the patents covering the foundational PCR process expired on March 29, 2005.

Takara* DNA Ligation and Blunting Kits

Provide high-efficiency DNA ligation in only five minutes for general ligation reactions, and in 30 minutes for most other types of ligation

Simple, two-component systems allow rapid performance of all cloning procedures requiring the covalent joining of DNA molecules in vitro.

Version 1

- Ideal for lambda DNA concatenation

Version 2.1

- Contains a convenient premix of enzyme and buffer that minimizes pipetting steps and final reaction volume in standard reactions
- Suitable for ligation in small reaction volumes, ligation of DNA fragments into plasmid vectors, insertion of linker DNA into plasmid vectors, self-circularization of linear DNA molecules, and adaptor ligation to cDNA
- Includes Transformation Enhancer Solution (Solution III)

DNA Blunting Kit

- Uses T4 DNA polymerase to convert 3' and 5' overhangs to blunt or flush ends

Description	Quantity	Cat. No.	Each
DNA Ligation Kit, Version 1	50 rxns	**TAK 6021**	169.46
DNA Ligation Kit, Version 2.1	50 rxns	**TAK 6022**	169.46

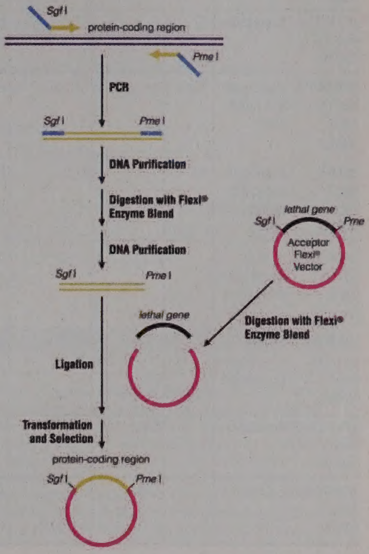
CLONING SYSTEMS AND VECTORS

Promega* Flexi* Cloning System and Vectors

Provide a rapid, efficient, and high-fidelity method to transfer protein-coding regions between a variety of Flexi Vectors[1,2,3,4] without the need to resequence



Cloning a protein-coding region into the Flexi Vectors

The Flexi Vector System[1,2] is based on two rare-cutting restriction enzymes, *Sgf* I[5] and *Pme* I[6], in a simple yet powerful directional cloning method for protein-coding sequences. Each Flexi vector contains *Sgf* I and *Pme* I sites, into which the protein-coding regions are cloned. The vectors also carry the lethal barnase gene, which is replaced by the DNA fragment of interest and acts as a positive selection for the successful ligation of the insert. The vector backbones contain expression or peptide tag options, while maintaining orientation, reading frame, and the ability to share protein coding regions with other Flexi vectors.

- Do not require attachment of multiple amino acids to the amino or carboxy termini of the protein of interest, unlike site-specific recombination vector systems
- Do not require an archival entry vector
- Offer a choice of initial applications, including bacterial protein, mammalian, or cell-free protein expression
- Allow direct use of recombinant clones, minimizing wasted time screening background colonies
- Adaptable to high-throughput formats for large screening projects

STORAGE CONDITIONS:

Store all products at -20°C, except for the Wizard* SV Gel and PCR Clean-Up System component of PR-C8640, which should be stored at room temperature.

INCLUDES:

10X Flexi Enzyme Blend (*Sgf* I and *Pme* I); 2X Flexi Ligase Buffer; 5X Flexi Digest Buffer; Nuclease-free water; T4 DNA ligase; Wizard SV Gel and PCR Clean-Up System

NOTE:

Vectors supplied separately.

Contd. on next page.

[1] *Patent pending.*

[2] *For research use only. Persons wishing to use this product or its derivatives in other fields of use, including without limitation, commercial sale, diagnostics or therapeutics, should contact Promega Corporation for licensing information.*

[3] *This product or portions thereof is manufactured under license from Amrad Corporation Limited. For noncommercial research use only. All other uses require a license from Amrad Corporation Limited, Unit 6, 663 Victoria Street, Abbotsford, Victoria 3067, Australia, under U.S. Patent 5,654,176; Australian Patent 607511, Canadian Patent 1338903 and other issued patents.*

[4] *The CMV promoter and its use are covered under U.S. Patents 5,168,062 and 5,385,839 owned by the University of Iowa Research Foundation, Iowa City, Iowa, and licensed for research use only. Research use includes contract research for which monetary or other consideration may be received. Other commercial users must obtain a license to these patents directly from the University of Iowa Research Foundation.*

[5] *U.S. Patent 5,391,487.*

[6] *Licensed under U.S. Patent 5,945,288.*

[7] *The "pF" indicates that the vector is a Flexi vector. The letter after "pF" indicates the position of any expression tags ("N" = an N-terminal expression tag). The number associated with the vector specifies the type of expression and application. The letters "A" and "K" designate the bacterial drug selection for the vector ("A" = ampicillin and "K" = kanamycin).*

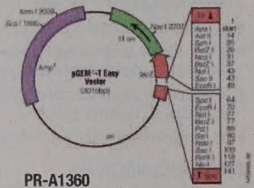
LOOKING FOR TRANSFECTION REAGENTS AND KITS?

For a wide variety of transfection reagents and kits, see the Transfection/Transformation section.

Promega* pGEM*-T and pGEM-T Easy Vector Systems

Convenient systems for the routine subcloning of PCR products

The pGEM-T Vector is prepared by cutting Promega's pGEM-5Zf(+) Vector with *Eco*R V and adding a 3' terminal thymidine to both ends. These single 3'-T overhangs at the insertion site greatly improve the efficiency of ligation of a PCR product into the plasmid.



PR-A1360

- 2X Rapid Ligation Buffer allows reactions to be completed in one hour at room temperature
- Blue/white screening can be used to directly identify recombinant clones, as T7 and SP6 RNA polymerase promoters flank a multiple cloning region within the α-peptide coding region for β-galactosidase, permitting insertional inactivation of the α-peptide
- f1 Origin of Replication allows the preparation of single-stranded DNA

pGEM-T Vector Systems

- Multiple cloning site is flanked by recognition sites for the restriction enzyme *BstZ* I
- Single-enzyme digestion allows release of the insert
- Double digestion may also be used to release the insert from the vector

pGEM-T Easy Vector Systems

- Recognition sites for *BstZ* I, *Eco*R I, and *Not* I flank the insertion site
- Several options are available for removal of the desired insert DNA with a single restriction digestion

INCLUDES:

Vector, Control insert DNA, T4 DNA ligase, Ligation buffer, High efficiency competent cells (PR-A3610 and PR-A1380 only)

Description	Quantity	Cat. No.	Each
pGEM-T Vector System I	20 rxns	**PR-A3600**	107.40
pGEM-T Vector System II	20 rxns	**PR-A3610**	197.40
pGEM-T Easy Vector System I	20 rxns	**PR-A1360**	130.40
pGEM-T Easy Vector System II	20 rxns	**PR-A1380**	219.40

LOOKING FOR NUCLEIC ACID PURIFICATION KITS?

Promega* siSTRIKE* U6 Hairpin Cloning Systems

Series of linearized plasmids designed for fast, easy cloning of hairpin target sequences for expression of siRNA target sequences in human cells

- Ideal for DNA-directed RNA interference in human cells
- Provide vectors containing a variety of eukaryotic antibiotic-selectable markers
- Predigested to eliminate time-consuming vector preparation
- *Pst* I digestion quickly identifies positive recombinants

INCLUDES:

T4 DNA Ligase, 100U; 2X Rapid Ligation Buffer, 200µL; Oligo Annealing Buffer, 1mL; psiSTRIKE Vector, 1.2µg; Nuclease-free water, 1.25mL.

Description	Quantity	Cat. No.	Each
Basic System	20 tests	**PR-C7890**	268.34
Puromycin System	20 tests	**PR-C7900**	268.34
Hygromycin System	20 tests	**PR-C7910**	268.34
Neomycin System	20 tests	**PR-C7920**	268.34

This product is covered under license from Carnegie Institution of Washington under U.S. Patent 6,506,559; Australian Patent 743798 and other patents pending. Commercial use of this product may require a separate license from Carnegie.

LOOKING FOR MORE siRNA PRODUCTS?

For more siRNA products, see the siRNA Technologies section.

Promega* siSTRIKE* U6 Hairpin Cloning System—hMGFP

For monitoring short hairpin RNA- (shRNA-) expressing constructs

Uses an shRNA expression vector which contains a synthetic version of the green fluorescent protein, hMGFP. The synthetic gene expresses a 26kDa protein which shows improved fluorescence and reduced cytotoxicity when compared to the native gene.

- Vectors are supplied predigested, eliminating the need for time-consuming preparation
- Low-level expression can be visualized in situ using fluorescence microscopy, fluorescence imagers, or fluorescence-activated cell sorting (FACS*)
- Positive recombinants can quickly be identified by *Pst* I
- Ideal for DNA-directed RNA interference in human cells

INCLUDES:

psiSTRIKE* hMGFP Vector, 1.2µg; 2X Rapid Ligation Buffer, 200µL; Nuclease-free water, 1.25mL; Oligo Annealing Buffer, 1mL; T4 DNA Ligase, 100U.

STORAGE CONDITIONS:

Store at -20°C.

Quantity	Cat. No.	Each
20 rxns	**PR-C3550**	313.39

This product is sold solely for use for research purposes in fields other than plants. This product is not transferable. If the purchaser is not willing to accept the conditions of this label license, Promega is willing to accept the return of the product and provide the purchaser with a full refund. However if the product is used, then the purchaser agrees to be bound by the conditions of this limited use statement. This product is sold by Promega Corporation under license from Benitec Australia Ltd and CSIRO as co-owners of U.S. Patent 6,573,099 and foreign counterparts. For information regarding licenses to these patents for use of ddRNAi as a therapeutic agent or as a method to treat/prevent human disease, please contact Benitec at: licensing@benitec.com. For the use of ddRNAi in other fields, please contact CSIRO at: ***www.pi.csiro.au/RNAi.***

This product is covered under license from Carnegie Institution of Washington under U.S. Patent 6,506,559; Australian Patent 743798 and other patents pending. Commercial use of this product may require a separate license from Carnegie.

The CMV promoter and its use are covered under U.S. Patents 5,168,062 and 5,385,839 owned by the University of Iowa Research Foundation, Iowa City, Iowa, and licensed for research use only. TRANSCRIPTION AND TRANSLATION

Promega* Gold TNT* Express 96 Transcription/Translation Systems

For transcription and translation of genes cloned downstream from the T7 or SP6 RNA polymerase promoter

- Contain 20µL of high-quality lysate that has been evaluated for optimal transcriptional/translational activity in each well of the 96-well plate
- Minimize lost time, resources, and material associated with aliquoting from bulk lysate
- Ideal for high-throughput applications such as in vitro expression cloning (IVEC)

STORAGE CONDITIONS:

Store at -70°C.

Description	Quantity	Cat. No.	Each
Gold TNT T7 Express 96 System	1 × 96 rxns	**PR-L5600**	579.00
Gold TNT SP6 Express 96 System	1 × 96 rxns	**PR-L5800**	579.00

U.S. Patents 5,283,179; 5,641,641; 5,650,289; and 5,814,471; Australian Patent 649289 and other patents.

U.S. Patent 5,552,302; Australian Patent 646803 and other patents.
U.S. Patents 4,966,964; 5,019,556; and 5,266,687; Australian Patents 616881 and 641261 and other pending and issued patents, which claim vectors encoding a portion of human placental ribonuclease inhibitor, are exclusively licensed to Promega Corporation.

Promega* TNT* Coupled Reticulocyte Lysate Systems

Single-tube, coupled transcription/translation systems for eukaryotic in vitro translations

- Produce data in as little as five to six hours, half the time of conventional two-step systems
- Provide two to six times the protein of standard translation reactions
- Compatible with linear or circular templates (T7 and T3 systems only; SP6 systems should be used with circular DNA only)
- Rigorously quality controlled to ensure the highest level of transcription/translation
- Available in configurations that permit co-expression of genes under the control of different phage polymerase promoters

INCLUDES:

TNT Rabbit Reticulocyte Lysate, appropriate TNT polymerase, control DNA, TNT Reaction Buffer, luciferase assay wells, luciferase assay reagent, amino acid mixtures.

STORAGE CONDITIONS:

Store polymerase at -20°C to -70°C; store luciferase assay wells at room temperature; store other components at -70°C. Do not freeze-thaw lysate more than two times.

Description	Quantity	Cat. No.	Each
TNT SP6 Coupled Reticulocyte Lysate System	8 rxns	**PR-L4601**	116.40
	40 rxns	**PR-L4600**	419.75
TNT T7 Coupled Reticulocyte Lysate System	8 rxns	**PR-L4611**	116.40
	40 rxns	**PR-L4610**	422.75
TNT T3 Coupled Reticulocyte Lysate System	40 rxns	**PR-L4950**	422.75

TNT T7/SP6 Coupled Reticulocyte Lysate System	40 rxns	**PR-L5020**	435.75

U.S. Patents 5,324,637 and 5,492,817; Australian Patent 660329 and other patents.
U.S. Patents 5,283,179; 5,641,641; 5,650,289; and 5,814,471; Australian Patent 649289 and other patents and patents pending.
U.S. Patents 4,966,964; 5,019,556; and 5,266,687; Australian Patents 616881 and 641261 and other pending and issued patents, which claim vectors encoding a portion of human placental ribonuclease inhibitor, are exclusively licensed to Promega Corporation.
The method of recombinant expression of Coleoptera *luciferase is covered by U.S. Patents 5,583,024; 5,674,713; and 5,700,673. A license (from Promega for research reagent products and from The Regents of the University of California for all other fields) is needed for any commercial sale of nucleic acid contained within or derived from this product.*
Patents for the foundational PCR process, European Patents 201,184 and 200,362, expired on March 28, 2006. In the U.S., the patents covering the foundational PCR process expired on March 29, 2005.

Promega* TNT* Coupled Wheat Germ Extract Systems

Ideal for the translation of mammalian transcription factors

- Permit one-tube, coupled transcription/translation reactions for eukaryotic in vitro translation
- Produce twofold to sixfold more protein than standard wheat germ extract translations
- Eliminate the time and effort required to prepare RNA for a standard wheat germ translation
- Provide results through autoradiography in six to eight hours
- Compatible with linear or circular templates (T7 and T3 systems only; SP6 systems should be used with circular DNA only)
- Available in formats that permit simultaneous expression of multiple genes that are under control of different phage polymerase promoters

INCLUDES:

TNT Wheat Germ Extract, appropriate TNT wheat germ polymerase, control DNA, TNT Reaction Buffer, luciferase assay reagent, luciferase assay wells, amino acid mixtures.

STORAGE CONDITIONS:

Store polymerase at -20°C; store luciferase assay wells at room temperature; store other components at -70°C. Avoid multiple freeze-thaw cycles.

U.S. Patents 5,283,179; 5,641,641; 5,650,289; and 5,814,471; Australian Patents 649289 and other patents and patents pending.
U.S. Patents 5,324,637 and 5,492,817; Australian Patent 660329 and other patents.
The method of recombinant expression of Coleoptera *luciferase is covered by U.S. Patents 5,583,024; 5,674,713; and 5,700,673. A license (from Promega for research reagent products and from The Regents of the University of California for all other fields) is needed for any commercial sale of nucleic acid contained within or derived from this product.*
U.S. Patents 4,966,964; 5,019,556; and 5,266,687; Australian Patents 616881 and 641261 and other pending and issued patents, which claim vectors encoding a portion of human placental ribonuclease inhibitor, are exclusively licensed to Promega Corporation.
Patents for the foundational PCR process, European Patents 201,184 and 200,362, expired on March 28, 2006. In the U.S., the patents covering the foundational PCR process expired on March 29, 2005.

Promega* TNT* Quick Coupled Transcription/Translation System

Convenient system combines RNA polymerase, nucleotides, salts, amino acids, and Recombinant RNasin* Ribonuclease Inhibitor with reticulocyte lysate solution in a single TNT Quick Master Mix

- Optimized for transcription/translation of genes cloned downstream from either the T7 or SP6 RNA polymerase promoter
- Produces two- to six-fold more protein in a 60- to 90-minute reaction than do standard in vitro rabbit reticulocyte lysate reactions using RNA templates
- Includes Luciferase Control DNA; 40-reaction systems also include Luciferase Assay Reagent

Storage Conditions:

Store at -70°C; do not freeze-thaw the lysate more than two times.

Description	Quantity	Cat. No.	Each
TNT T7 Quick Coupled Transcription/Translation System	5 rxns	**PR-L1171**	116.40
	40 rxns	**PR-L1170**	427.75
TNT SP6 Quick Coupled Transcription/Translation System	5 rxns	**PR-L2081**	117.40
	40 rxns	**PR-L2080**	427.75

U.S. Patents 5,283,179; 5,641,641; 5,650,289; and 5,814,471; Australian Patent 649289 and other patents.

U.S. Patents 5,324,637 and 5,492,817; Australian Patent 660329 and other patents.

U.S. Patent 5,552,302; Australian Patent 646803 and other patents.

The method of recombinant expression of Coleoptera *luciferase is covered by U.S. Patents 5,583,024; 5,674,713; and 5,700,673. A license (from Promega for research reagent products and from The Regents of the University of California for all other fields) is needed for any commercial sale of nucleic acid contained within or derived from this product.*

For Laboratory Use. Any use of the product for diagnostics requiring clearance or approval by the FDA may require a license under Mayo Clinic U.S. Patents 6,027,913 and 6,361,949.

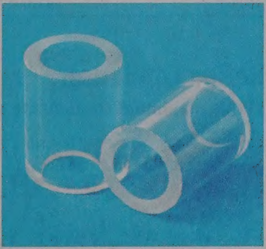
Patents for the foundational PCR process, European Patents 201,184 and 200,362, expired on March 28, 2006. In the U.S., the patents covering the foundational PCR process expired on March 29, 2005.

CLONING RINGS AND CYLINDERS

Pyrex* Cloning Cylinders

Create identical cells by surrounding a single cell or group of cells

- Borosilicate glass
- Flat ends ensure a good seal

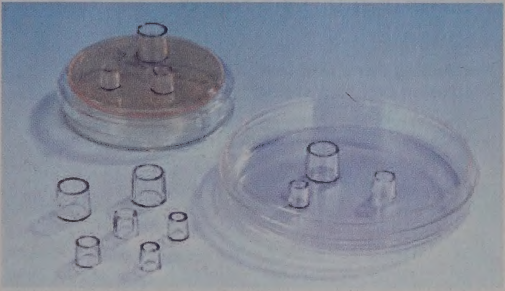


09-522-22

O.D. × H	Mfr. No.	Cat. No.	Case of 125
6 × 8mm	3166-6	**09-552-20**	47.15
8 × 8mm	3166-8	**09-552-21**	47.15
10 × 10mm	3166-10	**09-552-22**	53.83

Scienceware* Cloning Cylinders

For cloning a homogenous culture of cells rather than a mixed population



14-512 Series

- Polystyrene
- Tapered design ensures an excellent seal to the surface

ORDERING INFORMATION:

Individual sizes supplied five bags of 10 cylinders each; Variety Pack contains four bags with 10 of each size.

O.D. × H	Mfr. No.	Cat. No.	Pack of
4.7 × 8mm	37847 0100	**14-512-78**	50/44.26
6.4 × 8mm	37847 0200	**14-512-79**	50/46.53
9.5 × 6.4mm	37847 0300	**14-512-66**	50/59.30
Variety Pack	37847 0000	**07-907-10**	120/78.39

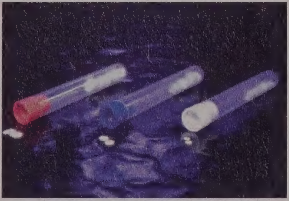
Scienceware* Cloning Discs

Reduce the time required to collect a large number of colonies, with less risk of contamination

- Alternative to cloning cylinders for isolating cell colonies
- Radiation sterilized paper

ORDERING INFORMATION:

Supplied in vials of 50, two vials per pack.



07-907-10C, 07-907-10B, 07-907-10A

Size	Mfr. No.	Cat. No.	Pack of 100

6mm	37847 0003	**07-907-10C**	28.17

LOOKING FOR MICROBIOLOGY MEDIA?

For a full line of microbiology media and other microbiology supplies, see the Microbiology section.

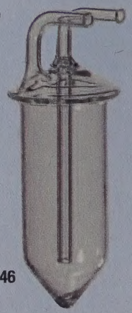
CONDENSERS

*Fisherbrand** Cold Finger Condenser

For boiling nitric acid test (corrosion-resistant steels)

- Borosilicate glass
- Overall length, 170mm; body diameter, 47.6mm

COMPLIANCE:
Meets ASTM* A 262-98



07-746

Cat. No.	Each
07-746	78.75

Pyrex* Allihn Condensers with ₷ Joints

Suited for use in vacuum distillation

- ₷ inner and outer joints
- Hose connections are 10mm O.D.

07-736B

Jacket L	₷ Joint	Mfr. No.	Cat. No.	Each†
200mm	19/38	2480 200	**07-736A**	135.99
300mm	24/40	2480 300	**07-736B**	165.73
400mm	24/40	2480 400	**07-736C**	192.55
500mm	24/40	2480 500	**07-736D**	157.28
600mm	29/42	2480 600	**07-736E**	184.21

† Available in alternate quantities. Contact your Fisher Scientific Customer Service Representative for details or visit our Web site.

Kontes* Allihn Condensers with Straight Outlet Tube

For refluxing applications including Soxhlet extractions

- Straight outlet tube at top
- Water-cooled ₷ inner drip joint at bottom
- Accept No. 2 hose connections, except for 350mm size which accepts No. 3

K456000-0021

Jacket L	₷ Joint	Cat. No.	Each
190mm	34/45	**K456000-0021**	94.42
260mm	45/50	**K456000-0022**	117.38

Kimax* West Condensers

With sloped inner tube and small annular space

Drip Tip, Medium Length 14/20 $ Joints

- One-piece sealed condenser
- 14/20 $ outer joint at the inlet
- 14/20 $ inner joint at the outlet
- Inlet end is sloped to avoid trapping condensate
- Inner tube is light-walled with a small diameter jacket for narrow annular space
- Hose connections accept 5⁄16" I.D. flexible tubing

Medium Length 19/22 $ Joints

- Useful for refluxing and distillation assemblies
- Accept No. 1 hose connections
- Overall height: approximately 285mm
- Approximate condensing area: 66cm^2

Full Length $ 24/40 Joints

- $ outer joint at the top
- $ inner drip joint at the bottom
- Narrow annular space provides high cooling efficiency due to the increased flowrate of the cooling medium
- Accepts No. 2 hose connections
- Approximate condensing area: 102cm^2
- Overall height: 442mm

10-310-46

CONDUCTIVITY

METERS, BENCHTOP

Fisher Scientific* accumet* Excel XL30 Conductivity Meter

Measures conductivity, resistivity, salinity, and temperature with Windows CE* operating system and user-friendly, full-color touchscreen

- Reads conductivity in µS/cm; resistivity in ohms•cm, kilohms•cm, megohms•cm; salinity in ppt; and temperature in °C
- Built-in replatinizing circuit aids in extending life of conductivity cells
- 4½W × 6"H (11 × 15cm), scratch-resistant color LCD screen
- Displays current measurement value, stability indicator, buffers or standards, time/date stamp, temperature
- On-screen operational prompts, recognizable icons, and context-specific help screens
- Durable ABS plastic housing resists dust and chemicals
- Accepts two- or four-cell probes

Customizable Features

- Selectable temperature coefficients and display units ensure accurate readings
- Choose appropriate operating parameters, resolution, buffer sets, and similar settings within the operational modes
- Selectable cell constants enable meter to be used for general purpose (1.0cm^{-1}), high purity water (0.1cm^{-1}), brines or other concentrated solutions (10cm^{-1})

Extensive GLP and Communication Capabilities

- Customizable printer or computer output and 1000-reading datalog capability
- Print Setup lets you print exactly what you want, when you want it
- Displays time in 12- or 24-hour format, date in U.S. or international format
- USB port connects a keyboard, mouse or trackball, or connects printer or PC for data output
- RS-232 port connects PCs or printers without USB, or frees your computer USB for other devices while meter is in operation
- Ethernet allows unmatched LAN connectivity and even allows software upgrades

ORDERING INFORMATION:

Dimensions (L x W x H): 9¼ x 6½ x 3½" (23.5 x 16.5 x 9cm)
Net weight: 2¾ lb. (1.2kg)

INCLUDES:

Meter Kit includes meter, conductivity probe (13-620-100), ATC probe (13-620-19), electrode support arm and bracket, 110/220V 50/60Hz power supply and operation manual.

Meter Only includes meter, electrode support arm and bracket, 110/220V 50/60Hz power supply and operation manual.

WARRANTY:

Warranted to the end user to be free from defects in materials and workmanship under normal use for a period of three years

SERVICE AGREEMENTS

Fisher Scientific offers several types of service agreements for the equipment featured here. For details on these agreements, equipment repairs and calibration services, see the Services section.

For immediate assistance, call 1-800-395-5442.

SPECIFICATIONS

Model	Fisher Scientific accumet* XL30 Conductivity/ Resistivity/ Salinity/Temperature Meter Kit
Display	640 × 480 pixel STN Color LCD; 4½"W × 6"H (11 × 15cm). Measurement Characters: ¾"H (1.9cm). Other Data: ¼"H (0.6cm)
Keypad/Controls	Touch Screen and External Keypad
Menus	Microsoft* Windows CE* pull-down menu options; extensive Help screens.
Remote Access	Parameters remotely controllable and monitorable via Win CE Remote Application Interface.
Connectivity	USB Host/Device 1.1 connectivity to printer, PC, bar code scanner, mouse, keypad etc. Ethernet port connectivity to LAN.
Data Memory	Internal: 1,000 Data points. External: USB storage device connectivity, SDCARD Memory Interface ver 1.0, RS-232 connectivity.
Data Output	On Stable; via timer; Manual
Special Features	User upgradable software (Flash ROM via Ethernet). Powerup self test; error messages; alarm, real-time clock/calendar.
Conductivity Mode	
Cell Constants	0.1cm^{-1}, 1.0cm^{-1}, 10cm^{-1}
Conductivity Range	0 to 5 × 10^{5}µS/cm
Resistivity Range	3ohms·cm to 100megohms·cm
Salinity Range	0 to 90ppt
Relative Accuracy	±0.5% of Full Scale reading ±1 least significant digit
Temperature Mode	
Range/Resolution	-10.0° to +110.0°C (14° to 230°F)/0.1°C
Relative Accuracy	±0.2°C
Compensation	Automatic or Manual
Inputs	1 DIN (4-cell cond.), 2-pin cond., 1 ATC
Outputs	USB Host/Device, Bidirectional RS-232, Ethernet, SDCard
Electrical Requirements	110V/220V 50/60Hz

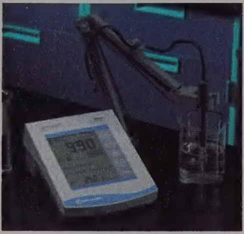
*Trademark. See Trademark Reference.

Prices subject to change.

Fisher Scientific* accumet* AB30 Conductivity Meter

Accurate, affordable, and easy-to-operate conductivity meter

- Measures conductivity in µS/cm, resistivity in megohm•cm and TDS in ppm
- Custom LCD shows readings in ¾"H (1.9cm) characters
- Plain-language prompts and error messages make operation a breeze
- Five-button soft-key controls
- Internal diagnostic capabilities, including self-test on powerup
- Two pin and four-cell conductivity inputs plus ATC input
- Ideal for routine conductivity measurements



13-636-AB30, shown with supplied electrode support.

ORDERING INFORMATION:

Meter dimensions (L × W × H): 7½ × 5½ × 3¼" (19 × 14 × 8cm). Net weight: 1.86 lb. (0.8kg). For 115V 60Hz. For Conductivity probes, see p. 522.

INCLUDES:

Meter Only package includes meter, power supply, operation manual, Fisher Scientific accuflex* electrode support (13-637-671).

Meter Kit includes meter, power supply, operation manual, Fisher Scientific accuflex electrode support (13-637-671), Fisher Scientific ATC probe (13-620-19).

NOTE: Order conductivity cells separately.

WARRANTY:

Warranted to the end user to be free from defects in materials and workmanship under normal use for a period of three years.

More Fisher Scientific* accumet* Meters with Conductivity Mode

For Multiparameter Meters XL60, XL50 and XL20 with Conductivity Mode, see the pH/pX Section.

Thermo Scientific* Orion* 3-Star* Benchtop Conductivity Meter

Dedicated measurement of conductivity, resistivity, salinity and TDS in a compact, ergonomic package

Easy-to-use single-channel meter provides reliable, accurate measurements for soil and water analysis applications.

13-642-054

- Displays conductivity and temperature measurements simultaneously
- Accepts both four-electrode and two-electrode cells
- Offers a full complement of GLP-related features
- Stores up to 10 password protected methods, including setup parameters and calibrations; download additional methods and software updates via the Web
- 200-point datalogger, downloadable to printer or computer via an optional RS-232 or USB interface
- SMART STABILITY* and SMART AVERAGING* functions automatically optimize accuracy, precision and response time
- Meets all U.S. Pharmacopeia (USP) requirements
- Auto stirrer control
- IP54 dustproof and splashproof
- Mini-DIN locking conductivity probe connectors
- Advanced self-tests and diagnostics on meter operation
- Universal power adapter for worldwide operation

ORDERING INFORMATION:

More Star Series Application Packages are available for specific applications, including meter, all required accessories, Tech Notes on procedure, and validation service. Contact your Fisher Scientific Customer Service Representative for details.

INCLUDES:

Meter Only includes meter and instruction manual.

Meter Kit includes meter, conductivity probe (13-642-225) with 1.5m cable, 1413µS/cm conductivity/TDS standard (13-301-77), benchtop electrode stand, instruction manual.

Meter Kit for Ultrapure Water includes meter, stainless-steel conductivity probe (13-642-227), 100mS/cm conductivity/TDS standard (13-301-78; 5 × 60mL), benchtop electrode stand, instruction manual.

Meter Kit for USP 645 includes meter, stainless-steel conductivity probe (13-642-227), 100mS/cm conductivity/TDS standard (13-301-78; 5 × 60mL), benchtop electrode stand, instruction manual.

WARRANTY:

Three-year replacement warranty

COMPLIANCE:

CE, CSA, UL and FCC Class A limits approved

Oakton* CON 510 Benchtop Meter

Affordable and reliable, with consistent and accurate measurements

13-620-328

- Reads conductivity across five ranges, TDS across six
- Dual display shows conductivity or TDS plus temperature in °C and °F
- Built-in memory stores up to 50 readings
- Autoranging across five ranges offers the best resolution for measurements
- Single-point and multipoint automatic or manual calibration (up to five—one per conductivity range)
- Adjustable temperature coefficient, selectable cell constant for very high or low range measurements
- Manual or automatic temperature compensation
- Adjustable conductivity-to-TDS conversion factor
- Choice of normalization temperature: 15°C or 30°C (59°F or 86°F)
- Advanced setup mode enables recall of previous data calibration, conductivity/TDS effective cell constants per range, and selectable READY indicator

ORDERING INFORMATION:

Dimensions (L × W × H): 9 × 7 × 2⅜" (22.9 × 6 × 17.8cm). For Conductivity cells and for Oakton Multiparameter Meters with Conductivity mode, contact your Fisher Scientific Customer Service Representative.

INCLUDES:

Meter, 1.0cm^{-1} conductivity/temperature plastic-bodied probe with 3' (0.9cm) long cable (13-620-AP54), built-in electrode holder arm, 110/220V 50/60Hz power adapters, instructions with pull-out reference guide.

ACCESSORIES

Replacement Conductivity/TDS/Temperature Probe

Replacement for:

- Oakton* CON 510, pH/CON 510 Benchtop Meters
- Fisher Scientific accumet* AP75, AP85 Portable Meters
- Oakton CON 11, CON 110, CON 400, CON 410, pH/CON 300, TDS 400 Portable Meters

Cat. No.	Each
13-620-AP54	246.36

YSI* Benchtop Conductivity Meters

Measure conductivity, salinity, and temperature, with temperature compensation

Model 3200

- Measures conductivity (up to three Siemens), resistivity, TDS, salinity, temperature—plus conductance and resistance
- Resistance Ratio Technology* continually compares sample resistance to a calibrated resistor in its circuitry
- Uses one conductivity cell over a broad measurement range:
  - Calibrate with up to five standards
  - Instrument chooses appropriate calibration for each sample
  - Eliminates guessing sample conductivity before you measure
- Helps assure highly accurate ultrapure water analysis
- Three temperature compensation options:
  - Enter linear compensation factor
  - Choose one of the stored nonlinear temperature compensation curves
  - Vary sample temperature and instrument stores a linear or nonlinear curve
- Microprocessor-based, with cell configuration storage, high/low alarm, data storage and logging, and variable reference temperature

09-324-48

09-324-46

Model 3100

- Measures conductivity, salinity, and temperature with accuracy and reliability
- Uses forced-current technology to measure conductivity over a broad range
- Linear temperature compensation is variable from 0 to 4%—choose reference temperature from 15° to 25°C
- Can platinize a conductivity cell directly—no need for a separate replatinizing instrument

ORDERING INFORMATION:

Order probes separately. YSI Multiparameter Meters with Conductivity mode available; see the pH/pX section.

COMPLIANCE:

Meet CE requirements

Mettler Toledo* Seven Series Conductivity Meters

Basic and advanced meters measure conductivity, esistivity, TDS, salinity, temperature

Model S30 Basic Conductivity Meter

- Simultaneously displays temperature with all parameters
- Simple one-point calibration with auto buffer recognition, prompting and endpoint
- Editable cell constants; outputs cell constants after calibration
- Autoranging for best resolution
- Manual or automatic temperature compensation
- Selectable reference temperature: 20°C or 25°C, linear, nonlinear, or no correction
- Adjustable solids factor from 0.4 to 1.0
- Automatically indicates when reading is stabilized and ready; freeze functions are manually controlled
- Power loss memory protection; stores last calibration
- Self-diagnostics test ensures meter is operating properly
- Mini-DIN inputs
- Bidirectional RS-232 interface enables output of data to printer or computer

Model S70 Advanced Conductivity Meter

- Includes all the features of Model S30
- Modular design accepts color-coded pH, ISE, ISFET modules for enhanced capabilities
- Stores last 10 calibrations, 10 methods, 1000 measurement/temperature data pairs
- Auto read, manual read, and timed read with autoranging resolution
- Automatic or timed endpoints; high/low alarms alert operator
- Takes readings at preset intervals, with values output to PC/printer/memory at defined periods
- Back-lit display with online help, GLP menus, five languages; graphically presents calibration curve; displays last 25 readings with high/low endpoints
- Recognizes 84µS/cm, 1413µS/cm, 12.88mS/cm, or custom standards
- Operator-defined calibration reminder: simply input number of use or time
- Key in alphanumeric input of meter ID, user name, sample ID, sensor ID, and serial number
- Enhanced communication through bidirectional RS-232 interface supports barcode reader for sample or sensor ID

ORDERING INFORMATION:

Model S30:
Dimensions (L × W × H): 7 × 7 × 2½" (18 × 18 × 6.5cm). Electrical requirements: 120V 50/60Hz. Operates on 9V power supply or uses four "AA" batteries (not included).

Model S70:
Dimensions (L × W × H): 7½ × 9½ × 2½" (19 × 24 × 6.5cm). Electrical requirements: 120V 50/60Hz. Operates on 9V power supply.

Mettler Toledo Portable and Multiparameter Meters with Conductivity mode available; see Conductivity Meters, Portable, p. 515 and the pH/pX section. For S70 modules, see the pH/pX section.

INCLUDES:

Meter Only option comes with 9V power supply, electrode holder and operating instructions.

Meter Kit option includes meter, 9V power supply, electrode holder, operating instructions, InLab* 730 conductivity probe (01-911-258), two 12.88mS/cm and two 1413µS/cm 20mL calibration sachets.

WARRANTY:

Two years on meter; one year on probe

NOTE:

Conductivity measurements compliant to USP 26 are possible with the InLab 740 ultralow conductivity probe (01-920-143, sold separately).

PORTABLE

Fisher Scientific* accumet* AP85 Portable Waterproof pH/Conductivity Meter

Durable, waterproof, dustproof—ideal for rough field applications

Measures pH, conductivity and TDS plus temperature. Switches between pH, conductivity and TDS with the press of a button. Dual-display LCD shows all parameters with temperature; recalls previous calibration points, too.

- Advanced set-up mode for customizing meter parameters
- Selectable automatic endpoint freezes reading immediately after stabilization
- HOLD button freezes reading
- Self-diagnostic: meter indicates when it is ready to operate; error messages alert operator to problems
- Manufactured with ISO 9001:2000-certified processes

accumet
MEAS
7.25
23.5

13-636-AP85

Powerful pH Mode

- Recalls pH electrode slope and offset
- Has five-point calibration with automatic buffer recognition

Conductivity and TDS Modes

- Recalls and customizes effective cell constants for each range
- Autoranging for conductivity across five ranges
- Autoranging for TDS across six ranges
- Five-point calibration for ±1% full-scale accuracy

Flexible Temperature Mode

- Select temperature in °C or °F
- Set coefficient from 0 to 10% for accurate compensation in almost any solution
- Manual or automatic temperature compensation

INCLUDES:

Meter/Probe package includes meter, 1.0cm^{-1} conductivity/temperature plastic-bodied probe with 3' (0.9m) long cable (13-620-AP54), All-in-One pH/temperature probe (13-620-AP55), four "AAA" batteries, and instruction manual.

Meter Kit package includes meter, 1.0cm^{-1} conductivity/temperature plastic-bodied probe with 3' (0.9m) long cable (13-620-AP54), All-in-One pH/temperature probe (13-620-AP55), 4.00 and 7.00pH buffer solutions, 1413µS conductivity calibration solution, sample bottle, four "AAA" batteries, instruction manual, and hard plastic carrying case.

WARRANTY:
Warranted to the end user to be free from defects in materials and workmanship under normal use for a period of three years.

13-636-AP75A

- Selectable cell constant (0.1cm⁻¹, 1.0cm⁻¹, or 10cm⁻¹)
- Autoranges for conductivity across five ranges and TDS across six for fast response
- Calibration up to five points for both conductivity and TDS measurements
- Adjustable temperature coefficient from 0 to 10% per °C offers accurate compensation in almost any solution
- Selectable auto endpoint freezes reading immediately after meter indicates stabilization
- Expanded memory function stores and recalls up to 50 readings
- Real-time clock enables stored and calibration data to be combined with date and time for more complete recordkeeping
- HOLD function and auto shutoff
- Manufactured with ISO 9001:2000-certified processes

ORDERING INFORMATION:

Dimensions (L × W × H): 7½ × 3¾ × 2¼" (19 × 9.5 × 5.7cm)

INCLUDES:

Meter/Probe package includes meter, K = 1.0cm⁻¹ conductivity/temperature plastic-bodied probe with 3' (0.9m) long cable (13-620-AP54), four "AAA" batteries, and instruction manual.

Meter Kit includes meter, K = 1.0cm⁻¹ conductivity/temperature plastic-bodied probe with 3' (0.9m) long cable (13-620-AP54); four each of 447µS, 1413µS, 2764µS, and 15,000µS 20mL conductivity calibration solution pouches; sample bottle; four "AAA" batteries; instruction manual; hard plastic carrying case.

Thermo Scientific* Orion* 3-Star* Portable Conductivity Meter

Dedicated measurement of conductivity, resistivity, salinity and TDS in a durable, waterproof, IP67 meter

Easy-to-use single-channel meter provides reliable, accurate measurements for soil and water analysis applications.

13-642-061

- Displays conductivity and temperature simultaneously
- Easy-to-use three-button keypad; balanced comfortable handling
- Accepts both four-electrode and two-electrode cells
- Offers a full complement of GLP-related features
- Stores 10 password-protected methods, including setup parameters and calibrations; additional methods/updates downloadable
- 200-point datalogger, downloadable to printer or computer via an optional RS232 or USB interface accessory
- Flexible autocalibration
- SMART STABILITY* and SMART AVERAGING* functions automatically optimize accuracy, precision and response time
- IP67 waterproof and dustproof
- Delivers 2000 hours of continuous operation
- Quick-Start Guide on meter back
- Mini-DIN locking conductivity probe connectors
- Advanced self-diagnostics

ORDERING INFORMATION:

Thermo Scientific Orion 3-Star Star Benchtop Conductivity Meter is on p. 511; Thermo Scientific Orion Star Multiparameter Meters with Conductivity mode are found in the pH/pX section. Additional application kits as well as validation services are available; contact your Fisher Scientific Customer Service Representative for details.

INCLUDES:

Meter Only option includes meter and instruction manual.

Meter/Probe Kit includes meter, four-cell conductivity probe (13-642-228), 1413µS/cm Conductivity/TDS Standard (10 × 15mL pouches), hard field case and instruction manual.

Meter Kit for Conductivity Fresh Surface Water Applications and **Meter Kit for Salinity Fresh Surface Water Applications** include meter, four-cell conductivity probe with 118⅛" (3m) cable (13-632-226), 1413µS/cm and 12.9mS/cm Conductivity/TDS Standards, electrode storage sleeve, hard field case, instruction manual and appropriate Star Series Method Note.

Oakton* CON 110 Advanced Meter

Customize meter parameters for specific applications

Reads conductivity 0.00µS to 199.9mS across five ranges with single or five-point, manual or automatic calibration. Stores and recalls 100 readings with temperature in °C or °F.

OAKTON
10.00
25.8

13-620-241

- Advanced set-up mode enables user to check calibration data and customize features
- Adjustable temperature coefficient
- Select one of three cell constants: 1.0cm^{-1} 0.1cm^{-1} or 10cm^{-1}
- Select manual or autoranging and manual or automatic temperature compensation
- Mode can also be used to program Ready indicator, auto shutoff, and more
- Press HOLD button to freeze data on the LCD display
- RS-232 output enables continuous download of data to printer
- Membrane keypad is water resistant
- Compatible with AC adapter 13-300-126 (not included)
- Manufactured with ISO 9000:2000-certified processes

ORDERING INFORMATION:

Dimensions (L × W × H): 3½ × 1¾ × 7½" (6.9 × 4.5 × 19cm)

INCLUDES:

Meter/Probe includes built-in stand, electrode holder, 1.0cm^{-1} conductivity/TDS/temperature plastic-bodied probe with 3' (0.9m) cable (13-620-AP54), four "AAA" batteries, and instructions.

Meter Kit includes meter with built-in standard electrode holder; 1.0cm^{-1} conductivity/TDS/temperature plastic-bodied probe with 3' (0.9m) cable (13-620-AP54); four each of 477µS, 1431µS, 2764µS, 15,000µS 20mL calibration solution pouches; four rinse water pouches; sample bottle; four "AAA" batteries; and hard plastic carrying case.

Oakton* TDSTestr* 11 and ECTestr* 11 Series Meters

Versatile, waterproof pocket testers that float

Rugged construction for long service; convenient operation.

- IP67 waterproof/dustproof rated
- Chemical-resistant, floatable Valox* housing so tester won't sink to the bottom of tank or pond
- Stainless-steel electrodes are replaceable without losing IP67 protection, have good chemical compatibility and durability
- Microprocessor-controlled TDS or conductivity testing
- Single- or one-point-per-range calibration
- Auto shutoff, low-battery indicator, error messages
- Automatic temperature compensation over the entire 0° to 50°C (32° to 122°F) range for quick response, even with fluctuating temperatures
- Accuracy of ±1% full-scale (each range)

TDSTestr 11

- Ranges of 0 to 2000ppm; 0 to 10.00ppt
- Resolution of 10ppm; 0.10ppt
- Pushbutton calibration, one point per range

TDSTestr 11 Plus

- Three-range instrument covers most applications
- Cup or dip style testing: pour sample into sensor cup or dip sensor into sample
- Ranges of 0 to 200.0ppm; 0 to 2000ppm; 0 to 10.00ppt
- Resolution, 0.1ppm; 1ppm; 0.01ppt
- Pushbutton calibration, one point per range

ECTestr 11

- Covers a broad range of applications
- Ranges of 0 to 2000µS; 0 to 20.00mS
- Resolution of 10µS; 0.10mS
- Pushbutton calibration, one point per range

ECTestr 11 Plus

- Three ranges for maximum resolution
- Cup or dip style testing: pour sample into sensor cup or dip sensor into sample
- Automatically or manually select measuring range
- Pushbutton calibration, HOLD function, and error messages
- Ranges of 0 to 200.0µS; 0 to 2000µS; 0 to 20.00mS
- Resolution 0.1µS, 1µS; 0.01mS
- Pushbutton calibration, one point per range

13-200-275

13-200-276

13-200-277

13-200-278

ORDERING INFORMATION:

All models measure 6½L x 1½" diameter. Shipping weight, 0.45 lb. (0.2kg). Operate on four 1.5V batteries (included); battery life, over 150 hours.

INCLUDES:

Housing, replaceable electrode, batteries, operating instructions

NOTE:

Before measuring, calibrate tester as either cup style or dip style (depending on intended method of use)

Specifications and Ordering Information on next page.

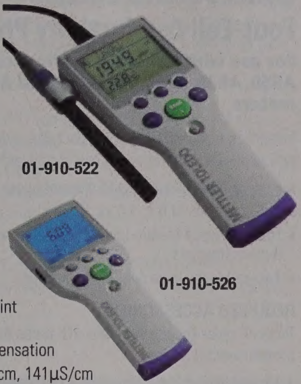
LOOKING CONDUCTIVITY/pH METERS?
YSI* Pro Multiparameter Meters with conductivity mode can be found in the pH/pX section.

Mettler Toledo* SevenGo* and SevenGo pro* Conductivity Meters

Built-in data memory and automatic functions for outstanding performance



- Measure conductivity, TDS, resistivity, salinity, temperature
- Designed for easy, comfortable right- or left-handed operation
- Waterproof and dustproof to IP67 standards
- Large display of measured value and settings
- Rotatable electrode clip mounts left or right for single-handed operation

SevenGo Model SG3

- Automatic and manual endpoint recognition
- Automatic temperature compensation
- Automatic recognition 84µS/cm, 141µS/cm or 12.88mS/cm
- Data memory for 30 GLP data points

SevenGo pro Model SG7

- Separate operating modes for expert and routine use
- Linear and nonlinear temperature compensation
- Calibration with user-defined standard or cell constant
- Water measurements according to USP
- Record date, time, time interval
- Intuitive menu operation using softkeys
- GLP memory for 200 datapoints
- Contact-free infrared communication with notebook, printer or PC
- On/off backlit display

ORDERING INFORMATION:

Choose from three packaging options. All include wrist strap, 1.8M cable, four "AA" batteries, operating instructions, test certificate, and declaration of conformity.

- Meter with electrode
- Meter with electrode and field case with electrode arm and cover
- Meter with electrode, field case with electrode arm and cover, and ErGo* field assistant that:
  - Converts SevenGo meter into mobile benchtop instrument or lets you wear it around your neck for hands-free operation
  - Can be used for a variety of functions
  - Stores pH electrodes wet for immediate use without watering caps

CELLS

Fisher Scientific accumet* Temperature-Compensated Two-Cell Conductivity Probes

For use on the Fisher Scientific accumet Excel (XL) series benchtop meters

- Immersion-type cell
- Use in standard electrode holder: unique compact size is same as typical pH electrode
- Built-in temperature sensors provide temperature-compensated readings
- Epoxy body
- 8-pin connectors

13-620-100

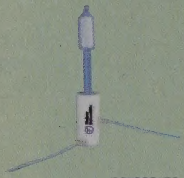
Cell Constant (K)	Cat. No.	Each
0.1cm^{-1}	**13-620-101**	325.56
1.0cm^{-1}	**13-620-100**	325.56
10.0cm^{-1}	**13-620-102**	325.56

ACCESSORIES

Fisher Scientific pH/Conductivity Universal Flow-thru Adapter

Accepts all 12mm dia. pH and conductivity probes to permit constant monitoring of flowing fluids

- Side connectors accept tubing from ⅛ to 3⁄16" I.D.
- Flowrates range from 0.001 to 50mL/min., depending on tube size
- Two O-rings ensure a secure, leakproof seal
- Cell volume (approx. 2 to 4mL) depends on how far into the adapter the probe is placed
- Manufactured from chemically inert PTFE
- Withstands temperatures from -73° to +260°C (-100° to +500°F)



06-662-59

ORDERING INFORMATION:
Measures 1" dia. × 2¼"L (2.5 × 5.6cm)

Cat. No.	Each
06-662-59	81.06

Fisher Scientific accumet* Two-Cell and Four-Cell Conductivity Probes

For use with Fisher Scientific accumet AR60, AR50, AR20, AB30 benchtop and AP65 portable meters

Immersion-type cell. Unique compact size is the same as a typical pH electrode, allowing use in standard electrode holder.

- Two- or four-cell types with glass or epoxy bodies
- Cell constants of 0.1, 1.0, or 10.0cm^{-1}
- Four-cell types feature built-in temperature sensors and 8-pin connectors
- Two-cell types have dual-pin connectors

REQUIRED ACCESSORIES:
Two-cell types require separate ATC probe for temperature-compensated readings.

Thermo Scientific* Orion* Conductivity Cells

Two-electrode and DuraProbe* four-electrode cells

Developed and manufactured under highest quality standards. Conventional two-electrode cells and DuraProbe four-electrode cells are available in a variety of styles for field and laboratory applications, with a variety of cell constants.

Two-electrode Glass Cells

- Models with 8-pin DIN, 8-pin DIN waterproof and Mini-DIN connectors
- Stainless-steel, epoxy or glass bodies

DuraProbe Four-electrode Cells

- Maximum precision and linearity, extremely large linear measuring range
- Long-term stability of cell constant
- Epoxy/graphite construction
- Integrated temperature sensor; 40mm or less immersion depth
- Eliminate errors from electrode fouling, cable length or age, polarization effects, or fringe field changes

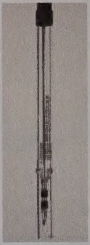
YSI* Conductivity Cells

For use with YSI 3200 and 3100 Conductivity Meters

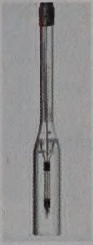
Rugged; suitable for field work. Models with built-in thermistors (CON/ATC) allow automatic temperature compensation without another probe. Models without thermistor (CON) require separate probe for temperature compensation. Contain platinized platinum electrodes.

09-324-54

09-324-28



09-324-22



09-324-31

Choose from five cell types:

- **Dip-type Plastic Cells** have ABS plastic body, O.D. of ½" (1.3cm)
- **Flow-through Cell** for flow systems has thermistor, borosilicate glass body, 30mL nominal volume, O.D. of 1" (2.5cm)
- **Fill Cell** for small volumes has thermistor, borosilicate glass body, 5mL nominal volume, O.D. of ¾" (2cm)
- **Dip-type Glass Cells** have borosilicate glass body; O.D. of 09-324-33 is ½" (1.3cm); all others have O.D. of 1" (2.5cm)
- **Dip-Type Glass Micro Cells** have borosilicate glass body; O.D. of ½" (1.3cm); usable in test tubes with 5mL samples

ORDERING INFORMATION:

CON Cells (without built-in thermistors) have banana-type connectors and require 09-324-50 Cell Adapter for use with Models 3200 and 3100 Conductivity Meters. CON/ATC Cells (with built-in thermistors) have seven-pin mini-DIN connectors and are compatible only with YSI Models 3200 and 3100 Conductivity Meters.

ACCESSORIES

Cell Adapter

Adapter required to use cells without thermistor with YSI Models 3200 and 3100 Conductivity Meters.

Mfr. No.	Cat. No.	Each
3232	**09-324-50**	158.61

STANDARDS AND SOLUTIONS

*Fisherbrand** Traceable* Conductivity Calibration Standards

Highly accurate; traceable to NIST* standards

- Calibrate conductivity, resistivity, and dissolved solids
- In 16 oz. bottle (473mL) or 100mL single-use container
- Accurate to ±0.25% for all solutions except 06-664-24, 06-664-25, 09-328-1 and 09-328-6, with accuracy of ±0.25μmhos (or the uncertainty listed on certificate)

Additional values and NIST/A2LA bottle-tested standards available; see our Web site.

CERTIFICATIONS:

ISO 17025 certificate provided to indicate solution traceability to NIST standards

09-328-20	42.75

*Fisherbrand** Redi-Stor* Conductivity Probe Storage Solution

Ideal for storing conductivity probes

- Preserves probe cleanliness
- Eliminates growths found when probes are stored in water
- Keeps probes ready for immediate use with no conditioning

ORDERING INFORMATION:

16 oz. (473mL) bottle

Cat. No.	Pack of 6
09-330-1	29.95

CONTAINERS

BINS/BOXES

*Fisherbrand** Workstation Storage/Dispenser Bins

Excellent space-saving storage

Ideal for holding and dispensing pipet tips, microcentrifuge tubes, finger cots, cotton swabs, alcohol packs, or any small items used in the laboratory.

- Clear acrylic front with white acrylic sides and back
- Provides easy content identification and keeps items dust free
- Front hinged and provides large opening for easy removal
- Removable top cover for easy filling

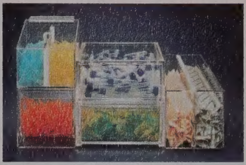
Nalgene* Lab Organizers

Build a workstation to suit your needs



For use on the bench. Clear acrylic modules are easy to clean, permit easy viewing of supplies. Modules attach to each other with Velcro* tabs. With rubber feet for stability.

Pipet Holder

- Holds bags, boxes, pipet canisters or serological pipets (up to 3⅜ oz. [100mL])
- With divider to separate items; remove divider to form large storage area
- Outside L × W × H: 15 × 6 × 6" (38 × 15 × 15cm)

Top Dispensing Bin

- All-purpose
- Hinged dust cover keeps items clean
- With divider to separate items; remove divider to form large storage area
- Outside L × W × H: 6 × 6 × 6" (15 × 15 × 15cm)

Front Dispensing Bin

- All-purpose
- Large bottom dispensing bin with hinged front access
- Allows easy removal, keeps items clean
- Outside L × W × H: 6 × 6 × 6" (15 × 15 × 15cm)

Multiple Dispensing Bin

- All-purpose
- Contains four storage areas of various sizes
- With hinged dust cover to keep supplies clean
- Outside L × W × H: 15 × 6 × 12" (38 × 15 × 30.5cm)

Stackable Drawer

- Units nest for high-density storage
- Can be mounted under a shelf with included hardware included
- Outside L × W × H: 9 × 9 × 4½" (23 × 23 × 11.4cm)

Rubbermaid* Square Space-Saving Containers

Store up to 25% more than conventional round containers in the same space

- FDA-compliant clear polycarbonate construction resists breakage
- Marked with precise graduations—English in red, metric in blue
- Smooth surfaces for easy cleaning: commercial dishwasher safe
- Textured bottom protects container from abrasion and reduces sliding on slippery surfaces
- Pocket-style handles, for easy lifting, have holes that allow complete draining when inverted in washer
- Nest for compact storage

[1] Nalgene assigns the term "leakproof": a) To bottle/closure systems with closures smaller than 100mm, after they are filled with water, inverted, withstand air pressure of 2psig for 2 minutes, and no water escapes;. b) To bottle/closure systems of 100 or 120mm after they are filled with water, inverted for 15 minutes, and no water escapes. **Note:** these tests, using other liquids, may not yield the same results. To ensure safe usage, Nalgene advises customers to test Nalgene bottles and closures under conditions of their planned applications. Nalgene bottles and carboys are leakproof at ambient temperature and pressure when used with their Nalgene closures.

Nalgene* Rectangular Polypropylene Tank with Cover

Ideal for disinfecting biological waste

- Suitable for use with many organic chemicals
- Offers good stress-crack resistance
- Wall thickness, 3⁄16" (4.7mm)
- Autoclavable
- Maximum service temperature: 220°F (104°C)

14-831-113 (front) and 14-831-115

COMPLIANCE:

Resin complies with FDA Reg. 177.1520 for food use.

NOTE:

Nalgene recommends using an exterior support with rectangular tanks used at elevated temperatures or with high specific-gravity liquids.

Capacity	L × W × H	Mfr. No.	Cat. No.	Each

Nalgene* Heavy-Duty Graduated Cylindrical HDPE Tanks

Conform to USP Class VI

- Rigid tanks with hard surface
- Graduated in L and gal. (except for 7½- and 10-gal. sizes, which are graduated in gal. only)
- Available with cover and polyethylene needle-type spigot for drawoff, or with cover only
- Spigot accepts 5⁄8" I.D. (1.3cm) tubing
- Not autoclavable

14-831-310B

NOTE:

Nalgene recommends using an exterior support with rectangular tanks used at elevated temperatures or with high specific-gravity liquids.

ACCESSORIES

Nalgene* Spigots

For safe, efficient liquid dispensing from storage tanks

- Needle type for tanks up to 100 gallons
- PTFE O-rings provide positive seal: 02-963-7C and -7B come with one; 02-963-7A with two

02-963-7A

NOTE:

Make sure container and spigot have compatible chemical resistance before installing.

Fitting	Mfr. No.	Cat. No.	Each	Case of
LDPE				
½" NPT male thread	6420 0500	**02-963-7C**	41.22	6/164.87
¾" NPT male thread	6420 0750	**02-963-7B**	44.79	6/179.17
Polypropylene				
1⅛-12 female screw thread	6421 0010	**02-963-7A†**	42.24	12/337.92

†Replacement spigot for 14-831-312 Series tanks.

Nalgene* Lightweight Graduated Cylindrical HDPE Tank with Cover

External flange at rim for extra strength

- Approximate wall thickness, $\frac{3}{32}$" (2.4mm)
- 55-gallon size can be used as liner for steel drums
- Available with spigot for drawoff

14-834-31D

COMPLIANCE:

Complies with FDA Reg. 177.1520 for food use and USP Class VI requirements

NOTE:

Nalgene recommends using an exterior support with rectangular tanks used at elevated temperatures or with high specific-gravity liquids.

COUNTERS

*Fisherbrand** Digital Counter

Solid-state construction and single, tactile-feel "click" button ensure accurate operation without gear and miscount problems

- Easy-to-read ¼" LCD tallies up to 99,999
- Fail-safe design prevents unintentional reset
- Housed in a rugged but lightweight ABS plastic case
- Unit is water- and shock-resistant—perfect for lab or plant use

Fisher Scientific
02395

07-905-2

ORDERING INFORMATION:
Dimensions (D × W × H): ⅞ × 1⅝ × 2⅝" (2.1 × 4.24 × 6.67cm). Net weight: 1 oz. (28.3g).

INCLUDES:
1.5V Button Cell 375 Battery (02-440-1C), battery powers unit for two years of continuous operation

Cat. No.	Each
07-905-2	20.19

*Fisherbrand** Hand Tally Counter

For counting blood cells, drops of liquid, inventory items, and more

- Tallies up to 9999
- Easily resets to zero
- Compact
- Fits in lab coat pocket
- Chrome-finished metal construction for reliability, long life, and hard usage

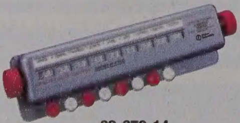
07-905-6

Cat. No.	Each
07-905-6	33.66

Lab Counters

With nine counting units

- Eight units record up to 999, each with its own key
- Last unit is the totalizing unit, which records total number of strokes made on other keys
- At 100 increments, totalizing unit rings bell
- When totalizing unit records 100, each figure corresponding to individual key automatically displays percentage
- Two reset knobs
- Removable tabs on top of counter provide area for identification of classification being counted



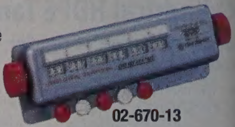
02-670-14

Mfr. No.	Cat. No.	Each
42409C	02-670-14	617.74

Lab Counters, Contd.

With six counting units

- Five counting keys with 0 to 999 range
- Totalizing counter records total number of strokes made on other keys; rings bell at increments of 100
- Feature dual reset knobs



02-670-13

Mfr. No.	Cat. No.	Each
42306C	02-670-13	456.58

With two counting units

- Two keys each with 0 to 999 range
- Single reset knob
- With removable tabs for top identification

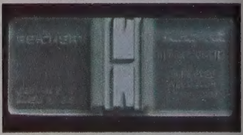
02-670-12

Mfr. No.	Cat. No.	Each
42202C	02-670-12	132.77

Bright-Line* Counting Chambers

For accurate white blood cell, red blood cell, and platelet counts

Difference in surface tension between cover glass and metal counting surface assures smooth capillary action for precise loading and more even cell distribution.



02-671-5

- Reichert Bright-Line Counting Chambers are molded from quartz Pyrex* glass; Hausser Bright-Line Counting Chambers are milled from soda lime glass
- H-shaped moat forms two counting areas
- Thin metal surface on each counting area has double Neubauer rulings with 400 small squares in central 1mm square
- When viewed through microscope, rulings appear as white lines on dark background
- Flat, polished cover glass covers moat region 0.1mm above ruled surface
- V-shaped slashes at each loading side of counting chambers reduce overflow into moat
- Without pipets

INCLUDES:
Two 0.4mm cover glasses

Counting Chamber	Cat. No.	Each
Reichert Bright-Line	02-671-5	155.08
Hausser Bright-Line	02-671-10	141.95

Reichert Bright-Line* Counting Chamber Set

Supplied in polyethylene carrying case.

INCLUDES:
Counting chamber (02-671-5), two cover glasses, one pipet for red blood cells, one pipet for white blood cells, tubing, and mouthpieces

Cat. No.	Each
02-672-5	202.12

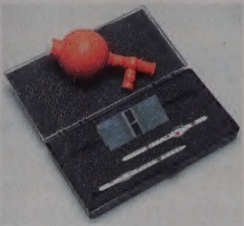
*Trademark. See Trademark Reference.

Prices subject to change.

Hausser* Counting Chamber Set

Supplied with polyethylene carrying case.

INCLUDES:
Counting chamber (02-671-10), two cover glasses, two Thoma pipets (one for red and one for white corpuscles), and pipet filler



Cat. No.	Each
02-671-11	190.95

Bright-Line* Phase Hemacytometer

Counting chamber with reduced thickness for use on phase microscopes

- Provides accurate platelet counts
- Molded from durable Pyrex* brand glass
- Without cover glasses or pipets

Description	Cat. No.	Each
Bright-Line Phase Hemacytometer	**02-671-6**	166.93

Orbeco Cover Glasses

Fit all popular counting chambers

- Precision cut from extra-hard, alkali-free optical-quality glass
- Polished thickness and flatness for exact sample volume
- Edges polished for handling safety

ORDERING INFORMATION:
(L × W): 0.8 × 1" (20 × 26mm). Thickness: 0.016 to 0.024" (0.4 to 0.6mm).

Type	For Counting Chamber	Cat. No.	Pack of 12	Case of 12 Pack
Octagonal	Double or Single	**02-671-30**	53.10	563.83
Rectangular	Double	**02-671-35**	47.42	503.51

CROSSLINKERS

Spectroline* Microprocessor-Controlled UV Crosslinkers

Produce publication-quality results every time

- Covalently bind nucleic acids to membranes in 30 seconds or less following Southern, Northern, or dot blotting, and colony/plague lifts
- Eliminate PCR contamination
- Four operating modes: Optimal Crosslink Mode delivers energy doses of 120mJ/cm^2; Energy Mode varies dosage from 100μJ/cm^2 to 0.9999J/cm^2; Time Mode used for UV-induced gel polymerization, drying and sanitization; and Intensity Mode permits continuous operation and provides accurate intensity readout
- Large LED display and built-in "Help" messages guide user through operations
- Programmable memory stores recently entered conditions—repetitive procedures begin with just the push of the START button
- Internal photo sensor measures only true shortwave UV radiation to ensure precise energy dosage to samples
- Individually calibrated and certified with safety interlock and UV-blocking door window
- Spectrolinker* Series features anodized aluminum housing for corrosion resistance; Select* Series offers painted sheet metal housing

Model	Chamber (D × W × H)	Includes	Cat. No.	Each

CRUCIBLES

METAL

*Fisherbrand** Nickel Crucibles

Withstand temperatures up to 800°C (1472°F)

- Drawn from one piece of heavy pure sheet nickel and trimmed to final form
- Highly resistant to dilute alkalis
- Covers are made from the same nickel material
- Covers sold separately (visit our Web site for details)

13-812-126

Capac.	Dia. × H	Cat. No.	Each
20mL	1½ × 1¼" (38 × 32mm)	**13-812-126**	38.87
30mL	1¾ × 1¾" (44 × 44mm)	**13-812-127**	40.05
50mL	1¾ × 2" (44 × 51mm)	**13-812-128**	47.87
75mL	2¼ × 2¼" (57 × 57mm)	**13-812-129**	61.11
100mL	2½ × 2¼" (64 × 57mm)	**13-812-130**	82.83
250mL	3¼ × 3" (84 × 78mm)	**13-812-131**	154.52

*Fisherbrand** Steel Crucibles

Withstands temperatures up to 500°C (932°F)

- Low-form
- Made from one-piece sheet steel
- Suitable for many alkali and peroxide fusions
- Cover sold separately (visit our Web site for details)

13-812-153

Capac.	I.D. × H	Cat. No.	Price
20mL	1 7/16 × 1" (36 × 26mm)	**13-812-151**	Pk. of 10/131.01
100mL	2 3/16 × 1⅞" (56 × 48mm)	**13-812-152**	Ea./12.95
200mL	2 11/16 × 2⅜" (68 × 60mm)	**13-812-153**	Ea./15.45

*Fisherbrand** Nickel Chromium Crucible

Withstand temperatures up to 1000°C (1832°F)

- For volatile matter tests
- Also for ignition, ashing, and incineration purposes where free acids are not present
- Determines volatile matter in coke
- Made of uniform nickel chromium alloy
- Cover sold separately (13-812-121; visit our Web site for details)

13-812-120

ORDERING INFORMATION:
Weight: 7 to 8g

Capac.	Dia. × H	Cat. No.	Each
13mL	1 × 1 5/16" (26 × 34mm)	**13-812-120**	28.10

*Fisherbrand** Zirconium Crucibles

Withstand about 100 two- to five-minute fusions between 460°C (860°F) and 900°C (1652°F)

- Ideal for sodium peroxide fusions conducted by hand over gas flame
- Made from a polished, solid zirconium strip

13-812-122

ORDERING INFORMATION:
2" dia. (51mm) covers are available, but must be requested at time of order.

NOTE:
Temperatures above 900°C (1652°F) will damage and reduce the service life of the crucible.

ALUNDUM*, METALLURGICAL

Saint-Gobain* Alundum* Crucibles

Withstand temperatures up to 1450°C (2642°F)

- For ignitions of carbonaceous material
- AN788 Alundum has high thermal conductivity
- Approximate particle retention size, 0.1µm
- Not suitable for alkali fusions

07-995 Series

Capac.	I.D. × H	Mfr. No.	Cat. No.	Each	Case of 12

*Trademark. See Trademark Reference.

Prices subject to change.

CoorsTek* Alumina Crucibles

Withstand temperatures up to 1750°C (3182°F)

- High-purity (99.8%) recrystallized aluminum oxide
- Nonporous, gas and vacuum tight
- Can be used in oxidizing and reducing atmospheres and with all kinds of metals
- Covers sold separately

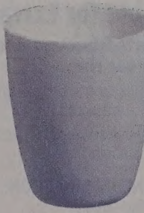
FILTERING-ALUNDUM*, METALLURGICAL

Saint-Gobain* Alundum* Filtering Crucibles

For melting metals and vaporizing liquids

- Not affected by acids or alkalis
- Porous for filtering with suction and holding finest precipitates
- Dry quickly to constant weight
- Available in medium, made from AN889 Alundum; coarse, made from AN485 mix



08-230 Series

Capac.	I.D.× H	Mfr. No.	Cat. No.	Case of 12

FILTERING — GLASS

Kimax* Gooch Filtering Crucibles

Dry precipitates to constant weight at 110°C (230°F)

- At higher temperatures, heat in electric furnace
- Do not remove crucibles until temperature is reduced to about 250°C (482°F)
- Fritted disc
- Avoid exposure to sudden temperature changes
- Coarse (C), medium (M), and fine (F) porosities

ACCESSORIES

Corning* Crucible Holder

For 08-236, 08-236-1, 08-237 Series Crucibles

- Borosilicate glass
- Should be used with 08-239 rubber adapter (sold separately; visit our Web site for details)

08-238A holder and 08-239A adapter plus crucible.

For Crucible	Cat. No.	Price
08-236 Series (15mL)	**08-238A**	Cs. of 6/160.00
08-236-1 Series, 08-237 Series (30mL)	**08-238B**	Ea./56.90

Glass Frit Porosity Chart for Glass Filtering Crucibles

Porosity Grade	Nominal Maximum Pore Size	Principal Uses
Coarse (C)	40 to 60µm	Coarse filtration; mercury filtration. Extraction apparatus.
Medium (M)	10 to 15µm	Filtration of crystalline precipitates. Extraction apparatus. Removal of floaters from distilled water.
Fine (F)	4 to 5.5µm	Fine filtration; mercury valve; extraction apparatus.
Very Fine (VF)	2 to 2.5µm	Clarification of growth bacteria and colloidal particles; plating; soil applications.

FILTERING—PORCELAIN

CoorsTek* Porcelain Gooch Filtering Crucibles

Glazed inside and out except for outside bottom surface

- Perforated bottoms
- Perforations, 1⁄32" dia. (0.7mm) in 13 to 40mL size; 3⁄64" dia. (1mm) in 130mL size
- Covers sold separately

ACCESSORIES

Plasticoid Walter Crucible Holder

Rubber with removable glass stem ground at 45° angle

- Holds 08-195D Gooch Crucible
- Fits neck of filter flasks that take rubber stopper sizes 6, 7, or 8
- Top of glass stem, inside the holder, is flared to collect filtrate
- With glass stem, but without filter flask or crucibles

08-285

ORDERING INFORMATION:
Tapered rubber portion, 1½" (38mm) at top and ⅞" (22mm) at bottom

Cat. No.	Each	Case of 12
08-285	11.98	122.86

CoorsTek* Porcelain Crucibles with Filtering Discs

Disc permanently fused into crucible walls

- Will not disintegrate when in contact with moderately alkaline solutions or acids (except HF)
- Stable porosity and flowrate

ORDERING INFORMATION:
Height: 1 11⁄16" (44mm)

GLASS

*Fisherbrand** Self-Sealing Quartz Crucibles

Withstand temperatures up to 1000°C (1832°F)

10-490-4

- Unique self-sealing lids form airtight seals around the crucible's ground rim
- During a volatiles run, the lid automatically rises to expel accumulated gases
- Lid sinks back to restore the seal and form an oxygen-free atmosphere to prevent sample ashing
- Produces more reproducible results than conventional methods
- During moisture and ash determinations, the lid keeps sample moisture-free
- Eliminate inaccurate weighings caused by moisture uptake
- Perform proximate analysis to determine moisture, volatiles, ash, and fixed carbon on the same sample

Capac.	O.D. × H	Cat. No.	Case of 4
10mL	⅞ × 1 5/16" (22.5 × 34mm)	10-490-4	282.98

Corning* Vycor* Glass Crucibles

Withstand temperatures up to 900°C (1652°F)

- Useful in analytical work
- Ideal where ashing of sample is required
- Withstand up to 1200°C (2192°F) for short periods
- Sudden thermal change will not cause breakage
- Covers sold separately

08-057 Series

CRYOGENICS

VIALS AND ACCESSORIES

*Fisherbrand** Externally and Internally Threaded Cryogenic Storage Vials

Choice of externally threaded vials with HDPE closures for aseptic technique or internally threaded vials featuring polypropylene closures with silicone gasket for tight seal

- Externally threaded vials have a conical-style bottom; self-standing
- Internally threaded vials have conical- or round-style bottoms with a star-style foot; also self standing
- Sterile; not autoclavable
- Noncytotoxic; nonpyrogenic
- Large white writing area
- Graduations in 0.5mL increments
- Use with Fisherbrand Color Coders for easier sample identification

APPLICATIONS:
Suitable for storage of biological materials in mechanical freezers or in the vapor phase of liquid nitrogen

CERTIFICATIONS:
CE marked

NOTE:
Vials are for research use only; not for in vitro diagnosis or parenterals.

*Fisherbrand** Color Coders for Externally and Internally Threaded Cryogenic Storage Vials

Fit into the caps of Fisherbrand Externally Threaded Cryogenic Storage Vials (10-500-25, -26, and -27) or Internally Threaded Cryogenic Storage Vials (12-567-500, -501, -502)

- For color-coded sample identification
- Polystyrene
- Nonsterile

WARNING

Cryogenic vials are intended for placement only in the vapor phase of liquid nitrogen, and should not be used for storage in the liquid phase of liquid nitrogen. Immersion of the vials in the liquid phase could result in penetration of the liquefied gas into the vial, resulting in rapid vaporization of the liquid upon removal and possible violent explosion or leakage from the vial/closure perimeter.

To prevent cryogenic vials from exploding, never overfill liquid nitrogen storage units. Always examine vials before use to ensure no visible defects around the closure rims. Always use full faceshields, heavy safety gloves and laboratory protective apparel when removing vials from cryogenic storage. Always permit vials to warm slowly in a biological safety cabinet. Never reuse cryogenic vials.

Nalgene* Cryogenic Vials

Two-turn deep-skirted screw closure system minimizes contamination

- Polypropylene
- Conical bottoms allow full retrieval of sample
- Vials are self-standing and may be used without holder
- Do not autoclave

Styles

- All vials with high-density polyethylene closures, except 03-337-7X and -7Y, which have polypropylene closures
- System-100 vials 03-337-7X and -7Y also have gasket seats for excellent seals during shipping
- Preassembled, radiation-sterilized vials are noncytotoxic, nonpyrogenic, and have a large white marking area, graduations, and fill line printed on side
- Nonsterile vials without printing and graduations; packed separately from closures

03-337-7N, 03-337-7P

APPLICATIONS:

For cryogenic storage of cell and microbiological cultures, sperm and serum/blood or other biologicals in vapor phase of liquid nitrogen

ACCESSORIES

Cryogenic Vial Closure Color Coders

Fit into top of 1.0, 1.2, 1.5, 1.8, 2.0, or 5.0mL Nalgene* Cryogenic Vial Closures

- Simplify inventory maintenance
- Polystyrene
- Remain firmly in place during storage in mechanical and liquid-nitrogen freezers
- Cut-out top facilitates handling of vials with forceps
- Flat surface for writing

15-350-40 Series

Color	Mfr. No.	Cat. No.	Pack of 100	Case of 5 Pk.
White	5045 0000	**15-350-45**	18.85	62.82

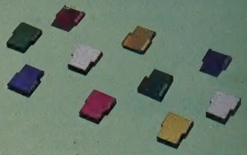
Blue	5045 0003	**15-350-47**	18.85	62.82
Green	5045 0004	**15-350-48**	18.85	62.82
Red	5045 0005	**15-350-49**	18.85	62.82

CryoCane* Color Coders

Slip onto the end of a Nalgene* CryoCane Holder (15-350-20 and 15-350-21, below)

- Use to identify a particular batch of vials or a specific technician's work
- Aluminum
- Remain firmly in place during storage in mechanical or liquid-nitrogen freezers
- Flat writing surface for additional identification



15-350-30 Series through 15-350-39

Color	Mfr. No.	Cat. No.	Case of 100

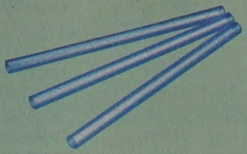
ACCESSORIES

CryoSleeve* Tubing

Clear polyvinyl chloride sleeve encloses a Nalgene* CryoCane* Holder (15-350-20, -21)

- Fits over most other canes
- Will not become brittle during freezing or thawing



15-350-23

Mfr. No.	Cat. No.	Case of 100
5016 0001	**15-350-23**	58.39

Nalgene* Holders

For single-handed capping/uncapping of cryogenic vials

- Polycarbonate holders for 1.0, 1.2, 1.5, 2.0, or 5.0mL vials
- Bottom of each well interlocks with Nalgene Cryogenic Vial's base to prevent vial turning when closure is opened or closed
- Stackable
- Autoclavable

03-337-7E (Vials not included)

Array	Dimensions (L × W × H)	Mfr. No.	Cat. No.	Each	Case of 4
5 × 10	4⅛ × 7⅞ × 1" (10.5 × 20 × 2.5cm)	5030 0510	**03-337-7E**	34.63	92.36
5 × 5	4 × 7¾ × ⅞" (10.2 × 19.7 × 2.5cm)	5030 0505	**03-337-7Z**	35.39	94.37

Nalgene* Wide-Mouth Cryogenic Vial

For storage and retrieval of solid specimens, such as tumor, bone, and organ samples, as well as larger volumes of cell culture and liquid samples

- Made of polypropylene, with high-density polyethylene screw closures
- Self-standing
- Radiation sterilized, noncytotoxic, nonpyrogenic
- Can be used in mechanical freezers only

03-337-7B

ORDERING INFORMATION:

With caps attached in 15 bags of five vials each

COMPLIANCE:

This product is in compliance to Directive 98/79/EC of the European Parliament and of the Council of 27 October 1998 on in vitro diagnostic medical devices.

Capacity	O.D. × H (with closure)	Mfr. No.	Cat. No.	Case of 75
15mL	1 5/16 × 1 13/16" (33 × 47mm)	5005 0015	**03-337-7B**	80.40

Nunc* Externally Threaded CryoTube* Vials

Externally threaded polypropylene vials with deep-skirted polyethylene screw caps

- Sterile
- Nontoxic, nonmutagenic, and nonpyrogenic
- For mechanical freezer and gas phase of liquid nitrogen

Styles

- Self-standing styles with a star-foot design interlock in the CryoTube rack (12-565-178) for one-handed opening and capping
- Standard vials have a body diameter of 12.5mm and a neck of reduced diameter so that even with the cap on, the vial has the same 12.5mm diameter
- Self-standing vials have 12.5mm diameter with 13mm diameter cap
- Both styles have a white marking area for labeling; self-standing vials without a marking area are also available

ORDERING INFORMATION:

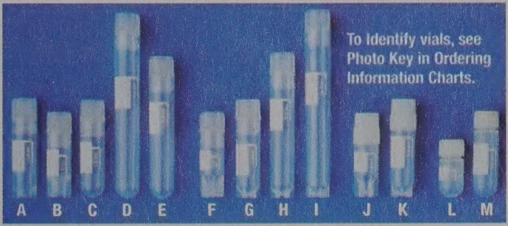
Packed in sleeves of 50

COMPLIANCE:

Meet IATA Dangerous Goods Regulations for the transport of infectious substances and diagnostic specimens

CERTIFICATIONS:

Carries CE mark for containers for samples of human origin



To Identify vials, see Photo Key in Ordering Information Charts.

Nunc* Internally Threaded CryoTube* Vials

Polyethylene cap has silicone gasket for the best possible seal

- Polypropylene
- Available standard or self-standing in two foot styles: solid skirt or star-foot
- Sterile, nontoxic, nonmutagenic, and nonpyrogenic
- Fill line and white marking area for labeling

ORDERING INFORMATION:

Packed in sleeves of 50

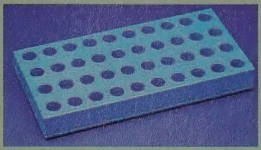
CryoTube* Racks

Hold externally or internally threaded CryoTube vials

- Autoclavable
- 12-565-178 allows vials with self-standing star-foot design to lock into rack for one-handed capping and uncapping



12-565-178

Array	Material	Mfr. No.	Cat. No.	Each	Case of
4 × 10	Polyphenyleneoxide	376589	**12-565-178**	33.88	15/393.24
7 × 10	Polycarbonate	347155	**12-565-179**	72.56	30/1676.00

Nunc* Cryobank and Bank-It* Vial Systems

96 polypropylene CryoTube* vials with a low-binding surface, in a low-profile microplate-format frame (SBS footprint)

NEW

- 14 × 14 array 2D open DataMatrix ECC 200 code is laser-etched into bottom of each 2D-coded vial
- Automation-friendly—code is easily read by instruments; allows for safe sample identification and reading of whole racks in one process
- Vials click firmly into the rack—will not get lost during manual or automated handling
- Two-shot molded screw cap and gasket eliminate risk of overtightening
- Microplate format enables high density storage in low temperature environments
- Can place both 0.5mL and 1.0mL capacity vials in the same rack

Choose from two styles

- **Cryobank vials** for storage of cells and proteins; nonpyrogenic, 10^{-6} sterility assurance level
- **Bank-It vials** for storage of DNA samples

12-570 Series

COMPLIANCE:

CE marked for diagnostic use; DNAse, RNAse free; nontoxic according to USP Class VI test; conform to IATA requirements for the transport of diagnostic specimens, UN packing instruction 602 and 650

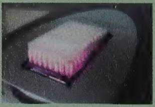
ACCESSORIES

Nunc* 96 Scanner Package for Cryobank and Bank-It* Vial Systems

Simultaneouly scans 2D codes from all vials racked in a 96-well format



12-565-005

- Scanned values are sent to an external file or database
- Software can read most common brands of microtubes (12 × 12 array codes or 14 × 14 array codes)
- Output file can be customized and may be connected to external databases by ODBC data source standard

INCLUDES:
Epson* scanner and software

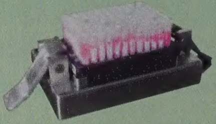
REQUIRED ACCESSORIES:
PC with Windows XP* operating system

Mfr. No.	Cat. No.	Each
330041	**12-565-005**	5750.00

Press Out Tool

Quickly picks multiple vials from rack to avoid thawing of remaining vials

- Cut off corner ensures that rack and press out tool orientation are always aligned
- Selected vials are released by levers and can be easily harvested
- Stainless steel



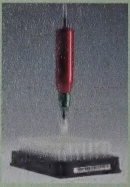
12-565-003 (racked vials sold separately)

Mfr. No.	Cat. No.	Each
374009	**12-565-003**	711.25

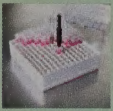
Screwdrivers

Facilitate unscrewing and fastening of caps

Cap is retained by socket, allowing one-handed manipulation of the cap.



12-570-219



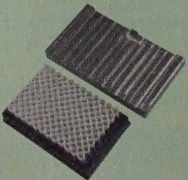
12-570-220

Description	Mfr. No.	Cat. No.	Each
Electric screwdriver, US plug	369641	**12-570-219**	2139.00
Manual screwdriver	369643	**12-570-220**	15.84

Retention Plate

Holds Cryobank and Bank-It* system racks securely for easier vial manipulation

- Recommended for use with electric screwdriver (12-570-219) to prevent rack from turning, while leaving one hand free for pipetting
- Stainless steel



12-565-002 (shown with racked vials, sold separately)

Mfr. No.	Cat. No.	Each
374011	**12-565-002**	278.35

Corning* Cryogenic Vials

Silicone washer provides secure seal

- Polypropylene
- Self-standing vials have slotted skirts allowing vials to lock into place for easy one-handed manipulation in a workstation or rack
- Sterilized by gamma radiation
- Certified RNase-/DNase-free and nonpyrogenic
- Vials have black graduations and large white marking spot
- Accept Corning cap inserts for color coding (see p. 545.)
- Can be used to –196°C (–320.8°F) in vapor phase of liquid nitrogen

09-761-7 Series and 03-374-2 Series

INCLUDES:
50-position polyfoam rack with each case, for easy carrying

Conical bottom, self-standing				
1.2mL	12.7 × 41.6mm	430487	**03-374-20**	500/210.30

WARNING

Cryogenic vials are intended for placement only in the vapor phase of liquid nitrogen, and should not be used for storage in the liquid phase of liquid nitrogen. Immersion of the vials in the liquid phase could result in penetration of the liquefied gas into the vial, resulting in rapid vaporization of the liquid upon removal and possible violent explosion or leakage from the vial/closure perimeter.

To prevent cryogenic vials from exploding, never overfill liquid nitrogen storage units. Always examine vials before use to ensure no visible defects around the closure rims. Always use full faceshields, heavy safety gloves and laboratory protective apparel when removing vials from cryogenic storage. Always permit vials to warm slowly in a biological safety cabinet. Never reuse cryogenic vials.

Corning* Disposable Plug Seal Cryogenic Vial

Plug seal cap provides secure seal

03-374-6

- Translucent polypropylene
- Round-bottom
- Certified nonpyrogenic
- Sterilized by gamma radiation
- Caps do not accept color-coded cap inserts
- Designed for low-temperature storage of cells and biological fluids; can withstand temperatures from –196° to +121°C (–320.8° to +250°F)
- To prevent leakage, store vials in the vapor phase above liquefied nitrogen or other gases

ORDERING INFORMATION:

Supplied in bags of 50 vials, 500 per case

Capacity	O.D. × H	Mfr. No.	Cat. No.	Case of 500
2.0mL	12.2 × 43mm	430289	**03-374-6**	226.91

ACCESSORIES

Color-Coded Cap Inserts

For use with Corning* cryogenic vials except 03-374-6

03-374-36G

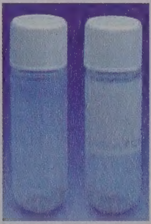
50 vials	431131	**07-200-618**	51.73

Wheaton Cryule* Externally Threaded Cryogenic Vials

- External threads minimize chance of contamination
- Cap attaches to outside of each vial for more efficient utilization of vial capacity; also protects lip and user's hands from contamination from vial contents
- Polypropylene vials with polypropylene screw caps
- Vertical inner wall and conical inner bottom facilitate filling and provide maximum product retrieval
- Choose standard round-bottom style or with freestanding flat base that lets vial stand without support on benches or in 03-341-18S rack (see p. 546) for one-handed cap removal
- Available in sterile or nonsterile round-bottom or sterile freestanding styles
- Ideal for preserving biological specimens under mechanical refrigeration at temperatures as low as -196°C (-320.8°F); also use them as mailing tubes
- Autoclavable at 121°C (249.8°F) for 20 minutes, but caps must be sufficiently loosened or removed to allow pressure equalization upon cooling to prevent wall collapse

Round-Bottom Vials



03-341-18A, 03-341-18

Available sterilized with white marking area or nonsterilized with or without white marking area.

ORDERING INFORMATION:

Nonsterilized vials and caps are packed separately in polyethylene bags; sterilized vials are supplied with caps attached, 50 per bag, 10 bags per case.

*Fisher*brand* Cryo/Freezer Boxes

Choice of boxes and dividers to accommodate tubes from 0.5 to 50mL

03-395-100 Series

Sturdy yet economical

Fisherbrand Cryo/Freezer Boxes and Dividers are made of sturdy white cardboard, with a special moisture-repellent coating to protect them from the effects of liquid nitrogen or condensation from refrigerated equipment. Small holes on the bottom allow for safe drainage of liquid nitrogen or water.

Simple design for versatile use

- Unbreakable white fiberboard to protect samples
- Can be used in mechanical freezers and liquid nitrogen tanks at temperatures to -196°C
- Sized to fit all standard stainless-steel and polycarbonate storage systems
- Surface is easy to write on for identification
- Protective coating prevents water or liquid nitrogen from saturating box for increased longevity
- Tight lid-to-box fit means accidental separation is next to impossible
- Bottom drain holes allow safe drainage of liquid nitrogen, prevent moisture buildup

Choice of sizes and dividers for flexibility

- Three boxes come with dividers in popular configurations
- Four boxes come without dividers: choose the divider you need, replace it with another divider when needs change

APPLICATIONS:

Provide low-cost storage for laboratories in universities, government, medical research and pharmaceutical facilities; in institutions performing artificial insemination, biotech, blood bank and stem cell/bone marrow procedures

ORDERING INFORMATION:

Sold individually, with or without dividers as noted in table.

REQUIRED ACCESSORIES:

Boxes without dividers require Cat. Nos. 03-395-099 or 03-395-104 through -111 (next page).

*Fisherbrand** CombiPack Freezer Racks

Polypropylene racks and boxes suitable for use with 1.5mL conical microtubes, cryogenic vials, and 12mm diameter tubes or vials

- Supplied in a five-level benchtop carrier/workstation unit
- Conical holes in the boxes keep microtubes upright
- Both boxes and racks have frosted writing areas and feature stamped-in alphanumerics for sample identification
- Dimensions L × W × H: 6¼ × 6¼ × 16½" (16 × 16 × 42cm)

CombiPack 405

- Holds up to 405 samples in five 81-section lightweight Maxicold racks
- Clear polycarbonate slip-on lids accept varying tube heights up to 55mm
- Rack colors are pink, blue, green, yellow, and natural

CombiPack 500

- Holds up to 500 samples in five 100-section storage boxes with colored hinged lids
- Box lid colors are blue, green, red, yellow, and natural; also available with all black boxes

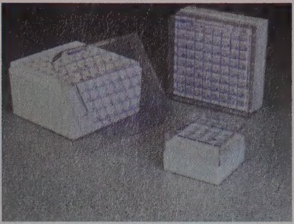
Nalgene* Cryogenic Storage Boxes

Square polycarbonate boxes with lids

- Use in mechanical or liquid nitrogen freezers
- Vented for rapid freeze-down
- Usable temperature range: -196° to +121°C (-320.8° to +249.8°F)
- Box and lid have numerical grid system to keep track of cryogenic vial inventory
- 10 × 10 array box, combined with 03-337-7X (1.0mL, 12 × 38mm) and -7Y (1.5mL, 12 × 48mm) cryogenic vials, increases freezer capacity 23% without increasing size of box



03-337-7J, 15-350-107B, and (bottom) 15-350-107

† Fits 03-337-7X and -7Y tubes. Also holds similarly sized externally threaded microtubes and vials, and most 1.0 and 2.0mL internally threaded vials.

Nalgene* "Mr. Frosty" Freezing Container

Low-cost, nonmechanical freezing unit provides repeatable -1°C/min. cooling rate for successful cryopreservation and recovery

- Labeled with graphic, step-by-step instructions
- Rigid, floating vial holder isolates vials from alcohol, preventing contamination of samples by wicking
- For thawing of samples, holder can be removed from container and transferred to water bath

ORDERING INFORMATION:
Container has 4¾" diameter (120mm) closure

REQUIRED ACCESSORIES:
Isopropyl alcohol and a mechanical freezer

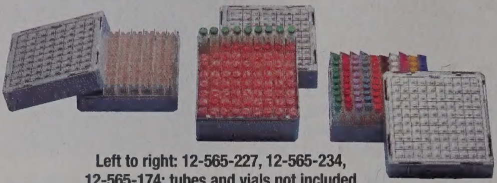
Nunc* MAX Storage Boxes

For CryoTube* vials and microcentrifuge tubes



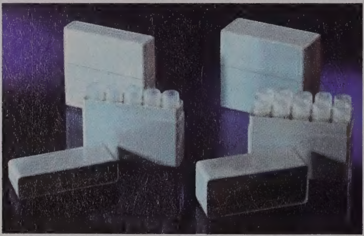
Left to right: 12-565-227, 12-565-234, 12-565-174; tubes and vials not included

- Molded polycarbonate
- For use in mechanical or liquid nitrogen freezers at temperatures to -196°C (-320.8°F)
- Stackable, impact-resistant units fit most rack storage systems
- Provide 23% more storage than many boxes of comparable size
- Printed grid on top for easy identification of contents
- Dividers can be removed completely for storage of larger containers
- Storage box 12-565-174 has a 10 × 10 divider that stores 100 internally threaded CryoTube vials
- 12-565-227 box has an 8 × 8 divider that stores up to sixty-four 1.5mL microcentrifuge tubes with caps

Accepts	L × W × H	Mfr. No.	Cat. No.	Pack of 4	Case of 6 Pk.
Hold 100 Internally Threaded CryoTube Vials					
1.0 to 1.8mL	5¼ × 5¼ × 2⅛" (13 × 13 × 5.4cm)	374187	**12-565-174**	46.02	236.00
3.6mL	5¼ × 5¼ × 3¹⁄₁₆" (13 × 13 × 7.8cm)	341483	**12-565-234**	55.14	282.75
Hold 64 Microcentrifuge Tubes w/caps					
1.5mL	5¼ × 5¼ × 2⅛" (13 × 13 × 5.4cm)	330821	**12-565-227**	44.70	229.25

Nunc* Transport Boxes for CryoLine*

Ideal for transport or storage of CryoTube* vials from 1.0 to 1.8mL



12-565-184, 12-565-185

- Constructed of high-impact polystyrene
- Keep special samples separate
- Available in two sizes
- Nonsterile

Holds	Mfr. No.	Cat. No.	Case of
5 CryoTube Vials	534479	**12-565-184**	350/631.75
10 CryoTube Vials	534592	**12-565-185**	200/455.00

Nunc* Polyethylene-Coated Chipboard Storage Boxes

Sturdy boxes store 1.0 to 4.5mL externally and internally threaded CryoTube* vials at temperatures to -196°C (-320.8°F)

- Fit standard rack systems
- Supplied with dividers and vented for good drainage
- Choose from 25-, 81- or 100-vial capacities

12-565-183 and 12-565-182

Nunc* Storage Box for Cryobank and Bank-It* Vial Systems

White cardboard box holds 169 vials in a 13 × 13 grid

12-570-218 (racked vials and screwdriver sold separately)

L × W × H	Mfr. No.	Cat. No.	Case of 48
5 × 5 × 2" (13.2 × 13.2 × 5cm)	369640	**12-570-218**	372.46

Nunc* Microplate Storage Racks for Cryobank and Bank-It* Vial Systems

Accommodate 0.5 and 1.0mL Cryobank and Bank-It racks

- Shelves are adjustable, allowing storage of a mixture of 0.5 and 1.0mL racks
- Alignment rod on the front side secures plates and allows for barcode reading
- Aluminum
- Autoclavable
- Also accommodates microplates, low-profile microplates, and DeepWell* plates

Corning* Cryogenic Vial Storage Boxes

For storage of internally and externally threaded vials in temperatures to –196°C (–320.8°F)

- Durable polycarbonate
- Vented for drainage, stack interchangeably, and feature large labeling area
- Clear silk-screened lid features nonreversible design and numeric grid to prevent misalignment of lid and provide easy identification of vials
- Autoclavable at 121°C (249.8°F)

07-200-615

INCLUDES:

Unique vial handler for easy removal of vials with each case

Accepts	L × W × H	Mfr. No.	Cat. No.	Pack of	Case of 2 Pk.
Hold 81 Internally or Externally Threaded Vials					
1.0 to 2.0mL	5¼ × 5¼ × 2" (13.3 × 13.3 × 5.1cm)	431119	**07-200-615**	5/52.00	92.78

Wheaton Cryule* Disposable Freezer Boxes

Hold 81 externally threaded Cryule Round-Bottom Cryogenic Vials with Screw Caps (03-341-18, -18A, -18B, and -18C)

- Cardboard boxes withstand liquid nitrogen temperatures to -196°C (-320.8°F)
- Use in freezers or at room temperature
- Eliminate cleanup and provide easy handling of vials during filling

12-009-30 (top);
12-009-31 (bottom)

Accepts	L × W × H	Mfr. No.	Cat. No.	Pack of 15
03-341-18B	5 × 5 × 1¼" (12.7 × 12.7 × 3.2cm)	651490	**12-009-30**	94.35
03-341-18C, -18, -18A	5 × 5 × 1¾" (12.7 × 12.7 × 4.4cm)	651492	**12-009-31**	72.35

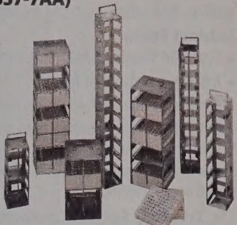
Thermo Scientific* Stainless-Steel Ultralow Temperature Freezer Racks

For use with 2.0mL or smaller vials in 2"H (5.1cm) cardboard or cryoplastic boxes (see Nalgene* Cryogenic Boxes 11-676-3 Series and 03-337-7AA)

- For storage in liquid nitrogen or mechanical freezers
- Stainless-steel retaining rod prevents accidental spilling of boxes from rack

ORDERING INFORMATION:

Racks for 25-vial (5 × 5 array) boxes are 3 5/16L × 3 5/16"W (8.4 × 8.4cm). Racks for 81-vial (9 × 9 array) and 100-vial (10 × 10 array) boxes are 5 9/16L × 5 9/16"W (14.1 × 14.1cm).



11-670-18 and -19 Series; boxes not included

NOTE:

These racks are not to be used with Thermo Scientific* Locator* or Locator Plus vessels.

Argos* PolarSafe* 100-Place Light Sensitive Cryo Box

All-black polypropylene storage box ideal for light-sensitive samples

- Holds 0.5, 1.5, and 2.0mL microtubes as well as most brands of vials
- Taller than other available storage boxes to accommodate vials or tubes up to 2⅛" (5.35cm) high
- Lid has alphanumeric grid for sample identification
- Matte surfaces on box sides are suitable for marking or labeling
- Stackable
- Withstands conditions to -112°F to +249.8°F (-80°C to +121°C)

03-391-206

Accepts	L × W × H	Mfr. No.	Cat. No.	Pack of 5	Case of 10 Pk.

LN$_2$ FREEZERS AND STORAGE SYSTEMS

Thermo Scientific* Forma* CryoMed* Freezers

Precise, controlled-rate freezing from -180°C to +50°C for maximum accuracy of cell freezing

With six standard preset and 10 user-defined (20 steps each) freezing profiles that can be modified for custom protocols.

Cabinet Features

- Type 304 stainless-steel construction
- Exterior powder-coat finish
- Foamed in-place polyurethane insulation
- Bulb-style gaskets ensure tight door seal; PTFE heat-breaks prevent door from freezing closed
- Some front and top access models are designed for human IVF and easy "seeding"

LN$_2$ Freezing System Components

- Intuitive control panel and integrated thermal printer
- Dual solenoid valves increase LN$_2$ injection volume for precise temperature control and accelerated freezing for optimum cell viability
- Specially designed air handling system and liquid nitrogen ring work in tandem for precise temperature control and uniformity
- Overtemperature protection on heating element

Easy Programming and Monitoring

- Chamber and sample temperatures and operation status simultaneously display on backlit LCD; chamber temperature monitored by fixed-mount Type T thermocouple, sample temperature monitored by Type T thermocouple with flexible cable (included)
- Pre-Cool step automatically begins temperature ramp when chamber and sample temperatures are equilibrated within 1°C
- Audible indicators alert operator when hold time has elapsed
- Continual operation if power outage lasts less than 10 seconds; audible/visual alarm for outages lasting longer than 10 seconds
- Modifiable access code for added security

TF7450 Series

INCLUDES:

6' (1.8m) stainless-steel transfer hose, thermal paper, 25-pin to 9-pin serial interface cable/adapter, and 10' (3m) RS-232 cable

Note: All Thermo Scientific* CryoMed Freezers come with Controlled Rate Freezing PC Interface software for connection to IBM*-compatible computer and external printer—download profiles and capture graphs, profile, and sample information (computer and external printer sold separately; contact your Fisher Scientific Customer Service Representative).

Thermo Scientific* Forma* CryoPlus* LN_2 Storage Systems

Low-profile storage tanks combine liquid nitrogen storage reliability with microprocessor technology

TF7400, TF7406, TF7404, TF7402

- Standard temperature sleeve for cold temperatures and efficient vapor phase operation
- Autofill

Microprocessor Features and Capabilities

- Easy, precise, and accurate liquid level control over all 16 parameters
- Top-mounted control panel for convenient access to microprocessor control and easy programming via touchpad
- Digital temperature display located under the lid indicates highest temperature reading inside tank
- 24 tri-color LEDs continuously display actual liquid nitrogen level and high level/low level setpoints
- Alarm contacts for remote monitoring of storage tank conditions

Durable Construction

- Double-walled, vacuum-insulated, stainless-steel LN_2 storage tanks
- Liquid level sensor and fill port located within vacuum space, ensuring maximum storage area and protecting sensor
- Exterior cabinet constructed of 18 gauge, cold-rolled steel with powder-coated paint
- Counterbalanced lid with foamed-in-place, high density polyurethane insulation; patented, dedicated vent; 100% clearance
- Two independent, flexible lid gaskets reduce moisture migration into the chamber
- Convenient, front-mounted key lock and rear-mounted recessed power switch provide product security; control panel can also be locked
- Heavy-duty casters

INCLUDES:

Model 1 has ½" 45° flare, 4' (1.2m) flexible hose. Models 2, 3, and 4 come with ½" 45° flare, 6' (1.8m) flexible hose.

REQUIRED ACCESSORIES:

Inventory systems of racks, canisters, and frames are available separately.

PORTABLE LN$_2$ CONTAINERS

Thermo Scientific* Locator* Plus Cryobiological Storage Systems

11-676-59, 11-676-55, 11-676-56, 11-676-71; cart not included (see next page)

Systems incorporate all the features of Locator Cryobiological Storage Systems (next page), plus increased working liquid nitrogen andvial capacities

- Locator Jr. Plus and Locator 8 Plus accommodate up to 2000 vials
- Locator 4 Plus holds up to 4000 vials
- High-capacity Locator 6 Plus is ideal for compact storage of up to 6000 vials

INCLUDES:

Indexed stainless-steel racks designed for use with Nalgene* Cryogenic Boxes (larger racks available for storage of 5.0mL ampules in Locator Jr. Plus and Locator 4 Plus).

Each system is available with or without Liquid Nitrogen Level Monitor (monitor can also be purchased separately).

REQUIRED ACCESSORIES:

Nalgene Cryogenic Boxes (03-337-7AA, 11-676-61, -3A, -3B, -3C; order separately)

hermo Scientific* Locator* Cryobiological Storage Systems

11-676-1C, 11-676-1A, 11-676-1B; cart and boxes not included (for cart, see below)

nventory system that makes cell sample retrieval uick and easy

- Compact design minimizes space requirements while maximizing storage capacity
- Super-insulated vessels have special, narrow-mouth design that conserves liquid nitrogen by minimizing evaporation
- Optional sonar-equipped Liquid Nitrogen Level Monitor mounts directly to vessel lid, never contacts liquid nitrogen (order separately)
- Monitor provides continuous LED readout of liquid nitrogen level, activates visual and audible alarms when level falls below safe range of approximately 1" (2.5cm)
- Alarm also alerts operator in the event of excessive liquid nitrogen loss
- Locator 4 is ideal for large-capacity, general-purpose applications
- Locator 8 is specially designed for applications where the system is shared among researchers or research projects
- Locator Jr. can be used where less capacity is needed

INCLUDES:
Stainless-steel indexed racks that fit into corresponding locations in the vessel. Each rack has individual storage compartments that hold one Nalgene* Cryogenic Storage Box.

REQUIRED ACCESSORIES:
Nalgene Cryogenic Storage Boxes (03-337-7AA; 11-676-61, -3A, -3B, -3C); each box has individually numbered storage areas for use with vials sized 2.0mL and smaller. (Boxes must be ordered separately.)

ACCESSORIES

Thermo Scientific* Locator* Plus Liquid Nitrogen Level Monitor

Ultrasonic monitor for Locator Plus Cryobiological Storage Systems

- Ultrasonic device eliminates contact with LN$_2$ to reduce conduction and LN$_2$ evaporation
- LED panel gives at-a-glance reading of liquid nitrogen levels
- Low level indicator flashes when volume drops to 2" (5.1cm); indicator flashes and audible alarm activates when volume falls below safe range of approximately 1" (2.5cm)
- Continuous alarm sounds in the event of excessive liquid nitrogen loss; can be connected to building alarm system to provide remote warning of vacuum failure
- Unit is mounted directly on vessel lid, never contacts the liquid nitrogen

ORDERING INFORMATION:

Thermo Scientific* Forma* CMR/CMC Portable LN$_2$ Storage Containers

Cost-effective containers have high storage capacities but minimum LN$_2$ consumption—ideal for long-term storage

- Constructed of durable, lightweight aluminum with vacuum insulation
- CMR Series containers include racks; CMC Series containers have canisters
- Color-coded/numbered inventory systems make sample retrieval easy and reduce the risk of misplacing specimens
- Lockable clasp (lock not included) for specimen security
- Accessories such as low level alarms with remote contacts are available

REQUIRED ACCESSORIES:
Straws are available separately.

Thermo Scientific* Forma* CMD LN_2 Dry Shipping Containers

Provide stable temperature and long holding time for safe and reliable sample transport

Thermo
SCIENTIFIC

TF8039, TF8040, TF8032

- Interior is lined with absorbent material that allows samples to be transported in dry vapor condition, eliminating LN_2 spillage
- Container itself is constructed of lightweight aluminum with vacuum insulation
- Retain temperatures as low as -190°C (-310°F)
- Easy-to-grasp handle
- Lockable clasp (lock not included)
- Models 8039 and 8040 include racks and canister for easy transfer of small quantities of 2mL vials
- Model 8032 includes cardboard shipping container—use for transporting bone marrow, heart valves, and oversized samples (optional hard shell shipping container available for Model 8032 [TF195460])

Looking for more Dewar Flasks?

Additional Dewars are located in the Flasks section.

Thermo Scientific* Transfer Vessels for Liquid Nitrogen

Lightweight design makes these vessels ideal for everyday laboratory use

- Provide safe and efficient storage and handling of liquid nitrogen
- Narrow neck and vacuum insulation keep evaporation rates low
- Durable aluminum, double-wall construction ensures years of trouble-free service even with the rough handling associated with portable cryogenic equipment
- Pail-style handle on the Thermo 5 and 10 makes pouring easy even in hard-to-reach places
- Thermo 20 and 30 offer a lightweight design and low liquid nitrogen consumption rate in a larger Dewar
- Thermo 35 and 50 are pressurized cylinders designed for researchers who need a continuous source of liquid nitrogen, but lack space for larger cylinders
- Relief valve setting on the 35- and 50-liter models is 22psi

AY509X19	**11-675-96**	17.21

Thermo Scientific* Thermolyne* CryoClaw* Ampule Remover

Heavy-duty, stainless-steel gripping device

11-675-95

- Rubber suction cups retrieve ampules or boxes that fall from racks or cans into cryogenic vessels
- Can also be used to reach overhead items or to safely move radioisotopes without touching containers
- Length 41" (104cm)

Mfr. No.	Cat. No.	Each
AY509X18	**11-675-95**	142.03

Thermo Scientific* Thermolyne* Arctic Express* Shipper/Lab Storage Vessels

Allow dry liquid nitrogen transport of nonhazardous samples for up to 30 days

- When filled with liquid nitrogen and placed in the laboratory, unit can be used as a "can and cane" storage system indefinitely with static holding times of up to 125 days
- Lockable lid
- Aluminum vessel holds six numbered, color-coded, stainless-steel cans (included), which accommodate canes that hold ampules
- Dual 10 and 28 models have a reusable Styrofoam*-insulated plastic shipping case to prevent damage
- Weights listed are when the vessel is empty of liquid nitrogen, but includes the six can containers

WARRANTY:
36-month vacuum warranty

Thermo Scientific* Thermolyne* Arctic Express* 10 Cryogenic Sample Shipper

Designed for safe shipping of cryogenically frozen samples

- Unique binding agent absorbs and secures all liquid nitrogen around samples, prevents spillage if vessel is tipped on its side
- Lightweight, yet built to withstand rough handling during shipment
- Vessel holds eighteen 2.0mL ampules and 1⅛ gal. (4.3L) LN$_2$
- 21-day holding time ensures fully frozen samples on delivery

ORDERING INFORMATION:
Net weight: filled, 20 lb. (9.1kg); empty, 13 lb. (5.9kg)

INCLUDES:
Reusable shipping case

ThermoSafe* DG and DS Cryogenic Shippers

Fully comply with DOT regulations and IATA Packing Instructions for air transport of infectious substances and diagnostic specimens

- Use dry vapor liquid nitrogen to preserve specimens at temperatures of -150°C (-238°F) for up to 20 days (static holding time) or 12 to 16 days (shipping time)
- One-piece, tip-tolerant design is leak resistant and eliminates the need to purchase a separate exterior shipping case; rugged HDPE outer case has all-aluminum cryogenic vacuum interior
- Patented screw closure seals in residual liquid nitrogen, yet allows vapor to vent if necessary
- Multiple-layer polyethylene plug provides thermal insulation between specimen and screw closure
- Competitively priced and comprised of durable components for years of operation
- Weigh 18 lb. (8kg) when empty; return shipping can be done at a minimal cost
- Ready to use in only four hours
- DS (Diagnostic Specimens) model meets IATA Packing Instruction 650
- DG (Dangerous Goods) model meets IATA Packing Instruction 602 and 650

03-522-51 (left) and 03-522-50 (right)

INCLUDES:

Three secondary containment bags, three absorbent pouches, three security tags, three packages of diagnostic specimen or infectious substance labels, three packages of directional labels

CUSTOM SERVICES

Fisher Scientific is your one-stop provider of Custom Services for Life Science

Our custom services offer you cost-effective solutions, allowing you to focus on core activities

Life Science research requires products with exacting specifications. If you can't find the product you need, let Fisher Scientific help you find the solution that meets your requirements—from custom antigen design to chemical and DNA synthesis.

Our portfolio of custom services includes:

GENOMIC SERVICES:

RNA/Microarray from Genome Explorations*

- Sample Preparation
- siRNA Vector Construction
- High Efficiency Profiling
- Data Analysis
- **www. fishersci.com/lifescience/custserv**

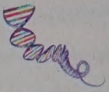
Custom DNA Synthesis from Operon*

- Custom Oligos
- Sequencing/Resequencing
- Custom PCR Kits
- DNA Methylation Analysis
- **www.fisheroligo.com**

Custom DNA Packages from SeqWright*

- siRNA Vector/Expression Cassette Construction
- Custom Cloning
- Site-Directed Mutagenesis
- cDNA Services
- **www.fishersci.com/lifescience/custserv**

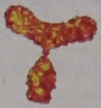
DNA Sequencing Services from SeqWright*



- Primer Extension Sequencing
- High-Throughput Sequencing
- DNA Methylation Analysis
- Serial Analysis of Gene Expression (SAGE)
- **www.fishersequencing.com**

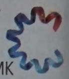
PROTEOMIC SERVICES:

Antibodies on Demand from Affinity BioReagents*



- Custom Production
- Antibody Purification
- ELISA Titers
- Antigen Conjugation
- **www.fishersci.com/lifescience/custserv**

Custom Peptides from American Peptide*



- Peptide-Protein conjugation
- Peptide labeling AMC, aldehyde, CMK
- Heavy Peptide* AQUA Kits
- FAM/FJTC/TAMRA Labeling
- **www.fishersci.com/lifescience/custserv**

ORDERING INFORMATION:

Visit our Fisher Scientific Custom Services Web site at: **www.fishersci.com/lifescience/custserv** to learn more about these services.

GENOMIC SERVICES

Genome Explorations* Microarray Services

Complete solutions for gene expression profiling

Cost-effective services for the academic, biotechnology, and pharmaceutical industries, from experimental design to advanced data analysis and bioinformatics. Using your minimally prepared RNA, we can provide reproducible differential expression data with high sensitivity for low copy numbers. Our expert staff runs a series of quality control tests on each sample of extracted RNA, including hybridization of the sample to a test array. Upon successful processing, we will work one-on-one with you to conduct a customized data analysis.

Featured Services Include:

- Complete sample preparation
- High efficiency profiling using the Affymetrix* Gene Chip* platform
- Complete, unfiltered expression profiles
- Advanced data analysis

To Bring You:

- Increased productivity
- High quality gene expression data in a few days
- Raw data for further in-house analysis
- Easy-to-interpret reports
- Standard platform

ORDERING INFORMATION:

To order, simply provide 10 to 20µg of total RNA for each sample that you would like to have processed. For a complete listing of services and capabilities, visit **www.fishersci.com/lifescience/custserv.**

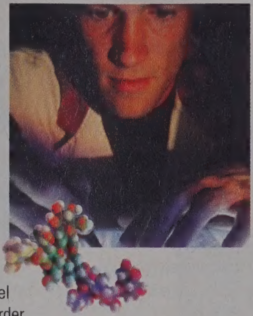
LOOKING FOR MORE SERVICES?

For other services Fisher Scientific provides, see the Services section. For chemical services, see the Chemicals section.

*Trademark. See Trademark Reference.

Operon* Custom Oligonucleotides

Wide variety of affordable, high quality oligos



Choose from a full range of long-mers and modified oligos in a ariety of scales, formats, and urification levels. Our technology, xperience, and capacity are nparalleled in the industry, bring-ng you unsurpassed quality and ervice. Custom DNA is produced sing optimized phosphoramidite hemistry and reagents of the high-st quality. Proprietary synthesis latforms provide computer-ontrolled oligo synthesis, cleavage, eprotection, and desalting in a parallel rocessing format. You can place an order irectly on our Web site or use our down-adable email forms. Our rapid turnaround time is made ossible through quick order processing and fully automated synthesis.

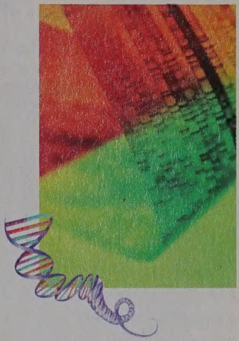
- High coupling efficiency, salt-free synthesis
- High quality longmers
- Fast turnaround times
- Easily scalable production
- GC rich/difficult templates
- Competitive pricing
- Dual-labeled probes
- Superior quality without the need for additional purification
- Unique longmer capability
- Reliable service for any order size
- High capacity and flexibility

RDERING INFORMATION:

isit **www.fisheroligo.com** to access state-of-the-art Nucleic Acid ynthesis Technology. You will find information on our products and ervices, as well as links to product literature and helpful online tools. ur Oligo Microarray Database (OMAD) provides information on each esigned oligo and its representative gene or open reading frame (ORF).

SeqWright* DNA Sequencing Services

Fast, reliable and high quality



From large-scale genome projects to FDA submissions, we offer a complete range of cost-effective solutions with a guaranteed accuracy of 100%. Choose from an array of options including DNA sequencing, SNP discovery, shotgun library construction, genotyping, quantitative PCR and DNA synthesis. Proprietary sequencing chemistry enhances mutation detection protocols, allowing rapid and consistent analysis of a large number of samples.

Featured Services Include:

Primer Extension Sequencing

- 24-hour production turnaround
- Accommodate single tube reactions to high-throughput reactions
- Samples may be submitted as cells or DNA
- Automated fluorescent dye-terminator sequencing
- Universal primers available for most common vectors
- Phred data analysis

High-throughput Sequencing

- Custom packages
- Customers can enter the production workflow at any stage
- Technical advisors available to assist package design

ORDERING INFORMATION:

For ordering, visit **www.fishersequencing.com.**

---

ustom DNA Packages from SeqWright*

iRNA vector and expression cassette construction

u select the target, we'll do the rest. We offer customizable siRNA vector construction services for gene lencing studies of any construct. Our vector construction services include target design through final product.

RNA Construction

- Target design
- DNA oligo synthesis
- Cloning
- Double-stranded confirmation sequencing
- Viral particle production and purification

RNA Expression Cassette onstruction

- Design of four target regions
- DNA oligo synthesis
- PCR amplification and purification
- Final product ready for transfection

To Bring You:

- Final product confirmed by DNA sequencing
- Multiple siRNAs for each target gene—you choose the one that yields the best silencing
- Flexibility—you select the target sequence and promoter for optimal gene silencing
- Integral restriction sites for effective cloning into a vector

Custom Cloning

- We can introduce any mutation, including single-or multiple-site deletions, insertions, and substitutions, into your gene of interest
- All gene alterations are confirmed by DNA sequencing
- Custom subcloning and construction of recombinant vectors is also available.
- Turnaround for most services is two to three weeks

ORDERING INFORMATION:

For a complete listing of cloning/subcloning and cDNA options or to place an order, visit **www.fishersci.com/lifescience/custserv.**

PROTEOMIC SERVICES

Custom Peptide Services from American Peptide*

Expanding the frontiers of peptide products

Fisher Scientific provides competitive pricing of peptides with a rapid turnaround. We offer custom synthesis from simple to highly modified peptides. Our high quality production facility uses the latest technologies to support your research.

We Specialize In:

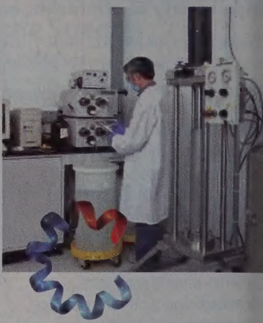
- Peptide-protein conjugation
- Complex peptides/ peptidomimetrics
- Peptide labeling AMC, aldehyde, CMK
- Heavy Peptide* AQUA kits
- FAM/FJTC/TAMRA labeling
- Calorimetry mass spec analysis
- Special amino acids and their derivatives
- Phosphorylated/Biotinylated structures
- Solid Phase/Solution/Segment coupling
- Pharmaceutical grade peptides
- Chromogenic/Fluorogenic substrates
- Quantities to kilograms
- Multiple disulfide bridges
- Purity from crude to 98%
- PEGylation

Featured Services Include:

- Functional peptides
- Heavy peptide synthesis
- Customer support from design phase to synthesis strategy
- Conjugation, packaging, documentation
- No additional charge for setup, acetylation or amidation
- Certificate of analysis, HPLC chromatogram, MS chromatogram
- Additional QC analysis provided on request

To Bring You:

- Cost-effective processing
- Guaranteed quality
- Customized reporting
- Complete and collaborative support
- Synthesis of especially complex biopolymers



ORDERING INFORMATION:

For more detailed information or to place an order, visit **www.fishersci.com/lifescience/custserv.**

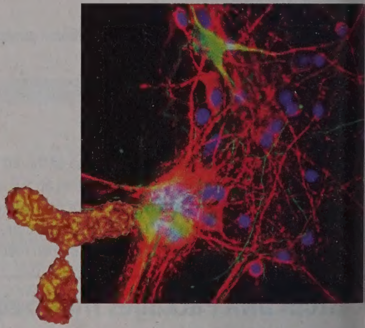
Custom Antibody Services from Affinity BioReagents*

Your complete antibody solution

Antibody production requires strong design and application knowledge. Our Antibody on Demand* program ensures ongoing management and support from start to finish for optimum performance of your custom antibody project. A variety of production plans let you select the elements you need for optimal cost management.

Create Your Own Plan

Affinity BioReagents Antibody on Demand Custom Antibody Production Services allow you to control your project from start to finish. Just provide ABR with your protein sequence, Accession number, peptide, or protein, and ABR's laboratory professionals will produce your custom antibodies. ABR offers a range of inclusive plans that provide the most efficient, versatile and cost-effective antibody production in the industry. Whether you are interested in a different host animal or multiple extension bleeds, ABR will work with you to make your project a success. Choose the plan that best meets your research needs or supply ABR with your own plan.



Featured Services Include:

- Antigen Design
- Peptide Synthesis
- Antigen Prep
- Production Bleeds
- ELISA Titers
- Affinity Purification
- SDS-PAGE Analysis
- Comprehensive Reporting

To Bring You:

- Nearly two decades of custom production expertise
- Cost containment—choose only the services you need
- Optimum performance of your project
- Unequaled customer support

ORDERING INFORMATION:

Simply provide your protein sequence, accession number, peptide or protein, and ABR-Affinity BioReagents will produce your antibody, complete with a comprehensive antibody performance report. For more information on custom products and services, visit **www. fishersci.com/lifescience/custserv.**

CYLINDERS

GLASS-CALIBRATED "TO DELIVER"

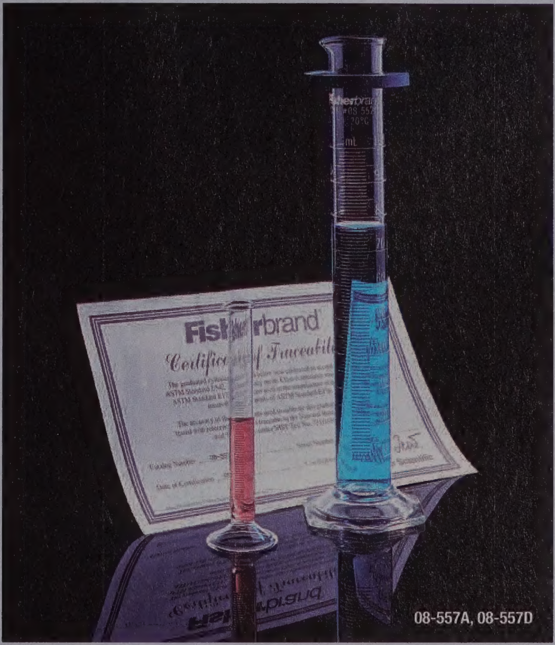
***Fisher**brand** Serialized Class A Cylinders

Calibrated "To Deliver"

- Individual serial numbers
- Calibrated in accordance with ASTM* E 542
- Accuracy is assured even at the lowest graduations
- White scale
- Molded hexagonal base keeps cylinder from rolling off the benchtop
- Bumper guards on sizes 25 through 500mL

Compliance

Glass meets the requirements of ASTM E 438; Cylinders Support ISO-9000 documentation requirements; meets ASTM E 694 specifications, and the accuracy requirements of ASTM E 1272.



08-557A, 08-557D

With Certificate of Traceability

INCLUDES:

Certificate that indicates cylinder is individually calibrated and certified against equipment whose calibration is traceable to the National Institute of Standards and Technology (NIST); lists the weight set used, the test number, and the date of testing.

Capac.	Subdiv.	Tol.	Approx. Height	Cat. No.	Each	Case of
10mL	0.1mL	±0.10mL	175mm	**08-557A**	69.79	6/370.57
25mL	0.2mL	±0.17mL	200mm	**08-557B**	75.93	6/403.15
50mL	1mL	±0.25mL	225mm	**08-557C**	77.03	6/408.99
100mL	1mL	±0.40mL	255mm	**08-557D**	83.26	6/442.09
250mL	2mL	±0.50mL	330mm	**08-557E**	94.58	4/334.80
500mL	5mL	±1.0mL	375mm	**08-557F**	113.35	4/387.51
1000mL	10mL	±6.0mL	460mm	**09-730-30**	133.49	2/228.19
2000mL	20mL	±2.0mL	520mm	**08-557H**	195.87	----

With Certificate of Calibration

INCLUDES:

Individual fused-in serial numbers and, in addition to traceability certification, are supplied with Certificates of Calibration that list apparent volumes and calibration correction factors.

Capac.	Subdiv.	Tol.	Approx. Height	Cat. No.	Each	Case of
10mL	0.1mL	±0.10mL	175mm	**08-557AC**	226.93	6/1163.73
25mL	0.2mL	±0.17mL	200mm	**08-557BC**	231.20	6/1185.62
50mL	1mL	±0.25mL	225mm	**08-557CC**	231.78	6/1188.60
100mL	1mL	±0.40mL	255mm	**08-557DC**	236.76	6/1214.15
250mL	2mL	±0.50mL	330mm	**08-557EC**	257.00	4/878.64

1000mL	10mL	±6.0mL	460mm	**09-730-31**	319.14	2/545.54
2000mL	20mL	±2.0mL	520mm	**08-557HC**	334.19	----

Pyrex* Certified/Serialized Class A Cylinders with Metric Scale

Calibrated "To Deliver"

- Individual serial number
- Easy-to-read permanent white graduations
- Bumper guards with 25 through 2000mL sizes
- 10mL size has a funnel-shaped top

INCLUDES:

Certificate of Identification and Capacity traceable to standards provided by NIST*.

COMPLIANCE:

Class A tolerances in accordance with ASTM* E 1272 and E 542.

08-553A

Capac.	Subdiv.	ASTM Tol.	Approx. Height	Mfr. No.	Cat. No.	Each

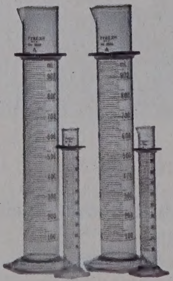
Pyrex* Class A Cylinders with Double Metric Scale

Calibrated "To Deliver"

- Double scale in durable white or blue enamel
- Shock-absorbing polyethylene bumper guards

COMPLIANCE:

Class A tolerances in accordance with ASTM* E 1272 and E 542.



08-549-11F, 08-549-11C, 08-549-11M, and 08-562-6

Kimax* Serialized Class A Cylinders with Single Metric Scale

Calibrated "To Deliver"

- Individual serial number
- Durable white scale
- SafeGard* bumpers, with all but 10mL size
- 10mL size has enlarged funnel top for easy filling

INCLUDES:

Certificate of Graduation Accuracy

COMPLIANCE:

Designed from ASTM* E 1272, Style 1, Class A requirements; meet accuracy requirements of ASTM E 694.

08-548E

Capac.	Subdiv.	Tol.	Approx. Height	Mfr. No.	Cat. No.	Each	Case of
10mL	0.1mL	±0.09mL	165mm	20026 10	**08-548A**	97.47	6/426.90

*Fisherbrand** Standard Class B Graduated Cylinders

Calibrated "To Deliver"

- White-ceramic graduations
- Heavy round bases
- Handy pouring spouts
- Accuracy is assured even at the lowest graduations; first 10% volume is not graduated

Capac.	Subdiv.	Tol.	Approx. Height	Cat. No.	Each	Case of
5mL	0.1mL	±0.1mL	120mm	**08-550A**	17.10	36/492.50

1000mL	10mL	±6.0mL	460mm	**08-550H**	67.46	8/477.61
2000mL	20mL	±12.0mL	520mm	**08-550J**	111.46	6/571.59

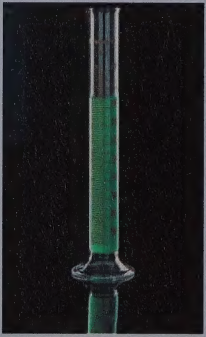
*Fisherbrand** Class B Cylinders with Single Amber Metric Scale

Calibrated "To Deliver"

- Ideal for use with light-colored liquids
- Dark amber graduations provide contrast for easy readings
- Heavy round bases and pouring spouts
- Accuracy is assured even at lowest graduations; first 10% of volume is not graduated

COMPLIANCE:

Designed from ASTM* E 1272, Style 1, Class B requirements.



08-570E

Capac.	Subdiv.	Tol.	Approx. Height	Cat. No.	Each	Case of
5mL	0.1mL	±0.1mL	120mm	**08-570A**	16.72	36/481.64

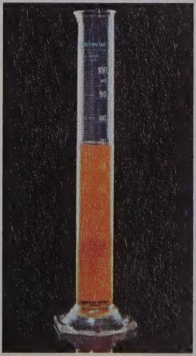
1000mL	10mL	±6.0mL	**08-555G**	60.05	8/339.12

PyrexPlus* Class B Cylinders with Single Metric Scale, Protective Coating

Calibrated "To Deliver"

- PVC coating for longer life and safety
- Autoclavable to 121°C (250°F) moist heat or 110°C (230°F) dry heat
- Resistant to thermal shock
- White graduations
- Without bumper guards



08-562-10C

Capac.	Subdiv.	ASTM* Tol.	Approx. Height	Mfr. No.	Cat. No.	Each	Case of
100mL	1mL	±1.0mL	254mm	63024 100	**08-562-10C**	42.52	4/116.71

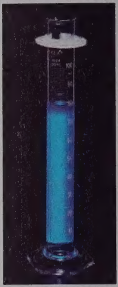
WARNING

Do not place over direct heat or flame.

Pyrex* Class B Cylinders with Single White-Enamel Metric Graduations

Calibrated "To Deliver"

- Bumper guards with 25 through 2000mL sizes
- Capacities of 5 and 10mL have funnel tops



08-552-4C

Capac.	Subdiv.	ASTM* Tol.	Approx. Height	Mfr. No.	Cat. No.	Each
5mL	0.1mL	±0.1mL	117mm	3024 5	**08-552-4G**	26.94
10mL	0.1mL	±0.2mL	177mm	3024 10	**08-552-4H**	17.99
25mL	0.2mL	±0.3mL	192mm	3024 25	**08-552-4A**	25.44
50mL	1mL	±0.5mL	225mm	3024 50	**08-552-4B**	26.47
100mL	1mL	±1.0mL	254mm	3024 100	**08-552-4C**	31.51
250mL	2mL	±2.0mL	340mm	3024 250	**08-552-4D**	43.61
500mL	5mL	±4.0mL	390mm	3024 500	**08-552-4E**	60.92
1000mL	10mL	±6.0mL	465mm	3024 1L	**08-552-4F**	65.21
2000mL	20mL	±12.0mL	520mm	3024 2L	**08-552-4J**	106.20

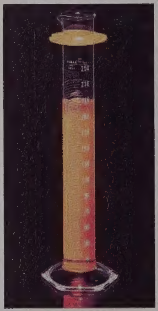
Kimax* Class B Cylinders with Single White Metric Scale

Calibrated "To Deliver"

- Durable scale
- 10 and 25mL sizes are short for stability
- 100mL size suitable for ASTM* distillation tests when hexagonal base fits in cooling baths and does not interfere with delivery from condensers
- SafeGard* bumpers with 25 to 2000mL sizes
- Funnel-shaped top on 10mL size for easy filling

COMPLIANCE:

Designed from ASTM E 1272, Style 1, Class B requirements.



08-549-5G

Capac.	Subdiv.	Tol.	Approx. Height	Mfr. No.	Cat. No.	Price

Kimax* Class B Cylinders with Single Metric Scale, Red Stripe

Calibrated "To Deliver"

- Red stain provides contrast for easy readings
- SafeGard* bumpers with all except 10mL size
- Funnel-shaped top on 10mL size for easy filling

COMPLIANCE:

Designed from ASTM* E 1272, Style 1, Class B requirements.

Kimble* Class B Cylinders with Single Blue Metric Scale

Calibrated "To Deliver"

- Blue ceramic scale
- 10mL size has funnel-shaped top
- SafeGard* bumpers with all except 10mL size

COMPLIANCE:
Designed from ASTM* E 1272, Style 1, Class B requirements

08-549G

Capac.	Subdiv.	Tol.	Approx. Height	Mfr. No.	Cat. No.	Price
10mL	0.2mL	±0.1mL	135mm	20025 10	**08-549B**	Pk. of 4/68.77
25mL	0.5mL	±0.3mL	140mm	20025 25	**08-549C**	Pk. of 4/97.10

*Fisherbrand** Low-Form Cylinders with Double Metric Scales

Calibrated "To Deliver"

- Two white scales for reading up or down
- Accuracy assured even at lowest graduations
- Won't easily tip
- Two pouring lips

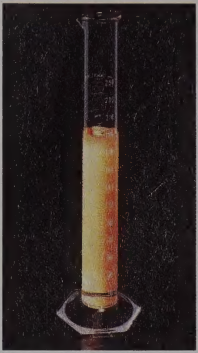
08-562A

Capac.	Subdiv.	Tol.	Approx. Height	Cat. No.	Each	Case of 12
50mL	1mL	±1.5mL	145mm	**08-562A**	33.08	339.27
100mL	2mL	±1.5mL	150mm	**08-562B**	37.28	382.35

Kimax* Educational-Grade Cylinders with Single Metric Scale

Calibrated "To Deliver"

- Borosilicate glass
- Durable white scale
- 10mL size has funnel-shaped top



08-549-2F

Capac.	Subdiv.	Approx. Height	Mfr. No.	Cat. No.	Price
10mL	0.2mL	135mm	20025K 10	**08-549-2B**	Pk. of 4/53.10

GLASS CALIBRATED "TO CONTAIN"

*Fisherbrand** Serialized Class A Cylinders

Calibrated "To Contain"

- Individual serial numbers
- Calibrated in accordance with ASTM* E 542
- Accuracy is assured even at the lowest graduations
- White scale
- Molded hexagonal base keeps it from rolling off the benchtop
- Bumper guards on sizes 25 through 1000mL

With Certificate of Traceability

INCLUDES:

Certificate indicates that cylinder is individually calibrated and certified against equipment whose calibration is traceable to the National Institute of Standards and Technology (NIST*); lists the weight set used, the test number, and the date of testing.

Capac.	Subdiv.	Tol.	Approx. Height	Cat. No.	Each	Case of
10mL	0.1mL	±0.10mL	140mm	**08-559A**	69.65	6/369.83

2000mL	20mL	±6.0mL	520mm	**08-559H**	197.19	----

COMPLIANCE

Glass meets the requirements of ASTM E 438; calibrated in accordance with ASTM E 542; manufacturing supports ISO-9000 documentation requirements; cylinder meets accuracy requirements of ASTM E 1272

08-559E, 08-559D

With Certificate of Calibration

INCLUDES:

Traceability Certification and Certificates of Calibration that list apparent volumes and calibration correction factors.

Capac.	Subdiv.	Tol.	Approx. Height	Cat. No.	Each	Case of

***Fisher**brand** Standard Class B Graduated Cylinders

Calibrated "To Contain"

- White ceramic graduations
- Heavy round bases (except 2000mL size, which has molded hexagonal base)
- Handy pouring spouts
- Accuracy is assured even at the lowest graduations

COMPLIANCE:

100mL size meets ASTM* E 133 requirements; used in ASTM tests D 86 and D 447.

Kimax* Class B Cylinders with Single Metric Scale

Calibrated "To Contain"

- Demonstrate emulsion and demulsifying characteristics of oils
- Determine sedimentation values of precipitates
- Receive condensate from distillation procedures
- White scale
- Pour spout
- Hexagonal base ground flat for stability
- 10mL size has an enlarged funnel top for easy filling
- Sizes 25mL and larger have SafeGard* bumpers

08-566-15D

COMPLIANCE:

Designed from ASTM* E 1272, Style 1, Class B requirements

Kimax* Serialized Class A Mixing Cylinders

Calibrated "To Contain"

- Permanently marked with individual serial number
- Supplied with Certificate of Graduation Accuracy
- Single metric white ceramic-enamel scale
- With $ stopper
- Heights shown in ordering table do not include stopper

INCLUDES:

Certificate of Graduation Accuracy.

REQUIRED ACCESSORIES:

Replacement stoppers available (14-642-2 Series)

COMPLIANCE:

Designed from ASTM* E 1272, Class A, Style 2 requirements; accuracy meets ASTM E 694 requirements.

Kimax* Class B Mixing Cylinders

Calibrated "To Contain"

- Single metric blue ceramic-enamel scale
- Heights shown in ordering table do not include stopper
- The 10 and 25mL sizes are short form for extra stability

REQUIRED ACCESSORIES:

Replacement stoppers available (14-642-2 Series)

COMPLIANCE:

Designed from ASTM* E 1272, Class B, Style 2 specifications; 250mL size meets ASTM D 460 requirements; 500mL size meets ASTM D 244 requirements.

SPECIAL PURPOSE

Kimax* Soil Test Cylinders

Calibrated "To Contain"

- Use with hydrometer to measure particle size distribution in soil suspensions (ASTM* D 422 and AASHTO T-88)
- 1205mL cylinder is not specified, but is useful for certain special cases
- Permanent white graduations fused onto glass without etching
- Round base (approximately 107mm diameter) fits into metal baths
- 1000mL cylinder also used in pipet methods of mechanical analysis of soils
- Approx. height, 457mm

08-568-2A

PLASTIC

*Fisherbrand** Polymethylpentene Graduated Cylinders

Calibrated "To Contain/To Deliver" at 20°C

- Transparent cylinders with large molded-in graduations
- Easy to read
- Large rounded bases ribbed for reinforcement and stability
- Generous pour spout; 10mL size has a conical top for easier filling and pouring
- Nonwetting
- Chemical, heat and impact resistant
- Window-clear

Corning* Graduated Polystyrene Cylinder

Accurately dispense culture media or other biological fluids

- Optically clear polystyrene
- Sterile
- Polyethylene dust cover included

08-558-10

Capacity	Subdiv.	Mfr. No.	Cat. No.	Case of 50
100mL	1mL	430182	**08-558-10**	284.19

Nalgene* Polymethylpentene Cylinders

Calibrated "To Contain/To Deliver" at 20°C

- Transparent, nontoxic, noncontaminating, biologically inert
- Offer excellent chemical resistance
- Absence of meniscus makes liquid level easy to read
- Resist most dyes and stains
- Shatterproof
- Resist temperatures to 135°C (275°F)
- Sterilize by standard chemical means; autoclaving will alter accuracy
- 10, 25, 50, 100, 250, 500 and 1000mL sizes have front-to-back raised graduations
- 2000 and 4000mL sizes have standard graduations

08-572-5D

ORDERING INFORMATION:

Individually packaged

COMPLIANCE:

Meet Fed. Spec. and ASTM* E 1272 Class B accuracy requirements, as well as requirements of ISO Standard 6706.

Nalgene* Polypropylene Cylinders

Calibrated "To Contain/To Deliver" at 20°C

- Translucent polypropylene
- Molded-in silk-screened graduations
- Absence of meniscus eliminates guesswork
- Octagonal base prevents rolling and tipping
- Offer excellent chemical resistance
- Resist temperatures to 135°C (275°F)
- Autoclaving may alter accuracy slightly
- Sterilize by standard chemical methods

08-572D

Nalgene* Economy Cylinders

Calibrated "To Contain/To Deliver"

- Break-resistant
- Nonwetting
- No meniscus
- Large, raised graduations
- Resist temperatures up to 135°C (275°F)
- Large, ribbed, rounded base
- Autoclavable, but repeated autoclaving may affect accuracy
- Generous pour spouts; the 10mL size has a conical top
- Polypropylene offers greater chemical resistance than polymethylpentene

DESICCANTS

*Fisherbrand** Humidity Sponge Desiccant

Absorbs 16% moisture by weight

- Tyvek* pack contains 10g sodium calcium aluminosilicate hydrate
- Maintains dry atmosphere in 2 gal. (7.6L) container
- Nontoxic, meets FDA specifications for use in direct contact with food and drugs, and certified as Class M3.5 (Class 100) cleanroom compatible
- Shell is resistant to chemicals, abrasion, and aging
- Disposable window type contains blue gel that turns pink when pack is exhausted
- Reusable type comes with Relative Humidity Card that changes from blue to pink when pack is exhausted; heat pack at 177°C (350°F) to regenerate

07-580, 07-580-1

ORDERING INFORMATION:

Measures 3L × 3W × ¼"H (7.6 × 7.6 × 0.6cm)

Description	Cat. No.	Pack of 40
Disposable Window Type	**07-580**	33.40
Reusable Type	**07-580-1**	31.33

Scienceware* Reusable Desiccant Bags

Supplied in sealed, moisture-proof pouch

- Permeable polyester/felt bags contain indicating silica gel beads
- Fit bottom section of standard glass and plastic desiccators
- Bags have transparent, perforated, sealed Mylar* disc tops
- Gel beads are blue when dry, pink when moist
- Regenerate desiccant by placing cartridge in vented oven at 149°C (300°F) for three hours or until blue color returns

08-594-17B, 08-594-17A

For Desiccator Diameter	Cartridge Diameter	Mfr. No.	Cat. No.	Each
160mm	4½" (114mm)	F42045 0160	**08-594-17A**	23.39
200mm	7¾" (197mm)	F42045 0200	**08-594-17B**	51.26
250mm	9⅜" (238mm)	F42045 0250	**08-594-17C**	85.43

Drierite* Absorbents

Indicating and nonindicating

- No danger of shrinking or channeling
- Stable, constant in volume
- Nonpoisonous and noncorrosive
- In 1 or 5 lb. bottles

07-578-4A

Indicating

- Absorbs 10 to 14% of its weight in water when drying gases
- Turns pink when exhausted
- Regenerate to original blue color by heating in oven at 218°C (425°F) for one hour

Nonindicating (White)

- Absorbs 6.6% of its weight in water when drying liquids
- Regenerate by heating in oven at 218°C (425°F) for one hour
- Insoluble in organic liquids

Mesh	Size[s]	Cat. No.	Each	Case of

cienceware* Disposable Desiccant Cartridges

ndividually sealed in aluminum foil

- Clear plastic Petri dish-type cartridges contain silica gel that changes from blue (dry) to pink (moist), indicating disposal or replacement
- Porous membrane on top of silica gel allows air and moisture exchange, but prevents silica gel spillage
- Cartridges can be regenerated when heated according to directions

Disposable Desiccator Plate

08-594-14 Series

Cartridge Diameter	Mfr. No.	Cat. No.	Pack of 6
65mm	F42048 0065	**08-594-14A**	42.00
100mm	F42048 0100	**08-594-14B**	53.75

Drierite* Gas Purifier

Dries gases to -73.3°C (-100°F) dew point

For the removal of moisture, impurities, and particulates from gas lines.

- Refillable polycarbonate column
- Safe for working pressures up to 100psig (0.69MPa)
- Both outlet and inlet have a ⅛" (1.3mm) male tube connector
- Fritted outlet assembly prevents particulates from entering instrumentation

ORDERING INFORMATION:
Dia. × H: 2⅝ × 11⅜" (6.66 × 28.89cm)

INCLUDES:
15 cu. in. (250cm^3) each of indicating Drierite absorbent and 5A molecular sieves that can be regenerated.

09-206

Cat. No.	Each	Case of 6
09-206	144.00	788.47

Drierite* Gas Drying Jar

Dries 200L of gas per hour to -73.3°C (-100°F) dew point

Gas is fed into system through lower serrated nipple. Moisture is absorbed as gas moves through Drierite absorbent. Dry gas is expelled through top outlet.

- Jar is made of polycarbonate
- For pressure systems up to 90psig (0.62MPa)

ORDERING INFORMATION:
Dia. × H: 2⅝ × 11⅜" (6.7 × 29cm)

INCLUDES:
Approximately 20 oz. (567g) of Drierite absorbent that can be regenerated

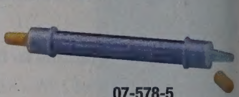
09-204

Cat. No.	Each	Case of 6
09-204	113.00	620.90

Drierite* Indicating Drying Tube

Absorbent changes color from blue to pink when exhausted

- Polycarbonate tube with polypropylene end caps
- Useful for drying gas streams and as vent dryers for Karl Fischer reaction chambers
- Unit may also be used for gravimetric determination of water vapor in air and gases
- Accepts tubing ¼ to ⅜" I.D. (6.4 to 9.5mm)



07-578-5

ORDERING INFORMATION:
Overall length: 8" (20.3cm)

INCLUDES:
1⅛ oz. (30g) of indicating Drierite absorbent

Cat. No.	Each
07-578-5	7.16

DESICCATORS

NONVACUUM

*Fisherbrand** Heavy Glass Desiccators

Annealed glass provides durability

- Apply grease to internal edges of flanges
- Press lid on jar and rotate at least 360° to ensure airtight seal
- Rim in lower portion of jar holds sample plate over desiccant

INCLUDES:
Cover

REQUIRED ACCESSORIES:
Desiccant plate

08-595A

I.D.	Uses Plate	Cat. No.	Each
100mm	95mm	08-595A	76.17

VACUUM

*Fisherbrand** Desi-Vac Container* Desiccator with Vacuum Pump

Built-in manual vacuum pump eliminates need for separate pump, tubing and stopcock

08-664-5 Series

- Ideal for drying, preserving, storing and shipping samples
- Self-contained unit holds a vacuum of 14.7"Hg (373mm) in excess of 24 hours
- Rubber O-ring in cover ensures a tight seal
- To remove cover, simply push release button to allow air into container
- Clear polycarbonate body, metal pump handle, chemical-resistant ABS plastic pump and cover
- No plate required

APPLICATIONS:

Ideal for drying, preserving, storing and shipping samples

ORDERING INFORMATION:

Can be used with Fisherbrand Humidity Sponge* Desiccant (07-580)

Volume	Diameter × Height	Cat. No.	Each
600mL	4⅛ × 3¾" (10.5 × 9.5cm)	**08-664-5A**	24.95
850mL	4⅛ × 5" (10.5 × 12.7cm)	**08-664-5B**	27.95
1100mL	4⅛ × 6" (10.5 × 15.2cm)	**08-664-5C**	31.12

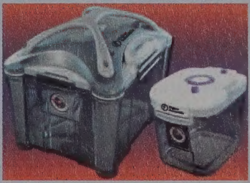
WARNING

Do not autoclave or expose container to organic solvents or their vapors. Do not use concentrated acids as desiccants.

*Fisherbrand** Desi-Vac* Containers

Vacuum and desiccants keep material dry

Plastic container with built-in vacuum pump is ideal for drying, preserving, storing, and even shipping samples.



15-077-956, -955

- Vacuum pump built into the top removes air with manual strokes
- Rubber O-ring-sealed cover maintains vacuum
- Achieves a vacuum of better than 200" of water (15" of mercury)
- Release button allows air into the container to remove lid
- Vacuum-indicating button confirms interior vacuum
- Dial hygrometer displays 0 to 100% relative humidity with a resolution of 2% RH
- Perfect for storing chemicals, powders, tissues, plant sections, electronics, and weighing samples

INCLUDES:

Fisherbrand Sample Humidity Sponge* Desiccant drying packets

Volume	Length × Width	Cat. No.	Each
3000cc	8½ × 6½" (21.6 × 16.5cm)	**15-077-955**	31.44
11,500cc	11⅘ × 10" (30 × 25.4cm)	**15-077-956**	82.59

Pyrex* Sleeve Top Desiccators

Can be used in bacteriological work as an anaerobic culture jar

- Rated 1 atmosphere vacuum
- Low height makes it easy to place in incubator
- ⅜" O.D. (10mm) tooled hose connection to sleeve for vacuum hookup
- Sleeve turns to open or close air pathway for pulling or releasing vacuum
- Holds vacuum of 500mm of mercury over 24-hour period
- Small diameter model has $ 40/35 external sleeve and rim to support sample plate
- Large diameter model has $ 55/38 sleeve joint along with three internal molded lugs to support plate

See Desiccator Plates subsection on pp. 584-585.

Pyrex* Stopper Top Large-Diameter Desiccator

Convenient access port in cover

- Rated 1 atmosphere vacuum
- Grease sealing
- Opening in knob accommodates No. 8 one-hole rubber stopper
- Insert 5mm glass tubing through hole in stopper and attach to vacuum pump for fast moisture removal
- Holds vacuum of 19.7"Hg (50cm) over 24-hour period
- Three internal lugs support plate above desiccant

Nalgene* Transparent Polycarbonate Desiccator

or easy viewing of vessels and desiccant in base

- Lightweight and virtually unbreakable
- Similar in dimensions to glass desiccators but more cost-effective
- Wide base provides superior stability
- Includes ports on both cover and base for maximum convenience
- Holds a vacuum of 28"Hg (71.1cm) for 24 hours
- Silicone O-ring ensures an airtight seal; no need to use grease
- With removable stopcock

08-642-7 (plate and desiccant must be ordered separately)

PPLICATIONS:

deal for vacuum and nonvacuum pplications

RDERING INFORMATION:

akes standard 230mm desiccator plate, uch as 08-642-10; accepts ¼ to ⅜" I.D. .6 to 1cm) vacuum tubing

INCLUDES:

TPE cap to seal side arm for nonvacuum use

eight	O.D.	Mfr. No.	Cat. No.	Each	Case of 4
3" (33cm)	11" (28cm)	5311 0250	**08-642-7**	154.97	413.27

WARNING

Do not autoclave or expose polycarbonate to organic solvents or their vapors. Will not shatter or implode at full vacuum when used according to instructions included with product.

algene* Desiccator with Stopcock

ill not shatter or implode t full vacuum

- Vacuum connector is on the chemical-resistant, polypropylene body
- Polypropylene stopcock has PTFE resin TFE plug; makes 250mm cover easy to handle
- Can be used with ¼" I.D. (6.4mm) vacuum tubing
- Straight bore design eliminates leakage
- No gasket necessary; grease makes polycarbonate cover airtight
- Recessed rim keeps grease off benchtop when cover is set down

RDERING INFORMATION:

erall height: 9⅝" (24cm); outside ameter: 13" (33cm), including opcock

INCLUDES:

Cover, stopcock

REQUIRED ACCESSORIES:

230mm plate

r. No.	Cat. No.	Each	Case of 4
10 0250	**08-642-5**	162.96	434.54

WARNING

For use at room temperature only. Do not use concentrated acids as desiccants.

Scienceware* Chemical-Resistant Vacuum Desiccator

Lower section is chemical-resistant polypropylene; upper section is shatterproof, transparent polycarbonate

- Holds vacuum of 29"Hg (73.6cm) below ambient pressure for 24 hours
- Molded groove in flange holds neoprene O-ring; seal unaffected by low temperature to 0°C
- Stopcock is highly visible red

08-594-15 Series

ORDERING INFORMATION:

Retention valve takes ¼" I.D. (6.4mm) tubing; can be used with incandescent crucibles if conventional porcelain plate is substituted for the plastic plate supplied.

INCLUDES:

Upper and lower sections, stopcock, neoprene O-ring, perforated polypropylene sample plate

Height	Flange O.D.	For Plate	Mfr. No.	Cat. No.	Each	Case of 4

Scienceware* Secador* Techni-Dome* Vacuum Dessicator

High-volume dessicator for large items or loads; safeguards samples, electronics, other high-value items

01-817-50

Spherical shape accommodates racks, trays, instruments, items up to 18" (46cm) tall, 20" (51cm) wide.

- Holds vacuum of 29"Hg (73.7cm) for 24 hours
- Clear polycarbonate construction for corrosion resistance, enhanced visibility, easy cleaning
- Molded-in handles allow easy transport and removal of top half of unit
- Neoprene O-ring requires no vacuum grease at room temperature; under cold conditions, grease ensures a tight seal to 0°C
- Polypropylene stopcock with PTFE plug easily turns to minimize disturbance to contents

REQUIRED ACCESSORIES:
For vacuum applications, unit requires ¼" I.D. (6.4mm) tubing; for nonvacuum applications, dessicator drying material (not included) can be used.

ORDERING INFORMATION:
Storage capacity: 4000 cu. in. Weight: 11 lb. (5kg).
Max. O.D. (at handles): 23" (58cm). Footprint: 12" (31cm).

INCLUDES:
Two removable polypropylene shelves

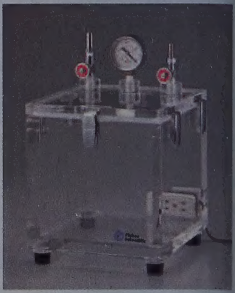
*Fisherbrand** Vacuum Desiccator Cabinets

Ideal for vacuum testing, defoaming, and storing samples under various atmospheres

- Available with or without plug socket
- Made of clear, strong, reinforced ¾" thick (2cm) polymethylmethacrylate (PMMA)
- Maximum vacuum pressure: 1 torr



08-647-42

With plug socket

- Can be used with inert gases (e.g., nitrogen)
- Removable cover makes it easy to insert and take out samples
- Lid opening: 8⅜W × 8⅜"H (21 × 21cm)
- Inside dimensions: 8⅜D × 8⅜W × 8⅜"H (21 × 21 × 21cm)
- Overall height: 15¼" (39cm)

08-647-43

Without plug socket

- Capable of withstanding 1mmHg pressure
- Silicone gasket on door ensures airtight seal and eliminates need for vacuum grease
- Includes tray for silica gel and two clear PMMA ⅛" thick (4mm) shelves with vent holes
- Distance between shelves: 4¼" (11cm)
- Door opening: 10⅜W × 10⅜"H (26 × 26cm)
- Inside depth: 7¼" (18cm)
- Overall height: 18⅜" (47cm)

ORDERING INFORMATION:

Each model has a 0 to 30"Hg vacuum gauge and two vacuum valves mounted to top. One vacuum valve accepts ¼ to ⅜" I.D. (6 to 8mm) intake tubing; the other accepts ½" (13mm) exhaust tubing.

Description	Outside L × W × H	Cat. No.	Each
With plug socket	10 × 10 × 10" (25 × 25 × 25cm)	**08-647-42**	1432.61
Without plug socket	12 × 8¾× 12" (31 × 22 × 31cm)	**08-647-43**	1326.49

*Trademark. See Trademark Reference.

Prices subject to change.

*Fisherbrand** Acrylic Desiccator Cabinets

Dust- and moisture-free storage in refrigerators, freezers, and on benchtops

08-642-23C

Ideal for storing anhydrous and hygroscopic biological and chemical compounds, as well as electronic assemblies and any components requiring controlled storage conditions.

- Neoprene gasket on door ensures tight seal
- Door is secured with two stainless-steel latches (large size has three latches) and full-height hinge
- Removable, lipped tray holds solid desiccant
- Shelves are removable, adjustable, and vented to maximize airflow

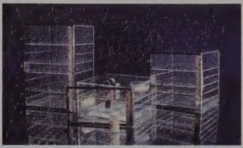
ORDERING INFORMATION:

Cabinets measure 12L × 12"W (30.5 × 30.5cm).

No. of Shelves	No. of Grooves	Height	Cat. No.	Each
2	3	7" (17.8cm)	**08-642-23A**	248.83
3	5	12" (30.5cm)	**08-642-23B**	317.02
4	7	18" (45.7cm)	**08-642-23C**	404.69

Nalgene* Acrylic Desiccator Cabinets

Provide dust- and moisture-free storage



Left to right: 08-642-22, 08-642-20, 08-642-21

Ideal for storing anhydrous and hygroscopic biological and chemical compounds, as well as electronic assemblies and any components requiring controlled storage conditions. Use in refrigerators, freezers, and on the benchtop

- Neoprene gasket on door ensures tight seal
- Door is secured with two stainless-steel latches and full-height hinge
- Removable, lipped tray holds solid desiccant
- Shelves are removable, adjustable, and vented to maximize airflow

Scienceware* Secador* Desiccator Cabinets

Small Desiccator Cabinets

Compact desiccator cabinets with small footprint; stackable for maximizing laboratory storage space

08-647-51

- Airtight, one-latch construction
- Nonelectric
- Capacity: 0.75 cu. ft. (21L)

ORDERING INFORMATION:

Weight: 13½ lb. (6.1kg)
Outside dimensions: 16¼L × 13⅜W × 8⅜"H (41 × 34 × 21cm)
IInside depth: 14" (36cm)

Color	Mfr. No.	Cat. No.	Each
Clear	F42071 0000	**08-647-50**	155.58
Clear with Blue End Caps	F42071 0006	**08-647-51**	155.58

Large Desiccator Cabinets

Can be reconfigured as either horizontal or vertical using conversion shelves

- Polystyrene shelves with waffle pattern for maximum air circulation
- Two latches in horizontal or vertical configurations
- Vertical cabinets: three shelves adjustable up to four positions
- Horizontal cabinets: two shelves adjustable up to two positions

08-647-58

Standard Models

- Nonelectric
- Weight: 24⅜ lb. (11.1kg)

Auto-Desiccator Models

- Continual silica gel desiccation is regenerated every 20 minutes
- Reduces RH from 75% to less than 25% in approximately eight hours
- Keeps the RH at a constant level
- Heater and two fans provide continuous airflow and humid air exhaust
- Conversion shelves reconfigure cabinets between vertical and horizontal

Scienceware* Dry-Keeper* Desiccator Cabinets

- Horizontal or tall cabinets molded of clear and black methylmethacrylate plastic
- Features 0 to 100 scale hygrometer with a 2¼" (57mm) dial mounted in door to measure relative humidity inside
- Optional Autodesiccator, has an electronic control section that automatically regenerates the silica gel desiccant for ½ hour after every 4½ hours of operation
- Maintains low (30 to 40%) relative humidity inside the cabinet

08-647-24

ORDERING INFORMATION:
Control section dimensions: 4½L × 6W × 12"H (11 × 15 × 30cm). With desiccant tray. For 110V 50/60Hz.

Horizontal Cabinet. Two sets of shelf rails and two clear molded shelves with vent holes allow eight levels of shelf placement. Door frame inside dimensions: 17⅞W × 10"H (45 × 25cm); Cabinet depth: 13¼" (34cm); Overall dimensions: 19⅝L × 14¾W × 13¾"H (50 × 37 × 35cm).

Tall Cabinet. Three sets of removable shelf rails and three clear molded shelves with vent holes allow 15 levels of shelf placement. Door frame inside dimensions: 10W × 17⅞"H (25 × 45cm). Cabinet depth: 13¼" (34cm). Overall dimensions: 12½L × 15¼W × 20"H (32 × 39 × 51cm).

Labconco* Fiberglass Desiccator Cabinet

Leak tested at 25"Hg (0.09MPa) below ambient pressure

- Withstands 29"Hg (0.1MPa) pressure
- Vacuum release needle valve equalizes chamber pressure gradually
- Made of fiberglass-reinforced polyester resins
- Clear tempered-glass door
- Nine molded shelf supports permit flexible shelf arrangements
- Can be stacked on top of each other using accessory Stacking Rack (16-307-242), available online

08-644

ORDERING INFORMATION:
Overall: 13½L × 17W × 14¾"H (34 × 43 × 37cm). Height on stand: 15⅜" (39cm).

INCLUDES:
Two 12 × 12" (30.5 × 30.5cm) shelves with twelve ⅞" (22mm) holes in each; door; needle valve; desiccant pan; wire support stand

Mfr. No.	Cat. No.	Each

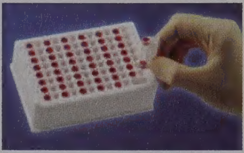
DIALYSIS

DEVICES

Thermo Scientific* Pierce* Rapid Equilibrium Dialysis (RED) System

NEW

Offers greater ease-of-use and versatility in less time than traditional equilibrium dialysis methods



PI-89809, PI-89811

Equilibrium dialysis is the preferred method to determine plasma protein binding, a critical step in drug development. Traditional methods of equilibrium dialysis are labor-intensive, time-consuming, cost-prohibitive, and difficult to automate. The RED Device for rapid equilibrium dialysis was developed in close association with the pharmaceutical industry to specifically address these issues.

- Comprised of disposable tube inserts and a 96-well PTFE base plate
- Each lot is tested in a protein binding assay for guaranteed performance
- Validated for plasma binding assays, producing results consistent with those reported in literature
- Convenient insert removal tool available

Inserts

- Disposable—require no presoaking, assembly, or specialized equipment
- Short incubation time—large dialysis surface area accelerates equilibrium
- MWCO: 8000 Daltons
- Membrane material: Regenerated cellulose with low glycerol content as a humectant

Base Plate

- Compatible with automated systems
- Compartmentalized—eliminates potential for crosstalk or leakage
- PTFE construction—eliminates nonspecific binding and risk of contamination
- Accepts 1 to 48 inserts—run number of assays needed without waste

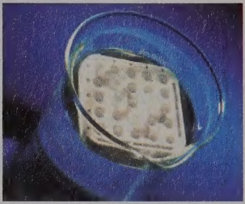
APPLICATIONS:

Determination of free drug vs. drug bound to plasma proteins; pharmacokinetics studies; formulation of drug dosage for in vivo studies; drug-drug interaction studies; selection criteria during drug lead optimization

Description	Cat. No.	Price
RED Inserts	PI-89809	Pk. of 50/360.50
RED Inserts	PI-89810	Cs. of 250/1545.00
Base Plate	PI-89811	Ea./329.60
Insert Removal Tool	PI-89812	Ea./82.40

Thermo Scientific* Pierce* Slide-A-Lyzer* MINI Dialysis Units

Designed for dialyzing and recovering extremely small sample volumes



PI-69552

- No wicking around the membrane—an occurrence in homemade devices
- 100% leak tested
- Units have working sample volume range of 10 to 100µL
- >90% sample recovery
- Ready to use; no membrane treatment or assembly required
- Inert polypropylene cup has a regenerated cellulose membrane on the bottom
- Caps are provided to seal each unit to prevent evaporation and airborne contamination

INCLUDES:

Caps

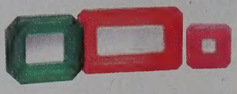
Slide-A-Lyzer MINI Dialysis Unit Technology is protected by U.S. Patent 6,039,871.

Thermo Scientific* Pierce* Slide-A-Lyzer* Dialysis Cassettes

Flat shape has better surface area/sample volume ratio than flat dialysis tubing—dialyze the same volume in half the time



Dialysis membranes made of low-binding regenerated cellulose remove low molecular weight contaminants and perform buffer exchange, desalting, and concentration.

- Recover up to 95% of sample volume with a needle and syringe
- Available in 2000, 3500, 7000, 10,000 and 20,000 Dalton MWCO
- Membranes separated by a gasket and held in place by a color-coded rigid frame
- Manufactured under cleanroom conditions to ensure absence of contaminants
- Sample chambers are hermetically sealed to maintain the highest possible sample integrity
- 30mL cassette has built-in buoy for flotation

ACCESSORIES

Dialysis Buoys

Serve as a flotation device for cassettes during dialysis and as a benchtop stand to hold cassettes during sample loading and recovery

- Single buoys hold one 0.1–0.5mL, 0.5–3mL, or 3–12mL capacity cassette
- Carousel Buoy holds ten 0.1–0.5mL or 0.5–3mL cassettes

Description	Holds	Cat. No.	Pack of
Single Buoys	One 3–12mL cassette	**PI-66432**	8/21.13
Single Buoys	One 0.1–0.5mL or 0.5–3mL cassette	**PI-66430**	10/26.16
Carousel Buoy	Ten 0.1–0.5mL or 0.5–3mL cassettes	**PI-66431**	1/37.22

Syringes and Needles

Sterile 1" long beveled needles in packs of 10 syringes and needles.

Description	Cat. No.	Pack of 10
1mL Syringe and 18-gauge Needle	**PI-66494**	21.13
5mL Syringe with 18-gauge Needle	**PI-66490**	21.13
20mL Syringe with 18-gauge Needle	**PI-66493**	22.13

Thermo Scientific* Pierce* Gamma Irradiated Slide-A-Lyzer* Dialysis Cassettes

For performing sample preparation in applications that require sterile conditions

PI-66455, PI-66454, PI-66453

- Sterility tested in both trypticase soy broth medium for identifying total growth and fluid thioglycollate medium for identifying anaerobic growth
- Require half the time of flat dialysis tubing because of better surface area/sample volume ratio and double membrane
- Produce sample volume recovery up to 95% with needle and syringe
- Eliminate preparation and loading hassles
- Manufactured under cleanroom conditions; sample chambers are hermetically sealed to maintain the highest possible sample integrity
- Frames can be easily labeled for quick sample identification
- Do not require the use of knots or clips that can lead to leaking and sample loss

APPLICATIONS:

Ideal for researchers culturing cells and microorganisms; purifying viruses, DNA and RNA; or performing sample preparation for other applications requiring minimal risk of sample contamination.

MEMBRANES/MEMBRANE TUBING

*Fisherbrand** Regenerated Cellulose Dialysis Tubing

Diffuses low molecular weight compounds in aqueous solutions; retains proteins and bacteria in tubing

- Made from regenerated cellulose membrane
- MWCOs from 3500 to 14,000 Daltons
- Individual lot data sheets from outside laboratory are supplied with tubing Types T1, T2, and T3; standard grade Type T4 is not tested in outside laboratory

Fisherbrand
DIALYSIS
TUBING
Instructions
Fisherbrand

21-152-8

ORDERING INFORMATION:
Comes on compact polystyrene spool that eliminates adsorption of glycerin from membranes. Dispenser box is packaged in plastic bag with desiccant for humidity control.

INCLUDES:
Two locking nylon membrane clamps; pair of disposable surgical scissors; individual lot data sheets as noted above

Flat Width	Dia. × Length	Vol./cm	Cat. No.	Each

Thermo Scientific* Pierce* SnakeSkin* Dialysis Tubing

Easy to prepare—just pull out the required length and cut

- Comes pleated in a convenient 20cm (8") hollow tube
- Regenerated cellulose
- Matches performance of traditional flat regenerated-cellulose dialysis tubing

STORAGE CONDITIONS:
Store at room temperature in original packaging

PI-68035

Visit www.fishersci.com and search for PI-68011

Spectrum* Spectra/Por* Biotech Cellulose Ester (CE) Dialysis Membrane Tubing

Selected MWCOs from 100 to 300,000 Daltons

Ideal for desalting, purification, and molecular separation. Supplied in 10m (33 ft.) lengths in two rolls of 5m each, in 0.1% sodium azide solution.

- Many other MWCOs available to 1 million Daltons
- Ready to use

NOTE:
Do not tie—must be used with Spectra/Por nylon closures (08-671-52, -53, -55). Strong polar solvents such as acetone, MEK, or dioxane will irreparably damage membranes. Contact Spectrum Technical Service, **1-800-634-3300**, for more information.

Spectrum* Spectra/Por* RC Dialysis Membranes

Supplied as flat-width tubing or flat sheets that can be folded to fit various funnel-type dialysis apparatus

Pure regenerated natural cellulose membranes with 1000 to 50,000 molecular weight cutoffs. Transparent and flexible. Ideal for molecular separation, protein binding studies, electrolyte removal, desalting.

Clockwise from left:
08-682-54A,
08-671-20, 08-670-4

- Low molecular weight compounds in aqueous solutions diffuse through membrane
- Higher molecular weights, such as proteins and bacteria, are retained by membrane
- Convenient dispenser boxes protect unused membranes
- Glycerol preserves membrane and must be removed before use
- Soak membrane for three hours in deionized water, then rinse well with running water

NOTE:
Do not tie knots in tubing; use closures. Contact Spectrum Technical Service, **1-800-634-3300**, for more information.

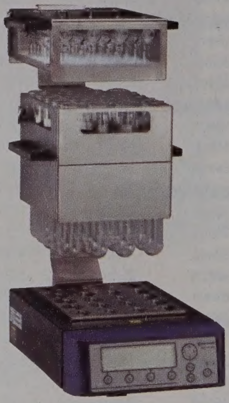
Fisher Scientific* Digestion Systems

Digestion units, with integrated programmable controllers, can be combined with a range of accessories to match individual needs

Choose from basic units capable of handling just a few samples a day to fully automated systems for high sample throughput.



TC2520-011

Benefits

- Economy of chemicals, energy, labor, space and time
- Efficient fume containment through optional exhaust manifold
- Efficient fume removal through optional scrubber
- Systems are compatible with Kjeltec* Distilling Units

Standard Features

- Three configurations available: Auto Lift, Auto Rack, and Basic
- System consists of a digestion unit and tube rack with capacity for either eight or 20 tubes
- Audible "ready" or "cycle over" alerts advise user when digestion application is completed
- Audible "alarm" alerts advise user when errors/interruptions occur within running application program
- Unit is insulated to minimize heat transfer to the surroundings and allow fast, even heating
- Auto versions have an integrated all-activity controller that is programmable using supplied software
- Auto models can be connected to a PC for datalogging and downloading of standard, user-defined applications

Basic Model

- Temperature and time for digestion are selected on front panel; all other procedures are performed manually
- Can be fitted with rack system at any time to save fume hood space
- Cannot be upgraded to Auto model

Auto Lift Models

- Fully automated digestion with user interface adapting to actual product configuration
- GLP-support through two-way PC communication
- Auto Lift models, with exhaust docking facility, allow fully automated unattended operation
- Facilitate highly automated procedures, eliminating heavy and risky handling of hot chemicals; save fume hood space
- When lift or scrubber unit is connected, they are controlled by the selected application program
- Exhaust manifold docks automatically with the tube rack as the tubes move down into the preheated digestion unit; scrubber unit, if connected, starts
- Scrubber capacity is automatically adjusted to contain fumes and minimize acid losses
- When digestion is completed, the combined tube rack and exhaust manifold move to the cooling position with scrubber unit still running until no further fumes are evolved
- Audible signal indicates "cycle over"
- To avoid spillage, a drip tray is inserted under exhaust manifold after cooling

Auto Rack Models

- Allow automated digestions but require manual placement of tube rack and exhaust manifold which are stored above the digestion unit
- Can be upgraded to Auto Lift systems

Software for Auto Systems

- Preinstalled software system controls all necessary functions of the unit
- Additional PC application software has two-way communication with Digestion Unit via serial RS-232 cable (supplied)

NOTE:

For reflux chemistries, such as Chemical Oxygen Demand (COD), a reflux head connected to a cold water supply should be used in place of the exhaust manifold. For Kjeldahl digestions, the Scrubber Unit (TC2501-001) should be considered for neutralization of corrosive gases; this replaces the water aspirator. For most Kjeldahl digestions, straight 250mL tubes are recommended.

INCLUDES:

Digestion unit, tube rack with integrated heat shields. Auto Lift models include lift and integrated controller; Auto Rack models include rack and integrated controller.

COMPLIANCE:

Software for Auto Systems supports Good Laboratory Practice (GLP) routines and accreditation procedures. Standard power failure/interrupt function complies with GLP and Health & Safety routines. To comply with GLP and Health & Safety requirements, we recommend that all digestion units are used with an exhaust manifold or reflux head and are located in a fume cupboard.

Description	Electrical Reqts.	Cat. No.	Each
Basic Models			
For 8 tubes	110V 50/60Hz	**TC2508-052**	3600.00
For 20 tubes	230V 50/60Hz	**TC2520-051**	7500.00
Auto Lift Models			
For 8 tubes	110V 50/60Hz	**TC2508-002**	8000.00
For 20 tubes	230V 50/60Hz	**TC2520-001**	12,000.00
Auto Rack Models			
For 8 tubes	110V 50/60Hz	**TC2508-012**	4500.00
For 20 tubes	230V 50/60Hz	**TC2520-011**	8500.00

Note: All of the above models are for use with 250mL tubes. Versions for 100mL tubes are available; contact your Fisher Scientific Customer Service representative or visit our Web site.

ACCESSORIES FOR FISHER SCIENTIFIC* DIGESTION SYSTEMS

Exhaust Manifolds

- Facilitate fume removal and containment
- Ensure Good Laboratory Practice (GLP)
- Should be connected to water aspirator (supplied) or to a suitable scrubber unit

For Digestion Unit	Cat. No.	Each
TC2508 Series	**TC2508-020**	1400.00
TC2520 Series	**TC2520-020**	2995.00

Scrubber Unit

- For neutralization of corrosive fumes in acid digestions
- Can be combined with any of the exhaust manifolds
- Handles up to 100 samples without changing reagent

TC2501-001

Electrical Reqts.	Cat. No.	Each
110/230V 50/60Hz	**TC2501-001**	3995.00

Digestion Tubes

- Straight-sided tubes are recommended for the majority of digestion applications
- Volumetric tubes with constriction at the neck are recommended for applications where the digestate requires dilution to a fixed volume before analyses such as FIA, SFA, and AA

Volume	Cat. No.	Pack of
Straight-Sided Tubes		
75mL	**TC1000-0546**	12/257.48
75mL	**TC1000-0203**	40/756.45
100mL	**TC1000-0825**	12/260.54

WHAT HAPPENED TO THE "NITROGEN ANALYSIS" SECTION?

The Nitrogen Analysis section is now divided into Digestion and Distillation. If you're looking for distillation units like Fisher Scientific* DU100, check out the Distillation section of the catalog.

Foss* Tecator* Fibertec* 2010 System

Semi-automated extraction system for simple determination of crude fiber, detergent fiber and related parameters in plant materials, compound feeds and foodstuffs

TC20100002

Single or sequential extractions including boiling, use of internally preheated reagents, rinsing and filtration are performed under reproducible, controlled conditions.

Standard Features

- For fiber determination in accordance with the Weende, van Soest and other recognized methods
- Samples are handled in specially designed filter crucibles
- Integrated extraction and filtration of six samples simultaneously saves time
- Automatic water filling/topping up
- Batch handling devices for simple transfer of samples to balance or furnace
- Enhanced precision due to integrated extraction and filtration, thus avoiding sample transfer
- Timer function ensures same extraction condition in each analysis

Modules

- Hot Extractor: for hot hydrolysis and extraction, featuring built-in systems for heating and filtration, and for automatic preheating and addition of reagents
- Cold Extraction Unit: for defatting samples, extraction at ambient temperatures (e.g., in lignin determination) and solvent dehydration of fiber residues
- Both modules use the same crucible system, permitting samples to be dried and weighed between extractions if required

Specifications

- Sample size: 0.5–3g
- Capacity per batch: Up to six samples simultaneously
- Measuring range: 0.1–100%
- Reproducibility: ±1% relative at 5–30% fiber level

Safety Features

- Automated heating of reagents in an integrated, closed system
- Simple handling of cold reagents (acid/alkali)
- Automated addition of preheated reagents
- Integration of all functions saves bench space

APPLICATIONS:

Crude fiber (Weende method); Neutral Detergent Fiber; Acid Detergent Fiber; Permanganate Lignin. Also suitable for use with most other chemical extraction methods except those that involve the use of acetic acid, trichloracetic acid and/or nitric acid.

ORDERING INFORMATION:

Dimensions (Hot Extractor), 29¼W × 15⅝D × 26½"H (75 × 40 × 68cm); Weight, 143⅝ lb. (65kg). Dimensions (Cold Extraction Unit), 22⅝W × 14¾D × 11H" (58 × 38 × 28cm); Weight, 31 lb. (14kg).

INCLUDES:

Hot extractor, cold extraction unit, crucibles, crucible stand, crucible holder, reflector, spray bottle, tubing, antifoaming agent, water supply tank, crucible seals

COMPLIANCE:

Official approval: ISO 5498 (feed). Fulfills boiling start time requirements for crude fiber specified in ISO and EC standards.

Electrical Reqts.	Cat. No.	Each
200-240V 60Hz	**TC20100002**	28,500.00

Foss* Tecator* Kjeltec* 2200 Auto Distillation Unit

Microprocessor-controlled distilling unit provides automated features that improve the classic Kjeldahl distillation process

These include dilution of sample; addition of alkali, water and receiver solution; distillation and tube draining.

TC2200-001

Standard Features

- Built-in steam generator speeds up operation for fast, effective test runs
- Versatile unit performs several different distillation methods, including Kjeldahl nitrogen/protein, ammonia, TKN and alkaline direct distillation
- Accurate bellow pumps give long-term stability in dispensing reagents

Specifications

- Distillation time: 3½ min. at 30mg nitrogen (6½ min. at 200mg nitrogen) with distillation capacity of approximately 40mL/min.
- Measuring range: 0.1–200mg nitrogen
- Reproducibility: ±1.0% relative (including the digestion step)
- Recovery is greater than 99.5% at nitrogen levels between 1 and 200mg

Design

- Consists of a microprocessor-controlled distilling unit with tube emptying and automatic addition of receiver solution
- Built-in steam generator for deionized water or tap water
- Alkali/water/receiver/waste tanks with level sensors

Safety Features

- Sensors for tube in place, safety door and front hood
- Alarms for reagent availability
- Plus level/overpressure sensors for steam generator
- Patented Steam Addition for Equilibration (SAfE) technology reduces exothermic reaction when alkali is added to the acid/salt digestate and eliminates need for manual predilution of samples

ORDERING INFORMATION:

Dimensions: 20⅞L × 17⅜W × 29⅞"H (53 × 44 × 76cm). Net Weight: 75 lb. (34kg).

INCLUDES:

Set of 10 receiver flasks, test tubes for 100 and 250mL, adapters for 100 and 250mL tubes

Electrical Reqts.	Cat. No.	Each
230V 50/60Hz	TC2200-001	12,000.00

Foss* Tecator* Kjeltec* 2300 Analyzer Unit

The ultimate solution for automation in the routine Kjeldahl laboratory

Automatic distillation and approved colorimetric titration for analysis of Kjeldahl nitrogen/protein, ammonium-nitrogen, TKN, Direct Distillation (DD), and volatile acids/bases.

TC2300-001

Standard Features

- Automatic distillation procedure, including sample dilution, alkali and receiver addition, distillation, titration, calculation, reporting and tube draining
- Can be preprogrammed for ten different distillation routines
- Alarms for reagent availability
- Approved colorimetric titration system
- Accurate bellow pumps; high-precision refillable buret
- Distillate temperature sensor automatically shuts down unit if risk exists for inaccurate results

Specifications

- Distillation time: 3½ min. at 30mg nitrogen (6½ min. at 200mg nitrogen)
- Distillation capacity: approximately 40mL/min.
- Measuring range: 0.1–200mg nitrogen
- Reproducibility: ±1.0% relative (including the digestion step)
- Recovery is greater than 99.5% at nitrogen levels between 1 and 200mg

Design

- Built-in steam generator for deionized or tap water
- Alkali/water/receiver/waste tanks with level sensors
- Surfaces exposed to reagents are made of corrosion-free, chemical-resistant dyed plastic materials

Safety Features

- Sensors for: 1) tube in place, 2) safety door, 3) front hood, 4) reagent level, 5) plus level and 6) overpressure for steam generator
- SAfE* (Steam Addition for Equilibration) technology improves safety by incorporating its own mixing procedure, reducing exothermic reaction between alkali and acid and making manual predilution of samples unnecessary
- A fast tube draining system removes the need for handling hot reagents after distillation
- Safety door and drip tray can both be easily removed for cleaning

ORDERING INFORMATION:

Dimensions: 20⅞L × 17⅜W × 29⅞"H (53 × 44 × 76cm).
Net Weight: 77¼ lb. (35kg).

INCLUDES:

Automatic distilling/titration unit, adapters for 100 and 250mL tubes, digestion tube for 100 and 250mL

COMPLIANCE:

Officially approved colorimetric titration system (AOAC, EPA, DIN, ISO) simplifies validation. GLP Routines are supported by Recovery Test process and documentation of all events during analysis.

Labconco* Micro Digestor for Kjeldahl Digestions

Individual electric heaters with adjustable controls

21-131-5

Each 200w heater consists of tubular steel heater element and stainless-steel cup recessed into top insulating board.

- Accommodates 100mL flasks
- Six-port glass manifold exhausts fumes
- Serrated connector for water aspirator
- Well ventilated to prevent heat accumulation
- Top is 1½" thick (3.8cm) insulating board; protects wiring and controls
- Heavy-gauge epoxy-coated aluminum case

ORDERING INFORMATION:

Dimensions: 9L × 22½W × 14"H (23 × 57 × 36cm) to top of manifold

INCLUDES:

Manifold, two rear brackets and six 100mL flasks

Electrical Requirements	Mfr. No.	Cat. No.	Each
115V 50/60Hz, 12A	6030000	**21-131-5**	2205.00
230V AC/DC 50/60Hz, 6A	6030001	**21-131-6**	2215.00

Parr* Acid Digestion Bomb

General-purpose acid digestion bomb for organic and norganic analytical samples

For use at high temperatures and pressures.

- With PTFE liner
- Operates at up to 250°C (482°F) and 1800psig (12.4MPa)
- PTFE sample cup has spring-loaded, flanged closure; permits a good seal when bomb cap is tightened with a spanner (not included)

04-731-54

APPLICATIONS:

- Dissolves both organic and inorganic analytical samples
- Good for digesting alumina samples or reactants of unknown behavior
- Useful for complete containment of volatile chemicals; safety rupture disc in bomb head blows out to release pressure through opening in cover

ORDERING INFORMATION:

Contact your Fisher Scientific Customer Service Representative for nformation on spanner wrench and other accessories.

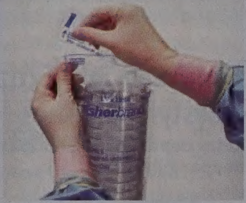
PETRI/DISPOSABLE

*Fisher*brand* Petri Dishes with Clear Lids

Polystyrene, radiation-sterilized dishes are easy to handle with just one hand

- ▸ Top and bottom edges are squared off (not rounded) to provide a firm, sure grip
- ▸ Bottom is flat so medium spreads evenly over the entire dish bottom
- ▸ Three venting ribs built into the underside of the lid prevent buildup of condensation that would drip onto the media
- ▸ Lid skirt is flared just enough so that it can be replaced quickly after streaking
- ▸ Lid fits loosely enough to provide air exchange, yet is tight enough to reduce risk of aerial contamination
- ▸ Place lid upside down on dish to close off dish from outside environment



08-757-13

Beveled Ridge Petri Dishes

- ▸ Ideal for automated filling systems
- ▸ Remove dishes easily from the center of a stack
- ▸ 150 × 15mm Kirby-Bauer dish has a larger capacity for antimicrobial susceptibility testing

Raised Ridge Petri Dishes

- ▸ Stack high and remain stacked
- ▸ Minimum of slipping, sliding, and resulting scratches

Outside Dia. × H	Cat. No.	Case of
Beveled Ridge		
100 × 15mm	**08-757-13**	500/147.10
150 × 15mm	**08-757-14**	100/149.40
Raised Ridge		
100 × 15mm	**08-757-12**	500/147.10

*Fisher*brand* Media-Miser* Dishes

Space-saving, stackable, and sterilized

These disposable polystyrene dishes are smaller than standard Petri dishes so less media is used.

- ▸ Clear tops for distortion-free viewing
- ▸ Venting ribs prevent condensation
- ▸ Lids fit snugly when turned over, to reduce the risk of aerial contamination
- ▸ Packaged in cut-apart polyethylene sleeves, 20 per sleeve
- ▸ Radiation sterilized

Clockwise from top:
08-757-14G,
08-757-11YZ, 08-757-13A

35 × 10mm Dishes

- ▸ Raised, straight ridge around the top permits high stacking with little or no slipping, sliding, or scratching

60 × 15mm Dishes

- ▸ Raised, straight ridge for high stacking

95 × 15mm Dishes

- ▸ Raised, beveled ridge around the top for easy removal from a stack

Dia. × H	Percent Media Saved[1]	Cat. No.	Case of 500
35 × 10mm	11%	**08-757-11YZ**	174.04
60 × 15mm	N/A	**08-757-13A**	171.20
95 × 15mm	11%	**08-757-14G**	170.90

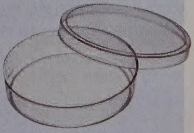
[1] *Compared to standard-size Petri dishes.*

*Fisher*brand* Extra-Deep Dishes

For fungal cultures and plant propagation

Disposable polystyrene dishes accommodate deeper media fills for longer culture periods.

- ▸ Radiation sterilized and supplied 20 per polyethylene sleeve



08-757-11Z

Stackable Dishes

- ▸ 100 × 20mm dish has a raised straight ridge around the top for stable stacking

Vented Dishes

- ▸ 100 × 25mm dish features three venting ribs on the underside of the lid

Description	Dia. × H	Cat. No.	Case of 500
Stackable	100 × 20mm	**08-757-11Z**	194.35
Vented	100 × 25mm	**08-757-11**	235.08

*Fisherbrand** Petri Dishes and Pad Dishes

Available with or without absorbent pads

Feature tight fitting lid to prevent dehydration.

Sterilized Petri Dishes

- 47mm dishes can be used with solid agar medium or add absorbent pads for liquid medium
- Molded polystyrene

Sterilized Pad Dishes

- Preloaded 47mm dishes with sterilized absorbent pads
- Minimize contamination
- Pure cellulose pad
- Extended 3-year shelf-life

09-720-501

Description	Cat. No.	Pack of
Petri Dishes	09-720-500	150/43.00

Millipore* Petri Dishes and Petri-Pad* Dishes

Available with or without absorbent pads

Petri Dishes

- 47mm sterilized Petri dishes
- Use with solid agar medium
- Dishes are made of molded polystyrene

Petri-Pad Dishes

- Presterilized disposable 47mm dishes preloaded with sterilized absorbent pads
- Eliminate labor and cost of hand-loading pads and minimize contamination
- Pads are pure cellulose

PD20 047 00

REQUIRED ACCESSORIES:

When using with liquid medium, add sterile absorbent pads (order Cat. No. AP10 047 S0, 47mm Sterile Pads; or AP10 045 S1, Millipore Pad Dispenser with Sterile Pads).

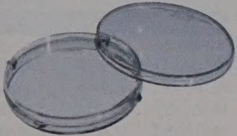
BD* Falcon* Tight-Fit Lid Dish

Tightly fitting lid minimizes sample dehydration

- Durable polystyrene construction
- Suitable for classroom observation
- Sterile and disposable

ORDERING INFORMATION:

Supplied 20 per sleeve.



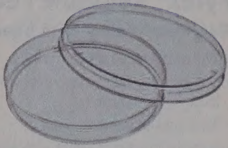
08-757-105

Dia. × H	Mfr. No.	Cat. No.	Case of 500
50 × 9mm	351006	08-757-105	237.95

BD* Optilux* Dishes

Provide exceptional optical clarity

- Design permits unimpaired observation of growth characteristics
- Reference mark on sides of dish and lid aids in positioning when scanning with microscope
- Sterile polystyrene
- Disposable



08-757-103C

ORDERING INFORMATION:

Supplied 20 per sleeve.

PETRI/ACCESSORIES

*Fisherbrand** Easyplate* Petri Dish Rack

Color-coded racks optimize sample organization and identification

- Four channels hold 100mm Petri dishes
- Silicone edges permit random plate entry and retrieval without disturbing the upper stack
- Inserted plates—media side up—remain suspended without needing the support of the lower plate
- Made of lightweight polycarbonate that is autoclavable and chemical resistant

ORDERING INFORMATION:

Available in two sizes—the 14" (35.5cm) rack holds a total of 84; the 9" (22.8cm) rack holds 48.

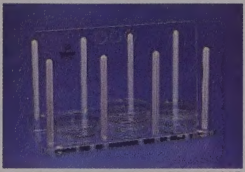
Nalgene* Autoclavable Petri and Bioassay Dish Racks

For glass and plastic dishes



08-759-10B

- Racks are easily sterilized by autoclaving
- Smooth rounded corners, finger-grip handle, and rubber feet make carrying dishes safe and secure
- Clear racks permit side visibility for culture checks during incubation
- Useful for media preparation, inoculations, incubation, and storage
- Simple assembly required

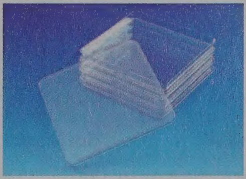
TISSUE CULTURE DISHES

Nunc* 245mm Square BioAssay Dishes

Large 500cm² square growth area



12-565-101

- Made of clear polystyrene
- Available untreated or with Nunclon* Δ cell culture surface treatment

Untreated

- Ideal for screening libraries or isolating clones

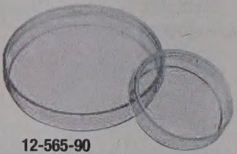
Nunclon Δ treated

- Provide an optimal surface for cell attachment and growth
- Sterile, supplied with lid
- Dimensions, 245L × 245W × 25mmH
- Four dishes per sleeve

Treatment	Mfr. No.	Cat. No.	Case of 16
Untreated	240835	**12-565-224**	132.93
Nunclon Δ	166508	**12-565-101**	255.75

Nunclon* Δ Dishes

Treated dishes provide excellent cell attachment and growth



12-565-90

- Available with culture areas ranging from 9 to 150cm²
- Polystyrene provides high optical quality—especially when microscopic examination is required; also available in Permanox* plastic (12-565-97)
- Top and bottom stacking rings for easier handling and more stable stacking
- Tested for cell growth and plating efficiency
- Radiation sterilized

Polystyrene Plastic Dishes

- Come with or without air vents for gas exchange
- For cloning experiments and plating efficiency determinations
- Cat. Nos. 12-565-92 and -96 feature 2mm grid

Permanox* Plastic Dish

- Chemically resistant to many solvents and useful with EM embedding reagents
- Low dissolved O_2 makes this plate ideal for culturing anoxic cells

INCLUDES:

Certificate that assures user of biological performance as well as traceability.

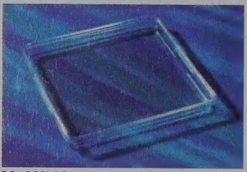
Corning* 245mm Square BioAssay Dishes

Generous growth area of 500cm² allows for larger assays and better overall use of space in incubators



06-443-22

- Improve the efficiency of microbial assays including library replication, colony picking, and plaque lift studies
- Polystyrene dishes feature stacking beads for stable stacking
- Available with or without special handles for easy manipulation
- Compatible with various automated colony picking and gridding robots
- Supplied with vented lid to provide consistent gas exchange
- Sterile, certified nonpyrogenic

Description	L × W × H†	Mfr. No.	Cat. No.	Case of
With Handles	245 × 245 × 26mm	431111	**07-200-600**	16/114.34

Corning* Cell Culture-Treated Polystyrene Dishes

Surface treated to enhance cell attachment and growth

08-722-20, 08-772-22, 07-200-599, 08-772-24

- Tested for sterility and cell growth
- The 60 × 15mm dish is also available with a 2mm grid to facilitate enumeration of cells or plaques
- Radiation sterilized

ORDERING INFORMATION:

Shelf pack 08-772-23 consists of six-pack carriers which hold six sleeves of 10 dishes each—minimizing contamination of unused dishes after sleeve is opened.

Supplied in sleeves of 20 dishes (except 150 × 25mm dish which is packaged five per sleeve and 245 × 245mm dish which comes four per sleeve).

DISPENSERS/DILUTERS

*Fisherbrand** Bottle-Top Dispensers

Five fully adjustable models cover a dispensing range from 0.05 to 50mL

Deliver even aggressive liquids and organic solvents safely and effortlessly (except hydrofluoric acid).

- Accuracy: ±0.7%
- Repeatability: ±0.1% or better
- Fully autoclavable to 121°C (250°F)
- Precision valve mechanism ensures easy priming and minimum reagent waste, with no leakage back to the reservoir
- Polypropylene protection sleeve surrounds the borosilicate glass barrel
- New antidrip taps prevent accidental spillage

03-692-180

- Low-profile amber reservoirs (sold separately, see next page) have a wide footprint to prevent tipping
- Side neck lets you refill the reservoirs without removing the dispenser assembly, eliminating a potential handling hazard
- New spring-lock provides quicker, more accurate volume selection
- Dispenser head can be rotated 360° for convenient dispensing and volume adjustment
- Smooth-moving PTFE piston minimizes operator fatigue and can be removed in seconds for cleaning
- Dispensers fit directly onto 30mm-neck bottles
- Manufactured with ISO 9002-certified processes

INCLUDES:

Adapters for use with 38, 40, and 45mm-neck bottles

CERTIFICATIONS:

CE marked

Range	Increments	Cat. No.	Each
0.05 to 2.5mL	0.05mL	**03-692-177**	328.75
0.1 to 5.0mL	0.1mL	**03-692-178**	328.75

1.0 to 50mL	1.0mL	**03-692-181**	451.50

ACCESSORIES

Anti-tip Reservoirs

Side neck allows filling of reservoir without removing the dispenser

- Amber borosilicate glass
- Low profile and wide footprint for extra stability
- Fit directly on 1.4L reservoir
- Require 45mm adapter (included with bottle-top dispenser) to fit 2.5L reservoir

Size	Cat. No.	Each
1.4L	**03-692-182**	107.00
2.5L	**03-692-183**	125.00

Thermo Scientific* Repipet* Dispensers

Dispense any common reagent except hydrofluoric acid

Protect valuable reagents—air intake tube and filter keep out airborne contamination.

- 0.5mL capacity dispenser
- Volume range: 0.01 to 50mL
- Accuracy 1%
- Reproducibility 0.1%
- Plunger-type operation
- Devices automatically expel air bubbles
- With round 1 qt. (950mL) amber bottle

13-687-56

50mL	0.50mL	3050A	**13-687-57**	475.00

Thermo Scientific* Repipet* II Dispensers

Tough fluorocarbon resin sleeve entirely protects dispensing mechanism

Suitable for use with all lab reagents except hydrofluoric acid and organic solvents.

- Reproducibility ±0.2%
- Volume range: 0.01 to 20mL
- Accuracy ±1.5%
- Magnifying indicator allows easy and accurate viewing of scale
- Dispensing mechanism features extra-thick borosilicate glass barrel and plunger
- PTFE inlet and outlet tips
- With amber glass bottles; 500mL for 5mL dispenser and 1250mL bottle for 10 and 20mL dispensers

13-687-62A

Volume	Increments	Mfr. No.	Cat. No.	Each

Thermo Scientific* Repipet* Jr. Dispensers

Models cover volume range from 0.01 through 10mL

- Accuracy: ±2%
- Reproducibility: 5%

Adjustable Volume

- Simple plunger operation to dispense liquids
- Volumes variable over entire range
- Graduations: 0.1mL
- Ideal for repetitive dispensing of aqueous solutions, water, diluted acids and bases, foods, and unhydrolyzed proteins
- Not recommended for oils, hydrocarbons, iodine, petroleum-based chemicals, oxidizing acids, alicyclics, or solvents
- All plastic
- 10¼"H (26cm)
- With 32 oz. (960mL) plastic container
- Without stand—available on request

13-687-59B

Fixed Volume

- Just press once to quickly dispense a fixed volume
- Made of rugged polypropylene to reduce breakage
- Dispense a variety of chemicals
- Not for use with oils, hydrocarbons, petroleum-based chemicals, oxidizing acids, concentrated acids, alicyclics and solvents
- Supplied with amber glass container, plastic container, four interchangeable cap adapters for 20-400, 22-400, 24-400, and 28-400 screw caps, and an extra 12" (30.5cm) of PTFE resin intake tubing
- 1.0 to 3.0mL sizes come with 8 oz. (240mL) containers
- 4.0 to 10.0mL sizes come with 16 oz. (480mL) containers

Thermo Scientific* Universal and Low-Profile Repipet* Dispensers

Handy, accurate Pyrex* glass reagent diluters

13-687-22

Safely handle most any reagent, including concentrated acids (except hydrofluoric) and alkalis, chlorinated hydrocarbons. Only glass and fluorocarbon resin come in contact with reagent. Repipet dispensers dispense 20 times/min.

- Lift plunger to fill, depress to deliver
- Accuracy: 1%
- Reproducibility: 0.1%

Universal Diluters

- Fit common screw-cap reagent bottles with openings greater than ¾" I.D. (19mm)
- Ideal for blood chemistries and biological and microbiological analyses
- Come with three sets of caps and washers to fit 28-430, 33-430, and 38-430 bottle threads (other sizes available on request)
- Features magnifying indicator, integral air filter, and 24" (61cm) of PTFE resin tubing (metal indicator for diluters available on special order)
- Without bottle

Low-Profile Diluters

- Wide-mouth, 1000mL reservoir containers have Halar* fluorocarbon resin caps with two openings: one for dispenser; other to allow refilling (no need to remove dispenser)
- Bottle designed for solid support, less chance of breakage
- Low profile allows easy fit into shelf space and refrigerators
- Amberized glass
- PTFE resin outlet tip
- With air intake tubulation

NOTE:

PTFE resin caps may distort with autoclaving or use of strong solvents.

Brinkmann* Bottle-Top Dispensers

With a broad array of adapters and accessories available, dispensers are designed to fit almost any size reagent bottle for almost any application

Brinkmann fixed- and adjustable-volume bottle-top dispensers shown with reservoirs (not supplied); some with accessory extended discharge tube or drying tube.

Fixed- and adjustable-volume dispensers cover a volume range of 0.1 to 100mL. Deliver even the harshest reagents safely. Choose standard models or ChemSaver models, which recirculate the reagent used during the priming step. Accuracy ±0.5%,† precision ≤0.1%.

- Clear plastic sleeve surrounds the glass cylinder to protect the user from chemical hazards should the cylinder break
- Support sleeve surrounds the discharge tubing to restrict its movement and provide an additional safety barrier during dispensing
- Entire assembly rotates 360° to allow the user to obtain the safest dispensing position and reach the volume adjustment at all times
- Autoclavable without having to loosen valves or remove individual parts
- Easy to use and maintain
- Unique "wiping" piston seal of PTFE resin eliminates the problems of piston swelling/freezing common to conventional floating-piston dispensers
- Reagent is wiped out of the cylinder with each stroke to prevent the buildup of residue that can lead to malfunction
- Grooved, positive-lock volume adjustment ensures precision and prevents accidental setting changes during use
- Unique telescoping filling tube adjusts to fit the reagent bottle, without cutting
- Filling valve, tubing, and even the piston can be individually replaced, to minimize repairs and downtime
- ChemSaver models eliminate reagent waste through the use of a recirculating safety valve that diverts reagent used in priming back into the reservoir bottle
- ChemSaver valve can be closed to prevent unintended flow of reagent
- ChemSaver models can be user-calibrated for fine adjustment of volume when working with viscous or high-density solutions

INCLUDES:

All dispensers are supplied with a certificate of calibration to aid in GLP compliance. Standard dispensers come in fixed- as well as adjustable-volume styles; ChemSaver dispensers, in adjustable-volume style only.

Jencons Safety Zippette Bottle-Top Dispensers

Five fully adjustable models cover a dispensing range from 0.05 to 50mL

Deliver even aggressive liquids and organic solvents safely and effortlessly (except HF). Precision valve mechanism ensures easy priming and minimum reagent waste, with no leakage back to the reservoir.

- Accuracy: ±0.7%
- Repeatability: ±0.1% or better
- Fully autoclavable to 121°C (250°F)
- Polypropylene protection sleeve surrounds the borosilicate glass barrel
- Anti-drip tap prevents accidental spillage
- Low-profile amber reservoirs (not included) specially designed for use with Zippette systems have wide footprint to prevent tipping
- Side neck lets you refill reservoirs without removing dispenser assembly—eliminating a potential handling hazard
- New spring-lock adjustment provides quicker, more accurate volume selection
- Dispenser head can be rotated 360° for convenient dispensing and volume adjustment
- Smooth-moving PTFE piston minimizes operator fatigue; can be removed in seconds for cleaning

03-692-95

- Dispensers fit directly onto 30mm-neck bottles
- Manufactured with an ISO 9002-certified process

INCLUDES:

Adapters for use with 38, 40, and 45mm-neck bottles, a calibration certificate, and "Quick Calibration" wheel for in-lab calibration.

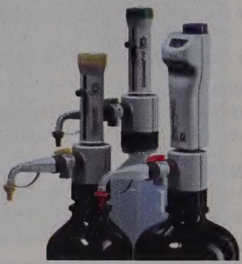
Brand* Dispensette* III Bottle-Top Dispensers from BrandTech*

For safe and accurate dispensing of many laboratory liquids, including most acids, bases, salt solutions, scintillation fluids and many organic solvents

Low-friction floating piston design provides reliable, smooth, one-handed operation without wiping seals to wear out. Suitable for most laboratory applications; fit most bottles with included adapters and autoclavable for use with sterile reagents.



13-688-2 Series

- Digital Easy Calibration, analog, and fixed-volume models from 50 to 100mL
- Rugged floating piston design, adapts to nearly any unpressurized container
- All models can be calibrated easily
- Digital models include Easy Calibration* feature
- Integral SafetyPrime* valve permits recirculation of dispensed liquid into reagent bottle during priming to reduce sputtering and conserve reagents
- Safety discharge system protects against inadvertent dispensing
- Polypropylene cylinder sleeve helps contain dispenser contents in event of breakage
- Flowpath consists of: borosilicate glass, Al_2O_3 ceramic, platinum-iridium, PFTE, ETFE, FEP and PFA
- Polypropylene safety screw cap on discharge tube
- Accuracy for all models is within ±0.5% (±1.0% for 0.05-0.5mL size), with reproducibility of ≤0.1% (≤0.2% for 0.05-0.5mL size)
- Autoclavable at 250°F (121°C) for sterile dispensing or decontamination
- Supplied with thread adapters and telescoping filling tube that adjusts to length without cutting
- Valve block rotates 360°

ORDERING INFORMATION:

Accessories available that allow dispenser to adapt to nearly any unpressurized reagent container; tube-to-tube serial dispensing with flexible discharge tubing, and dispense sterile or moisture/CO_2 sensitive reagents. For a complete listing, visit our Web site.

INCLUDES:

45mm thread, discharge tube, telescoping filling tube, valve mounting tool, polypropylene thread adapters (10mL or smaller units supplied with 24, 28, 33 and 38mm adapters; 25 and 50mL units come with 28, 33 and 38mm adapters; 100mL units come with 33 and 38mL adapters), certificate of performance, and operating manual

WARRANTY:

One year

COMPLIANCE:

Can be calibrated by users for GLP and ISO 9000 compliance

NOTE:

For dispensing concentrated fuming acids, peroxides, or difficult organic solvents, select the Dispensette Organic (see next page). Not for use with hydrofluoric acid (HF) or carbon disulfide (CS_2).

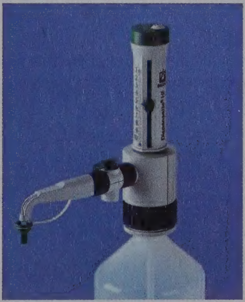
Brand* Dispensette* HF Bottle-Top Dispensers from BrandTech*

Safely and accurately dispense acid (up to 52%) and organic solvents up to a density of 3.8g/cm³ (i.e., bromoform, dibromoethane and tetrabromoethane)

- Analog-adjustable model features a SafetyPrime* valve to purge bubbles without dispensing, and reduce spurting and reagent waste
- Flowpath consists of the following high-grade materials: Al_2O_3 ceramic, platinum-iridium, PTFE, ETFE, FEP, and PFA
- Discharge screw cap is polypropylene



13-688-101

INCLUDES:

Discharge tube, telescoping filling tube, polypropylene bottle-top thread adapters, operating manual, and certificate of calibration

WARRANTY:

One year

NOTE:

None of the Dispensette dispensers should be used with carbon disulfide (CS_2). See Dispensette III and Dispensette Organic dispensers to dispense many other liquids.

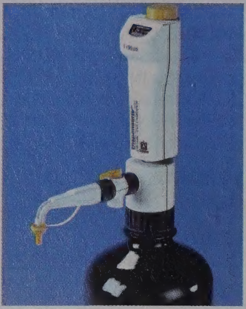
Range	Mfr. No.	Cat. No.	Each
1 to 10mL	4701041	**13-688-101**	900.00

Brand* Dispensette* Organic Bottle-Top Dispensers from BrandTech*

Ideal for HPLC and combinatorial chemistry labs

For dispensing of critical organic solvents including chlorinated and fluorinated hydrocarbons, concentrated acids (e.g., fuming HCl and HNO_3), trifluoroacetic acid (TFA) tetrahydrofuran (THF), methanol, acetonitrile, methylene choride, DMF, and DMSO.

- Mounts directly on most solvent and reagent bottles for fast, convenient dispensing
- Reinforced discharge tube with threaded safety cap
- Safety discharge system to reduce the chance of inadvertent dispensing
- Telescoping filling tube and polypropylene thread adapters (ETFE adapters available separately)
- Easily disassemble for cleaning and autoclaving
- Choice of analog adjustable and digital Easy Calibration* models that reduce calibration time by half compared to conventional instruments



13-688-276

- Optional SafetyPrime* valve reduces spurting and reagent waste while priming
- Flowpath consists of borosilicate glass, ceramic, tantalum, PTFE, ETFE, FEP, and PFA
- Discharge tube safety screw cap is polypropylene

INCLUDES:

Discharge tube, telescopic filling tube, selection of bottle-top thread adapters, manual, and calibration certificate

NOTE:

Must not be used for hydrofluoric acid (HF), alkaline solutions, hydrochloride salts, or liquids incompatible with the listed flowpath materials.

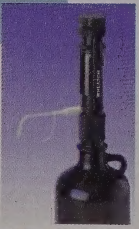
Wheaton Socorex* 520/521 Bottle-Top Dispensers

These accurate, user-friendly bottle-top dispensers are an affordable alternative to their all-glass counterparts

Volume selection is fast, easy and accurate. Simply rotate the selector ring while viewing the settings on the fixed window. Volume adjustments are made in calibrated steps and "locked in" to ensure that the amount dispensed is the amount required.

- High chemical resistance
- Easy in-lab calibration
- Six models cover volume range from 0.25 to 109mL
- Fit reservoirs with 33mm screw neck finish
- Accuracy: <±0.7%
- Reproducibility: <0.1%
- Syringe barrel is encased in a protective sleeve to prevent breakage and eliminate risk of spilling
- Dispenser can be quickly disassembled for cleaning
- Autoclavable fully assembled
- Dispenser rotates 360° on bottle

13-706-32 (reservoir not included).



13-706-4 (reservoir not included).

- All parts that come in contact with the liquid in use are chemically inert
- PTFE resin coating on the glass plunger prevents the "freezing" normally associated with dispensing caustic solutions

INCLUDES:

Adapters to fit bottles with 28, 38, and 45mm finishes

NOTE:

Not for use with concentrated or full-strength acids.

Hamilton* Microlab* Series 500 Diluters/Dispensers

These precision fluid-handling devices use positive displacement for highly accurate dispenses or dilutions

Hamilton 500 Series Diluter/ Dispenser with optional printer.

hoose economical Series 500A diluter or dispenser for simple fluid handling asks, or Series 500B multiprogrammable diluter/dispensers to perform more ntricate tasks such as titrations. You can perform diluting and dispensing perations via fill, dispense, auto-refill and pathway priming capabilities ith dispensing volumes of 0.025µL to 25mL.

- Syringe plunger fills or releases a desired volume of fluid with the touch of a button
- Programmable devices eliminate the problems associated with manual techniques using volumetric flasks and pipetters
- Liquid contacts only chemically inert Kel-F*, PTFE resin, and borosilicate glass
- Language switch allows display readouts in English, French, German, Portuguese or Spanish

odel 503A Dual Syringe Diluter

- Primarily for simple dilutions, but will perform single syringe dispensing as well

odel 504A Dual Syringe Dispenser

- Designed to dispense two separate liquids, providing a unique pathway for each

odel 510B Single Syringe Dispenser

- Primarily for dispensing a single fluid from a reservoir but will also perform titrations, aliquot and serial dispensing

odel 530B Dual Syringe Diluter

- Obtain ratios from 1:1 to 1:25,000
- Performs titrations, aliquot dispensing, serial dilutions and standards preparation may also be performed

odel 540B Dual Syringe Dispenser

- Equipped with independent fluid paths with user-programmable valve control for complicated applications

PPLICATIONS:

erfect for QC, production, environmental or chemical/life cience laboratories

ORDERING INFORMATION:

For 115V 50/60Hz. 220V models available; contact your Fisher Scientific Customer Service Representative.

INCLUDES:

Controller, ergonomically designed hand probe, valve, fill and dispense tubing in both 18- and 12-gauge, power cord and user manual. Everything required for operation is included; other size syringes available.

COMPLIANCE:

Units meet TUV/GS standards, are CSA approved.

CERTIFICATIONS:

CE marked; NIST* traceable. Each device is calibrated and certified against equipment whose calibration is traceable to NIST.

Nalgene* Single-Volume Dispensers

Deliver precise volumes automatically every time

Low-density polyethylene dispensers with polypropylene measuring chambers.

- Accuracy: ~2.5%
- A squeeze of the 250mL reservoir fills measuring chamber—another squeeze dispenses exact amount
- Disassembles in seconds for refilling or cleaning

13-683-20D

Chamber Capacity	Mfr. No.	Cat. No.	Each	Case of 6
1mL	3700-0001	**13-683-20A**	40.91	163.61
2mL	3700-0002	**13-683-20B**	40.91	163.61
5mL	3700-0005	**13-683-20D**	40.91	163.61

Nalgene* Variable-Volume Dispensers

Volume range 1 to 60mL

- Measuring cup slides up or down on vertical tube
- Height of tube inside measuring chamber determines volume to be dispensed
- Fill cup by squeezing bottle, forcing liquid up tube
- Release bottle pressure to draw excess liquid (above top of tube) back into bottle
- Desired volume remains in cup

25mL dispenser

- Measuring chamber graduated from 1 to 25mL; with 500mL graduated bottle and dust cover

60mL dispensers

- Measuring chamber calibrated in ounces (½, 1, 1½, 2) and milliliters (10 to 60 in 10mL increments)
- Patented push-pull stopper provided on end of measuring chamber stem makes dispenser leak resistant when closed
- For dispensing bases, aqueous solutions, and alcohols
- Has high-density polyethylene ring-tab around bottle neck for attaching a label

13-683-55

INCLUDES:
Low-density polyethylene bottle, graduated transparent polymethylpentene measuring chamber, polyethylene fill tube that connects bottle with chamber, polypropylene stem closure and push-pull stopper

Chamber Capacity	Bottle Capacity	Mfr. No.	Cat. No.	Each	Case of 6

DISSECTING

INSTRUMENTS

*Fisherbrand** Dissecting Set

All components come in plastic case

- Forceps: medium points, nickel plated
- Scissors: 1½" (40mm) blades, stainless steel
- Dissecting Knife Handle: nickel plated
- Knife Blades: stainless steel pack of 3
- Dropping Pipet: glass
- Bent Dissecting Needle: stainless steel with plastic handle
- Straight Dissecting Needle: stainless steel with plastic handle
- Vinylite* Ruler: 6" (15cm)

08-855

Cat. No.	Each	Case of 12
08-855	42.62	437.10

*Trademark. See Trademark Reference.

Prices subject to change.

*Fisherbrand** Metal Needle Holder

Has adjustable chuck to tighten or loosen steel needles

- Use with 08-960 Series Fisherbrand Dissecting Needles
- Overall length: 3⅛" (80mm)
- With one straight needle

08-955

Cat. No.	Each	Case of 12
08-955	13.46	129.09

*Fisherbrand** Dissecting Needles

- Steel
- Needles only
- With sharp points
- Length, 2" (50mm)
- Use with 08-955 Fisherbrand Metal Needle Holder

08-960A, 08-960B

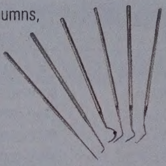
Type	Cat. No.	Pack of 36
Straight	08-960A	16.66
Curved	08-960B	19.13

*Fisherbrand** Microprobes

Six stainless-steel probes for electronics, dissecting, inspecting, soldering, gluing, and micromanipulation

Excellent for hooking small springs, packing columns, cleaning miniature parts, and soldering boards. Solder won't stick to probes.

- Tips are hand-honed for sharpness
- Precision-ground, highly polished, and tempered for long life



ORDERING INFORMATION:

Pack includes one each of six shapes shown in photo.

08-850

Length	Cat. No.	Pack
6" (152mm)	08-850	58.38

*Fisherbrand** Seeker with Bent End

Partly knurled to ensure firm grip

- Nickel-plated steel probe with round handle
- Curved point tapered and blunt at end
- Overall length: 6" (152mm)

08-995

Cat. No.	Each	Case of 25
08-995	16.84	336.89

*Fisherbrand** Shears

For cartilage and bone

- Strong, removable bar-spring makes shears self-opening
- Stainless steel as per ASTM* (F899-89) Standards
- Blade length: 1⅛" (30mm)
- Sterilizable by EtO/gamma radiation
- Rockwell Hardness: 50-55 HRC

08-990

COMPLIANCE:

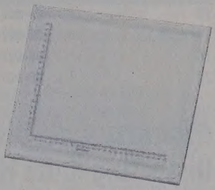
Produced under ISO 9001, GMP, cGMP guidelines; FDA-certified stainless material

Length	Cat. No.	Each	Case of 6
5½" (139.7mm)	08-990	78.96	419.23

Thermo Scientific* Richard-Allan Scientific* Dissecting Boards

White background with dimensional scales in centimeters allows quick sizing and serves as part of the permanent record (e.g., photographing specimens)

- White, high-density polyethylene boards make conventional cutting surfaces virtually obsolete
- Chemical and stain resistant
- Resist swelling, warping, or cracking
- Spill-containment border confines excess fluids
- Rubber feet prevent slippage on benchtops
- Feet and curved edges facilitate lifting and moving
- Fully washable



Dissecting board

L × W × H	Cat. No.	Each
⅝ × 13 × 11" (1.7 × 33 × 28cm)	09-002-12	75.77
⅝ × 23 × 16" (1.7 × 58 × 41cm)	09-002-16	157.01

Needles with Birch Handles

Sharp-pointed needles with attached holder

- Needle length: 1¾" (45mm)
- Overall length: 5¹¹⁄₁₆" (145mm)

08-965B, 08-965A

Type	Cat. No.	Pack of 12	Case of
Straight	08-965A	6.86	12 Pk./68.55
Curved	08-965B	----	144/37.07

SCALPELS

Fisherbrand* Metal Scalpels

All-metal nickel-plated scalpels

- Highly polished
- Easy to clean and sterilize
- Retain good cutting edge

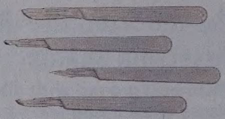
08-920A

Length of Cutting Edge	Cat. No.	Each	Case of 12
1" (2.5cm)	**08-920A**	11.46	114.56
1½" (3.8cm)	**08-920B**	13.37	137.09

Fisherbrand* Single-Use Scalpels

Surgical quality—also ideal for student or general lab use

- Stainless-steel blade attached to plastic handle
- Sterile, individually packaged
- Plastic guard protects cutting edge and prevents package puncture



08-927-5D, -5C, -5B, -5A

Includes Blade Size	Cat. No.	Pack of 20	Case of 50 Pk.
10	**08-927-5A**	52.53	2052.07
11	**08-927-5B**	50.16	1959.56
15	**08-927-5C**	52.15	2036.85
21	**08-927-5D**	52.15	2036.85

Fisherbrand* Disposable-Blade Dissecting Knife Handles

Smooth, tapered back end serves as blunt probe

08-913-5, 08-917-5, 08-914-5

Reusable handles in a choice of styles sold separately from interchangeable blades (see Fisherbrand Stainless-steel Blades below). Stainless-steel handles scientifically shaped and balanced for delicate dissecting and surgical use.

- Blades slide on smoothly and securely
- Passivated
- Fully autoclavable and sterilizable
- Snag-free
- Use blade sizes 10, 11, 12, 15 with handle sizes 3 and 7
- Use blade sizes 20, 21, 22, 23 with handle size 4

Size	Description	Length	Cat. No.	Each
3	Flat with patterned grip	4 7/8" (12.4cm)	**08-913-5**	13.58
4	Flat with patterned grip	5 9/32" (13.4cm)	**08-917-5**	15.95
7	Slender, contoured	6 5/16" (16cm)	**08-914-5**	25.70

LOOKING FOR MORE DISSECTING TOOLS?

See the Scissors Section for dissecting scissors.

Fisherbrand* Stainless-Steel Blades

Exceptionally strong and uniformly sharp

- Surgical quality
- Sterile
- Individually foil-wrapped

DISTILLATION

EQUIPMENT

Fisher Scientific* DU100 Distillation Unit

Semiautomatic distillation unit provides a simple and safe alternative for routine Kjeldahl nitrogen/protein, ammonia, TKN, and alkaline direct distillation

Standard Features

- Easy to use—semiautomatic distilling unit programmable for alkali addition and distillation cycle
- Accurate bellows pump for long-term stability in reagent delivery

Safety Features

- Patented SAfE* (Steam Addition for Equilibration) technology for safe distilling of tubes with acid/salt cake contents—provides better percent recovery than with conventional method
- Interconnected safety devices include sensors for tube in place, safety door, front hood, and level/overpressure sensors for steam generator

TCDU100

ORDERING INFORMATION:

Dimensions: 11¾L × 14⅛W × 31½"H (30 × 36 × 80cm). Net weight, 55 lb. (25kg).

INCLUDES:

Built-in steam generator, alkali tank, set of 10 receiver flasks, adapters for 100 and 250mL tubes

Electrical Reqts.	Cat. No.	Each
220V 50/60Hz	**TCDU100**	7210.23

ACCESSORIES

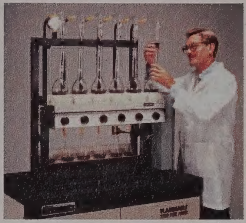
For Fisher Scientific* Model DU100 (above) and Foss* Tecator* Kjeltec* Model 2200 (see p. 596)

NOTE: Kjeltec Model 2200 is in the digestion section

Description	Cat. No.	Pack of
Rubber Adapters for 250mL Tubes	**TC1000-0056**	1/76.50
Rubber Adapters for 75 or 100mL Tubes	**TC1000-0487**	1/88.27
Direct Distillation Tubes, 750mL	**TC1000-0787**	6/460.47
Stand for 12 Direct Distillation Tubes	**TC1000-2049**	1/206.30

Labconco* Countertop Distillation Units

Two- or six-place models



21-131-14

- Manifold assembly holds two or six 500 or 800mL Kjeldahl flasks
- One-piece manifold assembly ensures optimum heat dissipation and uniform condensation
- Leak-resistant condensing tubes are seamless stainless steel for optimum heat transfer
- Heating system with continuously variable control regulates electrical input for each heater from 20 to 100% of electrical capacity
- Sturdy, epoxy-coated tubular steel frame; sits on a table or a cabinet

Six-Place Model Features:

- Counterflow heat exchange to control backpressure and provide uniform distillation rates
- Thermometer gauge that indicates temperature of distillation cooling water
- Remote-control flow valve that adjusts cooling water volume
- Molded epoxy resin base and terminal box for electrical connections

NOTE:

Two-place model comes with 8' long (2.4m) 3-wire cord and plug.

No. of Places	Dimensions (L × W × H)	Mfr. No.	Electrical Reqts.	Cat. No.	Each

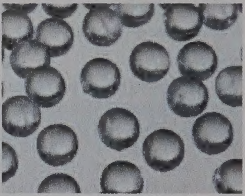
9.5mm	D1069391	**09-191-30C**	88.35

Economical Solid Glass Beads

Used for mixing, boiling, or packing

- Spherical
- Soda-lime glass

ORDERING INFORMATION:
Packaged in 1 lb. packs



11-312 Series

Approx. Diameter	Approx. No./lb.	Cat. No.	Each
3mm	12,500	**11-312A**	20.65
4mm	5500	**11-312B**	20.65
5mm	2700	**11-312C**	18.51
6mm	1600	**11-312D**	18.51

Porcelain 6mm Berl Saddles

Ideal for vacuum distillation, absorption, extraction

- Relatively high usable contact surface area
- Lower gas flow resistance
- Good internal distribution

ORDERING INFORMATION:
Packaged in 200cc packs

09-191-5

No./Pack	Cat. No.	Each
250	**09-191-5**	35.01

APPARATUS

Pyrex* Distillation Assembly

Includes flask, condenser and inlet tube

- 500mL flask has ₮ 29/42 joint; condenser has ₮ 19/38 joint
- Specially designed Kjeldahl type flask performs both distillation and digestion steps in determining nitrogen in organic compounds

ORDERING INFORMATION:
Overall height: 41cm. For replacement condenser (07-729A) only.

REQUIRED ACCESSORIES:
Clamp (sold separately)

DROSOPHILA

INSECT CELL CULTURE MEDIA

Mediatech* Insectagro* Cell Culture Media

High-quality media and supplements for the growth and maintenance of various insect cell lines

Serum-free media feature low protein concentrations without hormones, growth or attachment factors.

MT-61-201-RM, MT-13-100-CV, MT-13-901-CI, and MT-61-161-RM

ORDERING INFORMATION:

Liquid and powdered media are packaged in PET with tamper-evident seals; shipped at ambient temperature. Certificates of Analysis for each lot are available from Mediatech upon request.

COMPLIANCE:

Liquid products are tested for sterility according to FDA Guidelines for the Manufacture of In Vitro Diagnostic Products (January 1994) for sterile labeling.

VIALS AND CLOSURES

Applied Scientific Drosophila Vials and Closures

Shell Vials

Straight wall design minimizes the dislodging of food; provides more efficient racking, filling and plugging

Standard-Packed Glass Shell Vials

- Type 1, N-51A borosilicate glass
- Securely packed in cardboard trays with individual vial dividers

Bulk- and Tray-Packed Shell Vials

- Available in narrow- or wide-mouth styles
- Constructed from polystyrene, K-Resin*, or polypropylene
- K-Resin and polypropylene vials are virtually unbreakable, scratch and mar resistant; polystyrene and K-Resin vials have glass-like clarity
- Polypropylene vials are autoclavable; polystyrene and K-Resin are nonautoclavable

ORDERING INFORMATION:

Bulk-packed vials are layered 500 per case and oriented with all open ends facing one way. Tray-packed vials are shrink-wrapped in a 10 × 10 row configuration with dividers between vials.

Material	Style	O.D. × H	Cat. No.	Price

† Also available in case of 4 Pk./308.32

Stock Bottles

Wide base/narrow top design prevents fly meal from falling out when bottle is turned upside down

- Safer and more economical than glass
- Feature uniform top opening with a pliable neck to accept a variety of closures

Round-Bottom Bottles

- Polypropylene
- Thin wall design for excellent visibility
- AS-117 features a unique indent 20mm from the bottom to secure food at bottom of bottle
- Single use or autoclave for reuse

Square-Bottom Bottles

- Available in polypropylene or polyethylene
- Polypropylene provides good transparency and can be autoclaved for reuse or disposed after single use
- Nonautoclavable polyethylene bottle has a thin wall design for good visibility

Description	Dimensions	Capacity	Cat. No.	Case of
Round-Bottom Bottles				
Standard bottle	64 dia. × 103mmH	6 oz. (177mL)	**AS-115**	500/98.58
Bottle with indentation	60 dia. × 130mmH	8 oz. (237mL)	**AS-117**	250/53.09
Square-Bottom Bottles				
Polypropylene	57L × 57W × 103mmH	6 oz. (177mL)	**AS-355**	500/98.41
Polyethylene	57L × 57W × 103mmH	6 oz. (177mL)	**AS-359**	500/101.71

ACCESSORIES

Trays and Dividers

Accommodate narrow- or wide-diameter vials

- Cardboard trays have cell dividers
- 10 × 10-row configuration

For use with	Cat. No.	Case of 50
Narrow vials	**AS-260**	64.26
Wide vials	**AS-261**	70.03

*Trademark. See Trademark Reference.

Prices subject to change.

Applied Scientific Drosophila Vials and Closures, Contd.

Cotton and Rayon Balls

- For use with narrow-mouth vials

Description	Cat. No.	Case of 2000
Large Cotton Balls	**AS-212**	27.60
Large Rayon Balls	**AS-210**	29.90

BuzzPlugs* Vial and Bottle Closures

Nonshedding, dense weave of nontoxic cellulose acetate minimizes evaporation, keeps food fresh longer

- Superior barrier to mite infestation
- Exact fit with narrow (25mm) or wide (28.5mm) diameter plastic shell vials or standard (≈24mm diameter) glass vials or plastic stock bottles
- Stretches yet maintains tight fit after repeated removal and closing
- Flat surface accepts marking pen

For use with	Cat. No.	Case of 1000
Glass vials	**AS-271**	84.00
Narrow-diameter plastic vials	**AS-273**	96.80
Wide-diameter plastic vials	**AS-275**	72.65
Plastic stock bottles	**AS-277**	104.55

aper Lids for Bottles

ithout staple and pull-tab, printed lid	**AS-121**	143.83	1229.33

harmaceutical Coil

ull apart or cut to any length to plug any ize/diameter vial opening or bottle

oil packed materials will absorb 22 times their weight in moisture.

ayon Rope

- Uniform, man-made fiber (cellulose)
- Recommended for cotton-tearing equipment

otton Coil

- Natural fiber
- Reoxygenates faster in bottle, resulting in a drier environment

escription	Quantity	Cat. No.	Case
ayon Rope	20 lb./case	**12-640-41**	92.05
otton Coil	17 lb./case	**12-640-43**	88.56

SUPPLIES

Applied Scientific Drosophila Products

Petri Dishes

Ideal for embryo collection and nematode research

- Use with the AS-225 Bottle Adapter Ring
- Engineered for optimum flatness and uniform thickness
- Packaged sterile in easy-to-open bags
- 20 per sleeve, 500 per case

AS-4051

Description	Dia. × H	Cat. No.	Case of 500
Vented Petri Dish	60 × 15mm	**AS-4050**	55.00
Nonvented Petri Dish	60 × 15mm	**AS-4051**	60.00

Fly Vial Filler

Fill 100 vials in under a second

- Fill six trays of vials (10–12mL) from a single full reservoir of fly food
- 1–20% fill variance from vial to vial
- Immersible and autoclavable

WARRANTY:
Includes a five-year warranty

AS-770Q

For use with	Cat. No.	Each
Narrow-diameter tray-packed vials	**AS-770Q**	1243.56
Wide-diameter tray-packed vials	**AS-780Q**	1389.39

Cheesecloth

Keeps particulates and wild flies out of vials and bottles while meal is cooling

- Made of 100% woven cotton

Grade	Quantity	Cat. No.	Each	Case of 10
50 (28 × 24 threads/square inch)	70 yards/box	**AS-240**	87.25	607.61

Jazz-Mix* Drosophila Food

Simply add water—conveniently packaged as a complete and quick-to-prepare mixture

- Consists of brown sugar, corn meal, yeast, agar, benzoic acid, methyl paraben and propionic acid

ORDERING INFORMATION:
Packaged in a heavy twist-tied plastic bag inside a durable corrugated box

AS-153

STORAGE CONDITIONS:
Store in a cool, dry place.

NOTE:
Product is not made for human consumption.

Weight	Cat. No.	Each
10 lb.	**AS-153**	75.00

ELECTRICAL EQUIPMENT

*Fisherbrand** Surge Suppressor Strip

Responds in less than three nanoseconds to any surge

- Extruded metal housing
- Circuit breaker
- Lighted ON/OFF switch
- Transverse and common protection
- Operating temperature range: -40° to +85°C (-40° to +185°F)
- 240 J, 7000A maximum current pulse

09-520-5

ORDERING INFORMATION:

Use at 115V 50/60/415Hz

Cord, 6' (1.8m)

COMPLIANCE:

Functions in conditions as specified in ANSI* C 62.41, Categories A and B.

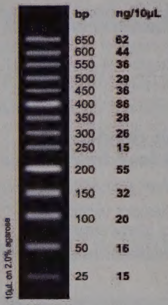
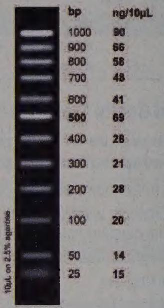
ELECTROPHORESIS

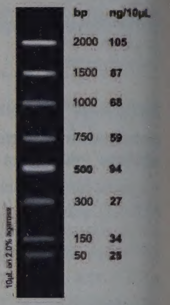
MOLECULAR WEIGHT MARKERS—DNA



BP2570-100



BP2571-100



BP2572-100

Fisher BioReagents* *exACTGene** DNA Ladders

Ready-to-use ladders are stable at room temperature—no need to thaw and refreeze

- Specially engineered to provide blunt-end DNA of precise length for better band quality than classic markers
- Ideal for size determination and quantitative determination of DNA mass
- Contain loading dye to reduce pipetting steps and save time
- Have two or three high intensity reference bands for better sizing
- Provided in sufficient quantity to load 100 lanes

STORAGE CONDITIONS:

Stable at room temperature for two years.

Marker (Base Pair Range)	No. of Bands	Application	Size	Cat. No.	Each
50 bp Mini Ladder (25–650)	14	PCR Size Confirmation	1000µL	BP2570-100	117.71

Thermo Scientific* ABgene* Superladder DNA Size Markers

Derived from cloned and purified DNA fragment repeats

- Standard markers supplied in TE storage buffer with a separate vial of 6X Type II Gel Loading Buffer
- ReddyRun* markers supplied in ReddyRun Buffer with a separate vial of 10X ReddyRun Buffer to add to samples

Superladder Kits

- Perfect 50% GC content
- Contain separate tubes of two ladders that can be used alone as utility markers or combined to form an easy-to-read rule
- Ideal for accurate sizing
- Can also be used for quantitation of sample bands because of the consistency in band intensity

STORAGE CONDITIONS:

Store at 4°C for routine use, -20°C for long-term storage.

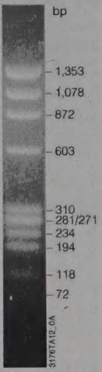
Promega* BenchTop DNA Markers

Ready-to-load markers offer the convenience of room temperature storage

Supplied in a stabilizing solution of 1X Blue/Orange Loading Dye.

STORAGE CONDITIONS:
Stable for up to six months when stored at room temperature (22° to 25°C).



PR-G7511 2% agarose

Marker (Base Pair Range)	No. of Bands	Concentration	Recommended Loading	Size	Cat. No.	Each
BenchTop ΦX174/*Hae* III (72 to 1353)	11	0.2μg/μL	5μL/lane	250μL	**PR-G7511**	129.40
BenchTop pGEM DNA (36 to 2645)	15	0.2μg/μL	5μL/lane	250μL	**PR-G7521**	113.40
BenchTop PCR (50 to 1000)	6	6.1ng/μL	6μL/lane	300μL	**PR-G7531**	134.40
BenchTop 1kb DNA Ladder (250 to 10,000)	13	0.08μg/μL	6μL/lane	600μL	**PR-G7541**	119.40
BenchTop 100 bp DNA Ladder (100 to 1500)	11	108ng/μL	6μL/lane	300μL	**PR-G8291**	105.40

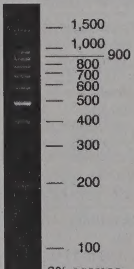
Promega* DNA Ladder Molecular Weight Markers

Ladders with defined sizes

Each ladder contains fragments present at increased intensity for easy identification.

INCLUDES:
6X Blue/Orange Loading Dye

NOTE:
Not intended for use in quantitative analysis



PR-G2101 2% agarose

Marker (Base Pair Range)	No. of Bands	Conc.	Recommended Loading	Size	Cat. No.	Each
100 bp DNA Ladder (100 to 1500)	11	0.13μg/μL	5μL/lane	250μL	**PR-G2101**	102.40
1kb DNA Ladder (250 to 10,000)	13	0.1μg/μL	5μL/lane	500μL	**PR-G5711**	108.40

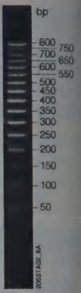
Promega* DNA Step Ladder Molecular Weight Markers

Ladders of defined sizes with exact incremental steps between bands

- Fragments can be stained with ethidium bromide
- Have high intensity fragment for easy identification; all other bands appear with equal intensity

INCLUDES:
6X Blue/Orange Loading Dye

NOTE:
Not intended for use in quantitative analysis



PR-G4521 2% agarose/TAE

Marker (Base Pair Range)	No. of Bands	Conc.	Recommended Loading	Size	Cat. No.	Each
10 bp DNA Step Ladder (10 to 100)	10	0.65μg/μL	1μL/lane	32.5μg	**PR-G4471**	103.40
25 bp DNA Step Ladder (25 to 300)	12	0.36μg/μL	5μL/lane	100μg	**PR-G4511**	103.40
50 bp DNA Step Ladder (50 to 800)	16	0.34μg/μL	5μL/lane	90μg	**PR-G4521**	118.40
100 bp DNA Step Ladder (100 to 4000)	40	1.0μg/μL	1μL/lane	100μg	**PR-G6951**	149.40
200 bp DNA Step Ladder (200 to 6600)	33	1μg/μL	1μL/lane	100μg	**PR-G6961**	118.40
1kb DNA Step Ladder (1000 to 10,000)	10	300ng/μL	1μL/lane	90μg	**PR-G6941**	88.20

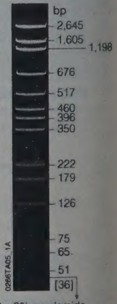
Promega* Conventional DNA Digest Molecular Weight Markers

Created by digesting either λ DNA, ΦX174 replicative form DNA, or plasmids to completion with one or more restriction enzymes

The enzymes are heat-inactivated and the resultant fragments are purified and resuspended in storage buffer.

INCLUDES:
6X Blue/Orange Loading Dye

NOTE:
Not intended for use in quantitative analysis



PR-G1741 8% acrylamide

Marker (Base Pair Range)	No. of Bands	Conc.	Recommended Loading	Size	Cat. No.	Each
λ DNA/*Hind* III (125 to 23,130)	8	0.5μg/μL	1μL/lane	100μg	**PR-G1711**	42.20

MOLECULAR WEIGHT MARKERS — RNA

Fisher BioReagents* RiboLadder* RNA Standards

For assessment of single-stranded RNA molecules on both native or denaturing agarose and polyacrylamide gels

- Genetically engineered for precise bands
- Well-spaced bands for easy identification and sizing of unknown RNA fragments and a higher intensity reference band for fast size comparison
- Packaged in two vials (25 loadings each) and lyophilized to decrease thawing-related degradation, to prolong shelf life, and to ensure consistent performance
- Purity level suitable for capillary electrophoresis and bioanalyzer applications
- Two size ranges suitable for most RNA applications
- Ideal for ethidium bromide and fluorescent staining

INCLUDES:
Loading buffer with bromophenol blue (tracking dye)

TORAGE CONDITIONS:
tore at -70°C.

escription	Base Pair Range	No. of Bands	Size	Cat. No.	Each

Marker (Base Pair Range)	No. of Bands	Conc.	Recommended Loading	Size	Cat. No.	Each
RNA Marker (0.28 to 6.58kb)	9	1µg/µL	3µL/lane	50µL	**PR-G3191**	105.39

U.S. Patents 4,966,964; 5,019,556; and 5,266,687; which claim vectors encoding a portion of human placental ribonuclease inhibitor, are exclusively licensed to Promega Corporation.

MOLECULAR WEIGHT MARKERS — PROTEIN

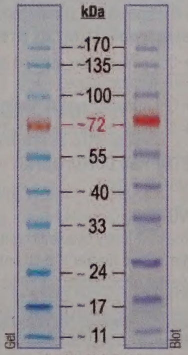
Fisher BioReagents* EZ-Run* Prestained *Rec* Protein Ladder

Comprised of 10 recombinant proteins covalently coupled to a blue chromophore plus a 72kDa reference band tagged with an orange dye[1]

- ▸ Ladder is ideal for monitoring protein separation during SDS-PAGE, verifying Western transfer efficiency, and approximating the molecular weight of blotted proteins
- ▸ Supplied in gel loading buffer

STORAGE CONDITIONS:
Store at -20°C.

NOTE:
The covalently coupled chromophore affects protein mobility; this prestained marker should only be used for approximating the molecular weight of separated proteins.



8-16% SDS-PAGE

BP3603 Series

Molecular Weight Range	No. of Bands	Size	Cat. No.	Each
10 to 170kDa	10	500µL (100 loadings)	**BP3603-500**	115.00
		2 × 500µL (200 loadings)	**BP3603-1**	170.00

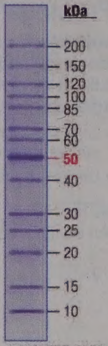
---

[1] *This product is manufactured under the license for Strep-tag* technology covered by U.S. Patent 5,506,121, U.K. Patent 2272698, and French Patent 93 13 066.*

Fisher BioReagents* EZ-Run* *Rec* Protein Ladder

Mixture of 14 highly purified recombinant proteins optimized for precise sizing of proteins by SDS-PAGE and Western blotting

- Ladder is ideal for precise molecular weight determination of polypeptides in denaturing PAGE and Western blots
- Each protein contains an integral Strep-tag* II sequence[1] and may be detected on Western blots using Strep-Tactin*-AP conjugate[2] or an antibody against Strep-tag II
- 50kDa protein band has greater intensity than other bands to serve as a reference
- Supplied in gel loading buffer



4-20% SDS-PAGE Coomassie Brilliant Blue R-250 stained

BP3602 series

STORAGE CONDITIONS:

Store at -20°C.

Molecular Weight Range	No. of Bands	Size	Cat. No.	Each
10 to 200kDa	14	500µL (100 loadings)	**BP3602-500**	110.00
		2 × 500µL (200 loadings)	**BP3602-1**	150.00

---

[1] Strep-tag technology for protein purification and detection is covered by U.S. Patent 5,506,121, U.K. Patent 2272698, and French Patent 93 13 006.

[2] Strep-Tactin is covered by U.S. Patent 6,103,493.

Fisher BioReagents* EZ-Run* Prestained Protein Marker

Ideal for monitoring protein separation during electrophoresis without staining and for verifying electroblotting of proteins onto membranes

- Comprised of six purified proteins covalently coupled to a blue chromophore
- Optimized to produce well-defined blue bands after SDS-PAGE
- Supplied in gel loading buffer

STORAGE CONDITIONS:

Store at -20°C.

NOTE:

The covalently coupled chromophore affects protein mobility; this prestained marker should only be used for approximating the molecular weight of separated proteins.

Molecular Weight Range	No. of Bands	Size	Cat. No.	Each
20 to 118kDa	6	500µL (100 loadings)	**BP3601-500**	100.00
		2 × 500µL (200 loadings)	**BP3601-1**	140.00

Fisher BioReagents* EZ-Run* Protein Marker

Mixture of seven purified proteins optimized to produce uniform, compact bands when analyzed by SDS-PAGE and stained with Coomassie* Blue

- Supplied in gel loading buffer for direct application to SDS-PAGE gels
- Ideal for molecular weight determination of polypeptides analyzed in various gel systems

STORAGE CONDITIONS:

Store at -20°C.

Molecular Weight Range	No. of Bands	Size	Cat. No.	Each
14.4 to 116.0kDa	7	500µL (100 loadings)	**BP3600-500**	80.00
		2 × 500µL (200 loadings)	**BP3600-1**	120.00

Thermo Scientific* Pierce* 2-D Protein Molecular Weight Marker Mix

Used to assess 2-D electrophoresis system performance and estimate the isoelectric point (pI) and molecular weight values of sample proteins

- Contains seven carefully selected proteins, some focus as tight spots while others focus as charge trains
- Can be used as an internal or external standard
- Can be stained with Coomasie* Blue, Silver or SYPRO* Ruby stains
- Does not require supporting paper work

STORAGE CONDITIONS:

Store at -20°C; avoid multiple freeze/thaw cycles.

Molecular Weight Range	pI Range	No. of Bands	Size	Cat. No.	Each
17 to 80kDa	4.5 to 8.7	7	500µL	**PI-26659**	169.63

This marker may contain potentially biohazardous human source material. (See Material Safety Data Sheet.) Results on Apo-Transferrin specific testing for infectious agents (HBsAg and HIV) are negative. Since no test method can offer absolute assurance that infectious agents are absent, handle this marker with the same safety precautions used when handling any potentially infectious material.

SPECIFICATIONS

2-D Marker Protein	M.W.	pI Value
Apo-Transferrin (human plasma)	80kDa	6.2
Glutamic Dehydrogenase (bovine liver)	56kDa	6.5, 6.7, 6.9
Actin (bovine muscle)	43kDa	5.2
Carbonic Anhydrase (bovine erythrocytes)	29kDa	6.3
Myokinase (chicken muscle)	22.5kDa	8.7
Trypsin Inhibitor (soybean)	20kDa	4.5
Myoglobin (equine skeletal muscle)	17kDa	7.0, 7.4

*Trademark. See Trademark Reference.

hermo Scientific* Pierce* BlueRanger* and TriChromRanger* Prestained Protein Molecular Weight Marker Mixes

With room-temperature stable, single-dose packaging

PI-26681

- Yield single bands of uniform intensity
- Suitable for use with 4% to 20% SDS-PAGE gels and a wide range of downstream applications
- Can be efficiently transferred onto both nitrocellulose and PVDF membranes
- Compatible with GelCode* Blue and GelCode E-Zinc* stains
- Contain sufficient material for loading 48 to 96 minigel lanes in each 6 × 8 tube, 48-well plate

STORAGE CONDITIONS:

Can be stored at room temperature for six months.

Description	No. of Plates	Cat. No.	Pack of 48
BlueRanger Molecular Weight Marker Mix	1	**PI-26681**	94.47
	5	**PI-26685**	405.51
TriChromRanger Molecular Weight Marker Mix	1	**PI-26691**	120.45

	BlueRanger		TriChromRanger	
Protein	**Band Color**	**Mol. Weight**	**Band Color**	**Mol. Weight**

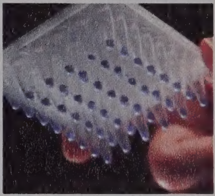
Trypsin inhibitor	Blue	28kDa	Blue	25K
Lysozyme	Blue	18.3kDa	Purple	16.5K

Thermo Scientific* Pierce* Chemiluminescent BlueRanger* Marker Mix

Provides colorimetric and chemiluminescent detection options both on-membrane and in-gel



PI-26651

Each protein in this marker mix is prestained covalently with a blue dye to allow direct visualization on a gel or blot. The proteins are also chemically modified to impart self-contained peroxidase activity, enabling chemiluminescent detection without the use of an HRP-antibody conjugate.

- Eliminates variability due to animal source or antibody class associated with the use of HRP-antibody conjugates
- Transfers to membrane for Western blot detection
- Compatible with streptavidin-HRP conjugates
- Can be detected using the optimized Thermo Scientific Pierce UnBlot* Chemiluminescent Substrate (PI-33550)

ORDERING INFORMATION:

Lyophilized and packaged in single-dose aliquots

STORAGE CONDITIONS:

Store at room temperature.

NOTE:

The peroxidase activity of the marker is lost upon exposure to chelators (EDTA/EGTA), azide, or acidic membrane stains such as Ponceau S.

Molecular Weight Range	No. of Bands	Quantity	Cat. No.	Each
18 to 220kDa	7	1 × 48 microtube plate	**PI-26651**	237.89

hermo Scientific* Pierce* DyLight* Fluorescent Protein Molecular Weight Markers

llow direct visualization of protein molecular weight ranges in both Cy*3 and Cy5 dye spectra after SDS-polyacrylamide gel electrophoresis

- Proteins are dual-labeled with Thermo Scientific Pierce DyLight 547 and DyLight 647 Fluorescent Dyes
- Two excitation and emission maxima enable single or two-color fluorescent detection, eliminating the need for awkward marking or overlay procedures
- Fluorescent spectra are compatible with excitation and emission wavelengths of common instruments
- Bands may be detected in-gel and on membrane

uorescent Detection. Figure 1: Direct in-gel fluorescent detection. Marker oteins (5μL) were separated in 4-20% Tris-glycine gels. The gels were imaged ith the Kodak* Image Station 2000MM using a five min. exposure at f2.8 with e 535/600nm excitation/emission filter set (A) or 625/700nm excitation/ nission filter set (B). Figure 2. Fluorescent Western blot detection. Marker oteins (5μL) were separated in 4-20% Tris-glycine gels and transferred to trocellulose (A) or PVDF membrane (B). Blots were imaged with the Typhoon* 410 at 500V PMT using the Cy3 (A) or Cy5 (B) laser settings. Note: Proteins in e marker mix produce uniform fluorescent intensities in SDS-PAGE applications; however, variations in protein transfer efficiency affect fluorescent intensity Western blotting. For example, high molecular weight proteins, such as myosin 00kDa), typically transfer less efficiently than low molecular weight proteins. gure 3. Colorimetric in-gel detection. Marker proteins (10μL) were separated 4-20% Tris-glycine gels and stained with Imperial* Protein Stain (A) or silver ain (B).

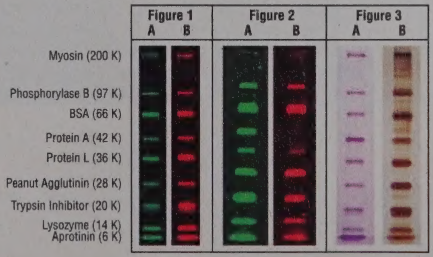
- Excitation/Emission Maxima: 557/570nm or 652/673nm
- Photostablility permits long exposure times for maximum sensitivity

STORAGE CONDITIONS:

Store at -20°C.

Molecular Weight Range	No. of Bands	Quantity	Cat. No.	Each
6 to 200kDa	9	250μL	**PI-26665**	205.76

Fluorescent and Colorimetric Detection of DyLight Fluorescent Protein Molecular Weight Markers



BUFFERS AND SOLUTIONS

Fisher BioReagents* EZ-Run* Protein Gel Solutions

NEW

Resolution equal to or better than gradient precast gels!

A ready-to-use premixed solution of acrylamide, bisacrylamide, buffer, and SDS that enables ultra-fine resolution of protein bands by denaturing PAGE. This novel formulation provides the resolution of a gradient gel with less preparative work than a standard discontinuous gel system.

- Ready-to-pour EZ-Run Protein Gel Solution for 1D or 2D PAGE— just add APS and TEMED
- Wide separation range—from 3kDa to 200kDa on same mini-gel
- Continuous gel system—no stacking gel necessary
- Proprietary (patent-pending) gel chemistry

APPLICATIONS:

Compatible with post-electrophoresis applications such as Western blotting, MALDI analysis, and protein sequencing. Suitable for all commonly used gel staining methods including Coomassie* blue, silver staining and fluorescent dyes.

STORAGE CONDITIONS:

Store at room temperature.

NOTE:

EZ-Run Protein Gel Solution comes with an optimized proprietary running buffer; other traditional SDS-PAGE buffers should not be used with the EZ-Run gel solution.

Description	Quantity	Cat. No.	Each
10% EZ-Run Protein Gel Solution with buffer	30mL	**BP7710-30**	11.23

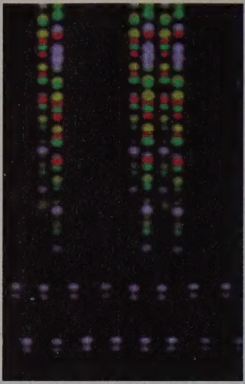
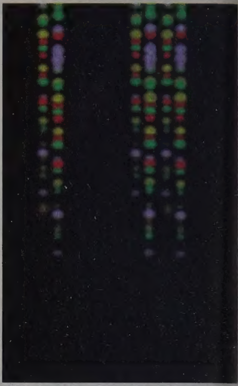
For the complete range of Agaroses, Acrylamides, and other gel components from Fisher BioReagents*, please see the Bioreagents section in the back of the catalog.

Commonwealth Biotechnologies *AccuTrac** Fluorescent DNA Sequencing Loading Buffer



With *AccuTrac*, the number and location of each lane is apparent.



Without a tracking dye, empty lanes are difficult to identify.

Provides a marking tool for sample tracking in automated DNA sequencing applications

- Utilizes a fluorescent dye label to mark the beginning of each lane into which sample was loaded
- Eliminates the need for manual review and lane assignment
- Detected by automated sequencers without interfering with data generation
- Ensures that automated sequencers accurately apply data to the appropriate sample
- For use with dye-terminator chemistry only

Quantity	No. of Loadings	Cat. No.	Each
3mL	600	**CBI-AT3**	123.85

Lonza SSCP Stop Solution

Ideal for maintaining PCR products in single-stranded conformations for SSCP analysis

Consists of 95% formamide, 10mM NaOH, bromophenol blue, and xylene cyanol.

STORAGE CONDITIONS:

Store at room temperature.

Quantity	Cat. No.	Each
5 × 1mL	**BW50653**	39.00

Lonza Formaldehyde Sample Buffer

Ideal when samples are to be recovered from agarose gels

- For denaturation of RNA samples for RNA electrophoresis
- Ready to use
- Contains formaldehyde, formamide, and tracking dyes in MOPS buffer

STORAGE CONDITIONS:

Store at -20°C.

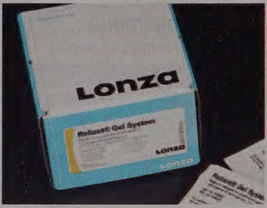
Quantity	Cat. No.	Each
5 × 1mL	**BW50571**	37.00

PRECAST GELS — DNA

Lonza Reliant* Precast Gels

For rapid and reproducible resolution of DNA sizes from 8 bp to ≥10kb

- Manufactured with high-quality SeaKem* and NuSieve* Brand Agaroses
- Easy to handle
- Fit most common mini, medium, and large submerged electrophoresis systems
- Available with 0.5µg/mL of ethidium bromide for ease of visualizing DNA bands during and after the run



BMA54801

Gel Type	Format, Buffer	DNA Size Range	Cat. No.	Pack of 20
With Ethidium Bromide

4% NuSieve 3:1 Plus	20-well, 1X TBE	8 bp to ≥1kb	**BMA54944**	125.34

SPECIFICATIONS

Gel Dimensions	6.0 × 9.5cm
Gel Thickness	5.5mm
Tray Dimensions	6.8 × 10.2cm
Well Volume	≤15µL
Configuration	8 wells (1 × 8, portrait); 20 wells (1 × 20, landscape); 24 wells (2 × 12, portrait)

WARNING

Ethidium bromide is a powerful mutagen. Gloves should be worn when opening pouches and handling gel solutions containing ethidium bromide.

Lonza Reliant* FastLane* Gel System

Accurately resolves DNA fragments from 10 bp to 10kb in as little as 15 minutes

- Combines precast gels with a premixed, premeasured, DNase- and RNase-free separation buffer
- Provides sharp bands and low background fluorescence
- Packaged in UV-transparent trays for easy handling
- Specifically designed for use in the FastLane Gel Chamber
- Prestained with ethidium bromide

INCLUDES:

Precast gels, 100mL packs of 1X TAE or TBE buffer

STORAGE CONDITIONS:

Store at room temperature for up to nine months.

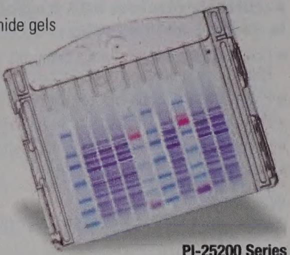
Thermo Scientific* Pierce* Precise* Protein Gels

45-minute run time provides quick results

Ready-to-use precast polyacrylamide gels in a neutral pH buffer permit proteins to stain quickly and with high sensitivity using Coomassie* and silver stains.



PI-25200 Series

- Can be transferred to nitrocellulose and PVDF membranes for Western blotting in just 90 minutes
- Utilize Tris-HEPES-SDS running buffer, available premixed (PI-28398), to produce excellent separation and high-resolution bands
- Compatible with samples loaded in Laemmli sample buffer
- Supplied in durable plastic cassettes that are easy to load and easy to open
- Suitable for use with standard minigel tanks
- Gel Dimensions: 8 × 5.8 × 0.1cm
- Cassette Dimensions: 10 × 8.5 × 0.45cm

ORDERING INFORMATION:
Individually packaged in plastic pouches

STORAGE CONDITIONS:
Store at 4°C for up to 12 months.

PAGEgel* Cassette Gels

Superior separations and a long shelf life

Precast gels use a special polymer and polymerization technology to make high-resolution, cross-linked polyacrylamide gels combined with a small amount of agarose. This polymer reduces shrinking and swelling 10- to 20-fold, allowing a full range of gel percentages to be made using the same gel and running buffer system.

CK01012

- Approximately 10 times stronger than the equivalent polyacrylamide gel without agarose
- Can be handled, stained, and dried without tearing or cracking
- Will not stick to membrane during blotting
- Use a neutral pH gel buffer for a longer shelf life
- Utilize well "fingers" that project above the top of the cassette to prevent sample carryover between lanes
- Save time—no comb or tape to remove
- Supplied in plastic cassettes without coating
- Gel Dimensions: 8 × 8.5 × 0.1cm
- Cassette Dimensions: 10 × 10cm

STORAGE CONDITIONS:
Store at 4°C for two years from the date of manufacture; may be stored at room temperature (up to 25°C) for three months after receipt.

Lonza PAGEr* Gold Precast Gels

Maximize resolution and provide optimum protein transfer efficiencies for Western blotting applications

- Polyacrylamide minigels in tris-glycine buffer cast with a 4% stacking gel for vertical protein electrophoresis
- Provide easy, accurate separation of biomolecules over a wide molecular-weight range
- Produce crisp, razor-sharp bands
- Packaged in a unique easy-to-open gold plastic cassette
- Fit most vertical minigel boxes
- Available with a variety of polyacrylamide concentrations and well configurations
- Manufactured with ISO-9001:2000-certified processes

LOOKING FOR MORE LONZA PAGEr* GOLD PRECAST GELS?

PAGEr Gold Precast Gels are also available with 17-, 8+1-, and 2D-well configurations.

Visit www.fishersci.com and search for PAGEr Gold

SEQUENCING SYSTEMS

isherBiotech* DNA Sequencing System

un samples in all gel lanes /ithout loss of data or uestionable interpretation f the banding pattern

- Integral anodized aluminum backplate distributes heat evenly across the entire gel surface to minimize band "smiling"
- Screw clamps are mounted directly on the unit to ensure leakproof seal between gel sandwich and upper buffer chamber
- Removable waste bottle allows for easy buffer disposal
- Interlocking lids on upper and lower chambers provide safety

FB-SEQ-3545

INCLUDES:

Main chamber with aluminum backplate, clamps, removable lower buffer chamber, two notched glass plates, two blank glass plates, two shark-tooth combs, one well comb, two spacer sets

REQUIRED ACCESSORIES:

Requires high-voltage power supply.

Gel W × L	Glass Plate W × L	Buffer Volume	Overall L × W × H	Cat. No.	Each
18 × 42cm	20 × 45cm	450mL	23 × 27 × 50cm	**FB-SEQ-2045**	1140.83
33 × 42cm	35 × 45cm	800mL	23 × 44 × 50cm	**FB-SEQ-3545**	1455.00

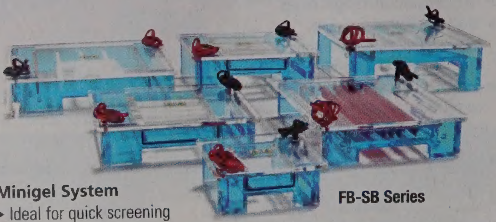
HORIZONTAL SYSTEMS

FisherBiotech* Horizontal Electrophoresis Systems



FB-SB Series

Minigel System

- Ideal for quick screening
- Uses 7 × 10cm gel tray with two comb positions
- Runs up to 16 samples on one gel with combs supplied
- Can run up to 24 samples on a gel with accessory combs
- Provides easy, leak-free casting without tape, grease, or seals

Midigel Systems

- Available with patented buffer recirculation method which prevents buffer's ionic depletion on long gel runs, keeps ionic gradients from distorting results when multiple sample series are run simultaneously, and prevents pH changes that can cause problems in RNA gels
- Provide leak-free gel casting in 13 × 16cm gel tray with two comb positions
- Run up to 32 samples on one gel with combs supplied
- Can run up to 48 samples on a gel with accessory combs

Large Gel Systems

- Improve resolution in Northern and Southern blotting of large gels and multiple samples
- Available with same self-contained buffer recirculation method as Midigel System (FB-SBR-1316)
- Provide leak-free casting in a 20 × 25cm gel tray with six comb positions
- Run up to 36 samples per comb position with supplied combs
- Permit up to four sets of samples to be run equal distances on the same gel
- Allow shorter gels to be poured when used with accessory wall comb
- May also be used with programmable power inverter for field inversion electrophoresis
- Include a three-point leveling platform

Wide-Format System

- Permits leak-free casting in an 18 × 23cm gel tray
- Runs 25 to 250 samples simultaneously on one gel
- Produces clear, tight banding patterns with no "smiling"
- May be used with included microwell-format combs and a multichannel pipetter to load samples directly from a 96-well plate for faster loading and reduced error

System	Gel Size	Buffer Volume	L × W × H	Type	Cat. No.	Each
Minigel	7 × 10cm	400mL	6¼ × 3¾ × 3⅛" (16 × 9.5 × 8cm)	Standard	**FB-SB-710**	379.72

Combs	Two 1.5mm thick combs (6- and 10-well)	Two 1.5mm thick combs (12- and 20-well)	Three 1.5mm combs (16-, 24-, 36-well)	Five microwell format combs

Thermo Scientific* Owl* D3-14 Horizontal Electrophoresis System

Ideal for screening PCR samples

System screens up to 200 samples on a single agarose gel in less than 30 minutes. With special microwell-format combs and a multichannel pipetter, samples can be loaded directly (8 or 12 at a time) from a 96-well plate.

- High-capacity, minigel format provides fast, error-free sample loading
- Unique electrode placement increases rate of gel runs without compromising resolution
- Produces clear, tight banding patterns with no "smiling"
- Used with one comb, tray provides ample separation length for samples consisting of many fragments
- Used with many combs, tray allows quick screening of up to 200 samples simultaneously
- With EasyCast* system, each side of gel tray is fitted with a gasket, allowing it to fit snugly into casting chamber
- Bubble level ensures casting of flat, uniformly thick gels

Thermo
D3-14

09-528-128

APPLICATIONS:
Ideal for screening PCR products, plasmid preps, restriction mapping, and cloning

INCLUDES:
Buffer chamber, lid with attached power cords, 14 × 23cm UVT gel tray, casting chamber, four combs (50 well, 1.5mm thick)

Gel Size	Buffer Volume	L × W × H	Cat. No.	Eac
23 × 14cm	800mL	11¼ × 10⅛ × 3⅛" (29 × 26 × 8cm)	**09-528-128**	645.7

*Trademark. See Trademark Reference.

Prices subject to change.

Thermo Scientific* Owl* Horizontal Gel System

Large format systems handle high throughput with consistent, reliable results

09-528-100

- Leakproof casting system allows a gel to be cast and run in the same chamber with no tape or additional parts required
- Comb slots allow two, three, or four sample sets of equal lengths to be run on the same gel
- Three-point leveling system ensures a flat casting surface for uniform gel thickness
- Gel tray is UV transparent, which allows the gel to be viewed on a transilluminator while on the tray, eliminating the risk of gel breakage
- Optional built-in buffer exchange ports to circulate buffer for extended running times

NCLUDES:

uffer chamber with three-point leveling base, SuperSafe* lid with ttached power supply leads that eliminate the risk of accidental shock, VT gel tray, gasketed end gates, three 1.5mm thick combs

VARRANTY:

ll systems come with a three-year warranty.

el Size	Combs Included	Buffer Volume	Cat. No.	Each
Vithout Buffer Ports				
3 × 25cm	12, 16, 20 wells	1600mL	**09-528-100**	634.38

hermo Scientific* Owl* D2 Wide-Gel lectrophoresis System

orizontal gel system can run from 10 to 80 samples n one gel

09-528-165

Vide gel size allows you to load 15 r 30 samples per row with multi- hannel pipetter. Using special combs nd a multichannel pipetter, samples ay be loaded directly from a 96-well ate, 8 or 12 at a time.

- Excellent for screening PCR samples or routine DNA fragment analysis
- Small footprint saves space on lab bench
- Incorporates EasyCast* casting design with external caster
- UVT gel tray is fitted with gasket, allowing tray to fit snugly into external gel caster; provides leakproof seal without tape
- Sample loading with multichannel pipetter speeds up transfer
- Unique electrode placement allows gel to be run quickly without compromising resolution

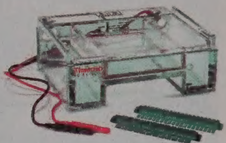
ICLUDES:

uffer chamber, SuperSafe* lid with attached power supply leads, UVT l tray, external multiple gel caster, four combs (two 30-well and two -well, 1.5mm thick)

l Size	Buffer Volume	L × W × H	Cat. No.	Each
.4 × 10.2cm	600mL	7⅜ × 7¾ × 4" (19 × 20 × 10cm)	**09-528-165**	495.59

Thermo Scientific* Owl* EasyCast* Horizontal Minigel System

Designed for simple use with high performance results



- Feature leakproof casting that allows a gel to be cast and run in the same chamber with no tape or additional parts required
- Supplied with a UV transmissible gel tray with a silk-screened ruler that fluoresces under UV light
- Randomly available in yellow, orange, and green

INCLUDES:

Main chamber, SuperSafe* lid with attached power supply leads, UVT gel tray, two double-sided combs

WARRANTY:

Three years

Gel Size	Combs Included	Buffer Volume	Cat. No.	Each
7 × 8cm	6 and 10 wells	400mL	**09-528-110**	348.15
9 × 11cm	10 and 14 wells	600mL	**09-528-178**	380.00
12 × 14cm	12 and 20 wells	800mL	**09-528-110B**	441.53

Hoefer* HE 33 Mini Submarine Electrophoresis Unit

Designed for very fast separations of DNA restriction fragments in agarose gels

03-500-130

- The clear molded base acts as a heat-sink—simply fill the base with coolant and seal
- Cooling the unit prior to a run allows higher voltages to be applied without generating band distortions or damaging the gel and unit
- No taping required for casting
- Electrical safety locks in lid

INCLUDES:

Buffer chamber, lid with cables, UV-transparent gel running tray, gel casting tray, four foam gaskets, bubble level. Complete System (03-500-130) also includes 1.5mm thick 8-well comb and comb back.

System	Gel Size	Buffer Volume	L × W × H	Mfr. No.	Cat. No.	Each
Complete	7 × 10cm	220mL	9½ × 5⅛ × 2¾" (24 × 13 × 7cm)	HE33-8-1.5	**03-500-130**	346.00
Basic	7 × 10cm	220mL	9½ × 5⅛ × 2¾" (24 × 13 × 7cm)	HE33B	**03-500-131**	321.00

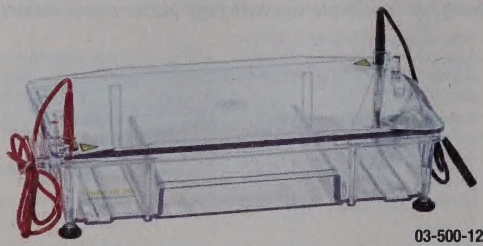
LOOKING FOR COMBS?

All of the gel combs and other accessories that you need for your electrophoresis system can be found on our Web site.

Visit www.fishersci.com and search for Gel Combs

Hoefer* HE99X Max Submarine Electrophoresis Unit

Offers no-mess gel casting without tape or dams



03-500-120

- Unit accommodates a variety of gel lengths for maximum resolution of DNA fragments
- Agarose bridges are also accommodated, so gels can be run in nonsubmarine fashion
- Rugged design provides reliability and safety

INCLUDES:
Buffer chamber with electrodes and leveling feet, safety lid with leads, bubble level. Complete system (03-500-121) also includes 15 × 20cm gel casting tray and UV-transparent running tray; 1.5mm thick, 15-well comb; adjustable comb back that permits control of the depth of the sample wells.

System	Gel Size	Buffer Volume	L × W × H	Mfr. No.	Cat. No.	Each
HE99X Max Complete	15 × 10-20cm	1.2L	14¼ × 7¼ × 5½" (36 × 18.2 × 14cm)	HE99X-15-1.5	**03-500-121**	597.00
HE99X Max Basic	15 × 10-20cm	1.2L	14¼ × 7¼ × 5½" (36 × 18.2 × 14cm)	HE99X	**03-500-120**	417.00

Lonza FastLane* Gel Chamber

Specifically engineered for use with Reliant* FastLane Gels

Provides a compact format to rapidly separate and identify DNA and RNA fragments, PCR products, and oligonucleotides.

INCLUDES:
Acrylic chamber, acrylic safety cover with attached power supply leads

NOTE:
Casting accessories are not available for this unit.

Gel Size	Buffer Volume	L × W × H	Cat. No.	Each
6 × 9.5cm	100mL	3⅛ × 7⅛ × 3½" (8 × 18.2 × 9cm)	**BMA57000**	265.00

Lonza Reliant* FastLane* Gel System Starter Kit

A simple, economical way to get started with PCR product analysis

sourcebook
Reliant* FastLane Gel System

BMA57009

- Enables analysis of DNA fragments from 10 bp to 10kb in as little as 15 minutes
- Combines the components needed to start using the Reliant* FastLane Gel System

INCLUDES:
FastLane Gel Chamber, one each; Reliant FastLane 1% TBE/SeaKem* Agarose 12-well gels, two each; Reliant FastLane 1% TBE/SeaKem Agarose 2 × 12-well gels, two each; Reliant FastLane 2.5% TBE/SeaKem Agarose 12-well gels, 2 each; Reliant FastLane 2.5% TBE/SeaKem Agarose 2 × 12-well gels, two each; Reliant FastLane 1% TAE/SeaKem Agarose 12-well gels, two each; 1X TBE buffer, 8 × 100mL; 1X TAE buffer, 2 × 100mL; SimplyLoad* Tandem Ladder, 500µL; "The Sourcebook, A Handbook for Gel Electrophoresis"

Cat. No.	Each

Prices subject to change.

VERTICAL SYSTEMS

FisherBiotech* Vertical Minigel Wedge Electrophoresis System

Unique wedge design holds gel in place without clamps or knobs

- Runs one or two gels with no additional cooling
- Compatible with most precast or self-cast protein gels
- Durable, fabricated, acrylic construction

INCLUDES:

Upper and lower buffer chambers, power supply leads and cords, two sets of wedges, adapter plate for 10 × 8cm gels, blocking plate

WARRANTY:

Three years

FB-VE121

Gel Size	L × W × H	Cat. No.	Each

20 × 20cm	1150mL	6½ × 12 × 9½" (16.5 × 31 × 24cm)	**FB-VE20-1**	1200.00

Key Features

- Systems are double-sided—run two protein gels simultaneously
- Agarose plug method allows gel casting of one or two gels in the same system
- Gel assemblies do not need to be moved after the gel is set
- Sliding clamp assemblies make system assembly a snap and prevent leaks
- Electrode configuration reduces run times
- Increased electrode surface area provides exceptional field uniformity

afety Features

- Asymmetrical shape prevents mismatching of electrodes
- Interlocking safety lid with attached power cords protects against electric shock

SYSTEM COMPONENTS

Thermo Scientific* Owl* Vertical Electrophoresis Systems

Eliminate the mess and inconvenience of conventional acrylamide gel casting

OWP8DS-2

Easy-to-use systems utilize an agarose plug technique to permit slab gels to be cast and run in one unit. Simply secure the glass cassettes, pour the agarose plug in the specially designed trough, cast acrylamide solution in the cassettes, load samples, and run the gel.

- Central cooling core provides even cooling across the gel surface for outstanding resolution and clear banding
- Cooling is achieved by circulating fluid through the core with an external circulator or cool tap water

APPLICATIONS:

Ideal for SDS electrophoresis, the second dimension of two-dimensional (2-D) electrophoresis, agarose electrophoresis, and native electrophoresis

WARRANTY:

Three years

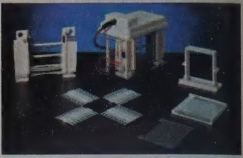
Thermo Scientific* Mini Vertical Gel Systems

Simplify protein and nucleic acid techniques performed in a minigel format



FB-EC120-4

- Model 120-2 casts and runs one or two gels and can be converted to a four-gel system with the addition of a second running frame
- Model 120-4 runs up to four gels
- Leak-free casting is made easy by self-adhering spacers that hold glass plates together
- Assembly is easy with no complicated mechanisms, cams or screws
- May be used with many precast gels

Model	Gel Capacity	Gel Size	L × W × H	Cat. No.	Each
120-2	2 gels	8 × 7cm	8 × 4⅞ × 6⅜" (20 × 12.3 × 16.1cm)	**FB-EC120-2**	612.85

PAGEgel* Dual Run and Blot Cell

Patent pending blotting system allows for complete, uniform transfers of all proteins

CA00002

Blotting takes place using the electrodes at the bottom of the core (Patent Pending) inside blotting cassettes, an asymmetrical arrangement which produces a voltage gradient that diminishes from bottom to top of the tank. Gels are placed in the blotting cassettes with the high molecular weight end down, so the proteins and polynucleotides receive a voltage inversely proportional to the rate they moved in the gel and are, therefore, transferred uniformly.

- System runs or blots one or two minigels
- The unit is compatible with precast gels in 6mm thick cassettes made by Lonza, Invitrogen*, and PAGEgel; blots gels up to 1.5mm thick
- Gels or blotting cassettes are inserted quickly and without leakage—no screws or external clamps are required
- Samples are loaded easily under running buffer, because the core can be assembled with gels and buffer outside the tank
- Both gels run at the same speed and temperature, as the gels sit symmetrically in the cell with an equal amount of running buffer on each side
- Blotting may be performed on the bench top because the integrated cooling blocks, combined with internal stirring from the tank bottom, cool the blot

INCLUDES:

Lower tank, lid with safety-interlock cables, buffer core assembly, two blotting cassettes, two cooling blocks, buffer dam used when running or blotting one gel, and six foam pads

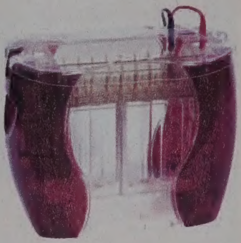
CERTIFICATIONS:

EN61010-1-1993 (IEC1010-1)

Gel Size	Buffer Volume	L × W × H	Cat. No.	Each
9.0 × 9.0	1L	5 × 7 × 8" (13 × 17 × 20cm)	**CA00002**	495.62

Hoefer* SE600 Series Vertical Electrophoresis Systems

Built-in heat exchanger maintains temperature between 1° and 45°C (33.8° and 113°F) for faster runs with superior quality results



03-500-100

- Run one gel or two gels simultaneously, four with optional divider plates
- Produce straight lanes and sharp, well-defined bands—no "smiling"
- Provide two mechanisms to dissipate heat

Available in three models

- SE600 Chroma has two built-in side handles and rounded contours that ease handling, lifting, introducing sample, and disassembling
- SE600 Complete offers durable construction for proven decades of performance
- SE660 Basic is identical in design to the SE600 Complete, but is taller to accommodate gels up to 24cm in length

APPLICATIONS:

Suitable for denaturing and native polyacrylamide, 2-D, isoelectric focusing, and agarose gel electrophoresis.

CERTIFICATIONS:

UL3101-1, CSA C22.2 1010.1, CE Certified, EN61010-1

ACCESSORIES

Gel Casters for SE600 and SE400 Series Vertical Electrophoresis Systems

Cast multiple gels

SE6015 Dual-Gel Caster

- Easy-to-handle
- Leak-free
- Suitable for one or two gels

SE675 Four-Gel Caster and SE615 Multiple-Gel Caster

- Include space-saver plate and filler sheets to permit fewer than the maximum number of gels to be cast
- Suitable for casting uniform or gradient gels

Model	Plate Size	Max. No. of Gels	Mfr. No.	Cat. No.	Each
SE6015 Dual-Gel Caster	18cm wide	2	SE6015	**03-500-247**	294.00

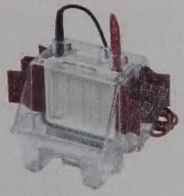
Hoefer* Mighty Small* Vertical Electrophoresis Systems

Combine the advantages of a small format and efficient cooling for rapid screening of protein and nucleic acids

- Run two gels at once
- Produce high-resolution separations in as little as 45 minutes with no band "smiling"
- Use alumina plates for efficient cooling



03-500-111

APPLICATIONS:
Ideal for uniform and gradient acrylamide, agarose, IEF, field inversion agarose, and 2-D electrophoresis.

INCLUDES:
Upper buffer chamber, lower buffer chamber, interlocking safety lid with leads, ten glass plates, two notched alumina plates, four clamps, Gel Seal, well locating decal, Spacer Mate, SE245 Dual Gel Caster, two 0.75mm thick 10-well combs, two pairs 0.75mm thick spacers

CERTIFICATIONS:
CE marked, CSA C22.2 1010.1, EN61010-1, UL3101-1

Hoefer* MiniVE Mini Vertical Electrophoresis Unit

Accepts gels up to 10 × 10.5cm, increasing separation length by more than 30% over conventional 10 × 8cm gels

- Gel module is simultaneously a casting stand and an upper buffer chamber
- Cooling system assures the temperature uniformity required for straight lanes and flat bands
- Optional blot module (03-500-109) permits gels to be cast, run, and blot in one instrument

03-500-108

INCLUDES:
Tank with lid, three 10 × 10.5cm rectangular glass plates, three 10 × 10.5cm notched glass plates, two gel modules, two 1mm thick 10-well combs, two 1mm thick spacer sets

Gel Size	Buffer Volume	L × W × H	Mfr. No.	Cat. No.	Each

ACCESSORIES

Blot Module for MiniVE Mini Vertical Electrophoresis Unit

Can be used to transfer two minigels inside the MiniVE tank

MiniVE tank can accommodate two blot modules simultaneously, so four gels can be transferred in 45 min. with only 300mL buffer.

03-500-109

INCLUDES:
Blot module, three ¼" (6mm) thick Dacron* sponges, 25 sheets of blotter paper

Gel Size	Mfr. No.	Cat. No.	Each
10 × 10.5cm or 10 × 8cm	SE302	**03-500-109**	402.00

POWER SUPPLIES

FisherBiotech* Power Supplies

Easy-to-use power supplies are designed for safety

Key Features

- Choice of operating modes—constant voltage or constant current output modes with automatic crossover between modes; programmable models add a constant power mode
- Automatic shutoff (at run's end) saves time, energy, and reduces errors
- Automatic recovery (after power failure) eliminates the need to restart the unit

Additional Features

- Backlit LED display, mode indicator lights, internal timer, and multiple output jacks
- Soft-touch keypad controls allow user to select modes and output levels, set timer, and start/stop operation
- Power-off memory retains settings after shutdown
- Lightweight, stackable design allows use of multiple units while saving space on the benchtop
- Locking kickstand permits positioning the unit at an angle for better viewing
- Standard safety features include no-load and failure notification, arc and ground leak detection, overvoltage protection, and jacks that are set away from controls
- Nonskid rubber feet provide stability

Compact Model FB300Q

- Runs up to three gels at once at either constant current or constant voltage
- Uses less surface area than a sheet of paper
- Utilizes UP/DOWN arrow controls
- Ideal for SDS-PAGE, DGGE/CDGE, and DNA/RNA submarine electrophoresis

High-Current Model FB200Q

- Uses a numeric keypad

Stackable FisherBiotech Power Supplies: FB300Q (top) and Programmable FB1000Q

High-Current Model FB200Q

- Perfect for high-current electroblotting (Western tank and semi-dry, Southern and Northern) and SDS-PAGE applications

Programmable Models FB1000Q and FB3000Q

- Enhanced features include a third, constant power mode and remote temperature probe
- Both models have a numeric keypad
- Nine-program memory with "list program" function for quick recall makes these units ideal for multi-user labs or multiple repetitive operations
- FB1000Q is designed for isoelectric focusing, SDS-PAGE, and native SDS-PAGE
- FB3000Q is ideal for DNA sequencing and high-voltage electrophoresis applications

WARRANTY:
12 months

COMPLIANCE:
CSA approved

NOTE:
All outputs run with the same settings.

Specifications and Ordering Information on next page.

Thermo Scientific* Power Supplies

Suitable for a wide range of applications

FB-105

- Designed for safety with no-load and failure notification, overvoltage protection, and jacks that are set away from controls

Constant Voltage Power Supply, Model EC 105

- Ultra-compact unit is easy to operate with only one switch and one adjustment knob to control the unit's voltage output
- LED display toggles between output voltage or output current
- Ideal for submarine gels, mini SDS-PAGE, mini tank (wet) electroblotting, and pulsed-field electrophoresis (requires pulse controller)
- For 110V 50/60Hz

Dual Mode Power Supplies

- Automatic power shutoff at end of run
- Automatic recovery after power failure
- Backlit LED display, mode indicator lights, timer, and multiple output jacks
- Soft-touch keypad controls
- Memory retains settings after shutdown
- Stackable design allows use of multiple units in less space
- Locking kickstand permits positioning the unit at an angle for better viewing
- Nonskid rubber feet provide stability
- For 120V 50/60Hz

Compact Model EC 300 XL

- Uses UP/DOWN arrow controls
- Suitable for SDS-PAGE, DGGE/CDGE, and DNA/RNA submarine electrophoresis

High-Current Model EC 200 XL

- Utilizes a numeric keypad
- Suitable for high-current electroblotting (Western tank and semi-dry, Southern and Northern) and SDS-PAGE applications

Programmable Power Supplies

- Additional features include a third, constant power mode, remote temperature probe, and nine-program memory
- Both models have a numeric keypad
- **Model EC 1000 XL** is suitable for isoelectric focusing, SDS-PAGE, and native SDS-PAGE
- **Model EC 3000 XL** is suitable for DNA sequencing and high-voltage electrophoresis applications

WARRANTY:

Model EC 105: Four-year warranty. All other models: 12-month warranty.

Hoefer* Power Supply PS 2A200

High current power supply ideal for all types of electrophoresis blotting and short electrophoresis runs

- Can be run with constant voltage, constant current, and constant power with automatic crossover
- Automatically continues a run after power failure
- Stores up to three protocols
- Offers four timer options: continuous run, set time run, set time run followed by hold at 5V, or set volt-hour run
- Permits a log of run parameters via RS-232 port
- Provides compact design
- Offers overload/short circuit detection and no-load detection

CERTIFICATIONS:

CE89/336/EEC (EMC Directive), CE73/23/EEC (LV Directive), CSA22.2 1010-1, EN-61010-1 (IEC1010-1), UL 3101-1

BLOTTING

FisherBiotech* Electrophoresis Bundle

Combines the convenience of a one-step vertical electrophoresis system with a mini tank electroblotter for rapid, efficient transfers

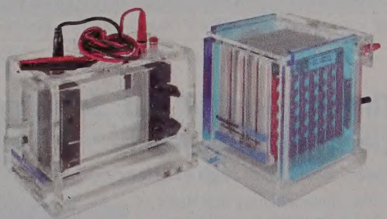
Cast and run gels in one device, then perform uniform, reproducible protein transfers over a wide molecular range.

Vertical Electrophoresis System

- Agarose plug method makes casting gels quick and easy
- Gel assemblies don't have to be moved once set up
- Simple clamping mechanism makes it easy to load glass cassettes and most precast gels
- Central cooling core is composed of thermally conductive alumina plates and a unique fluid circulation path which provides even cooling over the entire gel for outstanding resolution and clear banding
- Ideal for mobility shift assays, second dimension protocols of 2-D electrophoresis, SDS and agarose gels
- Gel Size: 10 × 8-10cm
- Dimensions: 5L × 21W × 18cmH
- Buffer Volume: 300mL

Mini Tank Electroblotting System

- Simultaneously transfers up to four polyacrylamide mini protein gels
- Integrated cooling base allows for temperature-controlled runs
- Buffer chamber features platinum wire electrode panels
- Optional stir bars may be added to bottom of buffer chamber for increased circulation and heat exchange
- Includes safety interlocking lid with attached power supply leads
- Transfer Area: 9 × 9cm
- Dimensions: 18L × 13W × 16.5cmH
- Buffer Volume: 1.4L



FB250

INCLUDES:

Four blank and four notched glass plates, two 10-well 1.5mm thick combs, two 15-well 1.5mm thick combs, 1.5mm thick spacer set and spacer placer

WARRANTY:

Three years on electrophoresis system

Description	Cat. No.	Each
Vertical System plus Mini Tank Electroblotter	**FB250**	865.00

DON'T SEE THE RIGHT PRODUCT?

For blotting membranes, see the Membranes section.

FisherBiotech* Semidry Blotting Apparatus

Sleek, low-profile system for fast, efficient Western transfers

Transfers minigels in 15 to 30 minutes; full-sized gels in 30 to 60 minutes, with efficiencies of nearly 90%.

- Multiple gels can be transferred by stacking gel/membrane/filter paper "sandwiches"
- Because plate electrodes are in direct contact with "sandwich," a homogeneous electric field is created, ensuring even transfers
- System requires only minimal amounts of buffer (about 250mL)
- Low voltage—requires less than 1mA/cm² of current; no external cooling is necessary
- Features 20 × 20cm platinum-coated titanium anode and stainless-steel cathode

FB-SDB-2020 with power supply (available separately)

APPLICATIONS:

Transfers proteins from polyacrylamide electrophoresis gels onto hybridization membranes (Western transfers). Ideal for membrane-based, solid-phase protein assays such as HIV testing, where viral antigens are assayed with patient antibodies. Use to detect trace proteins in complex mixtures and study protein interaction with other molecules (i.e., DNA).

INCLUDES:

Lid with anode, base with cathode, connecting knobs and power cords

Transfer Area	L × W × H	Cat. No.	Each
20 × 20cm	9¾ × 9¾ × 2" (25 × 25 × 5cm)	**FB-SDB-2020**	865.00

Thermo Scientific* Owl* Semi Dry Electroblotting System

Faster blots with high efficiency

- Fast, efficient transfer of proteins and nucleic acids to membranes
- Buffer contained within blotting paper is sufficient for efficient transfer of molecules
- Base contains stainless-steel cathode plate; lid has platinum/titanium anode plate
- Transfers may be done in as little as 15 minutes
- Ideal for proteins less than 150kDa

OWHEP3

INCLUDES:

Base, lid, power supply leads, heavy-duty knobs

Accommodates	L × W × H	Cat. No.	Each
4 minigels or up to a total of 20 × 20cm	9⅞ × 9⅞ × 2" (25 × 25 × 5cm)	**OWHEP1**	865.00
8 minigels or up to a total of 35 × 45cm	19⅞ × 15⅝ × 2" (51 × 40 × 5cm)	**OWHEP3**	2078.00

Hoefer* TE70X and TE77X Semi-Dry Blotting Systems

Perform uniform transfers of proteins and nucleic acids from polyacrylamide and agarose gels in less than one hour

03-500-610

- Transfer up to three polyacrylamide gels in a stack
- Use minimal buffer
- Do not generate the excessive heat that can distort bands or denature protein
- Utilize durable platinum-titanium and stainless-steel electrodes to assure uniform, contamination-free transfers
- Offer automatic transfer-stopping feature to prevent overheating when buffer is depleted
- Available with built-in power supply to save space and simplify transfer

INCLUDES:

Molded base with platinum/titanium anode, top assembly with stainless-steel cathode, power cables, 25 sheets of blotting paper, 50 sheets of cellophane (03-500-610, 03-500-612 only), two solid Mylar* masks

CERTIFICATIONS:

CE marked, CSA C22.2 1010.1, EN61010-1, UL3101-1

Model	Accommodates	L × W × H	Mfr. No.	Cat. No.	Each
Standard models

TE77XP	21 × 26cm gels or 4 minigels side-by-side	18⅞ × 15 × 4" (48 × 38 × 10cm)	TE77XP	**03-500-613**	1674.00

Hoefer* TE22 Mini Tank Blotting Unit

Safe, economical unit requires minimal current and only about 1L of buffer

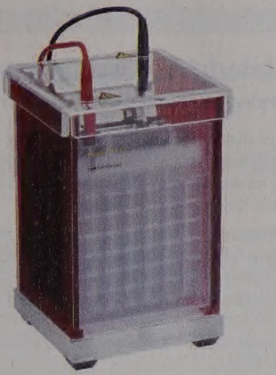
- Built-in alumina heat exchanger permits efficient transfers in less than one hour
- Platinum electrode ensures uniform electrical field for complete and even transfers
- Hinged, color-coded cassettes enable simple loading and easy orientation of gel sandwich
- Alumina-covered serpentine channel in base provides excellent temperature control with no more than 5°C rise during a normal run

INCLUDES:

Buffer chamber, lid with leads, two electrode panels, four gel cassettes, eight ⅛" thick foam sponges, four ¼" thick foam sponges, 25 sheets blotting paper

CERTIFICATIONS:

CE marked, CSA C22.2 1010.1, EN61010-1, UL3101-1



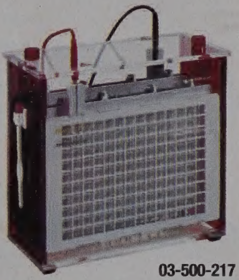
03-500-216

Accommodates	L × W × H	Mfr. No.	Cat. No.	Each
Four small gels up to 9 × 10cm	6½ × 5½ × 9½" (16.5 × 14 × 24cm)	TE22	**03-500-216**	954.00

Hoefer* TE42 and TE62 Tank Blotting Units

Perform high-intensity protein transfers in one hour

- Over 1.5m of platinum wire per electrode provides uniform field strength for efficient transfers
- Hinged, color-coded cassettes enable simple loading and easy orientation of gel sandwich
- Buffer volumes of 4 to 5L required, depending on number of cassettes processed
- Model TE42 can be used with optional heat exchanger (Cat. No. 03-500-296), see our Web site for details.
- Model TE62 offers a built-in heat exchanger in the base of the unit



03-500-217

CERTIFICATIONS:

03-500-220

GEL DRYING

FisherBiotech* Gel Drying System

Fast gel drying—without distortion or cracking

Integrates a gel dryer and vacuum system to provide a simple, effective, and reliable way to dry electrophoresis gels, while eliminating the hassles of dry ice and refrigerated traps. Dried gels are suitable for autoradiography, densitometry, or notebook storage.

Gel Dryer Features

- Large drying surface accommodates all sizes of gels, from DNA sequencing down to multiple smaller gels
- PTFE-resin-coated aluminum casting of gel dryer distributes heat uniformly, assuring quick drying without local hot spots that can crack gels
- The 720w heater has variable temperature adjustment between ambient and 80°C (176°F)
- Built-in five-hour timer can be set on HOLD for continuous operation
- CSA approved

Vacuum System Features

- Dual pumping action works with the heat from the gel dryer to dry gels fast
- Hot vapors from the gel dryer are condensed and isolated from the rest of the system by a room-temperature vapor pump
- A compact, high-efficiency dry vacuum pump provides the deep vacuum needed to get the last liquid out of the gel
- The two-pump system works as quickly as a two-stage vacuum pump and cold trap, and faster than a conventional stand-alone diaphragm pump or water jet pump
- The trapping medium doesn't mix with the condensate, so it can be reused
- System is easy to use and maintain

INCLUDES:

Gel Dryer with 5' (1.5m) of PVC vacuum tubing, inline stopcock, hose clamps, 1L of trapping medium; Vacuum System with plastic support mesh, porous support pad, silicone rubber sealing sheet

WARRANTY:

12 months

FisherBiotech Gel Dryer	
Drying Surface	14½ × 18½" (37 × 47cm)
Temperature Control	Variable adjustment from ambient to 80°C (176°F)
Timer	Built-in; 0–5 hr.; HOLD function for continuous operation
Vacuum Connection	For ¼, ⅜, or ½ I.D. tubing
L × W × H	17¾ × 25¾ × 3⅞" (45.1 × 65.5 × 9.8cm)
Net Weight	25½ lb. (11.6kg)
FisherBiotech Vacuum System	
Condensed Vapor Capacity	1.5L
L × W × H	15½ × 11¼ × 14" (39.4 × 28.6 × 35.6cm)
Inlet Port	Accepts ⅜" I.D. hose (9.5mm I.D. hose nipple)
Cooling Fan	218cfm
Net Weight	33½ lb. (15.2kg)

FISHERBIOTECH* GEL DRYING SYSTEM COMPONENTS

FisherBiotech Gel Dryers and Vacuum Systems are also available separately.

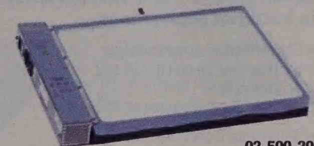
Hoefer* GD 2000 Gel Dryer System

Dries gels rapidly, evenly and safely using a dry-heat vacuum method



03-500-305

Gel Dryer Features

- Drying surface accommodates acrylamide and agarose gels up to 33 × 44cm
- Heat and vacuum are applied beneath the gel through a heavy aluminum platen, providing even heat and even vacuum distribution
- Thermostat is adjustable from 40° to 80°C, ±2°C
- Timers for heat and for vacuum can be set independently
- Clear silicone cover sheet allows user to view the gel during drying

Pump Features

- Quiet, oil-free diaphragm pump maintains the low vacuum necessary for rapid gel drying
- No trap required

INCLUDES:

GD 2000 Gel Dryer, VP 200 Vacuum Pump, and VT 3 Vacuum Tubing

CERTIFICATIONS:

CE marked, UL listed, CSA approved

Electrical Requirements	Mfr. No.	Cat. No.	Each
115VAC	GD2000-115V	**03-500-305**	3895.00

SPECIFICATIONS

Gel Dryer	
Drying Surface	13 × 17¼"(33 × 44cm)
Temperature Control	40° to 80°C (104° to 176°F)
Timer	Built-in; 0 to 9 hr. 59 min.; run function for continuous operation
Vacuum Connection	For ⅜" (9mm) I.D. tubing
L × W × H	17 × 21⅝ × 3⅜" (43.5 × 55.0 × 8.5cm)
Net Weight	17⅝ lb. (8kg)
Pump	
L × W × H	9½ × 12¼ × 11⅝" (24.0 × 31.0 × 29.5cm)
Inlet	⅜" (9mm) I.D. tubing
Net Weight	29¾ lb. (13.5kg)

ELECTROPORATORS

Thermo Scientific* CelljecT Pro Electroporator

Advanced set-up and programming capabilities enable precise methods optimization for all cell types

- Three pulse types improve transformation effectiveness: Single Pulse; Double Pulse to counteract the negative effects of electromagnetic repulsion; and OptiPulse with fast discharge to prevent pore re–sealing
- Safety features include pre-arc detection, visual and audible alarms for incorrect parameters
- Pre-pulse impedance measurement is linked to a fully enclosed electroporation chamber
- Fully microprocessor controlled via benchtop remote control unit
- Stores up to eight programs internally, plus an additional eight per Smart Card reader/recorder to support constantly changing conditions

CelljecT Pro
EPEJ002

INCLUDES:

Control circuitry and capacitance bank; separate keypad; printer with RS-232 serial port; two Smart Cards; electroporation chamber; cuvets (two 2mm yellow and ten 4mm purple); power supply; instruction manual; and optimization guide

Description	Cat. No.	Each
CelljecT Pro	**EPEJ002**	8003.10
Additional Smart Card	**EPES001**	79.40

SPECIFICATIONS

Waveform	Decaying exponential with R/C time constant, dependent upon capacitor and sample
Output Voltage	100–3500 Volts, 50v steps (high voltage mode); 20–450 Volts, 2v steps (low voltage mode)
Capacitance Range	0.5/25µf (high voltage); 150–3000µf (low voltage)
Pulse Time	10µsec. to 7 sec.
Dimensions (L × W × H)	Main Unit: 8⅔ × 16¾ × 20" (22 × 42.5 × 51cm) Chamber: 2⅔ × 10¼ × 3⅔" (6.7 × 26 × 9.2cm)

Thermo Scientific* CelljecT Duo Electroporator

Efficiently electroporates embryo, mammalian, plant, yeast, and bacterial cells

- User friendly; program by cell type or pre-optimized parameter value
- Accommodates 1, 2, 4, or 10mm cuvets
- Compact footprint minimizes benchtop space
- Safety features include lid interlock plus pre– and post–monitoring system to prevent incorrect programming
- External remote keypad with integral cuvet chamber enables external programming

CelljecT Duo
EPEJ003

Contd. on next page.

Thermo Scientific* CelljecT Duo Electroporator, Contd.

INCLUDES:
Remote keypad, instruction manual, optimization guide, and 10 cuvets (five 2mm yellow and five 4mm purple)

Description	Cat. No.	Each
CelljecT Duo	EPEJ003	5844.00
Replacement keypad	EPES900	727.00

SPECIFICATIONS

Waveform	Decaying exponential
Output Voltage	20–2500 volts in two–volt steps
Capacitance Range	5–1500µf in 75µf steps after 75µf
Pulse Time	1.5msec. to 7 seconds (auto)
Dimensions (L × W × H)	7 × 6½ × 11" (18 × 16.5 × 28.3cm)

ACCESSORIES

Precision Universal Cuvets

Compatible with most common electroporators

- Superior cap design improves aseptic handling and reduces aerosol contamination; color coded for size
- "V" form in the base enables easy sample pickup and reduces the amount of sample needed by 50%
- Materials have been tested to optimize transformation efficiency
- Aluminum electrodes are physically and chemically cleaned to provide a uniform surface
- Cuvets are available with or without specially designed disposable, plastic pipets which can be used to further improve aseptic procedures
- Cuvets and pipets are supplied individually wrapped and gamma sterilized

Description	Cat. No.	Pack of
Cuvets Only		
1mm	EPECU101	25/122.46
2mm	EPECU102	25/122.46
4mm	EPECU104	25/122.46
Cuvets plus Pipets		
1mm	EPECU201	25/83.42
2mm	EPECU202	25/83.42
4mm	EPECU204	25/83.42
Accessories		
Disposable Pipets, 50/Pk.	EPECU300	50/23.01

SPECIFICATIONS

Cuvet Size	Color	Application
1mm	Black	Bacteria requiring a high electric field (e.g., gram positive bacteria)
2mm	Yellow	Bacteria, yeast, fungi
4mm	Purple	Mammalian cells

Thermo Scientific* CelljecT Uno Electroporator

Small, easy-to-use model produces optimum efficiencies in bacterial applications

- Cost-effective; accommodates bacterial and yeast cells in 1, 2, or 4mm cuvets
- Dual voltage output
- Safety interlocking lid

CelljecT Uno

EPEJ004

INCLUDES:
Instruction manual, optimization guide, and 10 cuvets (five 2mm yellow and five 4mm purple)

Cat. No.	Each
EPEJ004	2220.00

SPECIFICATIONS

Output Voltage	1800 or 2500 Volts
Input Voltage	90 or 250 Volts
Pulse Time	5msec.

BTX*-Harvard Apparatus HT 96-/25-Well Electroporation Systems

High-throughput systems increases cell yields and viability

Quickly and efficiently optimize the electrical and biological parameters associated with electroporation. Fast, precise pulsing for efficient molecular delivery using BTX patented HT 96-well electroporation plates.

- Perform multiple experiments in either 5 × 5, 25–well plates or 8 × 12, 96–well plates
- Research 96 experimental parameters in minutes
- Choice of ECM generators: ECM 830 square pulse for mammalian cell transfer; or ECM 630, exponential decay wave, for molecular biology applications
- Adapter enables use of 25-well plates in the HT-100 plate handler

BTXHT100

BTXHTP252 (small), BTXHTP962 (large)

Plate Handler

- HT 96-well plate handlers (HT-100) accommodate both 25- and 96-well plates
- Feature integrated pulse switching technology and gold-plated contacts to mate with electroporation plates
- Designed for use in small spaces, such as laminar flow hoods
- HT-200 plate handler operates with the ECM830 generator and features Autotrack switching which automatically progresses column to column through the MOS plates within seconds—ideal for busy laboratories running many samples
- HT-100 handler operates with the ECM630 and uses manual track switching, ideal for laboratories doing bacterial and yeast transformations

Contd. on next page.

BTX* Harvard Apparatus Ht 96-/25-Well Electroporation Systems, Contd.

APPLICATIONS:

Transfection of mammalian cells; transformation of bacteria and yeast; cDNA library screening; drug screening; siRNA

INCLUDES:

Two HT 25 or HT 96 disposable well plates, HT–100 Plate Handler with connectors for standard pulse generators, ECM generator as specified in ordering table.

BTX*-Harvard Apparatus ECM* 2001 Electro Cell Manipulation System

Generate a proprietary AC wave form for dielectrophoretic alignment of cells

BTX2001EM

Switch-over time between AC and DC of only 50µsec enables efficient fusion; post-fusion AC keeps cells together for the rounding-off process. DC square pulse section can stand alone with a wide range of voltages and pulse lengths; capable of operating into low impedance loads.

- Include microprocessor-controlled precision, automatic or manually controlled sequence, and one to nine sequence repeats
- Can operate into a 20ohm load; short circuit and arc proof
- Includes the Electro Cell Manipulator 2001, also available separately
- ECM 2001 Embryo Manipulation System, includes ten 20µL, 0.5mm gap microslides; ten 40µL, 1mm gap microslides; one 0.65mL, 3.2mm gap slide; and micrograbber cables

ORDERING INFORMATION:

Printer outlet option available

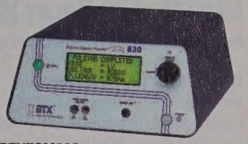
BTX*-Harvard Apparatus ECM* 830 Square Wave Electroporator

Designed for in vitro, in vivo, and in ovo electroporation applications



BTXECM830

- BTX Power Platform technology with digital user interface
- Arc Quencher* arc recognition and elimination
- Single rotary dial with push-button toggle between parameter settings
- Monitoring of voltage, pulse length, pulse interval, and pulse number
- Also offers multiple pulsing capability and precise parameter control

APPLICATIONS:

Embryo manipulation techniques, vivo gene therapy electroporation, in vitro embryo gene delivery, plant protoplast transformation, in ovo gene delivery, siRNA transfections, zebrafish electroporation

INCLUDES:

ECM 830 Square Wave Pulse Generator; 30 sterile, disposable cuvets (1, 2, and 4mm gap sizes); cuvet safety stand; 20-position numbered cuvet rack

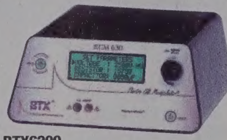
Description	Cat. No.	Each
ECM 830 Electroporation System	**BTX8300**	6978.00
ECM 830 Square Wave Pulse	**BTXECM830**	6452.00

SPECIFICATIONS

Model	ECM 830
Waveform	Square Wave
Low Voltage (LV) Mode	
Voltage Range (Res.)	5–500V (1V)
Pulse Length Range	10–999µsec; 1msec–10sec
High Voltage (HV) Mode	
Voltage Range (Res.)	30–3000V (5V)
Pulse Length Range	10µsec–600µsec
Pulse Interval	100msec–10sec
Pulse Number	1–99

BTX*-Harvard Apparatus ECM* 630 Exponential Decay Wave Electroporator

Broad capacitance and resistance range supports a wide variety of in vitro and in vivo applications



BTX6300

Ideal for gram positive and gram negative bacteria, yeast, fungi, and other microorganism transformation in HV mode; optimized for a broad range of mammalian cell lines such as ES cells, fibroblasts, and epithelial cells in the LV mode. Novel applications include transdermal drug/gene delivery and intact plant gene delivery.

- ▸ Delivers a maximum of 6000A in low-voltage mode; Precision Pulse* System provides the user with excellent control of the time constant
- ▸ Features BTX Power Platform technology, digital user interface, built-in monitoring of voltage and pulse length, automatic charge and pulse sequence, single rotary encoder, programming options, online menu, and protocol storage
- ▸ Duplicates over 200 ECM 600 protocols; the additional ECM 630 resistor selection NONE allows researchers to reproduce protocols from competitive systems lacking resistor settings or reporting unlimited resistance

APPLICATIONS:
Ideal for bacterial, yeast, fungal, and other microorganism transformation in HV mode. Optimized for a broad range of mammalian cell lines such as ES cells, fibroblasts, and epithelial cells in the LV mode. Novel applications include transdermal drug/gene delivery and intact plant gene delivery.

INCLUDES:
ECM 630 Exponential Decay Pulse Generator; 30 sterile, disposable cuvets (1, 2, and 4mm gap sizes); cuvet safety stand; 20-position numbered cuvet rack

Description	Cat. No.	Each
ECM 630 Electroporation System	**BTX6300**	5783.00
ECM 830 System w/ECM 630 Generator	**BTX450061**	12,300.00

SPECIFICATIONS

Model	ECM 630
Waveform	Exponential Decay
Low Voltage (LV) Mode	
Voltage Range (Res.)	10–500V (1V)
Capacitance Range	1, 25–3275μF
Pulse Length Range	25μsec–5sec (buffer dependent)
High Voltage (HV) Mode	
Voltage Range (Res.)	500–2500V (5V)
Capacitance Range	25, 50μF
Pulse Length Range	625μsec–78msec (buffer dependent)
Resistance Range	25–1575ohms

BTX*-Harvard Apparatus ECM* 399 Exponential Decay Wave Electroporator

Portable, user-friendly system

READY LV 250V
BTX
PEP
ECM 399
BTX399S

Produce the precise field strengths and pulse lengths required for the transformation of bacterial and yeast cells. Utilizes the BTX Power Platform Technology design with digital user interface. In low voltage mode the ECM 399 can be used for limited transfections of mammalian cells.

- ▸ Single-dial control
- ▸ Low and high voltage
- ▸ 16-character LCD readout
- ▸ Feedback of pulse length and peak voltage

APPLICATIONS:
Transformation of bacteria and yeast; limited transfection of mammalian cells

INCLUDES:
ECM 399 Electroporation System; ECM 399 Exponential Decay Pulse Generator with built-in power supply; one PEP* (Personal Electroporation Pak) for electroporation of disposable cuvets; 20 sterile disposable cuvets in 1, 2 and 4mm gap sizes; one 20-position numbered cuvet rack

Description	Cat. No.	Each
ECM 399 Electroporation System	**BTX399S**	2364.00
ECM 399 Generator only	**BTXECM399**	2158.00
ECM 399/ECM 830 Combination Package	**BTX450060**	9121.00

SPECIFICATIONS

Model	ECM 399
Waveform	Exponential Decay
Low Voltage (LV) Mode	
Voltage Range (Res.)	2–500V (2V)
Capacitance Range	1050μF
Pulse Length Range	26msec
High Voltage (HV) Mode	
Voltage Range (Res.)	10–2500V (10V)
Capacitance Range	36μF
Pulse Length Range	5msec
Resistance Range	150ohms

ACCESSORIES

Cuvettes Plus* Electroporation Cuvets

Field strengths up to 25kV/cm are possible when these cuvets are used with BTX generators

BTX600 Series

- ▸ With imbedded aluminum electrodes and round, color-coded caps
- ▸ Gamma irradiated for sterility

ORDERING INFORMATION:
Each package of 50 individually wrapped cuvets includes a sterile transfer pipet for removing the sample after electroporation.

Description	Cat. No.	Pack of 50
1mm gap, 90μL	**BTX610**	134.00
2mm gap, 400μL	**BTX620**	134.00
4mm gap, 800μL	**BTX640**	134.00

*Trademark. See Trademark Reference.

ACCESSORIES

*Fisherbrand** Electroporation Cuvettes Plus*

Disposable, color-coded cuvets fit most electroporators

- Clear, medical grade polycarbonate for high visibility
- Polished aluminum lowers arcing frequency
- Round cap allows single-handed removal
- Sterilized by gamma irradiation and supplied individually wrapped

FB101

Description	Cap Color	Cat. No.	Pack of 50
1mm gap, 90µL	Purple	**FB101**	126.63
2mm gap, 400µL	Blue	**FB102**	126.63
4mm gap, 800µL	Yellow	**FB104**	126.63

Eppendorf* Multiporator* Electroporation System

Pulse times in the micro-second (µsec.) range minimize damage to eukaryotic cells

Hypo-osmolar buffer system increases transfection efficiency; enables electro-deformation of the cells for membrane permeation at specific locations. Soft Pulse* Technology produces exceptionally high survival rates and greater transfection efficiency.

E4308 000 015

- Patented electronics[1] ensure accurate performance of pulse parameters, independent of the sample resistance
- Microprocessor-controlled discharge provides high reproducibility
- Built-in keypad and display screen allow the user to easily set and monitor operating parameters

ORDERING INFORMATION:
Eppendorf electroporation cuvets are available separately.

INCLUDES:
RS-232 interface

Description	Mfr. No.	Cat. No.	Each
Multiporator	940 00 050-5	**E4308-000-015**	5240.00

SPECIFICATIONS

	Multiporator
Application	Mammalian and plant cells
Pulse Voltage	20–1200V
Time Constant	15–500µsec., in 5µsec. increments
Multiple Pulsing	1–99, with 1 min. time interval
Buffers	Hypo-osmolar and iso-osmolar
Pulse Form	Exponentially diminishing
Cuvets	Aluminum, gap widths: 1mm, 2mm, 4mm

---

[1] *U.S. Patent 6,008,038.*

Eppendorf* Electroporator 2510

Compact unit transforms bacteria and yeast quickly and efficiently

Features an exponential decay pulse with a fixed time constant of five milliseconds—ideal for *E. coli* transformation

- Simple one-button triggering
- Portable—fits almost anywhere in the lab
- The two most common settings (1800 and 2500V) can be readied without scrolling through the entire range

E4307 000 640

APPLICATIONS:
Ideal for *E. coli* transformation

ORDERING INFORMATION:
Additional cuvets and other standard gap widths are available separately.

INCLUDES:
Ten 1mm electrode gap sample cuvets

WARRANTY:
One-year

COMPLIANCE:
Conforms to CSA and IEC 1010 safety standards.

CERTIFICATIONS:
UL listed

Electrical Requirements	Mfr. No.	Cat. No.	Each
115V 60Hz	940 00 000-9	**E4307 000 640**	1635.00

SPECIFICATIONS

Input Voltage	115V RMS 60Hz or 230V RMS 50Hz†
Input Current	<0.5 amp
Maximum Output	2500 peak into >3.3kilohm load
Output Waveform	Decaying exponential waveform with RC time constant of 5msec., assuming loads of 3.3kilohm
Output Voltage	Range of 200–2500V
Charging Time	<8 seconds at 2500V
Dimensions (L × W × H)	10¾ × 8⅞ × 4" (29.6 × 22 × 10cm)
Weight	6 3/16 lb. (2.8kg)

BEFORE YOU BUY EVAPORATORS

The R-210/215 series of rotary evaporators are designed to provide a complete and modular solution for laboratory solvent evaporation processes. R-215 units feature an additional digital display of the vapor temperature and rotation speed. Ease-of-use, flexibility and maintenance-free operation are the hallmarks of this evaporator series!

IMPORTANT TERMS TO KNOW

Simple Distillation—A process in which all hot vapors produced are immediately channeled into condenser which cools and condenses the vapors.

Fractional Distillation—The separation of a mixture into its component parts, or fractions. A goo example is separating chemical compounds by their boiling point by heating them to a temperature which several fractions of the compound will evaporate.

Vacuum Distillation—This technique is very useful for compounds which boil beyond their decomposition temperature at atmospheric pressure. Lowering the pressure to distill temperatur sensitive compounds, lowers the temperature at which the compounds vaporize.

Bumping—Sudden uncontrolled boiling, which can result in loss of some portion of the substance intended to be retained. Bumping can be prevented by regulating the streng the vacuum with a vacuum controller, by reducing the temperature of the water bath by using boiling chips.

Cold Trap—A device that condenses all vapors into a liquid or solid. The most common objective is to prevent vapors from contaminating a vacuum pump o vacuum line.

FEATURES TO LOOK FOR

Flexibility—Modular systems allow individual components to be combined as needed – a clear advantag laboratories or where many different applications are involved.

Vacuum Control—Pressure is a crucial parameter in every evaporation process. Only a defined and regul vacuum provides the controlled conditions necessary for a quick, reliable evaporation process. These conditi produce markedly lower solvent emissions, less bumping and foaming, and ensure reproducible process pa Some vacuum controllers even allow for completely automated distillation!

Ease of Use—Simple controls will allow you to focus on your evaporating tasks, not on reading operating

Safety:
Plastic Coated Glass—To protect against splintering in case of breakage.
Fault Protection—Systems should offer a "Safe Mode" to protect your critical samples in the event that a following occur: power failure, overheating, jamming, or deviations from set temperature, speed and rotati
User Protection—Users should be protected against contact with any hot surface and splashing from the evaporating flask

For a full selection of Büchi® Evaporators, see p. 649–651, 661, 663.

EVAPORATORS

ROTARY

Büchi* RotaVapor* R-210 Rotary Evaporation Systems

NEW

Complete, compact systems provide optimal performance, reliability and safety in a variety of configurations

Versatile, expandable operation

- Modular systems for distillation of all solvents
- Perfect for hard-to-handle materials that bump and foam
- Available with integrated vacuum controllers to automate distillation and handle time-pressure gradients
- Choice of seven condenser assemblies for numerous applications
- Optional plastic safety coating on all glassware resists solvents; protects you and your sample against breakage hazards
- Handle flask sizes from 50 to 4000mL
- Chemical-resistant PTFE sealing system is practically maintenance-free
- Optional water/oil heating bath has a 1300w heating capacity; can also be used as a stand-alone bath; has a temperature range from 20° to 180°C; digital display of both the set and actual temperatures
- Motorized quick-action jack raises and lowers evaporator; automatic release to top position in case of power failure
- Electronically controlled, variable-speed, sparkless motor provides high, constant torque from 20 to 280rpm

R-210 Basic Models feature:

- Rotary evaporator with rotation control knob
- Quick-action jack
- Glassware

R-210 Advanced Models offer R-210 Basic features, plus:

- Vacuum Controller V-850 for vacuum regulation to a specified setpoint
- Data transfer via USB interface
- Timer function for process interruption after a set time
- Library of 43 predetermined solvents
- Quick-configuration wizard

R-210 Professional Models offer R-210 Advanced features, with:

- Upgraded Vacuum Controller V-855 for automatic process control based on vapor pressure detection (when used with V-700 or V-710 Vacuum Pump)
- Automatic distillation with unique stage probe (when used with a V- or S-Condenser assembly)
- Special programming functions for pressure gradients up to 20 steps
- Storage of up to 15 process profiles with programmable gradients
- Repeat function for reproducible repetition of a distillation

ORDERING INFORMATION:

Operate on 120V 50/60Hz, 1360w

Dimensions: 16⅝L × 21$\frac{11}{16}$W × 22⅝"H (415 × 550 × 575mm)

Include one of three glassware assemblies:

Assembly A. Diagonal, tap-water-cooled condenser, ideal for areas with a limited height.

Assembly CR. Two-piece, cold trap condenser with a reflux valve. Inlet feed tube permits continuous feed of volumes.

Assembly S. Vertical, tap-water-cooled condenser with a reflux valve. Inlet feed tube permits continuous feed of volumes.

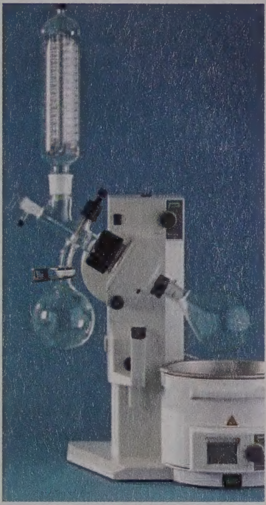
Additional configurations are available, including models for 220/240V, four additional glassware assembly styles (BY, C, E, V), models without heating bath or jack, and models with standard glassware. For details, see our Web site.

INCLUDES:

Rotary evaporator assembly with lift and rotation control; B-491 heating bath: plastic-coated glassware, including specified condenser, 1L receiving flask; standard glass 1L evaporating flask; Combi-Clip to secure flask during operation; other components as specified in ordering table.

REQUIRED ACCESSORIES:

Vacuum pump or system and associated connections



05-024-20

COMPLIANCE: CE marked. UL listed. CSA approved.

† W: Woulff bottle condensate trap. V: Valve unit with Woulff bottle condensate trap and nonreturn valve for attachment to Rotavapor (not necessary with V-700 vacuum pump in standalone system).

WARNING

Direct exposure of plastic-coated glassware to chlorinated solvents and aggressive reagents should be avoided. After extensive use, coating on glassware may wear and loosen from surface, increasing risk of injury.

Büchi* Rotavapor* R-215 Rotary Evaporation Systems

NEW

Compact, modular systems with digital display of vapor temperature and rotation speed

Versatile, expandable operation

- Modular systems for distillation of all solvents
- Perfect for hard-to-handle materials that bump and foam
- Available with integrated vacuum controllers to automate distillation and handle time-pressure gradients
- Choice of seven condenser assemblies for numerous applications
- Handle flask sizes from 50 to 4000mL
- Optional plastic safety coating on glassware resists solvents; protects you and your sample against breakage hazards
- Chemical-resistant PTFE sealing system is practically maintenance-free
- Optional water/oil heating bath has a 1300w heating capacity; can also be used as a stand-alone bath; has a temperature range from 20° to 180°C; digital display of both the set and actual temperatures
- Motorized quick-action jack raises and lowers evaporator; automatic release to top position in case of power failure
- Electronically controlled variable-speed sparkless motor provides high, constant torque from 20 to 280rpm

R-215 Basic Models feature:

- Digital LCD readout of vapor temperature and rotation speed
- Rotary evaporator with rotation control knob
- Quick-action jack
- Glassware

R-215 Advanced Models offer R-210 Basic features, plus:

- Vacuum Controller V-850 for vacuum regulation to a specified setpoint
- Data transfer via USB interface
- Timer function for process interruption after a set time
- Library of 43 predetermined solvents,
- Quick-configuration wizard

R-215 Professional Models offer R-210 Advanced features, with:

- Upgraded Vacuum Controller V-855 for automatic process control based on vapor pressure detection (when used with V-700 or V-710 Vacuum Pump)
- Automatic distillation with unique stage probe (when used with a V- or S-Condenser assembly)
- Special programming functions for pressure gradients up to 20 steps
- Storage of up to 15 process profiles with programmable gradients
- Repeat function for reproducible repetition of a distillation

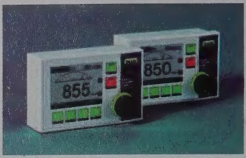
ORDERING INFORMATION:

Operate on 120V 50/60Hz, 1360w; dimensions:
16⅝L × 21 11⁄16W × 22⅝"H (415 × 550 × 575mm)
Additional configurations are available, including models for 220/240V, two additional glassware assembly styles (BY, E), models without heating bath or jack, and models with standard glassware. For details, see our Web site.

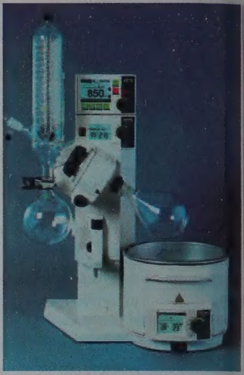
Include one of three glassware assemblies:

Assembly A. Diagonal, tap-water-cooled condenser, ideal for areas with a limited-height.

Assembly C. Two-piece cold trap condenser uses dry ice/acetone or liquid nitrogen as coolant. Ideal for distillation of low-boiling solvents. Eliminates tap water consumption and maximizes solvent recovery to minimize environmental contamination. Inlet feed tube permits continuous feed of volumes.



Vacuum Controllers V-855 (Professional Models), V-850 (Advanced Models)



05-401-259

Assembly CR. Two-piece, cold trap condenser with a reflux valve. Inlet feed tube permits continuous feed of volumes.

Assembly S. Vertical, tap-water-cooled condenser with a reflux valve. Inlet feed tube permits continuous feed of volumes.

Assembly V. Vertical tap-water-cooled condenser for distillation of high-boiling solvents. Inlet feed tube permits continuous feed of volumes.

INCLUDES:

Rotary evaporator assembly with digital display, heating bath, lift and rotation control; plastic-coated glassware, including specified condenser, 1L receiving flask standard-glass 1L evaporating flask; Combi-Clip to secure flask during operation; other components as specified in ordering table

REQUIRED ACCESSORIES:

Vacuum pump or system and associated connections

WARRANTY:

Three years

COMPLIANCE:

CE marked

Büchi* RotaVapor* RII Evaporation Systems

NEW

For quick, gentle and economical evaporation procedures without cutting corners

Rotavapor RII delivers the same performance as other Buchi Rotavapors, with just the features you need. Rotating flask produces effective heat transfer while ensuring thorough mixing and avoiding overheating of contents.

05-402-287

Modular design, versatile operation

- Choice of three condenser assemblies and two $ joint options; for 1 to 3L flasks
- Handle evaporating flask sizes from 50 to 4000mL; receiving flasks from 500 to 3000mL
- Optional plastic safety coating on glassware resists solvents; protects you and your sample against breakage hazards
- Chemical-resistant PTFE sealing system is practically maintenance-free
- Manual quick-action jack raises and lowers evaporator
- Heating bath has 1300w heating capacity, analog temperature control from 20° to 95°C
- Electronically controlled, variable-speed, sparkless motor provides a high, constant torque from 20 to 280rpm

ORDERING INFORMATION:
Operate on 120V 50/60Hz, 1360w; dimensions: 21 11⁄16L × 16 5⁄8W × 22 5⁄8"H (415 × 550 × 575mm)

Include one of three glassware assemblies:

Assembly A: Diagonal, tap-water-cooled condenser, ideal for areas with a limited height.

Assembly C: Two-piece cold trap condenser uses dry ice/acetone or liquid nitrogen as the coolant. Ideal for distillation of low-boiling solvents. Eliminates tap water consumption and maximizes solvent recovery to minimize environmental contamination. Inlet feed tube permits continuous feed of volumes.

Assembly V: Vertical, tap-water-cooled condenser, ideal for high-boiling solvents. Inlet feed tube permits continuous feed of volumes.

Additional configurations are available. For details, see our Web site.

INCLUDES:
Rotary evaporator assembly with manual lift and rotation control; $ 24/40 standard or plastic-coated glassware with specified condenser and 1L receiving flask; 1L $ glass evaporating flask; Combi-Clip to secure flask during operation; heating bath with handles and quick-release electrical connection for easy mobility

OPTIONAL ACCESSORIES INCLUDE: Transparent safety faceshield; Büchi Chiller B-741; Vacuum Controller V-850 or V-855; Vacuum Pump V-700. Contact your Fisher Scientific Customer Service Representative.

Brinkmann*/Heidolph* Collegiate* Series Rotary Evaporators

Analog Control Rotary Evaporators with manual lift for all standard distillations in the educational and university research environment

Designed with the cost-conscious researcher in mind

13-876-300

- Comes with all the basic features required for routine and common distillations
- Delivers the best value in benchtop rotary evaporation
- Modular design lets you upgrade easily and add an optional vacuum valve and Woulff bottle for more precise and accurate vacuum control
- Manual lift raises and lowers evaporation flask from heating bath
- Convenient large-dial control adjusts rotation speed from 20 to 270rpm, and heating bath temperature from 20° to 100°C
- Stainless-steel water bath with diameter of 240mm, total working volume of 4.3L
- Bath features non-slip handles for safe and easy transport, insulated double wall for protection against burns

ORDERING INFORMATION:

Available with choice of condenser sets:

G1. Diagonal Condenser: for standard distillations

G3. Vertical Condenser: for standard distillations and space saving requirements

G5. Cold Trap: for low-boiling solvent distillations

Glassware set includes one 1000mL evaporating flask (₮24/40) and one 1000mL receiving flask. All glassware sets are available with optional plastic safety coating. Operate on 115V or 230V, 50/60Hz.

Brinkmann*/Heidolph* VV Micro Rotary Evaporator

For small and microscale distillations

Small size, big performance

- Compact design fits into most leading lab hoods and glove boxes
- Provides high-capacity distillation with evaporation rates for pure water at 250mL/hr.
- Individual analog dial controls for rotation speed and bath temperature
- One condenser for both standard and reflux distillations, simple changeover
- Handles flask sizes from 50 to 250mL
- Water bath has 0.7L capacity, 500w heating capacity, 30° to 100°C range ±-5°C
- Silicon sheeting surrounds bath for user protection
- Variable-speed motor provides 80–200rpm rotation
- Manufactured with ISO 9001:2000-certified processes

VV Micro setup for reflux distillations 13-878-400

ORDERING INFORMATION:

Operates on 115V 50/60Hz, 530w. Dimensions: 6½L × 9⅜W × 14¼"H (167 × 23 × 360mm). Weight without glassware: 15¼ lb. (6.9kg).

VV Micro setup for standard microdistillations 13-878-400

INCLUDES:

Rotary evaporator, heating bath, glassware, with three sets of evaporation and receiving flasks (50, 100, 250mL), adapter for use with standard 14/20 evaporating flasks

REQUIRED ACCESSORIES:

Vacuum pump or system and associated connections

WARRANTY:

Three years

Brinkmann*/Heidolph* Laborota 4000 Series Rotary Evaporation Systems

NEW

Modular, expandable design, with all components designed to function together

Expandability, safety, convenience

- High efficiency in a limited space, even with low boiling solvents
- Available with integrated vacuum controllers to automate distillation
- Choice of five condenser assemblies for numerous applications handle flask sizes from 50 to 3000mL
- Optional plastic safety coating on glassware resists solvents; protects you and your sample against breakage hazards
- Long life graphite-filled PTFE vacuum seal
- Nonsticking quick release vapor tube
- Drip shield over display protects user and control panel from spills
- Individual power switches for control panel and heating bath
- Water/oil heating baths have 4.3L capacity, 1300w heating capacity, 20° to 180°C range ±0.1°C; digital display of set temperature
- Choice of manual or motorized jack to adjust height of evaporator flask
- Electronically controlled variable-speed motor provides high torque from 20 to 270rpm
- Manufactured with ISO 9001:2000-certified processes

4000 and 4001 Efficient Models feature:

- Rotary evaporator with large analog rotation control knob
- Manual or motorized lift
- Glassware
- Attachment for optional vacuum valve or Woulff Bottle

4010 and 4011 Digital Models offer 4000/4001 features, plus:

- Digital display of rotation speed, vapor temperature and bath temperature
- Dial on bath sets overtemperature protection

4002 and 4003 Control Models offer 4010/4011 features, plus:

- Built-in vacuum controller for automatic process control based on vapor pressure and temperature detection
- Programmability of up to nine of your most common applications
- Process timer allows for unattended operation
- T Function to stop distillation at your set minimum pressure
- P Function to hold vacuum setting constant throughout entire distillation
- Allows for setting of pressure ramps for gradient distillation of binary/tertiary solvent mixtures
- Safety bath temperature backup system with additional control

ORDERING INFORMATION:

Operate on 115V 50/60Hz, 1430w

Dimensions: 15$\frac{9}{16}$L × 17$\frac{5}{16}$W × 14⅜"H (396 × 440 × 360mm). Weight without glassware: 37½ to 41⅞ lb. (17 to 19kg), depending on configuration.

Additional configurations are available, including models for 230V, two additional glasssware assemblies (G4, G6), models with \$ 29/32 and with standard glassware. For details, see our Web site.

Include one of three glassware assemblies:

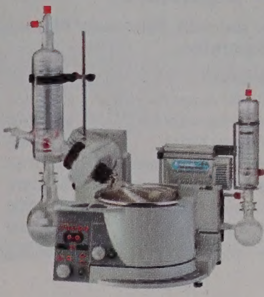
Assembly G1. Diagonal condenser for all standard distillations, the alternative with the most affordable price

Assembly G3. Vertical condenser for all standard distillations, the alternative with the smallest space requirement

Assembly G5. Condensate trap for low-boiling solvents; cooling by dry ice

INCLUDES:

Rotary evaporator assembly, heating bath with digital display, manual or automatic lift, rotation control; plastic-coated glassware \$29/32, including specified condenser, 1L receiving flask, standard-glass 1L evaporating flask; other components as specified in ordering table



13-878-874

REQUIRED ACCESSORIES:

Vacuum pump or system and associated connections.
4010 and 4011 models require Vapor Temperature sensor 13-878-672;
4002 and 4003 models for use with the Valve Control pump or a house vacuum source require VAC Sensor T (13-878-742) and Vacuum Valve (13-876-314).

WARRANTY: Three years

Kontes* Rotary Evaporator Traps With Inner Vapor Tube at Top

Design allows expanded volume for mixtures that have a tendency to foam excessively

- Inner vapor tube is ring-sealed at top of flask to prevent entry of organic mixtures into the condenser
- Flask has Ŧ 24/40 outer ground joint at top

CENTRIFUGAL

Thermo Scientific* Savant DNA SpeedVac Concentrators

Compact, fully-integrated systems designed specifically for DNA and RNA applications

Support the rapid and efficient concentration and drying of DNA/RNA samples, nucleic acids, PCR preps, and synthetic oligos. Choice of three models to handle low-volume sample preps as well as higher-volume processing requirements. Units are easy to use and install with no additional tubing or pumps required.

Operating Features

- Consistent performance: designed to ensure consistent drying times and reproducible results
- Simplicity: a single program supports all DNA/RNA applications
- User-friendly interface with temperature/time settings
- Three drying rates: (ambient, ~43°C, ~65°C)
- Dual digital timers for independent control of heat/run times
- Manufactured under ISO 9001: 2000 Certified processes

Sample Protection

- Ensured with both drying at ambient temperatures or very low heat to avoid sample denaturing
- Oil-free diaphragm pump provides gentle transition from atmosphere to ultimate vacuum setting with no bumping

Safety Features

- PTFE-coated chamber resists chemicals and cleans easily
- Latched lid ensures user safety during operation
- Unit and pump are virtually maintenance-free
- Optional chemical traps and cartridges trap radioactivity and ammonia

High-capacity ISS110 DNA SpeedVac Concentrator

- With a built-in 4L cold trap
- Ideal for processing large batches of DNA/RNA samples up to 4L
- Capacity: 120 × 1.5/2.0mL tubes, 4 × 100mL flasks, or two microplates

Thermo SCIENTIFIC
ISS 110

20-548-134

- Plug-and-play design: integrated concentrator, cold trap, and pump
- Chamber can be preheated to accelerate evaporation

Small Volume DNA 120 SpeedVac Concentrator

- Offers rapid and efficient drying of small volume DNA/RNA samples
- Handle aqueous and alcohol solvents
- Compact, space-saving design

Oligo SpeedVac Concentrator DNA1200P

- All the features of the DNA 120 plus external post trap to neutralize ammonium hydroxide
- Chemically resistant glass cover to contain solvents

APPLICATIONS:

Biotechnology, pharmaceutical research, hospital and clinical labs, forensic labs, and general R&D.

INCLUDES:

Rotor (see Specifications Chart for specific model information)

CERTIFICATIONS:

CE marked, CSA approved

Eppendorf* Vacufuge* Concentrator

Three aeration modes to concentrate DNA/RNA, proteins, and other samples quickly

For gentle concentration of DNA, RNA, nucleotides, proteins, and samples for gel electrophoresis. Combines centrifugal force and vacuum.

- Available as a basic instrument for use with existing pumps (with minimum vacuum pressure of 20mbar) or as a complete system with a maintenance-free PTFE vacuum pump (40L/min.) and vapor trap
- Three aeration modes (aqueous, alcohol, and off) maximize evaporation efficiency, prolong pump life span, and reduce processing time by up to 20%
- Corrosion-resistant stainless-steel chamber withstands chemical exposure
- Brake function brings rotor to a faster stop
- Maximum speed/force: 1400rpm/240×G
- Space-saving design with low noise level of ≤60 dBA for the compact laboratory
- Choice of four heating levels (ambient, 30°, 45° and 60°C) provides optimal evaporation speed for your samples

07-748-15

ORDERING INFORMATION:
Concentrator is supplied with a stackable 48-place fixed-angle rotor for 1.5–2.0mL microcentrifuge tubes. Additional rotors are available separately. Nonstackable rotors for 96-well plates, 15mL conical tubes, and vials are also available.

Model	Max. Speed	Max. Force	Dimensions (L × W × H)	Mfr. No.	Electrical Requirements	Cat. No.	Each

Complete System, w/ PTFE vacuum pump	1400rpm	240×G	21 × 12⅝ × 11¾" (53 × 32 × 30cm)	22 82 010 9	115V 50/60Hz	**07-748-15**	7625.00
				22 82 012 5	220V 50/60Hz	**07-748-16**	7625.00

Labconco* CentriVap* Concentration Systems

Use centrifugal force, vacuum and heat to evaporate solvents rapidly from multiple biological or analytical samples

Components available separately or in application-specific packages. Choose systems for DNA samples; aqueous-, acid- or solvent-based applications; multiple small samples containing harsh chemicals; samples requiring temperature control from -4°C to +100°C; Mobile Systems; Gel-Dryer Systems for application sharing of accessory vacuum pump.

Benchtop Concentrator

- Eliminates bumping and foaming, maximizes trace solute recovery
- Microprocessor-controlled 300w heater covers ambient to 100°C in 1° increments
- Optional Heat Boost* surrounds chamber with extra controlled heat at programmed temperature, in closer proximity to sample
- Electrical receptacle included for an accessory vacuum pump (available separately)
- Vacuum delay prevents bumping by allowing rotor to achieve speed before applying vacuum
- Quick-Start* button starts rotor, heater, timers and pump
- Quick-Stop* system stops pump, opens vacuum release valve and stops rotor in seconds after time expires or RUN/STOP button is pressed
- Memory stores nine user programs (temperature/heat time/run time); LCD shows operating parameters and programs
- Compact, low-profile design
- Choice of removable acrylic lid with large, durable lid seal, or glass lid for use with solvents that attack acrylics
- Safety latch locks lid when rotor is turning, prevents start-up when lid is open
- Corrosion-resistant sample chamber has epoxy finish for easy cleaning and decontamination
- Microprocessor-controlled brushless motor runs at up to 1725rpm; stacks on top of cold trap to save space
- With ½" O.D. vacuum tube fitting

16-108-354

Cold Trap

- Included in Aqueous, Acid, Acid-Resistant, Refrigerated, Solvent, Gel-dryer and Mobile Systems; available as separate component
- ¼ hp compressor lowers cold trap temperature to -55°C in <15 minutes
- Environment-friendly, CFC-free refrigerant
- Stainless-steel condenser collects 4L of liquid, accepts optional glass insert (16-315-61) for corrosives
- Corrosion-resistant drain speeds cleanup
- READY light illuminates at -40°C, indicating concentration conditions are right
- **Ultralow Cold Trap** reaches -100°C; protects pump from low freezing point

ORDERING INFORMATION:
Also available for operation on 230V; contact your Fisher Scientific Customer Service Representative for details.

COMPLIANCE:
Concentrators and cold traps are ETL, ETL-C, and CE listed.

Aqueous, Acid and Solvent Systems

With clear canister and acid, moisture, or solvent insert to provide additional vacuum pump protection

Rotor holds forty 1.5–2.0mL microcentrifuge tubes or up to one hundred 12–13mm dia. tubes.

ORDERING INFORMATION:
For 115V 60Hz, 8.5A. Also available for operation on 230V; contact your Fisher Scientific Customer Service Representative for details.

INCLUDES:
Benchtop concentrator, cold trap, vacuum tubing, clamps, 12–13mm rotor; acid system also includes glass trap to protect cold trap reservoir and lid from corrosives.

REQUIRED ACCESSORIES:
Vacuum pump is required for all systems; see Fisher Scientific Maxima C-line Pumps in the Pumps section.

Electrical Reqts.	Mfr. No.	Cat. No.	Each

Refrigerated Vacuum Concentrators

Unique instruments use a refrigeration system and heater to achieve selected setpoint temperature from -4°C to +100°C

NEW

Centrifugal force and vacuum rapidly concentrate multiple small samples, such as RNA and proteins. Microprocessor-controlled cooling and heating systems protect delicate samples from heat during processing.

- Programming holds two temperatures and times
- Setpoints for first and second temperatures and run times are selected separately
- PREHEAT/COOL button activates the refrigeration system and heater to reach setpoint temperature
- Set temperatures and times can be altered while a program is in process
- Memory stores up to nine user-defined programs
- Choose removable acrylic lid or solvent-resistant glass lid, each with large phenol-free lid gasket

REQUIRED ACCESSORIES:
Rotor, cold trap and vacuum pump

COMPLIANCE:
115V models are ETL and ETL-C compliant; 230V 50Hz models are CE marked.

Electrical Requirements	Mfr. No.	Cat. No.	Each
Glass Lid			
115V 60Hz, 8A	7310021	**16-108-443**	7495.00

230V 60Hz, 5A	7310040	**16-108-446**	6705.00

Acid-Resistant Vacuum Concentrators

Rapidly concentrates multiple small samples containing harsh chemicals

NEW

- Durable, acid-resistant components throughout the vapor path
- Can be used with samples containing 0.1 to 1%TFA, hydrochloric acid, acetic acid, hydrobromic acid, ammonium hydroxide, and sodium hydroxide
- PTFE-coated aluminum chamber with glass lid and large phenol-free lid gasket

REQUIRED ACCESSORIES:
Rotor, cold trap and vacuum pump

COMPLIANCE:
115V model is ETL and ETL-C compliant; 230V model is CE marked

Electrical Requirements	Mfr. No.	Cat. No.	Each
110/115V 50/60Hz, 3.1A	7810016	**16-108-440**	6375.00

Contd. on next page.

Labconco CentriVap* Concentration Systems, Contd.

DNA Systems

For processing DNA samples or minute quantities of solvents

- Centrifugal force and vacuum rapidly evaporate solvents from multiple small samples
- DNA rotor holds seventy-two 0.5mL sample tubes or sixty 1.5 or 2.0mL sample tubes
- Corrosion-resistant diaphragm pump achieves vacuum of 29.6"Hg; has pumping capacity of 34L/min
- All wetted parts are PTFE or PTFE-coated
- Pump is easily removed for service

16-108-346

ORDERING INFORMATION:
For 115V 60Hz, 15A. Also available for operation on 230V; contact your Fisher Scientific Customer Service Representative for details.

INCLUDES:
CentriVap* Benchtop Concentrator, Integral vacuum pump, DNA rotor, Inlet and outlet glass traps to protect pump and environment.

Electrical Reqts. †	Mfr. No.	Cat. No.	Each
115V 60Hz, 15A	7970010	**16-108-346**	8045.00

† Electrical requirements including vacuum pump.

Gel-Dryer Systems

Allow accessory pump to be shared between applications

- Rotor holds forty 1.5–2.0mL microcentrifuge tubes or up to one hundred 12–13mm dia. tubes
- Three-way valve allows accessory pump to be shared among applications

ORDERING INFORMATION:
For 115V 60Hz, 15.5A. Also available for operation on 230V; contact your Fisher Scientific Customer Service Representative for details.

INCLUDES:
Benchtop concentrator, cold trap, gel dryer, 12–13mm rotor, three-way valve, vacuum tubing and clamps

REQUIRED ACCESSORIES:
Vacuum pump required; order separately.

Electrical Requirements	Mfr. No.	Cat. No.	Each
115V 60Hz, 15.5A	7475010	**16-108-363**	9665.00

Mobile Systems

Combines concentrator and cold trap in space-saving mobile console

16-108-340

Concentrator Features:

- 300w ambient to 100°C heater; selectable heater shutdown before end of run; run times from 1 to 999 min.
- Automatic vacuum release when rotor stops (to prevent sample loss)
- Microprocessor-controlled brushless 1725rpm motor
- Large corrosion-resistant sample chamber with epoxy finish
- Removable acrylic lid with durable seal; safety sensor locks lid when rotor is turning, prevents startup when lid is open
- Removable front panel gives access to accessory vacuum pump
- Pump plugs into receptacle, activates from control panel
- Automatic vacuum delay applies vacuum only after rotor achieves set speed to prevent bumping

Cold Trap Features:

- ¼hp compressor lowers cold trap temperature to -55°C in 5 minutes and accelerates startup procedures; uses CFC-free refrigerant
- READY light illuminates when condenser reaches -40°C to indicate start conditions
- Stainless-steel condenser collects up to 4L of liquid
- Condenser drain with nylon valve and stainless-steel plumbing speeds cleaning
- Built-in chemical trap canister accommodates inserts to trap moisture, acids, solvents and radiochemicals to protect vacuum pump

INCLUDES:
Benchtop Concentrator (16-316-1 or 16-317-56 with Heat Boost*) and Cold Trap (16-316-2) in a compact console, mounted on 2" dia. (5cm) hard-rubber casters for portability; 12–13mm rotor that holds forty 1.5–2.0mL microcentrifuge tubes or up to one hundred 12–13mm dia. tubes; one solvent trap insert

REQUIRED ACCESSORIES:
Vacuum pump required; order separately

Labconco* CentriVap* Concentration Systems, Contd.

ACCESSORIES

Rotors

For use with Labconco* CentriVap* Systems

- Anodized aluminum rotors hold tubes at angle to maximize surface area
- Two hole sizes on rotors 16-317-54 and 16-317-62 to -64 accommodate tubes with different O.D.
- Maximum tube capacity for a given O.D. may vary with overall tube height
- CentriVap DNA Systems come with DNA Rotor (16-317-54); all others with 12–13mm Rotor (16-317-62)

NOTE:
To prevent loss of sample during centrifugation, fill tubes only ⅓ to ½ full.

Rotor Tube	Mfr. No.	Cat. No.	Each
DNA	7462900	**16-317-54**	209.79
Hexagonal	7450700	**16-317-50**	201.76
12–13mm	7455100	**16-317-62**	800.00
12–17mm	7455000	**16-317-64**	845.00
28mm	7455200	**16-317-63**	750.00
Microtiter Plate	7461900	**16-317-53**	660.00

ROTOR TUBE/PLATE CAPACITY CHART

Rotor Type	Tube/Plate Type†	Volume	Holds
DNA	Microcentrifuge	0.5mL	72 tubes
	Microcentrifuge	1.5–2.0mL	60 tubes
Hexagonal	Microcentrifuge	1.5–2.0mL	132 tubes
12–13mm	Microcentrifuge	1.5–2.0mL	40 tubes
	12 × 55mm	3mL	16 tubes
	13 × 75mm	5–6mL	100 tubes
	13 × 100mm	5–10mL	64 tubes
12–17mm	13 × 51mm	2–5mL	52 tubes
	12 × 55mm	3mL	44 tubes
	13 × 100mm	5–10mL	36 tubes
	16 × 100mm	11–15mL	24 tubes
	17 × 120mm	12–15mL	18 tubes
	16 × 125mm	15–19mL	18 tubes
28mm	Microcentrifuge	1.5–2.0mL	32 tubes
	28 × 140mm	40–50mL	12 tubes
Microtiter Plate	Standard	96-well	4 plates
	Deep-well	96-well	2 plates

† Maximum O.D. × H held by rotor where applicable. Rotors may not hold all tubes/plates described at the same time.

Secondary Trap Canister and Inserts

Help to provide secondary protection to vacuum pumps in evaporation systems

- Clear polypropylene canister with mounting bracket, 17" (43cm) PVC tubing, and two clamps
- Canister accommodates trap inserts listed in the table

Description	Mfr. No.	Cat. No.	Each
Secondary Trap Canister	7460900	**16-317-52**	292.00
Acid Trap Insert	7814800	**16-316-8**	82.16
Moisture Trap Insert	7814900	**16-316-9**	82.15
Radioisotope Trap Insert	7815000	**16-316-10**	40.74
Solvent Trap Insert	7815200	**16-316-11**	82.16

VORTEX

Labconco* RapidVap* Vacuum Evaporation System

Alternative to traditional centrifugal evaporation methods uses vortex motion, heat and vacuum

- Processes up to 110 samples at once
- Interchangeable aluminum sample blocks coated with PTFE* fluorocarbon resin
- Blocks tubes from 12mm O.D. to 600mL

Advanced vacuum function

- Microprocessor controls vacuum at preset level
- Automatic vacuum release if power fails
- LCD shows vacuum level from 0 to 999mbar
- Rear-mounted vacuum connections: vacuum port, tubing clamps, lid heater receptacle, 30"L (76cm) ½" I.D. tubing for connection to accessory vacuum pump

Safety features

- Lexan* shield on clear glass lid protects against glass implosion
- Dual lid clamps hold lid securely in place for vacuum-tight seal
- Phenol-free gasket provides complete sealing under vacuum

Optional lid heater

- 40w heater plugs into electrical receptacle on rear
- Eliminates fogging, increases visibility when evaporating water or other high-boiling-point solvents

ORDERING INFORMATION:
Includes 6½' (2.0m) 3-wire cord with plug. Dimensions (lid closed): 18⅜L × 20¾W × 13½"H (46.7 × 52.6 × 34.3cm).

230V models available; contact your Fisher Scientific Customer Service Representative for details.

REQUIRED ACCESSORIES:
Vacuum pump. Select vacuum pump based on solvent type and possible temperature limitations.

*Trademark. See Trademark Reference.

Prices subject to change.

Labconco* RapidVap* N_2 Evaporation System

Evaporates using vortex motion, heat and nitrogen blowdown

Efficient alternative to Kuderna-Danish and rotary evaporators.

- Nitrogen manifold lets operator introduce nitrogen to selected samples
- Processes up to eight samples at once; maximum individual volume capacity, 450mL

Choice of two end-of-run signals:

- Timed signal: electric timer pauses system, alerts user when set time has elapsed
- Temperature signal: system monitors temperature difference between sample block and heater caused by evaporative cooling; when evaporation is nearly complete, the two temperatures equalize, causing alarm to sound and PREHEAT/END ALARM light to flash

ORDERING INFORMATION:

With side-mounted 2" dia. (5cm) exhaust port with built-in blower; 6' (1.8m) of exhaust tubing to vent toxic solvent vapors into fume hood; nitrogen inlet port with 1/4 NPT male thread; eight polyethylene glassware caps; PTFE-coated aluminum sample block that holds eight 600mL tubes; phenol-free gasket; 6½' (2.0m) 3-wire cord and plug. Dimensions (lid closed): 19L × 21¾W × 13½"H (48.3 × 55.1 × 34.3cm). 230V models available; contact your Fisher Scientific Customer Service Representative for details.

REQUIRED ACCESSORIES:

- Nitrogen with maximum flowrate of 0.6cfm and a gas pressure regulator
- Pressure of 5–10psi is typical

With RS-232 Port	Electrical Reqts. †	Mfr. No.	Cat. No.	Each
No	115V 50/60Hz, 9A	7910000	**16-317-40**	11,530.00

† Excludes vacuum pump.

PARALLEL SYNTHESIS

Büchi* Syncore* System for Parallel Synthesis and Evaporation

NEW

Modular system for parallel synthesis, evaporation and sample concentration

Comprises three instruments, based on a single platform, suitable for all aspects of multiple sample processing. The Polyvap unit performs as a parallel evaporator, instantly convertible into the Analyst parallel concentrator or the Reactor parallel reaction station. (For Reactor models, see our Web site.) The field of applications includes fast parallel evaporation of multiple samples, the smooth concentration to predefined residual volumes and parallel synthesis.

The Syncore Platform provides basic functions

- Horizontal orbital movement of 0 to 10mm, with maximum rotational speed of 600 rpm, produces a strong vortex in the sample tube to prevent bumping during operation
- Heating from ambient to 150°C
- Cooling to -20°C with optional cooling plate, to -7°C with optional circulators (sold separately)
- Manually controlled temperatures, or preprogrammed temperature profiles in nine timed stages to 9 hr. 59 min. each

Polyvap: for evaporation to drynesss

- Unique parallel evaporator allows fast, safe, automatic evaporation of multiple samples
- Evaporation of high-boiling solvents like DMSO and DMF, with optional High Temperature Insulation Kit
- Interchangeable racks for 4, 6, 12, 24, 48 and 96 samples from 0.5 to 500mL
- Each rack has its own PFA-coated aluminum vacuum cover with individual vacuum connections
- Vacuum cover is heatable to 70°C to prevent condensation
- Use of inert materials–including glass, PFA-coated aluminum and PTFE–offers high chemical resistance, prevents cross-contamination
- Automatic distillations are achieved with optional Vacuum Controller V-855
- Environmentally sound operation (ISO 14000)
- Fully transparent racks in format 4 and 6

Applications

Evaporation of chromatography samples; evaporation after parallel extractions; gravimetric analyses in quality control; evaporation after parallel reactions

Analyst: for concentration to residual volumes

- Concentrate solutions in parallel to a cooled residual volume
- Racks for 4, 6 and 12 vessels
- Locally cooled appendix stops evaporation process as solvent level reaches top of cooling zone
- Sample is concentrated in a small, cooled residual volume, preventing thermal decomposition
- Achieves high recovery rates with smooth sample processing
- Vacuum covers are interchangeable with Polyvap models
- For higher recovery rates, an optional Flushback Module is available

Applications

Food, feed and environmental analysis, quality control; evaporation of temperature-sensitive compounds; procedures requiring a concentration step

ORDERING INFORMATION:

Additional models are available with dry-ice condenser and with rack formats other than those listed here. All models operate on 120V 50/60Hz, 1500w. Connections: TTL for external on/off signal; 24VDC temperature-controlled valve; 24VDC cooling water valve (0.5°C hysteresis).

Büchi* Syncore* System for Parallel Synthesis and Evaporation, Contd.

Dimensions (L x W x H): 19 x 19 x 14 in. (48.3 x 48.3 x 35.6cm).
Weight: 66 lb. (29.9kg).

Optional accessories include condensers, 1L and 2L flasks, additional rack sizes and vacuum covers, high- and low-temperature insulation kits, flushback module, vacuum controller, pumps, and chillers. Go to our Web site for details.

INCLUDES:
Polyvap Models come with S condenser for tapwater cooling, choice of racks and tubes as follows: 6-position rack with 6 tubes for 50–250mL samples; 12-position rack with 12 tubes for 5–120mL samples; 24-position rack with 50 tubes for 2–30mL samples; 48-position rack with 100 test tubes for 1–20mL samples.

Analyst Models come with S condenser for tapwater cooling, choice of racks and graduated tubes as follows: 4-position rack for 50–500mL samples; 6-position rack for 25–250mL samples; 12-position rack for 5–120mL samples.

Brinkmann*/Heidolph* Synthesis 1 Parallel Evaporation Systems

NEW

Flexible, modular, highly efficient parallel liquid and solid phase synthesis

- Solid/liquid phase synthesis and multiple evaporation with one base unit
- Exceptional visual control of reaction with circular-design reaction block
- Easy access and dismantling of interchangeable, revolving reaction blocks
- Four heating zones with individual heat control allow for different temperatures
- 1000w heater for temperatures to 160°C, 1°C; optional external chiller for cooling to -80°C
- Digital temperature display; precise temperature control sensor positioned in reaction vessel
- Additional condensation zone for refluxing of solvents
- Programmable automated temperature ramping
- Vibration frequency of 100–1000rpm, 3mm orbit
- Built-in process timer for unattended operation from 0 to 999 min.
- Electronic overtemperature protection
- Vessel design ensures optimal septa fixing
- PTFE coating of septa resists acid
- RS-232 interface for monitoring and controlling temperature, vibration frequency and pressure (with optional vacuum controller)

Synthesis 1 for Solid-Phase Synthesis

- Valved reaction vessels eliminate the use of needles
- Transparent PFA/PTFE reaction vessels are visible at all times
- Screw fittings allow access for cleaning and filter replacement
- Washing and recovery of product by vacuum filtration
- Vessels have bottom valves for draining washing solvent and product collection
- Central connection and distributor for vacuum and inert atmosphere
- Waste cube with approx. 1000mL capacity

Synthesis 1 for Liquid-Phase Synthesis

- Separate caps on reaction vessels—no counter-contamination
- Glass vessels with PTFE caps
- Easy handling of conventional glass reaction vessels with standard threads
- Base unit can be upgraded to a multiple evaporator
- Central connection and distributor for vacuum and inert atmosphere

Synthesis 1 for Multiple Evaporations

- Highest distillation rates possible due to quick heat-up time
- Reproducible results due to temperature sensor positioned in reaction vesselfor precise sample temperature reading and control
- Guard hood to ensure constant sample temperature and for added safety
- Glass vessels with PTFE caps

ORDERING INFORMATION:
Dimensions: $12\frac{3}{16}$L × $19\frac{11}{16}$"H (310 × 500mm). For 115V or 230V, 50/60Hz, 1120w. Weight, $60\frac{5}{8}$ to 63 lb. (27.5 or 28.5kg) (depending on configuration).

INCLUDES:
Base unit, reaction block and vessels as indicated in Ordering Table

REQUIRED ACCESSORIES:
Vacuum pump; Rotavac Valve Control 13-876-312; vacuum controller (Brinkmann No. 036300320); vacuum valve 13-876-314

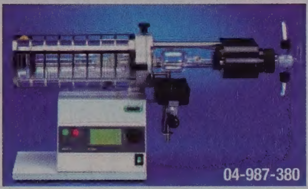
DISTILLATION OVEN

Büchi* Kugelrohr B-585 Distillation Oven

Ideal for drying, distilling, and sublimation of small-volume samples under vacuum up to 300°C



04-987-380

- Fast drying, safety, and versatility
- 10 programmable distillation profiles
- Transparent heating vessel for easy sample observation
- For small-scale distillation from 10mL to 250mL
- Small-scale evaporation vessel eliminates cross-contamination and improves reproducibility
- Stainless-steel sleeve protects glassware
- Interchangeable glassware configurations are available for specific applications
- Rotation speeds up to 50rpm for quick and careful drying
- Closed system for working under a vacuum or inert conditions
- Precise temperature regulation from 40°C to 300°C
- Reaches -70°C for freeze-drying and sublimation with accessory circulator

ORDERING INFORMATION:

Dimensions (L x W x H): $25\frac{5}{8}$ x $11\frac{13}{16}$ x $11\frac{13}{16}$" (65 x 30 x 30cm)
Optional accessories include: Conversion Kit for converting Kugelrohr to drying oven; sublimation glass tube; freeze drying tube; cold trap; condenser; cooling dish. Contact your Fisher Scientific Customer Service Representative for details.

REQUIRED ACCESSORIES:

Drying and Kugelrohr applications require vacuum pump, controller and recirculating chiller; order all separately.

EXTRACTION

SOLVENT EXTRACTION SYSTEMS

Foss* Soxtec* 2055 Manual Fat Extraction System

Handles six samples at a time with typical 80% solvent recovery

TC2055-002

For safe and fast determination of soluble material in food, feed, soil, polymers, textiles, paper, pulp, and pharmaceuticals. System combines the Soxhlet extraction technique with integral solvent handling.

- Maximum user convenience with minimum system handling—six samples at a time
- One handle moves all samples simultaneously
- Four-step extraction procedure: boiling, rinsing, recovery, pre-drying
- Separate timer functions for each extraction step make programming and procedure conveniently repeatable
- Capacity per batch, six samples
- Thimble size, 33 x 80mm, 65mL
- Maximum solvent volume per thimble, 70–90mL
- Reproducibility, ±1%
- 2L/min. tap water flow for cooling

ORDERING INFORMATION:

Electrical requirements, 115V 60Hz

INCLUDES:

System consists of extraction unit, control unit, and accessories kit containing: 18 extraction cups, cup holder, cup stand, tongs for extraction cups; 25 thimbles plus thimble support, holder, adapters, handler and stand; Viton* and butyl seals; solvent addition kit and emptying tube; manual and application notes.

COMPLIANCE:

Methods are approved by AOAC (meat) and EPA (soil)

Crude Fiber Apparatus

Six 350w heaters for 600mL beakers

09-681B

Benchtop unit for determining crude fiber in feed, food and other agricultural products as outlined in AOAC methods. Amount of crude fiber is determined by subjecting sample to simulated digestive action. Samples are boiled in acid, washed, boiled in alkali and washed again. Loss upon ignition is defined as crude fiber.

- Compression spring holds beaker rigidly between heater and condenser during digestion
- Tight seal keeps acid and alkali at constant volumes during boiling
- Complete for six samples
- Requires connection to water source

ORDERING INFORMATION:

Dimensions: 9L × $35\frac{11}{16}$W × $27\frac{3}{16}$"H (23 × 91 × 69cm). Shipping weight: 137 lb. (62kg). Base cabinet not included. For 115V 50/60Hz, 2100w. Must be wired directly to line (line cord not supplied).

INCLUDES:

Six 350w heaters; six infinite heat controls; 12 tall-form 600mL borosilicate glass beakers—six for test and six spares; six stainless-steel condensers.

3000100	**09-681B**	9380.00

Foss* Soxtec* 2045 Fat Extraction System

Designed for rapid, safe and economical extraction of solid and semisolid materials

TC2045-00

Two-place solvent extraction system for fast and safe determinations of soluble material in food, feed, soil, polymers, paper pulp, textiles. Consumes only 15mL solvent per sample (uses 60mL). Typical solvent recovery: 75%.

- Separate timer functions for each extraction step make programming and procedure conveniently repeatable
- Batch handling tools eliminate sample touching, mixing; prevent handling of hot cups or thimbles
- Designed to work with all common solvents
- Adjustable overtemperature setting ensures that ignition point never is reached for any solvent
- 65mL thimble size extends application range

INCLUDES:

2045 Extraction Unit, 2046 Control Unit, one Food/Agri routine accessories kit comprising extraction cups (1 set of 2), cup holder, thimbles (set of 25), thimble adapters (1 set of 6), thimble stand, seals in Viton* and butyl; manual and Application Note AN 301.

COMPLIANCE:

Meets requirements for AOAC 991.36 (meat), AOAC 2003.05, 2003.06 (feed), SCAN-CM 49:93 (paper/pulp), EPA method 3541 (PAH in soil).

CERTIFICATIONS:

Foss SoxCap* 2047 Hydrolysis Unit

Performs hydrolysis, filtration, and washing of food and feed samples without any sample transfer

TC2047-002

A simple, economical, reliable method for acid hydrolysis of food and feed samples, prior to the solvent extraction step of total fat analysis. Used in tandem with the Soxtec* 2045, 2050, or 2055 extraction system to provide results in agreement with official procedures.

Sample is weighed into a SoxCap glass capsule and kept there throughout the hydrolysis/filtration/washing process. After hydrolysis, the capsule is turned upside down, fitted with a cellulose thimble, and placed in a Soxtec for the solvent extraction step. The unique design of the SoxCap filter holds the fat present in the sample during hydrolysis and releases it during solvent extraction.

- Sample size: 0.5–3g
- Measuring range: 0.1–100%
- Capacity: six samples simultaneously, up to 36 analyses/day
- No pre-extraction step required
- Minimum manual handling using batch handling tools
- ID numbers ensure no mixing up of samples
- Fast filtration and washing of samples
- Improved measurement precision and faster analysis
- No contact with hot acid during hydrolysis, filtration, and washing
- Fumes removed automatically during hydrolysis
- Compact system requires only a small bench space
- Minimum use of Celite* with liquid samples

ORDERING INFORMATION: Dimensions: 4¼L × 7⅜W × 11¾"H (11 × 19 × 30cm). For 115V 50/60Hz.

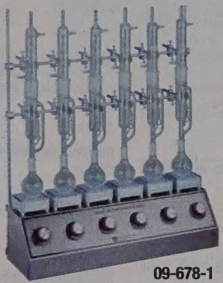
INCLUDES:
Ceramic Hotplate 2022, condenser holder with valve plate, condenser, hydrolysis beaker, beaker, boiling stand, capsule tray (set of 2), drying stand, glass capsules (2 sets of 6), filters (set of 100), thimbles (set of 25), adapters (set of 6), cotton, water aspirator, user manual

NOTE:
Two water taps are needed.

Model	Cat. No.	Each
2047	**TC2047-002**	5000.00

Thermo Scientific* Lab-Line* Multi-Unit Extraction Heater

Ideal for extractions, distillations, and digestions



09-678-1

- Temperature range from 40° to 300°C
- Six individual, independent heating controls
- Allows heating of samples at different temperatures simultaneously
- Individual pilot lights indicate when heaters are in operation
- Aluminum hotplates are 4½L × 4½"W with 300w heating elements
- Heaters are elevated on a perforated support for ventilation
- Inclined control panel mounted on stainless-steel housing

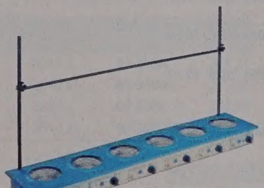
ORDERING INFORMATION:
Dimensions: 30L × 11D × 9"H (76 × 28 × 23cm). Shipping weight: 40 lb. (18kg). 120V; unit must be hardwired to power source.

INCLUDES:
Built-in sample-holding extraction rack, two 30" (76cm) horizontal rods, and two 36" (91cm) vertical frame rods. Equipped with 12 extraction clamps and clamp holders.

Mfr. No.	Cat. No.	Each
5000	**09-678-1**	3248.00

Thermo Scientific* Electrothermal* Individually Controlled Soxhlet Apparatus Heaters

Individual heating of up to three or six samples



09-682-11

Allow liquids with different boiling points to be heated side-by-side. Choice of three- or six-place models with capacities to 1000mL. Set temperature for each sample using individual solid-state controller in front of each heating recess; calibrate with thermometer (not supplied).

- Stainless-steel safety screen in each recess, grounded directly to supply cable—protects against electrical shock if flasks break or liquids spill
- Clear indicator light shows "Power On"
- Individual amber lights indicate "Heater On"
- External surfaces are PTFE-coated and chemical resistant
- Fitted with brackets to accept support rods ½" (13mm) in diameter

INCLUDES:
Three vertical rods supplied with three-place models; one horizontal and two vertical rods supplied with six-place models.

Kontes* Concentrators with Graduated Tubes

Graduated concentrator tubes in hooked models (with formed hooks on glassware for attachment via supplied springs) and hookless versions (for attachment using the polyacetal clamps included).

- ₸ 19/22 joints
- Graduations from 0 to 1mL in 0.1mL divisions and from 2 to 10mL in 1mL divisions
- All have three-chamber column
- Flasks have ₸ 24/40 top, bottom taper to fit concentrator tube supplied
- Tube capacity, 10mL

INCLUDES:

250 or 500mL flask

Kontes* Soxhlet/Dean-Stark Apparatus with Allihn Condenser

Avoid analyte loss and sample contamination

- Combines Soxhlet extraction and Dean-Stark azeotropic distillation into a single process for the removal of water, chlorinated dibenzo-p-dioxins (CDDs), and chlorinated dibenzofurans (CDFs) from the same wet particulate sample
- Does not require desiccation prior to Soxhlet extraction, so loss of analytes and sample contamination are avoided

REQUIRED ACCESSORIES:

Complete assembly requires Cat. No. K586500-0023 or -0233 fritted glass extraction thimble (order separately online).

Saint-Gobain Alundum* Extraction Thimbles

Wash, ignite, and use repeatedly

- Used for all kinds of extractions except strong alkalis
- Alundum AN889 thimbles (Series 09-660) have medium porosity, retain particles approximately 5µm and larger
- Alundum AN485 thimbles (Series 09-661) have coarse porosity for faster extraction, less retentivity; retain particles approximately 20µm and larger
- 34 and 45mm diameter thimbles in each series have round bottoms; all other sizes have flat bottoms

09-660A

†With round bottoms.

Whatman* Extraction Thimbles

For use in Soxhlet extraction units

Pure Cellulose Thimbles

- Made from pure cotton cellulose under controlled conditions
- For extraction of pesticides from environmental samples, fat analysis in the food industry and supercritical fluid extraction (SFE)
- Single-thickness thimbles have wall thickness of approximately 1mm
- Double-thickness thimbles have 2mm walls

Borosilicate Glass Thimbles

- For high-temperature extractions up to 550°C (1022°F)
- Also for using solvents incompatible with cellulose thimbles

New Brunswick BioFlo* 110 Fermentor/Bioreactor

Compact, flexible modular systems for fermentation and cell culture applications

Available as ready-to-use kits or as individual components. Can be assembled with desired features only, then expanded as application needs change.

Components

- **Primary Control Unit (PCU)**, an easy-to-use, 32-loop controller with a bright display, supports from one to four vessels and provides the interface for all control functions; readouts in English, French, German or Spanish
- **Power Controller** supports temperature and agitation control and has five controlled power outlets for optional pumps
- **Vessel Assemblies** are available either nonjacketed or water jacketed
- Choice of fermentation or cell-culture kits, preconfigured with the most commonly required components for growing cultures

Advanced Fermentation Kits

- **With nonjacketed vessel and heater blanket**
  - Include PCU, power controller, immersed cooling coil and one complete nonjacketed fermentation vessel assembly
  - Also includes components for foam, pH, and DO control
  - Accessories (most sold separately) include pH/DO controller; pH/DO probes; levels/foam controller; foam probe kit; four-pump module; 25' (7.6m) silicone tubing; triport adapter; septum kit; exhaust condenser; sterile sampling kit; nutrient addition tube; cooling water tubing; acid base and antifoam addition bottles; cables; and adapters
- **With water-jacketed vessel**
  - Include everything supplied in the nonjacketed vessel kit except nonjacketed vessel, heater blanket, cooling coil, and cooling water tubing
  - Also includes water-jacketed vessel with dished base and water-jacketed temperature controller

Basic Fermentation Kits

- Include PCU, power controller, immersed cooling coil, and one complete nonjacketed fermentation vessel assembly

Advanced Cell Culture Kits

- **With water-jacketed vessel**
  - Include all components as supplied in the nonjacketed vessel kit, except nonjacketed vessel, heater blanket, cooling coil, and cooling water tubing
  - Also include water-jacketed vessel and water-jacketed temperature controller
  - Available with 30–300rpm magnetic or direct-drive agitation systems

ORDERING INFORMATION:

Electrical requirements for all kits: 100 to 120V; individual components available separately online.

INCLUDES:

Various controllers, one vessel, probes, accessories (for details, see individual descriptions)

Water-jacketed vessel with heater and two additional reagent bottles with tubes.

Typical fermentor control stack (middle) includes (top to bottom) PCU, levels/foam controller, pH/DO controller, and power controller. Shown with water-jacketed vessel (left) and nonjacketed vessel (right).

FILTRATION

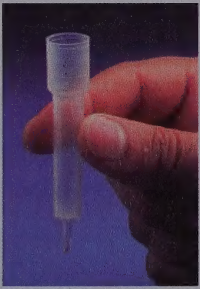
BOTTLE-TOP AND FILTER UNITS

*Fisherbrand** Disposable Filter Columns

Disposable polypropylene columns effectively filter out interfering materials from blood serum or urine

For SMA* Systems

- Save time and money
- Help eliminate inaccurate readings
- To use, just hold screening column over sample cup
- Decant directly through the column into sample cups—no pipetting
- Filters 200 to 300µm
- When filtration is complete, discard column
- Sample is ready for analysis
- Columns are graduated in 0.5mL divisions



11-387-50

For SMAC*, SMA Systems

- Serum filter column for final filtration directly into sample cups for Technicon* 6/60*, 12/60*, and SMAC analyzers
- Large flow channel and less capillarity let all the sample through
- Filters particles as small as 40 to 50µm
- Helps reduce line clogging

Cat. No.	Case of
11-387-50	1000/194.66

Millipore* Stericup* Sterile Vacuum Filter Units

No-tip design for improved stability during filtration—ideal for laminar flow hood use

From left to right: front, SCGP-U05-RE, SCVP-U02-RE, SCGP-U01-RE; back, SCGP-U11-RE, SCGP-U10-RE

- NEW — Stem Cell Tested 0.22µm pore size
- Gamma radiation sterilized
- Tapered flasks are easy to grip; with recessed bottom for easy stacking and storage of capped flasks
- Filter with 0.10µm membrane (SCVP U02 RE) is ideal for removing mycoplasma
- Small tab secures prefilter in place during filtration (order prefilters separately.)
- Millipore Express* Plus polyethersulfone (PES) for fast-flow, low protein binding sterilization of aqueous solutions
- Durapore polyvinylidene fluoride (PVDF) for lowest protein binding sterilization/clarification of biological solutions

ORDERING INFORMATION:

Filter diameter: 73mm.

INCLUDES:

Steritop* bottle-top filter unit with a graduated, polystyrene receiving flask for storing volumes of 150, 250, 500 and 1000mL.

Millipore* Steritop* Sterile Vacuum Bottle-Top Filters

With large 73mm diameter filter for faster filtration

SCGV-T10-RE, SCGP-S01-RE, -S02-RE

- NEW — Stem Cell Tested 0.22µm pore size
- Graduated polystyrene funnels available in 150, 250, 500 and 1000mL capacities to fit 33 and 45mm glass bottle neck sizes
- Recessed funnel threads maintain sterility
- Gamma radiation sterilized
- Without receiver bottles
- Millipore Express* Plus polyethersulfone (PES) membrane for fast flow and low protein binding (0.1µm PES membrane is also useful for removing mycoplasma)
- Durapore* polyvinylidene fluoride (PVDF) membrane for lowest protein binding

Millipore* Steriflip* Sterile Disposable Vacuum Filter Units

Performance and convenience all in one

SCGP 005 25

Attach the Steriflip unit to a 50mL centrifuge tube containing the sample, flip it over, apply vacuum, then collect filtrate in the supplied 50mL centrifuge (filtrate) tube.

- Gamma radiation sterilized
- Choose from PES, PVDF, or nylon membranes with a variety of pore sizes
- Millipore Express* polyethersulfone (PES) membrane provides fast flow and low protein binding
- Durapore* (PVDF) membrane, with very low protein binding, is used for filtration of buffers with DMSO, and retrovirus filtration
- Nylon net filter is used for cell suspension and cell separation
- Use the 0.1 or 0.22µm membranes to sterilize tissue culture media, microbiological media, and other biological solutions

ORDERING INFORMATION:

Filter diameter: 40mm

INCLUDES:

Filter, graduated 50mL centrifuge tube, tube cap, and stand

Pore Size	Membrane Material	Cat. No.	Pack of 25
0.1µm	PES	**SE1M 005 M00**	135.00
0.22µm	PES	**SCGP 005 25**	123.00

100µm	Nylon	**SE1M 002 M8**	139.00

Millipore* Stericap* Sterile Bottle-Top Filter Unit

Dual-mode (vacuum/pressure) unit can filter up to 2000mL into your receiver bottle or flask

Disposable system sterilizes hard-to-filter tissue culture media and other biological solutions into any type of container.

- Easy to set up and convenient to use
- Compact design saves storage space
- Uses Millipore Express* polyethersulfone (PES) 0.22µm membrane for fast flow and low protein binding
- Gamma radiation-sterilized

SVGP V10 24

- Inlet: female Luer-Lok* with upstream vent
- Universal bottle-top outlet fits all bottles; held by suction
- Can be used with peristaltic pump or vacuum source
- Membrane is housed in Eastar* polyester; universal adapter/base is ABS plastic; vacuum port adapter is polyethylene

ORDERING INFORMATION:

Filter is a 10cm² rectangle.

INCLUDES:

24 individually wrapped sterile filter units and two tube sets.

Pore Size	Membrane	Cat. No.	Pack of 24
0.22µm	PES	**SVGP V10 24**	182.68

Millipore* Stericap* PLUS Sterile Bottle-Top Filter Device

For ultrafast, aseptic sterilization of 5 to 10L using vacuum filtration

SCGP CAP RE

Millipore Express* PLUS polyethersulfone (PES) membrane is fast flowing, high throughput and low protein binding.

- Noncytotoxic, nonpyrogenic
- Provides fast filtration of even viscous solutions without the need for a prefilter
- Fits wide range of containers
- Can be used to fill any vacuum-rated bottle or other container with inner neck diameter of 20 to 67mm
- Fluid is drawn directly from feed container, eliminating need to keep pouring into a funnel
- Fluid is filtered directly into desired container, eliminating transfer steps and minimizing risk of contamination
- Compact design saves lab space

APPLICATIONS: Ideal for sterilization of tissue culture media, serum, buffers, or other biological solutions.

Pore Size	Membrane	Cat. No.	Pack of 10
0.22µm	PES	**SCGP CAP RE**	133.50

SPECIFICATIONS

Filtration Capacity	5-10L (of typical cell culture media)
Filtration Area	40cm²
Sterilization	Gamma irradiated
Storage Temperature	-30 to +45°C (-22 to +113°F)
Max. Operating Vacuum	25" Hg
Membrane	Millipore Express PLUS, polyethersulfone, 0.22µm
Materials	Dome: clear styrene Tube: silicone Vacuum adapter: high-density polyethylene

ACCESSORIES

Replacement Receiver Flasks. 45mm neck with screw-top lid.

Description	Cat. No.	Pack of
1L Sterile Receiver Flask	**SC00 B10 RE**	12/70.00

Millipore* Sterifil* 47mm Aseptic Vacuum Filter System and Holder

Closed unit for particulate or biological contamination analysis

- Protects sample and filtrate from environmental contamination
- Capacity: 250mL (funnel and receiver flask)
- Holder and funnel available separately (without receiver flask and cover) to use with standard 1L vacuum filtering flask or multiple-place manifold
- Polysulfone funnel, funnel cover, receiver flask and cover
- Polypropylene holder base and filter support screen
- Silicone stopper and O-ring

Millipore* Sterivex* Sterile Pressure-Driven Devices

Sterile filtration and clarification of solutions with volumes of 100 to 2000mL

Minimize contamination risk to filtered solution by direct-dispensing design.

- Driven by syringe, peristaltic pump, or pressure vessel
- Self-venting prevents air locking that slows filtration
- Ready-to-use units filter solutions with volumes 100 to 2000mL
- Housings made of Eastar* co-polyester
- Units are 100% integrity tested, individually packaged, and radiation sterilized
- With female Luer-Lok* inlet and male nipple, male Luer-Lok, or filling bell outlet
- **Millipore Express* PES (polyethersulfone) membrane**—for fast flow, low protein binding sterilization of aqueous solutions
- **Durapore* PVDF membrane**—for lowest protein binding sterilization/clarification of biological solutions
- **MF-Millipore* MCE (mixed cellulose) membrane**—for sterilization/clarification of water, buffers, and salt solutions

TYPICAL CHARACTERISTICS

Volume	100–2000mL
Effective Filtration Area	10cm²
Filter Hold-up Volume (after Air Purge)	≤200µL
Pressure Limit	45psi
Temperature Limit	45°C (113°F)

Millipore* Millex*-GP 50mm Sterile Filter Unit

Fast filtration with low protein binding

Filter up to 4L of tissue culture media and additives, protein solutions, virus suspensions, DNA and other aqueous solutions.

- Pore size: 0.22µm
- Effective filtration area of 19.6cm²
- Hold-up volume after air purge ≤1000µL
- Pressure limit is 3.5 bar (50psi) and temperature limit is 45°C (113°F)
- Pyrogenicity ≤0.5EU/mL
- Millipore Express* PLUS PES (surface-modified polyethersulfone) membrane filters quickly and reliably with low protein binding

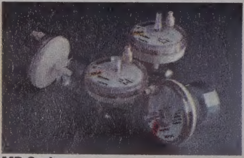
Outlet Type	Cat. No.	Pack of 10
Filling bell	**SLGP B50 10**	122.46
Stepped hose barb with female Luer slip interior	**SLGP 050 10**	99.50

SLGP 050 10

Millipore* Millipak* Disposable Filter Units

Pump-driven filter units designed for the removal of particles and microorganisms from liquids and gases

Unique, stacked-disc design allows minimal hold-up volume and eliminates the particle-generating, woven, downstream support found in pleated cartridges.



MP Series

- Sterile filtration of parenterals, diagnostics, buffers, media, and biologicals
- Point-of-use filter for high-purity water
- Ideally suited for high value-added applications
- Durapore* PVDF membranes provide high flowrates and throughputs, low extractables, broad chemical compatibility, and the lowest protein binding of any membrane available
- Three different stack sizes allow optimum flexibility for easy scale-up and system sizing
- Presterilized units are gamma irradiated
- Autoclavable up to three times
- Each unit is labeled with catalog number, lot number, pore size and serial number
- 100% integrity tested to guarantee integrity

Filter	**Millipak**
Medium	Durapore PVDF
Applications	Removal of particles and microorganisms from liquids and gases
Filter Area	100, 200, and 300cm²
Pore Size	0.1, 0.22, and 0.45µm
Housing	Polycarbonate
Max. Inlet Pressure	5.2 bar (75psig) at 25°C
Max. Differential Pressure	Forward: 4.1 bar (60psid) at 25°C; 1.7 (25) at 80°C; 0.35 (5) at 123°C. Reverse: 0.7 bar (10psid) at 25°C.
Bacterial Retention (0.1, 0.22µm)	Quantitative retention of *Brevundimonas diminuta* (ATCC* 19146) following ASTM* F838-83 methodology at a minimum challenge level of 10^7 CFU/cm²

Millipore* Sterivac* Sterile Vacuum-Driven Filter Units

Fast flow without protein loss

Filter up to 20L of tissue culture media, additives or other aqueous solutions directly into receiver flasks at rates as high as 1.6L/min. without loss of protein.

SKVP-M20-RJ

- Start/stop filtration valve for easy bottle transfers
- Vent valve prevents air locking
- Universal cap fits all bottle sizes
- High speed and throughput into any vacuum-rated receiver flask
- Millipore Express* PES membranes feature high flow, low protein binding
- Pyrogenicity ≤0.5EU/mL
- Filtration areas: 83cm² (10L unit) and 166cm² (20L unit)
- Polyethylene housing
- Inlet is ¼" tube adapter for vacuum, sample feed
- Operable over temperature range of 4° to 50°C (39° to 122°F)
- Sterilized by gamma radiation

Volume	Pore Size	Cat. No.	Pack of 5
<15L	0.10µm	**SKVP M20 RJ**	231.00
<10L	0.22µm	**SKGP M10 RJ**	162.00
<20L	0.22µm	**SKGP M20 RJ**	208.00

Millipore* Steripak*-GP Sterile Filter Unit

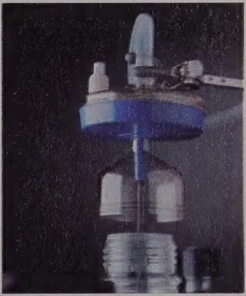
Fast flow and high throughput

Disposable bottle-top filter units designed for larger-scale, pressure-driven filtration of tissue culture media with or without serum.

- Easily connect to vacuum pump or pressure vessel
- Utilize low protein binding, fast-flow Millipore Express* polyethersulfone (PES) membranes
- Filter up to 20L
- Sterile

INCLUDES:

6mm (¼") stepped hose barb inlet, 6mm (¼") stepped hose barb outlet and filling bell.



SPGP M10 RJ

Volume	Pore Size	Cat. No.	Pack of 3
<10L	0.22µm	**SPGP M10 RJ**	96.00
<20L	0.22µm	**SPGP M20 RJ**	135.00

Corning* Disposable Sterile Filter Systems

Secure handling, easy-grip sides, stable profile minimize risk of tipping

09-761 Series

The receiver easily unscrews from unit, and can be sealed with a plug cap (supplied sterile and individually packaged) for filtrate storage.

- Radiation sterilized and certified nonpyrogenic
- Angled hose connector simplifies vacuum line attachment
- Receiver bottles feature easy-grip sides for improved handling
- Units are color coded by membrane type and labeled with both membrane material and pore size
- All membrane types are tissue culture compatible, and heat-sealed to the support grid to maximize flowrate, and reduce foaming and protein denaturization
- NYL, CN and PES membranes are detergent-free
- Ideal for filtration of tissue culture media and components, biological fluids, other solutions
- Models with 150 or 250mL funnel contain 50mm diameter filters; 500mL funnel contains 70mm filters; 1000mL funnel contains 90mm filters

Membrane Types

- Cellulose acetate (CA)—For low protein binding
- Nylon (NYL)—For low extractables
- Cellulose nitrate (CN)—For general-purpose filtration
- Polyethersulfone (PES)—For fast flowrates and low protein binding

INCLUDES:

Membrane filter, graduated funnel and receiver of clear polystyrene; polyethylene neck adapter

NOTE:

Not for parenteral use.

Corning* Disposable Sterile Bottle-Top Filters

Vacuum filtration units fit standard threaded bottle tops

09-761 Series Funnels

Designed for use on glass or polystyrene media bottles.

- Attach to most popular 33 and 45mm diameter bottles with standard GPI threads
- Systems are individually packaged, gamma radiation sterilized and certified nonpyrogenic
- Color coded by membrane type and labeled as to both membrane material and pore size
- Choice of membrane media: Cellulose acetate (CA) for low protein binding; Nylon (NYL) for low extractables; or polyethersulfone (PES) for fast flowrates and low protein binding
- Tissue culture compatible
- Heat-sealed to the support grid to maximize flowrate and reduce foaming and protein denaturization

APPLICATIONS:

Ideal for filtration of tissue culture media and components, biological fluids, other solutions.

ORDERING INFORMATION:

Units with 150mL funnels contain 50mm diameter filters; 500mL funnels contain 70mm filters; 1000mL funnels contain 90mm filters.

INCLUDES:

Membrane filter, graduated funnel of clear polystyrene with polyethylene neck adapter, and tubing adapter that fits most vacuum hoses

NOTE:

Not for parenteral use.

Corning* Disposable Sterile Bottles

Use as replacement receivers for Corning Disposable Sterile Filter Systems or as storage bottles

- Durable polystyrene bottles
- Neck size: 45mm
- Easy-to-read graduations
- With sterile caps
- Can also be used as receivers for Corning Disposable Bottle-top Filters

09-761-4, -140, -11, -10

Capacity	Grad. Range/Interval	Mfr. No.	Cat. No.	Case of 24
150mL	25 to 150mL/25mL	431175	**09-761-140**	63.31
250mL	50 to 250mL/25mL	430281	**09-761-4**	65.80
500mL	100 to 500mL/50mL	430282	**09-761-10**	92.41
1000mL	100 to 1000mL/50mL	430518	**09-761-11**	130.40

Costar* Disposable Sterile Storage Bottles

Ideal for storing media, buffers, and other aqueous solutions

Medical-grade polystyrene bottles available in 125, 250, 500, and 1000mL volumes.

- With 45mm neck
- Nonpyrogenic
- Individually wrapped with phenolic cap

07-200-420, -450, -446, -448

ACCESSORIES

Corning* Fiberglass Prefilters

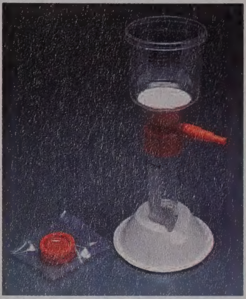
For use in Corning* bottle top and vacuum filtration systems.

For	Diameter	Cat. No.	Pack of
150 and 250mL filter funnels	50mm	**07-200-862**	96/54.87
500mL filter funnels	70mm	**07-200-861**	96/64.75
1000mL filter funnels	90mm	**07-200-860**	96/82.31

Corning* Mini-Miser Sterile Filter-Top Tube

Viewing slot in base lets you measure volumes as small as 5mL

Saves time and minimizes costs and error by letting you filter samples directly into a centrifuge tube.



09-761-34

- 150mL Funnel with filter membrane attached to a 50mL centrifuge tube
- Eliminates open-air liquid transfer step and extra storage vessels
- Smaller volumes mean less media waste
- Funnel is made of clear polystyrene
- Centrifuge tube is polypropylene, with easy-to-read graduations
- Filter membranes are low protein binding cellulose acetate
- Side arm tubulation fitting permits use with differential pressure of 5 to 10psi

INCLUDES:

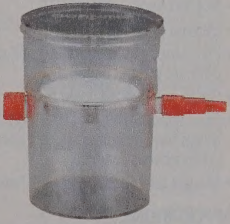
Sterile plug-seal cap to maintain sterility after filtering and two reusable stands with each case, to keep the tube stable and minimize mess.

Pore Size	Mfr. No.	Cat. No.	Case of 12
0.22µm	430320	**09-761-34**	63.28
0.45µm	430314	**09-761-35**	63.28

Corning* Disposable 115mL Sterile Vacuum Filter Unit

Features low center of gravity and wide base for stability

- No-mess pour spout saves time and makes sample transfer easier
- Eliminates need to detach tubing to empty filtered media, decreasing chance of sample contamination
- Porosity is clearly labeled on each unit
- Certified nonpyrogenic
- Cellulose acetate (CA) membrane for low protein binding
- Available in 0.22 (for sterilizing) or 0.45µm (for clarifying) pore sizes



09-761-94B

INCLUDES:

60mm diameter membrane

Pore Size	Membrane	Mfr. No.	Cat. No.	Case of 24
0.22µm	CA	430944	**09-761-94B**	129.04
0.45µm	CA	430945	**09-761-95B**	129.04

Nalgene* 50mL Sterile Conical Tube Filter Unit

Offers fast flowrate and low protein binding

Conical tube filter unit with Pall* Supor* machV PES membrane. Excellent choice for small-volume tissue culture work. Perfect for fast, clean, convenient filtration of 20 to 50mL of media or buffers.

- Fast flowrate membrane
- Low protein binding
- Noncytotoxic, nonpyrogenic
- Radiation sterilized
- Unit comes assembled with sterile closure

INCLUDES:
Two reusable stands

CERTIFICATIONS:
Nalgene certified.

NEW

09-741-88

Pore Size	Mfr. No.	Cat. No.	Case of
0.2µm	564-0020	**09-741-88**	12/60.20

Nalgene* MF75* Series Disposable Sterilization Filter Units

Triton*-free membranes to avoid cytotoxic effects, allow excellent flowrates

Graduated upper chamber with nonfiber-plugged side arm and quick-disconnect tubing adapter separate from graduated receiver for easy access to filtrate.

- White 50 and 75mm diameter cellulose nitrate (CN) membranes
- CN general-purpose membrane
- Ergonomic shape
- All-in-one filter
- 75mm diameter membranes yield faster flows
- Top and bottom chambers made of clear polystyrene
- Nonpyrogenic
- Gamma radiation sterilized
- Pore size, membrane type, catalog number, lot number and expiration date are printed on units
- Green color-coded collar (except 115mL sizes)
- Filter units 09-740, 09-740-5, and -10 feature a porous support plate; all others have a padless support plate to minimize foaming of proteinaceous solutions
- Models 09-740-36K and -36L have low-profile design for extra stability

09-740-1A

APPLICATIONS:
Ideal for vacuum filtration and single-use biological work requiring sterile filtration, prefiltration or clarification of aqueous solutions in the lab or field.

ORDERING INFORMATION:
Individually wrapped. Side arm is on receiver of 115mL size. All units have a five-year sterile shelf life.

INCLUDES:
50 or 75mm diameter membrane, polyethylene adapter, and quick-disconnect tubing adapter. Each pack of 500 and 1000mL units includes 12 glass fiber prefilters. All sizes except 115mL supplied with sterile polyethylene leakproof closure that lets you use the receiver for filtrate storage (See definition of "leakproof" on next page).

† Membrane support plate is green on 09-740, 09-740-5 and -10; clear on 09-740-36K and -36L
‡ 09-740-36K and -36L have low-profile design to impede tip-over.

Nalgene* MF75* Series Sterile Disposable Tissue Culture Filter Units

All-in-one units specially designed for cell tissue culture work

09-740-32

- Filters are available in three different membranes, each in 50, 75 and 90mm sizes
- Upper chamber separates from receiver for easy access to filtrate
- 1½-turn sterile polyethylene leakproof[†] screw closure eliminates pH shift in receiver
- Receiver is an ideal filtrate storage vessel
- Upper chamber of filter units is clearly marked with pore size, membrane type, catalog number, lot number and expiration date (except 115mL size)
- Padless membrane support minimizes foaming of proteinaceous samples
- Nonpyrogenic
- Units are color coded: with PES membrane, blue; with SFCA membrane, yellow; with nylon membrane, red
- Gamma radiation sterilized
- Individually wrapped for a five-year sterile shelf life

Polyethersulfone (PES) Membrane

- Offers fast flowrate and lowest protein binding
- Naturally hydrophilic
- Low extractables and better chemical resistance than acetate or nitrate membranes
- 0.2µm units feature the new Supor* mach V (aPES) membranes

Surfactant-free Cellulose Acetate (SFCA) Membrane

- Offers low protein binding
- Has no wetting agents that might affect sensitive cell culture lines
- Cleaner than an ordinary CA membrane for tissue culture use

Nylon (NYL) Membrane

- Low extractables and naturally hydrophilic
- Contains no wetting agents and is alcohol resistant

115mL Sizes

- Graduated upper chamber only (no collar)
- Expiration date printed in the color code on the side of each unit
- Padless membrane supports not included

INCLUDES:

Polystyrene cover; graduated upper chamber and receiver (except 115mL size); integral membrane filter; cellulosic-plugged side arm; quick-disconnect tubing adapter; color-coded collar. Each case of 500 and 1000mL units includes 12 glass fiber prefilters.

[†] *Except 115mL sizes. For definition of "leakproof," see below*

[‡] *Upper chamber capacity, 500mL*

[†] Nalgene assigns the term "leakproof": a) To bottle/closure systems with closures smaller than 100mm, after they are filled with water, inverted, withstand air pressure of 2psig for 2 minutes, and no water escapes;. b) To bottle/closure systems of 100 or 120mm after they are filled with water, inverted for 15 minutes, and no water escapes. **Note:** these tests, using other liquids, may not yield the same results. To ensure safe usage, Nalgene advises customers to test Nalgene bottles and closures under conditions of their planned applications. Nalgene bottles and carboys are leakproof at ambient temperature and pressure when used with their Nalgene closures.

Nalgene* MF75* Series Sterile Disposable Bottle-Top Filters

Presterilized, disposable tissue culture filters

Fit standard media bottles; allow vacuum filtration directly into sterile bottles.

- All filters are marked with catalog number, membrane type and pore size, lot number and expiration date
- Gamma radiation sterilized
- Individually wrapped for five-year sterile shelf life
- Noncytotoxic and nonpyrogenic
- Easy-open bag minimizes possibility of accidental contamination before use

Clockwise from top: 09-740-47C, 09-741-06, 09-740-22F, 09-740-22K.

Polyethersulfone (PES) membranes

- High flowrates, lower protein binding and lower extractables than cellulosic and nylon membranes
- Blue collar
- Come in 150, 500 and 1000mL funnel sizes
- 0.2µm units feature the new Supor* mach V (aPES) membranes

Surfactant-free cellulose acetate membranes (SFCA)

- Low protein binding, excellent flowrates, little or no loss of specific proteins
- No wetting agents to affect sensitive cell culture lines
- Yellow collar
- Come in 150, 500 and 1000mL funnel capacities

INCLUDES:

Polystyrene graduated chamber; color-coded collar with cellulosic vent plug side arm and quick-disconnect tubing adapter; 50, 75, or 90mm diameter membranes; bottom screw threads for attachment to bottles with 33-430 or 45mm neck sizes.

Nalgene* MF75* Series Sterile Filter Unit Receivers

Guaranteed leakproof† closure system

Use as receivers for Nalgene Bottle-Top Filters, or as replacements or extra receptacles for Nalgene Tissue Culture and Sterilization Filter Units.

- Headspace allows for extra serum or other additives to be added to the filtrate
- Can also be used as handy sterile single-use storage containers
- Polystyrene with 1½-turn polyethylene leakproof† screw closures to eliminate pH shift in receiver
- Units feature an easy-to-use, ergonomic shape and are nontoxic
- Sterilized by gamma radiation
- Nonpyrogenic
- Five-year sterile shelf life

Clockwise from top: 09-740-25F, -25E, -25D, -25C.

Visit www.fishersci.com and search for Syringe Filters

Nalgene* Reusable Nonsterile Filter Holders

Versatile system is ideal for field work

Left to right: 09-740-23E, -23A, -23D

Made of durable, transparent polysulfone, these versatile filter holders eliminate the need for a manifold or breakable glass vacuum flask.

- Graduated receiver
- Two side arms allow connection to vacuum line
- Accept ¼ to 5⁄16" I.D. (6.4 to 8mm) vacuum tubing
- Also accept syringe filters
- Fully autoclavable, with or without membranes in place
- Upper chamber is designed for pressure or vacuum filtration
- Independent locking rings seal upper chamber to receiver without damaging membrane
- Chamber accommodates 47mm membrane (not included) and has three ports for venting (with or without syringe filters) and aseptic addition of samples
- Ports also can be attached to a pressure source
- Upper chamber is supplied with two membrane support plates: a sterilization plate and an analytical plate

Sterilization plate (one-piece, clear)

- Provides maximum flowrate and throughput
- Suitable for cold sterilization or clarification of culture media, reagents or solvents that are compatible with holder and membrane materials
- Nominal filter area, 13.3cm^2

Analytical plate (two-piece, white)

- Provides optimal membrane support and keeps membrane flat to facilitate analytical procedures
- Suitable for analysis of particulates and biological contaminants, or any microbiological analyses using the membrane filter technique
- Nominal filter area, 11.3cm^2

INCLUDES:

Complete upper chamber, receiver, polypropylene cover and TPE port caps. (Membranes not included.)

Capacity

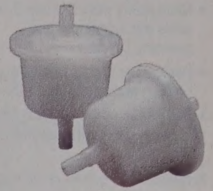
CAPSULES/INLINE FILTERS

Millipore* Groundwater Sampling Capsules

Large surface area and high-throughput membrane



GWSC 045 01 and GWSC 100 01

Ensures that the capsules filter faster, more efficiently, and require fewer change-outs than other filters

- Disposable collection filters for sampling groundwater prior to dissolved metals analysis
- Low-extractable materials minimize background in sample analysis
- Ready to use with membrane filter in place—there is nothing to assemble or clean up
- 600cm^2 pleated membrane filter
- Unique pore structure enhances the filter's flow mechanics

Choose from three pore sizes:

- 0.45µm samples relatively clean water
- 1.0µm samples normal particulate loads
- 5.0µm samples water with very high particulate levels

INCLUDES:

Certificate showing lowest detectable level (LDL) analyses for a broad range of metals.

COMPLIANCE:

Certified for 67 metals and two anions; meet U.S. EPA filtration requirements for 0.45µm filtration.

Pore Size	Cat. No.	Pack of
0.45µm	**GWSC 045 01**	1/27.00

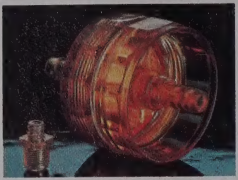
SPECIFICATIONS

Effective Filtration Area	600cm^2
Inlet/Outlet Connections	⅛" NPTM with ⅜" stepped hose adapter
Maximum Inlet Pressure	60psi
Sterilization	Nonsterile
Autoclavable	Yes

Nalgene* Reusable Inline Filter Holder

For 47 or 50mm diameter filters



09-748

- Made of tough, transparent polysulfone
- Biologically inert silicone O-ring seals the membrane and prevents bypass
- Removable tubing connectors on both ends fit ⅜" I.D. tubing
- Bell-shaped base protects filtrate from outside contamination during flow
- Holder can be used as an aseptic filling bell
- Length (including tubing connector) × diameter: 3⅞ × 2⅝" (10 × 6.5cm)
- Autoclavable

APPLICATIONS:

Designed for inline filtration of liquids or gases and for sampling to detect microbial contamination in production lines

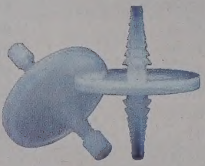
INCLUDES:

Attachable locking Luer fitting for use with syringe.

Mfr. No.	Cat. No.	Each
DS0330-4000	**09-748**	91.20

Millipore* Millex* Vacuum Line Protection and Tank/Bioreactor Venting Filter Units

Protect vacuum sources from contamination and moisture damage



SLFG 850 10 and SLFG 025 LS

- With hydrophobic PTFE membranes
- Polypropylene housing (except for SLFG-025-LS and -50, which have PVC housing)
- Variety of inlet/outlet combinations, including stepped hose barb and ⅛ NPT
- Sterilize ambient air entering fermenters
- Filter incubator gas to protect against contamination
- Filter nitrogen and air used to dry liquid samples
- Nonsterile, autoclavable, bidirectional

Pore Size	Diameter	Cat. No.	Pack of

† *Sterile pack.*

Millipore* Aervent-50 Disposable Filters

Sterilizing-grade filters designed for critical small-scale gas line and air venting applications

MTGR Series

With hydrophobic Aervent membrane. Ideal for sterile venting of vessels and carboys, low-volume filtration of nonaqueous fluids, and small fermenter inlet and exhaust gas filtration. Also used for autoclave vacuum break lines.

- 50mm PTFE membrane
  - Hydrophobic
  - High flowrates and throughput, low extractables, low particle shedding
  - Broad chemical compatibility
- Bidirectionally supported polypropylene casing
- Marked with catalog and lot numbers for traceability and easy identification
- Integrity tested
- Autoclavable

TYPICAL CHARACTERISTICS

Filter	Aervent-50
Medium	PTFE: hydrophobic, bidirectional
Applications	For critical small-scale gas line and air venting.
Diameter	62mm
Filter Area	19.6cm^2
Pore Size	0.2µm
Housing	Polypropylene
Pressure Limit	4.1 bar (60psig) at 25°C
Bacterial Retention	Quantitative retention of *Brevundimonas diminuta* (ATCC* 19146) following ASTM* F838-83 methodol-ogy at a minimum challenge level of 10^7 CFU/cm^2

Whatman* Polycap* GW High-Capacity Capsules

Filter ground water samples before dissolved metal analysis

Provides excellent sample filtration for ground water analysis.

05-714-036

- Membrane is encapsulated in a durable polypropylene housing
- Pre-assembled—no need to replace the filter or decontaminate the capsule
- Filtration area: 600cm^2
- Flowrate: 60L/min. at 1.0 bar (14.5psi)
- All housing components are thermally fused
- Stepped hose barb fittings allow connection with various size tubings
- Drain screen, core, end caps and backpressure screens are made of durable polypropylene
- Sterile

COMPLIANCE:

Certified for low metal extractables. Suitable for the EPA Method 3005 for groundwater analysis.

Pore Size	Filtration Area	Mfr. No.	Cat. No.	Price

Whatman* Polycap* TC High-Capacity Capsules

Developed for safe, efficient filtration of critical biological and tissue culture solutions

Contain two layers of polyethersulfone membrane—inherently hydrophilic, low in extractables, excellent flowrates. Low protein-binding characteristics make capsules ideal for use with biologically sensitive solutions.

05-713-751, -752, -750

- Pore size 0.8/0.2µm
- Filtration area: 440, 930, or 1900cm^2
- Vent evacuates any air for fast filtration
- Outlet is protected to prevent touch contamination during setup
- Standard hose barb connections
- Durable polypropylene filter housing can withstand maximum operating pressure of 60psi (4.1 bar)
- Presterilized
- ISO-driven cleanroom manufacturing ensures product consistency
- Stamped lot numbers ensure traceability of all critical components

APPLICATIONS:

Suitable for pharmaceutical aqueous solutions, tissue culture media, reagent preparation, virus suspensions, particle counting solutions, cleaning and rinsing solutions

COMPLIANCE:

Pass HIMA Challenge Test for Sterilizing Grade Filters to retain >10^{7}CFU/cm^2 *Brevundimonas diminuta* per ASTM* 838-83 and FDA guidelines; microbial retention correlated to 100% integrity testing during manufacturing.

Filtration Area	Inlet Connection	Outlet Connection	Mfr. No.	Cat. No.	Each

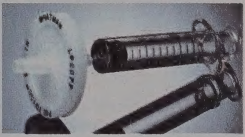
1900cm^2	⅜ to ½" stepped barb	¼ to ⅜" stepped barb	6718-9582	**05-713-752**	108.43

Whatman* Polydisc* Inline Filters

Versatile, cost-effective filters designed for larger volume sample filtration

Filter up to 1L with one device. Can be used in conjunction with a syringe or connected inline (6-10mm ID hose) via stepped hose barbs. High-purity polypropylene housing maintains sample purity. 50mm filter devices. Autoclavable. Lightweight (11.5g).



09-744-66

Polydisc AS (Aqueous Solution)

- For tissue culture media, reagent preparation, particle counting solutions, pharmaceutical preparations
- High-throughput polyethersulfone membrane (low protein binding and no surfactants)
- Glass microfiber prefilter extends membrane life and effectively filters heavily contaminated samples
- Sterility cap on outlet (optional)
- No EtO residuals
- Barbed hose connections fit multiple tubing sizes
- Integrity testable (bubble point method)
- Sealed in its own "medical grade" clear blister pack and secured in a protective shelf pack

Polydisc TF

- Use in vents, inline, exhausts for growth environments, clean or sterile gases, solvents, reagents, drying gases, photoresists
- Hydrophobic PTFE membrane ideal for chemically aggressive solutions, reagents and organic solvents
- Chemical-resistant housing
- Integrity testable (bubble point or water breakthrough pressure *in situ* methods)
- Biosafe

Description	Filter Membrane	Pore Size	Mfr. No.	Cat. No.	Pack of
Polydisc AS	PES	0.45µm	6724-5145	**09-733-06**	50/391.91
Polydisc TF	PTFE	0.2µm	6720-5002	**09-744-66**	10/121.17
Polydisc TF	PTFE	1.0µm	6721-5010	**09-744-72**	10/122.29

Whatman* Polycap* Disposable Capsules

Choose from five filter types for a wide variety of filtration applications

- Autoclavable
- Polypropylene housing
- All bonds are fused: no glues, adhesives, metals, epoxies used
- Contain no mold release agents or surfactants
- Manufactured in cleanrooms
- Pass USP Class VI tests
- Max. housing pressure: 4.1 bar (60psi)

Whatman* PolyVent* Vessel Venting Filters

Unique integral, inline filters designed specifically for venting of vessels

Single standardized set of materials—polypropylene and PTFE—simplifies the task of approving materials for housing and membrane.

- Hydrophobic, 0.2µm PTFE membrane
- **PolyVent 4** is for smaller bottles and jars with capacity of less than 1L
- **PolyVent 16** accommodates vessels from 5 gal. to 19L
- **PolyVent 500** works with bulk tanks that store food products, biological products, or deionized water—allowing only sterile, microfiltered air to replace the liquid drawn off for use. Safely vent off reaction gases without contaminating either the environment or the tank contents.
- **PolyVent 1000** is used for larger process tanks

Specifications

- Maximum pressure: 2 bar (29psi); for PolyVent 40, 1 bar (14.5psi)
- Supplied nonsterile; autoclavable at 121°C (250°F) for 20 minutes

APPLICATIONS:

- Sterile venting of filling, mixing, holding, autoclave, fermentation, shipping, and dispensing vessels
- For isolation[†] of incubators, autoclaves, lyophilizers, EtO sterilizers, and fermenters
- For biotech, pharmaceutical and diagnostics, and food and beverage applications

COMPLIANCE:

Biosafe—all materials meet USP Class VI requirements. Manufactured in GMP-controlled cleanroom facilities.

09-745-1 Serie

Capsule No.	Type	Filter Area	Housing Dia. × L	Inlet/Outlet Connections	Airflow Rate[‡]	Mfr. No.	Cat. No.	Pack of

[†] Gases pass; liquids and aerosols are stopped.

[‡] Typical values at 1 bar (14psi).

[††] Indicates female Luer lock/male Luer.

Whatman* Carbon-Cap* Disposable Activated Carbon Capsules

Wide chemical compatibility of activated carbon available in a sturdy polypropylene housing

- Remove odor organics, color, and colloids from reagent-grade water, chemicals, and air
- Activated carbon plus a pleated HEPA filter media retains 99.97% of all particles ≥0.3µm
- Maximum housing pressure: 4.1 bar (60psi)

Carbon-Cap 75

- Offers 26,000m^2 activated carbon surface area
- Housing dia. × L: 66 × 96mm (2⅝ × 3⅝")

Carbon-Cap 150

- Offers 82,000m^2 filter area equivalent
- Housing dia. × L: 66 × 183mm (2⅝ × 7⅕")

APPLICATIONS:

For vacuum pump outlet removal of smoke and oil.

09-744-40

Capsule No.	Filtration Area Equivalent	Inlet/Outlet Connections	Mfr. No.	Cat. No.	Each
75	26,000m^2	½" hose barb	6704-7500	**09-744-40**	67.78
150	82,000m^2	⅜-½" stepped hose barb	6704-1500	**09-744-37**	90.37

Whatman* HEPA-Cap* Disposable Air Filtration Capsules

Assure sterile, clean air for mixing, filling, storing, fermenting, and transporting

Polyester-laminated glass microfiber filter removes 99.97% of 0.3µm particles from air and gas stream.[†]

- Filter instrument air and maintain particle-free air to environmental chambers
- Bidirectional flow
- Polypropylene housing
- Autoclavable
- Maximum housing pressure: 4.1 bar (60psi)
- Housing dia. × L:
  - HEPA-Cap 36: 66 × 48mm (2⅝ × 1⅞")
  - HEPA-Cap 75: 66 × 96mm (2⅝ × $3\frac{13}{16}$")

09-744-12

Capsule No.	Filtration Area	Inlet/Outlet Connections	Mfr. No.	Cat. No.	Each
36	625cm^2	¼-⅜" stepped hose barb	6702-3600	**09-744-12**	54.63
75	1300cm^2	⅜-½" stepped hose barb	6702-7500	**09-744-15**	71.16

[†] Rated by DOP aerosol test.

*Trademark. See Trademark Reference.

Whatman* HEPA-Vent* Filter

Assures sterile air for mixing, filling, storing, fermenting, and transporting

- Glass fiber filter is treated to be mildly hydrophobic
- Repels moisture, prevents bacterial growth
- 0.3µm particle retention unaffected by autoclaving
- Bidirectional flow
- Filter area: 16cm²

HEPA-VENT™
WHATMAN
INLET

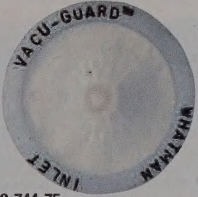
09-744-79

Inlet/Outlet	Mfr. No.	Cat. No.	Pack of 10
¼-⅜" tapered hose barb	6723-5000	**09-744-79**	80.13

Whatman* Vacu-Guard* Filter

PTFE membrane retains 99.9% of air/gas particles ≥0.1µm

- Installed inline
- Isolate and confine infectious materials
- Prevent fluid and aerosol contamination of vacuum pumps or aspiration suction systems
- Eliminate hazardous exhaust
- Disposable
- Filter area: 16cm²



09-744-75

Inlet/Outlet	Mfr. No.	Cat. No.	Pack of 10
¼-⅜" tapered hose barb	6722-5000	**09-744-75**	143.00
⅜-½" tapered hose barb	6722-5001	**09-744-76**	141.97

Whatman* Vacu-Guard* 150 Vacuum Protection Filter

Hydrophobic PTFE membrane in a pleated cartridge with choice of three chemical traps

- Especially protective for vacuum pumps and exhaust air
- Permanently fuse bonded inside base of capsule
- Stops 99.99% of particulates ≥0.1µm in air/gas and aqueous solutions
- Housing: Polypropylene
- Inlet: ½" hose barb
- Outlet: ⅜–½" stepped hose barb
- Filter dia. × L: 66 × 236mm (2⅝ × 9⁵⁄₁₆")

Activated carbon

- Produced from lignite and acid washed after steam activation
- Surface area: 82,000m²
- Flowrates at 0.1 bar (1.45psi) and 0.5 bar (7.25psi): 210 and 450L/min.

Desiccant

- Anhydrous calcium sulfate impregnated with calcium chloride
- High drying capacity
- Flowrates at 0.1 bar (1.45psi) and 0.5 bar (7.25psi): 280 and 600L/min.

09-746A

Molecular Sieve

- Type A
- Absorbs molecules less than 4Å; excludes larger
- Flowrates at 0.1 bar (1.45psi) and 0.5 bar (7.25psi): 250 and 570L/min.

Vacu-Guard 150 with Trap	Mesh Size	Mfr. No.	Cat. No.	Each
Activated Carbon	12 × 20	6722-1001	**09-746A**	103.57
Desiccant	8	6722-1002	**09-746B**	103.57
Molecular Sieve	8 × 12	6722-1003	**09-746C**	103.57

WARNING
Care should be taken to determine safety and usefulness of products prior to routine use. For example, molecular sieve rapidly heats up when exposed to water.

domnick hunter* Demicap* Filter Capsules

A compact, cost-effective, and efficient method of filtration for small-scale applications and batch filtration where clarification, stabilization, and sterilization are required

Capsule design minimizes hold-up volumes while providing high flowrates without the need for cartridge housings.

- Nylon or polypropylene, depending on filtration media
- Maximum operating conditions, in direction of flow (outside to in): 72.5psi at 104°F for liquid filtration; and 58psi for air/gas
- Propor PES capsules have been fully validated by bacterial challenge (10^7 organisms/cm² minimum challenge) in accordance with ASTM* F838-83

Propor PES Membrane

- Polyethersulfone membrane
- Low chemical and protein binding characteristics
- Microbially retentive membrane is fully validated to ASTM* F838-83 standards
- Naturally hydrophilic and easy to integrity test

- Autoclavable by steam sterilization
- Available with a variety of inlet and outlet connections
- Sterile or nonsterile

COMPLIANCE:
All materials conform to current USP Plastics Class VI (121°C) specifications.

WARNING

Propor PES capsules using polypropylene components for encapsulation require the use of 60:40 IPA/Water for integrity testing.

LOOKING FOR MORE?

Demicap* filter capsules are available in five different media types including: Tetpor*, Peplyn* Plus, Prepor GF*, Prepor PES*, and Propor PES*.

Visit www.fishersci.com and search for Demicap Capsules

CENTRIFUGAL DEVICES

Millipore* Microcon* Centrifugal Concentrators†

Provide fast, convenient, high-recovery alternatives to dialysis and ethanol precipitation

- Amicon* low-binding YM regenerated cellulose ultrafiltration membrane; polypropylene centrifuge tube housing
- Inverted spin method combines two spin stages for high sample recovery
- Color-coded devices are available with nominal molecular weight limits (NMWL) of 3000; 10,000; 30,000; 50,000; or 100,000

424 Series

Microcon

- For concentrating and desalting proteins, nucleic acids, and antibodies as well as removing primers, linkers, labeled amino acids, and nucleotides
- Deadstop feature helps eliminate risk of running samples to dryness
- Use Microcon for samples up to 0.5mL; Centricon, to 2mL
- Devices include filter unit, filtrate vial and collection vial

SPECIFICATIONS

Centrifugal Device	**Microcon**
Max. Volume Capacity	0.5mL
Min. Final Concentrate Volume	5µL
Max Centrifugal Force	14,000×G (Microcon-3, -10, -30, -50, -100); 3,000×G (Microcon-100); 500×G (for DNA/RNA with Microcon-100)
Active Membrane Surface Area	0.34cm²
Hold-up Volume of Membrane	10µL
Diameter × Length	½ × 1¾" (12.3× 45mm)
Rotor	Fixed angle

† An Amicon Bioseparations product.*

Millipore* Centricon* Plus-70 Centrifugal Filter Units

Compatible with swinging-bucket rotor (250mL) with maximum rotation of 3500×G

Device consists of a polypropylene filtrate collection cup, sample filter cup, concentrate/retentate cup and cap.

- Low hold-up volume
- >90% typical recovery
- 50X to 200X concentration
- Polypropylene housing minimizes binding
- Deadstop prevents spinning to dryness
- Ready to use; nothing to assemble

UFC 710008

APPLICATIONS:

Concentrating and desalting chromatography column eluates; concentrating monoclonal antibodies; concentrating proteins or viruses from culture supernatants; clarifying tissue homogenates and cell lysates; buffer exchange or diafiltration

Description	Pore Size	Cat. No.	Pack of 8
Biomax*	5000	**UFC7 005 08**	150.00
Ultracel*	10,000	**UFC7 010 08**	150.00
Ultracel	30,000	**UFC7 030 08**	150.00
Ultracel	100,000	**UFC7 100 08**	150.00

Millipore* Ultrafree* -0.5 Centrifugal Filter Devices[†]

Rapid concentration, desalting and purification in as little as 10 minutes

Combine the design of a centrifugal filter device with a vertically oriented membrane, for quick and efficient sample processing.

- Polycarbonate reservoir
- Concentrate, purify and prepare biological samples for volumes up to 0.5mL
- High-flow, Biomax* ultrafiltration membrane available in NMWL cutoffs
- Recover processed sample from concentrate pocket after a single spin
- Depending on sample type, concentration factors range from 50x to 200x
- Can be used with any fixed-angle or swinging bucket centrifuge with standard rotors which accept standard receiver tubes

UFV5 Series

Ultrafree-0.5	
Max. Volume Capacity	0.5mL
Minimum Final Concentrate Volume	5µL
Max. Centrifugal Force	12,000×G (10,000×G for Biomax-100)
Active Membrane Surface Area	0.48cm^2
Hold-Up Volume of Membrane	<8µL
Dia. × Length	$\frac{7}{16}$ × 2" (10.7 × 50mm)
Rotor	Fixed angle or swinging bucket

[†] *An Amicon* Bioseparations product.*

Millipore* Amicon* Ultra-4 and Amicon Ultra-15 Centrifugal Filter Units

Provide both high sample recovery and fast sample processing

- High-recovery Ultracel*-PL regenerated cellulose membrane
- Vertical membrane reduces polarization for ultrafast spin times (as little as 10-15 minutes)
- Heat-sealed membrane eliminates possibility of downstream extractables
- Housing is constructed of co-polymer styrene/butadiene
- Centrifuge tube is polypropylene; tube cap and liner are polyethylene
- Universal rotor compatibility
- High retentate recovery of >90%
- High concentration factors of 80-100 fold
- Easy sample monitoring, due to translucent housing and volume gradations
- Direct pipetter sample access eliminates processing step to recover concentrate

APPLICATIONS:

For concentration of biological samples containing antigens, antibodies, enzymes, nucleic acids, or microorganisms; purification of macromolecular components found in tissue culture extracts or cell lysates ; concentration of dilute or prepurified proteins from column eluents; desalting and buffer exchange

INCLUDES:

Assembled with centrifuge tubes and caps

SPECIFICATIONS

Millipore* Ultrafree*-MC Centrifugal Filter Devices†

Fast, convenient sample preparation; very low hold-up volumes (10µL)

- Achieve maximum recovery with a high degree of purity for volumes up to 0.5mL with Ultrafree-MC devices
- Minimize sample handling to avoid significant losses of valuable material
- Low hold-up volume of sample allows highest recoveries

UFC3 ODV 25

Millipore* Centriprep* Centrifugal Filter Units

For processing high-solute samples

- Fast sample processing
- High-recovery, Ultracel*-YM membrane
- Ideal for concentrating and purifying particle-laden solutions or high concentrations
- Separate low MW solutes from fermentation broths, cell culture media, and cell lysates
- Unique inverse flow mode with large deadstop
- Use in 50mL tube swinging-bucket or fixed-angle rotor

4321

FILTER PAPER—QUALITATIVE

*Fisherbrand** Qualitative Grade Circles and Sheets

Ideal for clarifying and removing particles of 1µm and larger, and in applications that do not require a low-ash or ashless paper

- Cellulose fiber papers
- Good wet strength
- Suitable for gravity and low-suction filtration and for use in vacuum filtration systems
- Use with fluted circles (sold separately) for easy use with conical funnels
- Available as circular, rectangular, and square sheets

NOTE:
Not suitable for nitrogen analysis.

Fisherbrand Grade	P8	P5	P4	P2
Particle Retention	20–25µm	5–10µm	4–8µm	1–5µm
Porosity	Coarse	Medium	Medium-Fine	Fine
Filtration Speed[1]	Herzberg, 55 seconds	Herzberg, 230 seconds	Herzberg, 730 seconds	Herzberg, 1400 seconds
Flowrate[2]	Fast—160mL/min.	Slow—60mL/min.	Slow—25mL/min.	Slow—5mL/min.
Surface	Smooth, open texture	Smooth	Smooth	Smooth, dense texture
Applications	Suitable for coarse and gelatinous precipitates. Retains $Fe(OH)_3$, $Al(OH)_3$, metallic sulfides, iron ores. For clarifying solutions, oils. For zinc analysis (Fe ppt removal). Size 19cm (09-804) widely used for sugar analysis.	General lab uses: clinical and spot testing, clarifying pharmaceuticals.	General purpose: slightly slower, more retentive than P5. Retains $MgNH_4PO_4$, silver sulfide, cadmium sulfide. In air monitors, collects particulates and chromic acid mist.	Excellent retention. Suitable for finest particles or precipitates. Used for boiler water testing, pigment studies, analysis of zinc and titanium.

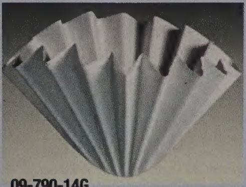
[1] *Time for 100mL to pass through 10cm² filter paper with 10cm constant head pressure of water.*
[2] *Rate of flow for distilled water through a 5cm diameter filter with constant 5cm head of water.*

*Trademark. See Trademark Reference.

*Fisherbrand** Fluted Qualitative Circles

Cellulose fiber papers

- For use with conical funnels
- High wet strength†



09-790-14G

Diameter	Cat. No.	Pack of 100
12.5cm	**09-790-14D**	51.73
15cm	**09-790-14E**	56.22
18.5cm	**09-790-14F**	61.23
24cm	**09-790-14G**	64.40

† Wet-strengthened papers should not be used for Kjeldahl analyses.

Fisherbrand Grade	P8—Fluted
Particle Retention	25µm
Porosity	Coarse
Flowrate	Fast
Surface	Smooth
Applications	Fluting provides more filter area, faster flowrate in conical funnel; reduces likelihood of tearing. Suitable for coarse, gelatinous precipitates.

*Fisherbrand** Wet-Strengthened Qualitative Circles

Coarse cellulose fiber papers remove particles >25µm

- Creped surface
- Fast flowrate
- Suitable for vacuum filtration

NOTE:
Not for nitrogen analysis.

Whatman* Qualitative Grade Paper for IS Measurement

Specifically developed for measuring the Ignition Strength (IS) of Cigarettes

- Certified Grade 2 (for IS testing)
- Each lot is guaranteed to meet the ASTM* E2187-04 specifications
- Simplifies testing process by eliminating lot suitability testing
- Just condition and use

FILTER PAPERS
2
Whatman
NEW

09-940-100

COMPLIANCE:

Tested according to the procedure detailed in ASTM E2187-04 Sections 9.3.1 and 9.3.2. Meets both the conditioned (26.1 ±0.5g, SD ≤0.3g) and dried (24.7 ±0.5g, SD ≤0.3g) weight requirements. Lot-specific certificate can be downloaded from Whatman website.

Diameter	Mfr. No.	Cat. No.	Pack of 100
15cm	1002-147	**09-940-100**	22.70

Whatman* Shark Skin Filter Paper

High wet strength allows use under pressure

- General use filter paper is white, with crepe surface
- Unique paper is almost as strong wet as it is dry
- Used for qualitative work, exceptional filtering properties
- Speed of filtering is comparable to common qualitative papers
- Acid and alkali resistance allows for wide range of process operations
- Particle retention: 8-12µm

09-924-39

APPLICATIONS:

Great for industrial work, because its high wet strength allows use under pressure or suction.

Diameter	Mfr. No.	Cat. No.	Pack of 100
12.5cm	10347511	**09-924-390**	35.46

FILTER PAPER—QUANTITATIVE

*Fisherbrand** Quantitative Grade Circles

Manufactured to reduce silicon dioxide, calcium oxide and ferric oxide levels

- Made from high-quality alpha cotton cellulose, washed in hydrochloric acid and neutralized in an ultrapure water rinse
- Leave no more than 0.01% ash when burned
- Limited wet strength, suitable for gravity or low-suction filtration; should be used with care to avoid rupturing

09-790G

ORDERING INFORMATION:

Packed 100 circles to a box and shrink-wrapped for purity and cleanliness.

COMPLIANCE:

All papers listed in chart meet ASTM* requirements for "ash content per circle."

Fisherbrand Grade	Q8	Q5	Q2
Particle Retention	20–25µm	5–10µm	1–5µm
Porosity	Coarse	Medium	Fine
Filtration Speed	Fast	Medium	Slow
Surface	Smooth, open texture	Smooth	Smooth, dense texture
Applications†	Suitable for coarse and gelatinous precipitates requiring thorough washing on paper. Used in metallurgical labs for filtering iron and aluminum hydroxides, metallic aerosols and for determining silica in steel. Also used in environmental monitoring. Limited wet strength.	Widely used for general gravimetric analysis. Retains medium-sized particles such as lead sulfate, calcium oxalate and magnesium ammonium sulfate. Limited wet strength.	Excellent retention. Suitable for finest precipitates such as metastannic acid, barium sulfate, mercuric chromate, strontium sulfate. Used primarily for gravimetric and inorganic analyses, collecting precipitates that tend toward colloidal dispersions. Limited wet strength.

Ashless Circles and Sheets

Suitable for gravity or low-suction filtration

- Acid washed: Ash content not exceeding 0.007%
- Meet ASTM* "ash content per circle" requirements
- Manufactured with demineralized water for high purity
- Limited wet strength, use care to avoid rupturing

Whatman Grade	Whatman 40	Whatman 41
Particle Retention	>8µm	>20–25µm
Porosity	Medium	Coarse
Filtration Speed[1]	ASTM, 75 seconds; Herzberg, 340 seconds	ASTM, 12 seconds; Herzberg, 54 seconds
Surface	Smooth	Smooth, open texture
Applications[2]	Widely used, general-purpose gravimetric grade. Medium crystalline precipitates: calcium oxalate, well-digested barium. Normal loading; limited wet strength.	Gelatinous precipitates and coarse particles. Metallurgy: iron and aluminum hydroxides. Air pollution monitoring. Normal loading; limited wet strength.

GLASS FIBER FILTERS AND PREFILTERS

Fisherbrand* Glass Fiber Circles

Faster flow, higher retention than cellulose filters

- Ideal as prefilters and for gravimetric analyses
- Low hygroscopicity
- Chemically and biologically inert, with no organic binders
- Suitable for many corrosive applications
- Offer higher retention efficiency of fine particles (<3µm in size)
- Resist clogging for greater loading capacity than cellulose paper filters
- Autoclavable and usable to 500°C (932°F)
- Filters should be used flat: folding will break the glass fibers

09-804-90A

Fisherbrand Grade	G8	G6	G4	G2
Particle Retention	2.5µm	1.6µm	1.2µm	1.0µm

Fisherbrand* Filters for TCLP

Binder-free, borosilicate glass fiber filters have 0.7 micron pore size

09-804-142H

- 47mm size recommended for use with 09-753-1A Filter Holder in filtering highly granular samples or those with <10% solids
- 90mm size recommended for use with 09-753-2 Filter Holder with highly granular samples
- 142mm size provides four times the filtration area of 47mm filters (ideal for samples with >10% solids); recommended for use with 09-753-25J Filter Holder with reservoir

COMPLIANCE:

Meet U.S. EPA requirements for Toxicity Characteristic Leaching Procedure (TCLP).

Diameter	Recommended Filter Holder	Cat. No.	Pack of 100
47mm	09-753-1A	**09-804-142H**	24.92

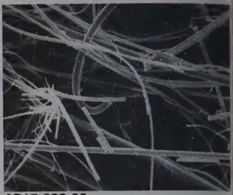
Millipore* Glass Fiber Filters

For prefiltration and contamination analysis



AP15 022 00

Disc diameters to fit either O-ring I.D. or filter O.D. Available in three grades.

- AP15, 20, and 25 Series filters are made of borosilicate microfiber glass with acrylic binder resin
- Filters retain structural integrity without weight loss when ignited to 550°C (1022°F) after sample filtration
- Autoclavable

	Glass Fiber Filters			Glass Fiber Filters Without Binders
Series	**AP15**	**AP20**	**AP25**	**AP40**
Thickness	0.790mm	0.38mm	1.2mm	0.475mm

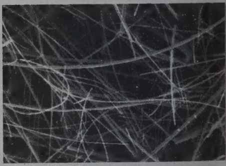
† Also available 500/pk. (AP40 047 05).

Glass Fiber Filters without Binders

Filters made of borosilicate microfiber glass without binders



APFA 025 00

- For environmental, gravimetric, and biochemical applications
- AP40 Series (above) are used for contamination analysis only
- Can be rendered transparent by immersing in benzene, ethyl alcohol, or other solvents with Refractive Index of 1.5097
- Autoclavable

	Glass Fiber Filters Without Binders				
Series	**APFA**	**APFB**	**APFC**	**APFD**	**APFF**
Particle Retention	1.6µm	1.0µm	1.2µm	2.7µm	0.7µm
Thickness	0.5–0.63mm	0.87–0.94mm	0.32–0.36mm	0.98–1.04mm	0.59–0.63mm

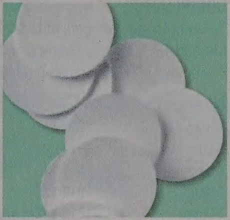
Millipore* Quartz Fiber Filters

Perfect for measuring heavy metal concentrations and small amounts of particles



AQFA 037 00

- Suitable for use in U.S. EPA PM10 ambient air monitoring method
- Pure quartz composition prevents the filters from reacting with acidic gases
- Exhibit good weight and form stability
- Can be sterilized by EtO, gamma, or autoclave (121°C at 1 bar)

iameter	Cat. No.	Pack of
32mm	**AQFA 032 00**	100/84.00

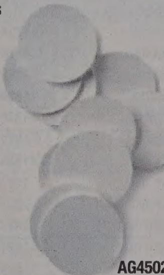
YPICAL CHARACTERISTICS:

hickness	500µm
lowrate	1.6mL/min./cm²
ax. Filtration Temp.	550°C (1022°F)
eight	75g/m²
terilization	Autoclavable

Millipore* Silver Membrane Filters

Excellent chemical and temperature resistance

trong, homogenous structure allows resterilization ultiple times without changing characteristics r loss of performance.



AG4502550

- Pure metallic silver
- Ideal for collecting airborne contaminants
- Constructed of 99.97% pure metallic silver
- Designed to withstand extreme chemical and thermal stress
- Ideal for applications involving aggressive fluids and/or high temperatures
- Referenced by NIOSH for collecting airborne contaminants†
- Filter surface: plain

PPLICATIONS: Used for air monitoring of carbon black, coal tar products, oke oven emissions, and silica. Ideal for crystalline silica analysis by X-ray iffraction techniques.

eries	Diameter	Cat. No.	Pack of 50

Millipore* Reinforced Membrane Filters

Contain no asbestos or fiberglass

Made of homogenous microporous polymers of cellulose esters formed around a polyester web. Available in three grades.

RW03 047 00

- RW03 filters offer the highest retention efficiency in submicron clarification; can also serve as prefilters for 0.2 to 0.45µm filters
- RW06 and RW19 filters provide lower retention efficiencies than the RW03 Series in submicron clarification
- RW06 filters can also serve as prefilters for 0.45 to 0.8µm filters
- RW19 filters are suitable as prefilters for 0.8 to 1.2µm filters

Max. Filtration Temperature	75°C (167°F)	75°C (167°F)	75°C (167°F)
Sterilization	Autoclavable	Autoclavable	Autoclavable
Applications	Submicron clarification. Prefiltration for 0.2–0.45µm filters.	Prefiltration for 0.45–0.8µm filters.	Prefiltration for 0.8–1.2µm filters.

Fisherbrand* Filter Forceps

Easy, effortless handling of membranes and glass fiber filters

- Made of Type 304 stainless steel
- Broad unserrated tips to prevent damage to filters
- Serrated grip area on blades lets you hold forceps securely and correctly, without slippage
- Sterilize by autoclave or by dipping tips in alcohol and "flaming"
- Won't corrode in acids or acidic atmospheres

ORDERING INFORMATION:

Length: 4½" (11.4cm).

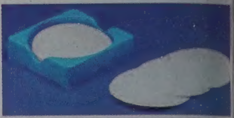
Cat. No.	Each
09-753-50	13.66

Whatman* Acid-Treated Low-Metal TCLP Filters

Contain no binders to interfere with samples

Made of acid-treated microfibers of borosilicate glass in a unique formulation with inherently low levels of barium and zinc.

- Resistant to acids and bases
- Nominal 0.7µm pore size
- Superior lot-to-lot consistency, with the high loading capacity demanded by TCLP samples
- Available in six diameters, including sizes to fit Büchner funnels and zero-headspace extraction units
- Pretreatment with acid eliminates need to acid-wash filters in your lab, for reduced analysis time and reagent costs



09-921-8

COMPLIANCE:

Conform to requirements of U.S. EPA Method 1311 Toxicity Characteristic Leaching Procedure (TCLP), including 0.6 to 0.8µm particle retention requirement.

Diameter	Mfr. No.	Cat. No.	Pack of
47mm	1810-047	**09-921-7**	100/94.55

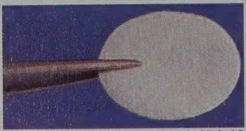
Whatman* Binder-Free Glass Microfiber Filters

Type GF/A

- General purpose, high efficiency
- High flowrate
- Extra thick for greater retention



09-874-16

APPLICATIONS:

- Water pollution effluent monitoring
- Filtering water, algae, bacterial cultures
- Foodstuff analyses
- Protein filtration
- Radioimmunoassay of weak β-emitters
- Gravimetric determination of airborne particulates, stack sampling and absorption methods of air pollution monitoring

Whatman Grade	**GF/A**
Particle Retention[1]	1.6µm
Flowrate[2]	13.0 sec./100mL
Thickness	0.26mm
Weight	53g/m²
Max. Temp.	500°C (932°F)
Water Absorption[3]	275mL/m²
Sterilization	Autoclavable

[1] 2% initial penetration values using solid particulates dispersed in water. (Represents complete retention in normal laboratory analysis.)

[2] Vacuum filtration of prefiltered water through 2¹⁄₁₆" (5.5cm) flat filter at 100mmHg (1.9psi).

[3] Equilibrium volume of water absorbed by filter.

Type GF/B Filters

Extra thick for greater retention

- High wet strength
- High loading capacity

Whatman
GF/B

09-874-24

APPLICATIONS:

Particularly useful when liquid or solids quantification is required for heavily loaded fine particulate suspensions; Can be used as a finely retentive membrane filter; Used in LSC techniques where high loading capacity is required

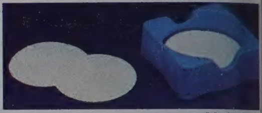
Whatman Grade	934/AH
Particle Retention	1.5µm
Filtration Speed (Herzberg)	4.7 sec./100mL
Thickness	0.33mm
Weight	64g/m²
Max. Temp.	500°C (932°F)
Sterilization	Autoclavable

Type GF/F Filters

- Binder-free borosilicate glass
- Retain fine particles down to 0.7µm
- Very rapid flowrate, extremely high loading capacity
- Autoclavable, usable to 500°C
- Effective in filtering finely precipitated proteins
- Can be used with type GF/D as a prefilter for clarification of extremely "difficult" biochemical solutions and nucleic acids



09-874-6

COMPLIANCE:

Meet requirements of EPA Toxicity Characteristic Leaching Procedure (TCLP).

LOOKING FOR WATER-TESTING MEMBRANE FILTERS?

Fisherbrand* Water-Testing Membrane Filters are gridded to aid in counting and colony differentiation. They're designed for determining bacterial levels, including coliforms, in water, sewage, foods, and filterable beverages. A Certificate of Analysis supplied with each filter pack. For more information, see Microbiological Analysis later in this section.

GE* Glass Prefilters

With or without binders

G40 Binder-free Filters

- High solvent resistance
- Higher dirt-handling capacity than glass filters with binders
- Made of borosilicate glass fibers woven into a porous matrix
- Ideal for gravimetric analyses and particulate testing

G25 and G15 Glass Filters with Binders

- Borosilicate glass fiber matrix bonded by acrylic resin
- G25 filters are extra thick for increased throughput
- High wet strength for long aqueous filtrations and reduced media migration

G20 Glass Prefilters with Binders

- Surface capture of particles
- Average retention efficiency
- Higher dirt-handling capacity

G40WP03705

LOOKING FOR MEMBRANE FILTERS?

Fisherbrand* General Filtration Membrane Filters are ideal for most filter applications. These plain, white membrane filters are a pure, biologically inert mixture of cellulose acetate and cellulose nitrate (MCE). They're compatible with dilute acids and bases, aliphatic and aromatic hydrocarbons, and nonpolar liquids. Fisherbrand filters wet readily with water and other fluids, and they contain no fibers or particles to contaminate filtrate.

For more information, and a complete selection of membrane filters, check out the Membranes section.

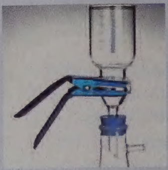
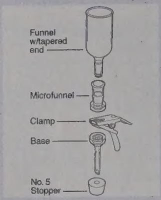
09-753C

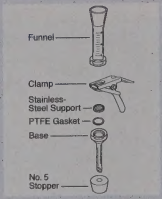
09-753G

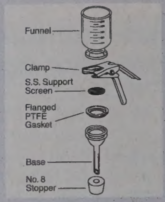


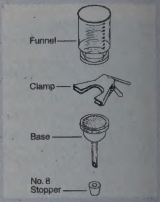
09-753-1A

09-753-2









Filter Type	**Glass Microanalysis, 13mm**		**Glass Microanalysis, 25mm**		**Glass Microanalysis, 47mm**				**Glass Microanalysis, 90mm**
Applications	Filtering small liquid volumes in RNA/DNA hybridizations, collecting biological cells and other materials, preparing small volumes of sterile filtrate.		Filtering small volumes of fluids in biological or particulate contamination studies, gravimetric analyses, radiochemical determinations, biological tests.		Analyzing liquids for particulate or biological contamination; water/wastewater analysis, pharmaceutical QC, yeast and mold detection, preparing ultraclean or sterile filtrates and organic solvent purification.				Filtering bioburden/heavy particle load samples; ultracleaning or filtering photoresists, viscous fluids when high flowrate is required; colony hybridization studies.
Filter Size	25mm		25mm		47mm				90mm (82mm, microbiology)
Prefilter Size	Not recommended		16mm		35mm				70mm
Filtration Area	1.1cm²		2.1cm²		9.6cm²				38.5cm²
Max. Capacity	100mL		25mL		1000mL	300mL	300mL	300mL	1000mL
Grad. Volume	----		15mL		----	250mL	250mL	250mL	——
Connection	No. 5 silicone stopper for 125mL flasks.†		No. 5 silicone stopper for 125mL flasks.†		$ 40/35 for 1L flask or manifold.	No. 8 silicone stopper for 1L flask or manifold.	No. 8 silicone stopper for 1L flask or manifold.	No. 8 silicone stopper for 1L flask or manifold.	No. 8 silicone stopper for 1L flask or manifold.
Sterilization‡	Autoclavable		Autoclavable		Autoclavable				Autoclavable
Features	Use 25mm membranes, concentrate sample into 1.1cm² area (13mm diameter). Two models: 1) with 100mL borosilicate funnel; 2) with 13mL microfunnel for small volumes, 100mL funnel with tapered ground glass connector that fits inside microfunnel, increases capacity.		Use 25mm membranes, concentrate sample into 2.1cm² area. Available with integral fritted glass support to retain sample, or removable stainless-steel mesh support screen and PTFE gasket for ultraclean filtrate, proteinaceous solutions, optimizing flow.		Use 47mm membranes. Available with integral glass support for organic (fritted only), biological, or general applications; with stainless-steel support for ultraclean filtrate or proteinaceous solutions; or with stainless-steel support plus PTFE gasket, PTFE-coated sealing flange, to prevent membrane from sticking to the base after autoclaving.				Integral fritted glass support assures that filter sits flat on support base for uniform distribution of sample. Filtration area is four times larger than on 47mm holders. (After filtration, 90mm membrane will fit into 150mm dish; 82mm will fit 100mm Petri dish.)
Components	Ungraduated borosilicate glass funnel(s), base, fritted glass support; anodized aluminum spring clamp; No. 5 stopper.		Flare-top 15mL borosilicate glass funnel (graduated 5 to 15mL in 1mL increments) and base; anodized aluminum spring clamp; No. 5 stopper.		Borosilicate glass funnel (graduated 100 to 300 in 25mL increments) and base; anodized aluminum clamp; No. 8 stopper. 09-753-102 comes with borosilicate glass funnel (graduated 300 to 1000mL in 50mL increments), base, fritted glass support; anodized aluminum clamp; $ 40/35 connection.				Borosilicate glass funnel (graduated 100 to 300mL in 50mL increments), base, fritted glass support; anodized aluminum clamp; No. 8 stopper.

† Accessory funnels.

*Fisherbrand** Airejector* Aspirator Pump

Tapered serrated hose connection on side arm and water outlet

- Typical free air capacity of 0.05 cu. ft./min. (1.4L/min.) with water at gauge pressure of 40psig (276kPa)
- Nickel-plated brass, ¼ NPT female thread at top
- Accommodates ¼ to 5⁄16" (6.4 to 7.9mm) rubber tubing
- Diameter of serrated tips, ⅜" (9.5mm)
- Overall length, 5½" (14cm)

11-474-208

APPLICATIONS:

Urea nitrogen test by aerator method; cleaning pipets and sedimentation tubes; drawing up spilled liquids

WARRANTY:

12 months

Connections	Cat. No.	Each
3/8 NPT male thread	**11-474-208**	58.50
1/4 NPT male thread	**11-474-213**	59.74

*Fisherbrand** Splashgon* Cylinder

Eliminates splashing

09-959Q

Rubberized cylinder with neck fits outlet of 11-474-208 and -213 Airejector* Aspirators (above).

- Brass device inside cylinder eliminates entrained air, spreads water stream, decreases water speed to 1⁄14 of original speed
- Max. dia., 1¼" (3.2cm)

Cat. No.	Each
09-959Q	27.39

Nalgene* Aspirator Vacuum Pump

Attaches directly to sink faucets for pumping

- Polypropylene vacuum pump
- Operates with water at gauge pressures as low as 7.5psig (52kPa)
- Water consumption rate: 1.7 gal./min. (6.5L/min.)
- Ultimate vacuum: 28.5"Hg (96kPa) below ambient pressure
- Capacity: 0.4 cu. ft./min. (11.5L/min.)

09-960-2

INCLUDES:

Integral check valve, ⅜ NPT connecting thread, 4¾" (12cm) of tubing

Mfr. No.	Cat. No.	Each	Case of 24
6140 0010	**09-960-2**	16.93	270.84

Millipore* 13mm Analytical Stainless-Steel Vacuum Filter Holder

Vacuum filter small volumes for precise particulate contamination analysis

- Stainless-steel funnel capacity: approx. 40mL
- PTFE gasket
- Filtration area: 0.7cm^2
- Male slip Luer outlet for use with stopper and flask
- Vacuum only

XX30 012 40	324.41

ACCESSORIES

Replacement Parts for Stainless-Steel 13 and 25mm Filter Holders

Swinnex* parts kit contains two PTFE gaskets, two O-rings, and two support screens.

Description	Cat. No.	Each
13mm Swinnex Replacement Parts Kit	XX30 012 RK	100.50
25mm Microsyringe Replacement Parts Kit	XX30 025 RK	111.42
13mm Swinnex Luer-Lok inlet	XX30 012 00	74.37
25mm Microsyringe Luer-Lok inlet	XX30 025 00	155.58

Millipore* 25mm Stainless-Steel Filter Holder

For 25mm disc filters

XX45 025 00

- Autoclavable
- Fitting inlet and outlet: ⅛ NPTF
- Filter diameter, 25mm; prefilter, 18mm (thick depth)
- Maximum inlet pressure: 350 bar (5000psi)
- Differential pressure: 10-70 bar (150-1000psi), depends on filter type used
- Filtration area: 2.2cm^2
- Housing is constructed of 316 stainless steel; seal material is Buna-N
- For filtration of gases or liquids at inlet pressures of 20 to 700 bar

ORDERING INFORMATION:

Replacement Parts Kit includes three stainless-steel hex-cap screws, three LCR-treated Buna-N O-rings, one stainless-steel support screen, and one Allen wrench

Description	Cat. No.	Each
Filter Holder	XX45 025 00	327.00
Replacement Parts Kit	XX45 025 RK	226.00

Millipore* 25mm Glass Microanalysis Vacuum Filter Holder and Support

Vacuum filter small volumes for particulate or biological contamination analysis

- Funnel capacity: 15mL
- Filtration area: 2.5cm^2
- Not autoclavable with filter in place

INCLUDES:

Borosilicate glass funnel and base; fritted glass or removable stainless-steel filter support; anodized aluminum spring clamp; No. 5 stopper

XX10 025 00

Description	Cat. No.	Each
With Fritted Glass Support	XX10 025 00	192.72

Base with screen, gasket and stopper	XX10 025 42	Ea./202.76

Millipore* 25mm Analytical Vacuum Filter Holder

Vacuum filter small volumes for precise particulate contamination analysis

- Electropolished finish minimizes potential particulate "hang-up" on funnel sides
- Filtration area: 2.8cm^2
- Funnel capacity: 50mL (internally scribed at 25 and 50mL)

INCLUDES:

Stainless-steel funnel; filter support screen; borosilicate glass base; anodized aluminum spring clamp; PTFE resin gasket; neoprene stopper

Replacement Parts for Millipore* 25mm Analytical Vacuum Filter

Description	Cat. No.	Price
PTFE support screen gasket	XX10 025 35	Pk. of 10/71.36
Base with screen, gasket and stopper	XX10 025 42	Ea./202.76

illipore* 47mm Glass Vacuum ilter Holders

or vacuum only

XX10 047 00

- Sanitize with sulfuric acid or hydrochloric acid
- Sterilize with UV sterilizer (2 to 3 min.) or autoclave (20 min. at 121°C)
- Capacity: 300mL

lass Filter Holder

- For bacteriological analysis of water (with Millipore membrane filters HAWG 047 S1) and for analysis of suspended solids in water (using Millipore depth filters AP40 047 05 or AP20 047 00)
- Includes borosilicate glass funnel and base, coarse-frit glass filter support, anodized aluminum spring clamp, and neoprene stopper

lass Filter Holder with PTFE-Coated Sealing Surfaces

- Useful for bacteriological analysis applications where filter holder must be autoclaved with membrane in place
- Coated sealing surfaces prevent membrane adhesion and filter damage during autoclaving
- Includes borosilicate glass, PTFE-faced funnel and base, anodized aluminum spring clamp, and neoprene stopper

lass Filter Holder with Stainless-Steel Support

- For use in particulate contamination analysis of oils and hydraulic fluids by gravimetric or particulate counting methods
- Also suitable for use in exfoliative cytology applications
- Includes borosilicate glass funnel and base with stainless-steel screen filter support, anodized aluminum spring clamp, and neoprene stopper

escription	Cat. No.	Each
lass Filter Holder	XX10 047 00	154.58
TFE-faced Glass Filter Holder	XX10 047 20	224.84
tainless-steel Screen Glass Filter Holder: ncludes funnel, base, stopper, clamp	XX10 047 30	224.84

ALERT

Glass (Cat. No. XX10 047 00) and stainless-steel screen (Cat. No. XX10 047 30) holders not recommended for use with flammable liquids.

ACCESSORIES

For Millipore 1225 Sampling Vacuum Manifold

Description	Cat. No.	Pack of
Sample cup extension barrel	XX27 025 55	12/104.39
Chamber replacement kit: includes 3 each of chamber inner O-rings, chamber outer O-rings, and drain plugs	XX27 025 52	1/115.43
Filter sealing silicone O-rings	XX27 025 09	30/179.67

Millipore* 1225 Sampling Vacuum Manifold

Compact cell harvester for individual sample collection in 15mL tubes

- Filter up to 12 samples, using 25mm discs in numbered filter plate
- Acid and base resistant, including TCA
- Solvent resistant below 80°C (176°F)
- Not recommended for use with strong oxidizing acids
- Major components can be autoclaved at least 20 times; screens and O-rings not autoclavable

XX27 025 50

ORDERING INFORMATION:

Extension barrels are available to handle 50mL sample volumes (see XX27 025 55, sold separately below)

INCLUDES:

Sealing stoppers for analyzing fewer than 12 samples

Cat. No.	Each
XX27 025 50	924.00

Millipore* 47mm All-Glass Vacuum Filter Holder

Vacuum filter aqueous, organic, or corrosive liquids for particulate contamination analysis

XX15 047 00

- Borosilicate glass parts with ground glass sealing surfaces
- Vacuum connection to integral base and flask cap is above filtrate exit level
- Avoids drawing filtrate droplets into vacuum tubing
- Funnel capacity: 300mL
- Flask capacity: 1L

APPLICATIONS:

Recommended for HPLC solvent filtration

ALERT:

Not recommended for use with flammable liquids

Description	Cat. No.	Each
With Fritted Glass Support	XX15 047 00	382.48
With Stainless-steel Screen	XX15 047 30	378.47

ACCESSORIES

Replacement Parts for Millipore* 47mm All-Glass Vacuum Filter Holder

Description	Cat. No.	Price
Funnel, 300mL, ground glass seal	XX10 047 04	Ea./85.43
Ground glass base and tubulated cap	XX15 047 02	Ea./184.69

PTFE gasket for stainless-steel support screen	XX20 047 03	Pk. of 25/75.38

Millipore* 47mm Hydrosol Stainless-Steel Vacuum Filter Holder

For particulate or biological contamination analysis via vacuum filtration

- For prefilter, use Millipore 35mm Type AP depth prefilter or 47mm Type AW prefilter
- Stopper fits standard 1L flask or filter manifold
- Not autoclavable with filter in place
- Funnel capacity: 650mL

INCLUDES:
Grounding set for use with flammable liquids; stainless-steel funnel, base, and filter support screen; anodized aluminum locking ring; nylon lockwheels; PTFE resin gaskets; silicone stopper.

Description	Cat. No.	Each
Replacement parts kit	**XX20 047 RK**	189.71

Millipore* 90mm Glass Vacuum Filter Holder

Vacuum filter aqueous, organic, or corrosive liquids for particulate contamination analysis

- Ground glass sealing surfaces
- Vacuum connection to integral base and flask cap is above filtrate exit level
- Prevents the drawing of filtrate into vacuum tubing
- Fittings: ¼" (6mm) O.D. tubulated-cap sidearm to vacuum
- Filter dia.: 90mm
- Funnel capacity: 1L

APPLICATIONS:
Recommended for HPLC solvent fltration

XX10 090 20

INCLUDES:
Borosilicate glass funnel, base, and tubulated cap; PTFE-coated, stainless-steel support screen; anodized aluminum spring clamp

NOTE:
Do not use with flammable liquids

Millipore* Chemical Duty Vacuum Pressure Pump

With a chemically resistant head and diaphragm for use with corrosive chemicals and solvents

- Cast aluminum pump head, housing, and regulator
- 813mbar (24"Hg) maximum vacuum
- 2.45bar (35 psig) maximum pressure
- 37L/min. (1.3 CFM) maximum flow rate
- Weight: 4.1kg (9.0 lb.)
- Dimensions: 8L × 7W × 7"H (20.3 × 17.8 × 17.8cm)
- ¼" stepped hose barb connections

WP6111560

INCLUDES:
70cm of ¼" dia. tubing; Millex* FA50 filter for in-line moisture protection

CERTIFICATIONS:
UL listed and CE marked

Millipore* Ultraviolet Sterilizer

Rapidly decontaminate 47mm Millipore filter holders between successive sample filtrations

- Prevents organism carryover on funnels
- Economical autoclaving alternative
- Holds up to three 47mm funnels and bases
- Sterilizes by exposing organisms to four germicidal UV lamps
- L × W × H: 13¼ × 17 × 9½" (337 × 432 × 241mm)
- Shipping weight: 21.6 lb. (9.8kg)
- 115V 60Hz

XX6370000

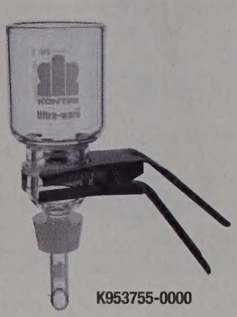
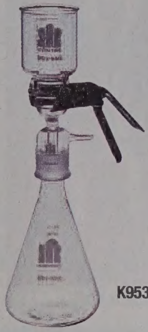
XX6370000	1871.00

Kontes* Ultra-Ware* 25, 47, and 90mm Microfiltration Assemblies

Vacuum filtration assemblies



K953755-0000



K953825-0000

25, 47 and 90mm Filter Holders

- Use with either flasks or manifolds
- Include silicone stoppers (No. 5 for 25mm models, No. 8 for 47 and 90mm models)

Models with Flasks

- Integral No. 2 vacuum connection in filter support base
- Designed to prevent contamination of vacuum line by filtrate droplets
- $ 40/35 joint connection to flasks
- Glass models eliminate phthalate contamination from silicone and neoprene stoppers, as well as metal contaminate extraction by acid-preserved samples; ideal for use with Empore* extraction discs

Models with Bottles

- Borosilicate glass adapter designed to fit media bottles directly
- Fritted glass support base connects directly to funnel assembly and to the bottle with special PBT caps and PTFE-faced silicone sealing rings
- Model K953800-5347 adds a removable Type 316 stainless-steel support screen for viscous or proteinaceous solutions
- Adapter has: GL-45 thread to 1L vacuum- and pressure-rated media-style bottle; polypropylene tubing adapter with size 108 Viton* O-ring

Filter Holders (Support Bases)

- **Glass**-coarse fritted glass support; for analysis of particulate or microbiological contamination
- **Replaceable Glass**-exchangeable if clogged or if sample-to-sample cross-contamination is a concern
- **Type 316 Stainless-steel**-metal support screen with glass support base; for viscous or proteinaceous solutions or to produce ultraclean filtrate
- **PTFE**-PTFE coating on fritted glass support and on funnel prevent membrane from adhering to ground glass surface; only these models permit autoclaving with membrane in place

INCLUDES:

Graduated glass funnel, anodized aluminum clamp, filter support base

REQUIRED ACCESSORIES:

25, 47 and 90mm filter holders with silicone stoppers require flask or manifold with vacuum connection

Contd. on next page.

Prices subject to change.

Nalge* Vacuum Filter Holder

For use in microbial and particulate analysis

09-747

- Tight fit prevents bypass even after autoclaving
- Reservoir graduated from 100 to 250mL in 25mL increments
- Aluminum clamp allows one-handed operation and easy membrane replacement
- Autoclavable

NCLUDES:

ugged polysulfone funnel; olypropylene copolymer cover with hree ports, three friction-fit TPE caps; upport plate for 47mm membrane; ilicone gasket; No. 8 stopper 9⁄16" hole); aluminum clamp

Mfr. No.	Cat. No.	Each
DS0315-0047	**09-747**	140.78

Whatman* Vacuum Filter Holders

recision-ground, 100% borosilicate glass faces

- Ensure secure clamping and integral sealing at membrane edge
- 47mm models have clearly printed graduation scales
- 90mm size has 1L capacity funnel for rapid filtration of viscous or heavily contaminated liquids, is useful for biological fluid filtration (except serum), and for industrial liquid filtration

Left to right: 09-907-2, -4, -6

APPLICATIONS:

ravimetric analysis filtration; ultraclean filtration; bacteriological control of ood, drink, pharmaceuticals, cosmetics; removal of particulates in solution; ucleic acid and protein analysis; HPLC solvent filtration

NCLUDES:

orosilicate glass funnel and base; anodized aluminum clamp; support creen (sintered glass or Type 304 stainless steel); rubber stopper No. 5 for 25mm diameter filters to fit 125mL flask or No. 8 for all others o fit 1000mL flask).

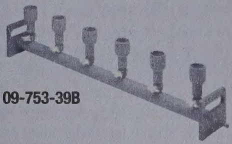
*Fisherbrand** PVC Vacuum Manifolds

For testing multiple samples by vacuum filtration



09-753-39B

- Accommodate vacuum filter holders and funnels using a No. 8 stopper
- Lightweight design efficiently uses lab space
- Each holder has two-way valve made of Type 316 stainless steel with Viton* seals
- Manifold body and funnel holders made of polyvinylchloride
- 1/4 NPTM connections to vacuum
- Not autoclavable; sanitize using ethanol or formaldehyde
- Maximum operating temperature: 55°C (130°F)

Type	Overall L × W × H	Cat. No.	Each
3 Place	17¾ × 4½ × 4½" (45.1 × 11.4 × 11.4cm)	**09-753-39A**	779.00
6 Place	34½ × 4¾ × 6¾" (87.6 × 12 × 17cm)	**09-753-39B**	1058.40

*Fisherbrand** Stainless-Steel Hydrolab Manifolds

For routine microbiological filtrations

- Support microanalysis funnels when multiple samples are run from one vacuum line
- Made from polished Type 304 stainless steel
- Anodized aluminum handles on both ends for positioning on benchtop
- Sturdy units have low center of gravity to avoid tipping
- Each branch is operated by three-way valve to permit attachment of vent filter
- Accept vacuum funnel using a No. 8 stopper
- Autoclavable
- Serrated vacuum hose connection accepts ⅜" (9.5mm) tubing from an appropriate vacuum source

09-753-36A

INCLUDES:

Manifold with hose connector and pipe plug; manifold handles; three-way valve assemblies with Type 316 stainless-steel bodies; Viton* rubber O-rings; funnel holders

Type	Overall L × W × H	Cat. No.	Each
3 Place	17¾ × 6 × 6" (45.1 × 15.2 × 15.2cm)	**09-753-36A**	1468.04

Millipore* Filter Holder Vacuum Manifolds

Provide vacuum support for simultaneous filtration of either three or six test samples

XX26-047-35, XX25-047-35, XX25-047-00

- Use Millipore glass, plastic or stainless-steel filter holders fitted with standard No. 8 perforated stoppers over the holder outlets
- Manifolds connect to single vacuum source and use separate control valves at each station for independent operation
- Use vent ports on each stainless-steel manifold station to attach Swinnex* filter holders or Millex* filter units to maintain sterility on the test filter's downstream side

Stainless-steel Manifolds

- Stainless-steel body, three-way valves, filter holder supports; anodized aluminum handles; stainless-steel hose connector, pipe plug
- Units are autoclavable at 121°C (250°F)

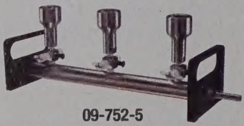
PVC Manifold

- Polyvinylchloride body; stainless-steel two-way valve; polypropylene hose adapters and handles
- Not autoclavable

Description	Cat. No.	Each
Stainless-steel Manifold, six-place	XX25 047 00	1904.00
Stainless-steel Manifold, three-place	XX25 047 35	1412.00
PVC Manifold, three-place	XX26 047 35	691.00

Nalgene* Vacuum Manifold

Widely spaced outlets permit easy funnel manipulation



09-752-5

- Filter funnel stems fit into No. 8 stoppers without interference
- PTFE stopcock on each valve shuts off flow when fewer than three outlets are used
- Simultaneous vacuum filtrations with increased filtrate volume in particulate and microbial analyses
- Use with Nalgene Analytical Filter Funnel 09-740-30B, or most filter funnels adaptable to No. 8 stopper
- Stainless-steel body with left and right handles

INCLUDES:

Three vacuum outlets, each with two-way valve and vent port; hose barb vacuum connector for ⅜" (9.5mm) I.D. tubing

Mfr. No.	Cat. No.	Each
DS0345-0001	09-752-5	1096.00

GE* Analytical Funnel

Two-piece design with no clamps or locking devices to manipulate

PFC000470

- Unique gravity-sealing design permits one-handed operation with no danger of filter bypass or sample leakage
- Solid, stable, easy to use, with no costly replacement parts
- Access points in the base are large, for easy insertion of forceps to seat or remove membrane
- Funnel and base are chemical-resistant polysulfone
- Graduated to 350mL in 50mL intervals
- Uses 47mm filter membranes
- Autoclavable

INCLUDES:

No. 8 stopper

Description	Cat. No.	Price
Complete unit	PFC0004701	Ea./137.74
Complete unit	PFC0004703	Pk. of 3/284.77

Manufactured by GE Infrastructure Water & Process Technologies.

Millipore* Stainless-Steel Pressure Filter Holders

Ultraclean or sterilize liquids or gases by pressure filtration

YY30 142 36 YY30 090 00

- Autoclavable with MF (mixed cellulose esters) filter in place
- Type 316 stainless steel
- Anodized aluminum legs
- PTFE O-rings

90mm Filter

- ¼ NPTF inlet
- Outlet with connections supplied for ⅜" I.D. (9.5mm) hose
- ⅛ NPTF upstream port for vent/relief valve

142mm Filter

- 1⅛ NPTF TC flange with clamps and adapters supplied for 9⁄16" I.D. (14mm) hose
- ⅛ NPTF upstream port for vent/relief

NOTE:

Other O-ring materials are available, as well as accessory cylinders to convert holders into pressure cells without separate reservoirs. Contact your Fisher Scientific Customer Service Representative for details.

For Filter Size	Dia. × Height[†]	Cat. No.	Each
90mm diameter	4¾ × 6¾" (121 × 171mm)	YY30 090 00	816.00
142mm diameter	7¼ × 10⅝" (184 × 270mm)	YY30 142 36	1696.00

[†] *Not including inlet connector.*

ACCESSORIES

Replacement PTFE O-rings for Millipore* Stainless-Steel Pressure Filter Holders

For Holder	Cat. No.	Price
90mm	YY30 090 53	Pk. of 4/81.00
142mm	YY22 142 53	Ea./34.00

*Trademark. See Trademark Reference.

Millipore* Zero-Headspace Extractor Hazardous Waste Pressure Filter System

Cannot pressurize unless completely assembled, assuring safe operation

YT30 090 HW

Pressure-filter without introducing air—preventing loss of volatiles—thanks to ZHE system's movable piston.

- Manual or automatic venting modes
- Type 316 stainless-steel body
- Molded polypropylene handwheels
- Viton*-A O-rings
- Max. pressure: 3.5 bar (50psi)
- Filter size: 90mm

Connections

- Top plate—⅛ NPTF upstream port for two-way SST valve with ⅛ NPTF for Luer fitting
- Bottom plate—¼ NPTF port for ¼" (6.4mm) elbow or ¼ × ⅛ NPT T-fitting, ¼ NPTF port for pressure-relief valve

COMPLIANCE:

Designated by the U.S. EPA as a suitable apparatus for TCLP

Cat. No.	Each
YT30 090 HW	1637.00

ACCESSORIES

Replacement Parts for Millipore* Zero-Headspace Extractor Hazardous Waste Pressure Filter System

Description	Cat. No.	Pack of
Top and bottom plate O-rings	**YY22 090 68**	6/103.39
Cylinder O-rings	**XX67 000 10**	3/105.39
Piston O-rings and wiper seal	**YT30 090 03**	1/58.29

Millipore* 142mm Hazardous Waste Pressure Filter System

Separates solid and liquid phases of waste samples

YT30 142 HW

Use for U.S. EPA Toxicity Test and Toxicity Characteristic Leaching Procedure (TCLP).

- Interior coating of PTFE resin prevents heavy metal contamination
- Wide entry port and removable top plate make introducing bulky samples easy
- Disassembles for easy cleaning
- Type 316 stainless steel; aluminum legs; molded polypropylene handwheels; seal of PTFE resin
- Dimensions: 7¼ dia. × 16⅝"H (184 × 422mm), plus inlet connector

Connections

- 1⅛ NPTF TC flange with clamps and adapters supplied for 9⁄16" I.D. (14mm) hose
- ⅛ NPTF upstream port for vent relief

Cat. No.	Each
YT30 142 HW	2000.00

LOOKING FOR MORE HARDWARE?

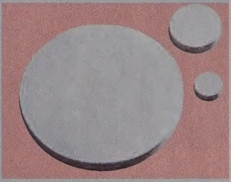
The **Environmental Express* ZHE+ Zero-Headspace Extractor** allows initial liquid/solid separation, extraction, and final extraction filtration of volatiles—without opening the unit. For more information,

Visit www.fishersci.com and search for ZHE Zero-Headspace

MEMBRANES

***Fisher**brand** General Filtration Membrane Filters

Useful for most filter applications



Left to Right: 09-719-2F, -2B (top), -2G

- Plain, white membrane filters
- Pure, biologically inert mixture of cellulose acetate and cellulose nitrate (MCE)
- Compatible with dilute acids and bases, aliphatic and aromatic hydrocarbons, and nonpolar liquids
- Filters wet readily with water and other fluids
- Contain no fibers or particles to contaminate filtrate
- Autoclavable

APPLICATIONS:

For all analytical, ultracleaning, and sterilizing applications at temperatures below 75°C (167°F)—except those involving esters, ether-alcohols, ketones, nitroparaffins or strong acids and bases.

Pore Size	Diameter	Cat. No.	Pack of
0.2µm	25mm	**09-719-2A**	100/60.25
0.2µm	47mm	**09-719-2B**	100/91.80

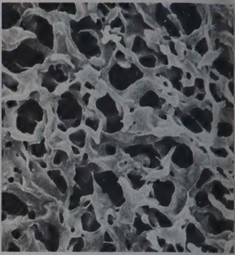
0.45µm	47mm	**09-719-2E**	100/90.35
0.45µm	142mm	**09-719-2F**	50/222.26
0.8µm	25mm	**09-719-2G**	100/60.33
0.8µm	47mm	**09-719-2H**	100/104.55

Millipore* Durapore* PVDF Membrane Filters

Recommended when maximum recovery is important

- Mean thickness: 125µm
- Typical refractive index: 1.42
- Autoclavable
- Hydrophilic form is made from modified polyvinylidene fluoride (PVDF); lower protein binding than nitrocellulose, nylon, or PTFE



VVLP 013 00

APPLICATIONS

Hydrophilic: clarification of air and other gases; sterilizing filtration of protein solutions, tissue culture media, additives, antibiotics, and alcohols; particulate removal; biological assays (receptor binding studies, TCA precipitates)

Hydrophobic: clarification of air/gases; sterilizing filtration of gases

TYPICAL CHARACTERISTICS

		Typical Flowrates		
Filter	**Mean Pore Size**	**Liquid[1]**	**Air[2]**	**Min. Bubble Point[3]**
VVLP	0.10µm	2.5	----	70psi
GVWP	0.22µm	6.9	----	50psi
GVHP	0.22µm	15	3	17psi
HVLP	0.45µm	29	----	22psi
HVHP	0.45µm	35	6	8psi
DVPP	0.65µm	69	----	14psi
SVLP	5.0µm	288	----	3psi

[1] *mL/min./cm² of filtration area at 20°C with differential pressure of 10psi. (Flowrates for hydrophilic types are based on water flow; for hydrophobic types, on methanol.)*

[2] *L/min./cm² of filtration area at 20°C with differential pressure of 10psi and exit pressure of 14.7psi.*

[3] *Differential pressure required to force air through the pores of a water-wet filter (methanol-wet for hydrophobic Durapore filters).*

MF-Millipore* Mixed Cellulose Ester Membrane Filters

Composed of mixed cellulose esters (nitrate and acetate)

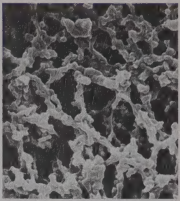
- Mean thickness varies from 105 to 180µm
- Typical refractive index varies from 1.495 to 1.512, depending on filter type
- Autoclavable at 121°C, except AA black and HA black series
- Biologically inert

Triton*-free MF-Millipore Filters

- For critical applications involving sensitive biological solutions, cell contact, or very small volumes
- Contain minimal amounts of wetting agent
- Lower water extractable table content than standard MF-Millipore filters

APPLICATIONS:

Clarification of fluids; sterilizing filtration of tissue culture media, additives, antibiotics; air monitoring; particulate analysis; particulate removal; biological assays (receptor binding studies, TCA precipitates, etc.)



VSWP 013 00

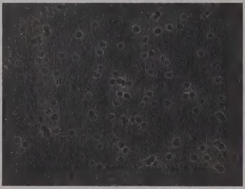
Millipore* Isopore* Polycarbonate Membrane Filters

Smooth glass-like surface—clearer sample observation

- Hydrophilic and nonhygroscopic
- No clearing is needed for most transmitted-light microscopy
- Water vapor equilibration not necessary
- Low, consistent ash and tare weights
- Nonreactive to most stains
- Mean thickness varies from 9 to 11µm
- Typical refractive index is 1.6
- Autoclavable at 121°C (250°F)



GTBP 013 00

APPLICATIONS:

Air analysis, cell biology, cell culture, bioassays, cytology, environmental analysis, epifluorescence

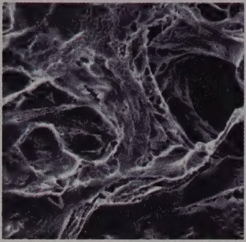
Millipore* Mitex* PTFE Membrane Filters

Jnlaminated for extreme chemical or temperature :onditions

- Membranes have no backing
- Mean thickness is 125µm
- Autoclavable at 121°C (250°F)



LSWP 013 00

APPLICATIONS:

larification of acids, bases and ryogenic fluids; clarification of ropellants; analysis of hydraulic luids; RNA isolation

YPICAL CHARACTERISTICS

ilter	Mean Pore Size	Typical Flowrates		Minimum Bubble Point[3]
		Methanol[1]	Air[2]	
S	5.0m	51.9	9	0.9psi
C	10.0m	126	14	0.5psi

mL/min./cm² of filtration area at 20°C with a differential pressure of 10psi.

L/min./cm² of filtration area at 20°C with a differential pressure of 10psi and exit pressure of 14.7psi.

Differential pressure required to force air through the pores of a methanol-wet filter.

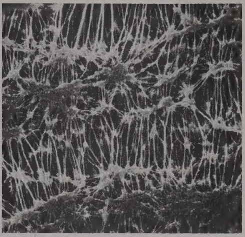
Millipore* Fluoropore* PTFE Membrane Filters

Hydrophobic membrane with laminated backing for easier handling

- Made from polytetrafluoroethylene bonded to high-density polyethylene
- Wetting with methanol or another low-surface-tension fluid renders the membrane hydrophilic
- Mean thickness varies from 145 to 200µm, depending upon filter type
- Autoclavable at 121°C (250°F)



FGLP 013 00

APPLICATIONS:

Clarification of acids, bases and solvents; clarification of alcohol solutions; UV spectroscopy

TYPICAL CHARACTERISTICS

Filter	Mean Pore Size	Typical Flowrates		Minimum Bubble Point[3]

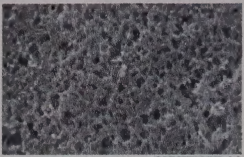
Millipore* Nylon Hydrophilic Membrane Filters

Filtration of aqueous or organic solutions



GNWP 025 00

- Resist most commonly used HPLC solvents
- Hydrophilic discs made of noncharged, unreinforced Nylon 66 in 0.2 and 0.45µm pore sizes
- Won't contaminate a sample with extractables
- Autoclaved or sterilized by EtO
- Thermal compatibility: ≤135°C (275°F)
- Absorbance: <0.002 absorbance units or 2mV, after 2 min. of column volume

APPLICATIONS:

Used in clarifying aqueous or organic solutions prior to HPLC analysis. Can be used with all common HPLC solvents.

TYPICAL CHARACTERISTICS

Filter	Mean Pore Size	Typical Flowrate Water[1]	Minimum Bubble Point[2]
GN	0.2µm	200	40psi
HN	0.45µm	250	35.5psi

[1] *mL/min./cm² of filtration area at 20°C with a differential pressure of 10psi.*

[2] *Differential pressure required to force through the pores of a water-wet filter.*

Diameter	Type	Cat. No.	Pack of 100

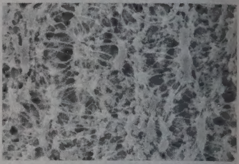
Millipore* LCR Hydrophilized PTFE Membrane Filters

Filtration of aqueous fluids with no wetting



FHLC 013 00

- Made of unlaminated PTFE resin
- White, hydrophilic cut discs for removal of particles larger than 0.5µm
- Used with all common HPLC solvents
- Will not contaminate a sample with extractables
- Wetting time: <5 seconds
- Thickness: 5.5mil (0.14mm) max.

APPLICATIONS:

Clarification of acids, bases, and cryogenic fluids, clarification of propellants, analysis of hydraulic fluids, RNA isolation, clarification of aqueous or organic solutions prior to chromatographic analysis

TYPICAL CHARACTERISTICS

Filter	Mean Pore Size	Initial Flowrate Water[1]	Bubble Point[2]
FHLC	0.5µm	>110 sec./500mL	9–13.2psi

[1] *Maximum, at 27" Hg across 47mm disc.*

[2] *Differential pressure required to force through the pores of a water-wet filter.*

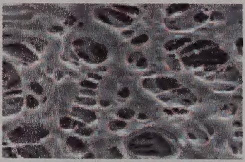
47mm	Plain	**FHLC 047 00**	298.00

Millipore* Express* PLUS Membrane Filters

NEW

Plain white polyethersulfone membranes provide ultrafast filtration for a variety of applications



- Hydrophilic, high-throughput, low-protein-binding
- Thickness: ≥150µm and ≤200µm
- Sterilization: by autoclave (121°C at 1 bar), EtO or gamma
- Bacterial endotoxins: 0.5 EU/mL
- Gravimetric extractables: <1.5%
- Flowrate: 40mL/min cm² at 2 bar, 25°C

APPLICATIONS:

Provide ultrafast filtration of tissue culture media, additives, buffers and other aqueous solutions. This membrane is also used in many ready-to-use sterile filtration devices.

Whatman* Anodisc* Filter Membranes

Compatible with a wide range of solvents and aqueous solutions

09-926 Series

- Consist of Anopore* inorganic membranes, with or without annular polypropylene support ring
- High-purity alumina matrix with a precise nondeformable honeycomb pore structure
- Unique capillary pore structure, uniform pore size and flat surface capture virtually 100% of particulates larger than rated pore size
- Porosity over 50% by volume and low surface adsorption, resulting in high flowrate
- Contain no monomers, plasticizers, adhesives, surfactants or wetting agents, for minimal sample interference
- Transparent when wet for minimal optical interference

APPLICATIONS:

In biochemical applications, membranes exhibit extremely low protein binding, immune to UV and gamma radiation, and stable to 400°C (752°F). In microscopic analysis, they provide more precise bacterial counts, easier focusing, low background fluorescence. Suitable for epifluorescent light, electron, direct/incident light, phase contrast, and differential interference microscopy.

Whatman* Type WTP PTFE Membranes

Chemically stable and inert to handle most aggressive solvents, acids and alkalis

09-900-7, -2

- PTFE stretched film, laminated to a nonwoven polypropylene support web
- Naturally hydrophobic
- 1.0µm size is generally used for sample prefiltering in HPLC analyses to protect columns against solid particles
- 0.2µm size is used in sterile venting of vacuum manifolds and sterile filtrate tanks and containers

APPLICATIONS:

Clarification of corrosives, solvents, and aggressive fluids; collecting moist dusts for subsequent analysis (0.5 and 1.0µm pore sizes); air and gas sterilization (0.2 and 0.5µm pore sizes)

NOTE:

Use up to 120°C (248°F); higher temperatures will cause laminate to soften.

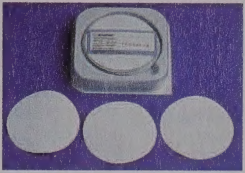
Whatman* Nylon Membranes

Flexible and durable for easier handling



09-902-3

- Pure nylon membranes
- Tear-resistant
- Filters most organic solvents
- Naturally hydrophilic, eliminating need for wetting agents and prewetting when filtering aqueous solutions
- Autoclavable; withstand temperatures to 135°C (275°F)

APPLICATIONS:

- Biotechnology applications include filtration of tissue culture media, microbiological media, buffers and solutions
- Used in chromatography to filter samples, aqueous and organic mobile phases, vacuum degassing

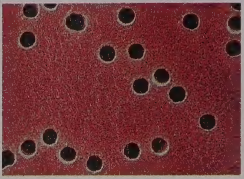
Whatman* Nuclepore* Polycarbonate Track-Etched Membranes

Lowest extractables of any membrane for environmental analysis



09-300-58

- High-grade polycarbonate film created using track-etch technology
- Precise pore size for accurate fractionation of particulates
- Smooth, flat surface for excellent surface capture
- High particulate visibility
- Low protein binding membranes
- Biologically inert
- Excellent chemical and thermal resistance
- Low, consistent ash and tare weights
- No shedding of particulates into filtrate
- High tensile strength

APPLICATIONS:

Common applications: general filtration, sample preparation, epifluorescence, clinical, and food and beverage testing. Other applications include environmental and air analysis, chemotaxis, cell biology, HPLC, liposome extrusion, environmental and fuel testing, pharmaceuticals, water microbiology, bioassays, and parasitology. Ideal for any study which views the collected sample on the membrane including optical, scanning electron (SEM) and transmission electron (TEM) microscopy, particulate analysis, and diagnostic cytology.

Whatman* Type WCN Cellulose Nitrate Membranes

Manufactured under strictly controlled conditions for improved performance

09-905-15, -18

- For most routine applications; can replace other general-purpose membranes without significant changes in technique
- Among the strongest of their type with noticeably improved flexibility and tolerating abuse without sacrificing integrity
- Low level of extractables—generally below that of other similar membranes
- Advanced manufacturing ensures narrow pore size distribution and minimal batch-to-batch variation
- Autoclavable at 121°C (250°F), with low shrinkage
- Overheating to 130°C (266°F) can be tolerated without damage
- May be autoclaved two or three times without major changes in physical properties
- Gridded circles available (Cat. No. 09-529-710 series)

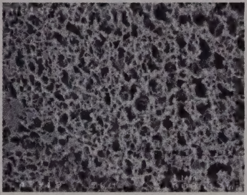
GE* Magna* Nylon Membrane Filters

Plain white nylon membranes offer low extractables, high uniformity

- Won't crack, tear, or distort in handling or creasing
- Resist heat, sterilization, and most organic solvents
- Hydrophilic, no wetting agents; extractable level <0.0015mg/cm
- Heatable, autoclavable up to 180°C (356°F)
- Broad chemical compatibility



R01SP01300

APPLICATIONS:

Permit use for aqueous filtration without wetting and organic solvent filtrations such as HPLC; for microbiological work, use 47mm/0.45µm size with grid

NOTE:

Not compatible with strong acids or bases

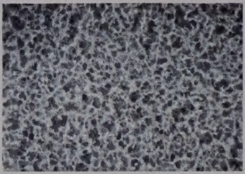
† Grid-style membranes.

GE* Nitrocellulose-Mixed Esters of Cellulose Membrane Filters



E01WP02500

- Cellulose nitrate/cellulose acetate polymers offer fast flow, high throughput, no contaminating fibers
- No cytotoxic wetting agents
- Hydrophilic; extractables <4%; biologically inert; <0.05% ash
- Gridded types for particle counting
- Thickness, 150μm (except 0.10μm membranes, 130μm)
- 0.22 and 0.45μm sizes are tested for microbial recovery, bacteria retention
- White membranes autoclavable at 121°C (250°F) for 20 minutes
- Black membranes provide dark background for particle analyses; not autoclavable

APPLICATIONS:

Microbiological determinations; industrial hygiene procedures; clarifying aqueous solutions; determination of lead, chromium, cadmium, beryllium, arsenic, airborne asbestos and other particulates

ORDERING INFORMATION:

In dispenser packs of 25 or 100. Magna Nitrocellulose 47mm membrane filters in 0.22 and 0.45μm thickness are also available in presterilized packs, as well as autoclavable packs suitable for onsite presterilization. Order online or contact your Fisher Scientific Customer Service Representative.

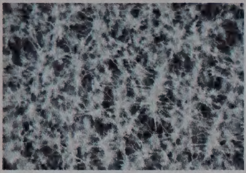
GE* Magna* PTFE Membranes

Naturally hydrophobic, plain white membranes

- Biologically inert, chemical resistant
- Easy to handle



F02LP01300

APPLICATIONS:

Laminated membranes are ideal for vent filtration, phase separation, aerosol sampling. Prewet with solvent to filter aqueous solutions. Pure PTFE types are useful for solvent, acid, and gas filtrations.

TYPICAL CHARACTERISTICS

Pore Size	Flowrates		Bubble Point[3]
	Water[1]	Air[2]	
Laminated PTFE Membranes

GE* PCTE Filter Membranes

Smooth, flat surface for even distribution in a single plane

PCTE Polycarbonate Track-Etched membranes are manufactured under Class 100 conditions to be exceptionally contaminant free. Exhibit negligible adsorption/absorption of filtrate, precise pore size, narrow pore distribution, low tare weights, low trace element level.

- Created with pore density and size precisely controlled
- Biologically inert
- Optically translucent (actually transparent in most pore sizes)
- Not stained by most solutions
- Nonhygroscopic
- Superior strength, chemical resistance, thermal stability
- Autoclavable

Typical Characteristics

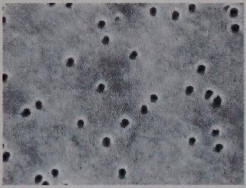
- Thickness: 6 to 10µm
- Tare weight: 1.0mg/cm^2
- Tensile strength: >3000psi
- Residual ash: 0.92mg/cm^2
- Specific gravity: 0.94 to 0.97
- Minimum burst strength: 10psi
- Max. use temperature: 140°C (284°F)

PCTE Plain Hydrophilic Membranes

- Can be made hydrophobic

APPLICATIONS:

Recommended for viewing sample on filter surface: observation of sample with optical or electron microscopes; cold sterilization, tissue culture, fractionation, blood studies, virology, general separations.



09-732

MICROBIOLOGICAL ANALYSIS

*Fisherbrand** Water-Testing Membrane Filters

Nitrocellulose membrane filters

- Gridded to aid in counting and colony differentiation
- 0.45µm pore size with 47mm diameter
- Fit standard 2" (5cm) Petri dishes

09-719-555

APPLICATIONS:
Designed for determining bacterial levels, including coliforms, in water, sewage, foods, and filterable beverages

ORDERING INFORMATION:
Individually wrapped packs feature filters individually sealed in peel-back envelopes without absorbent pads. Bulk packages contain ten resealable envelopes, each containing ten filters and ten absorbent pads.

INCLUDES:
Certificate of Analysis supplied with each filter pack

COMPLIANCE:
Comply with applicable EPA standard methods and ASTM* specifications for drinking water analysis. Certified to meet stated specifications for physical, chemical, and biological properties including extractables and recovery and retention of indicator organisms.

NOTE:
Autoclave nonsterile packs before opening

Pore Size	Packaging	Cat. No.	Pack of
0.45µm	Individually Wrapped, Sterile	**09-719-555**	600/247.92
0.45µm	Bulk Packed, Nonsterile	**09-719-1C**	100/56.80

LOOKING FOR ENVIRONMENTAL TESTING MATERIALS?

Fisher Scientific offers a large selection of materials for environmental and wastewater testing. See the Water/Wastewater section.

Millipore* Microbiological Analysis Membrane Filters

Optimized for MF method microbiological analysis of water or other liquids

- MF-Type (mixed cellulose esters) filter membranes
- 0.45µm (Type HA) designed to give complete retention and maximum recovery of total coliforms and fecal coliform bacteria
- 0.7µm (Type HC) ideal for fecal coliform analyses
- Use 0.22µm membranes where 0.45µm pore size is not sufficient
- For beverage analysis, choose membranes with 0.8µm pore size

COMPLIANCE:

Certified to meet *Standard Methods for the Examination of Water and Wastewater* requirements

Millipore* EZ-Pak* Membranes and Dispenser

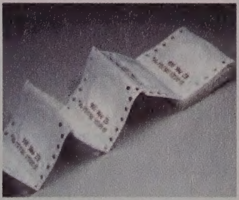
Sterile, ready-to-use membranes eliminate contamination risk, save time

Press lever to uncover half of membrane surface for easy retrieval with forceps; otherhalf remains in protective packaging. Unused membranes remain safely packed in pleated band.

09-719-9 Dispenser with EZHAWG474 membranes.

Dispenser

- Stainless-steel casing with epoxy-based paint finish and Ultem* rollers; cast-aluminum
- Eliminates contamination risk of opening and detaching peel-back envelopes of sterile membranes
- Membranes load easily
- Dispenser dimensions: 9¼L × 6⅜W × 9½"H (23.5 × 16 × 24cm); weight: 5½ lb. (2.4kg)



Pleated band carries 150 individually sealed EZ-Pak membranes.

EZ-Pak Membranes

- Mixed ester cellulose membranes are 47mm in diameter with 0.45 or 0.8µm pore sizes
- White membranes ideal for particle counting
- Black membranes facilitate colony counting by improving contrast of lactic bacteria colonies in beer and wine analysis and yeast colonies in soft drink testing
- Suitable for testing according to international standards for drinking, bottled, and mineral water analysis
- No special precautions needed, even for extended times between uses
- Used packaging film and paper are collected on spool for easy discarding

ORDERING INFORMATION:

Membranes are individually wrapped and come in pleated-band formatted cartridges of 150. Each pack includes four cartridges (600 membranes in all). Membrane catalog number, lot number, sterilization date, pore size, and sequential number from 1 to 150 for each membrane cartridge are printed on clear, protective cover.

COMPLIANCE:

Meet guidelines for *Standard Methods for the Examination of Water and Wastewater*

Millipore* Microfil* Filtration System

Convenient filtration system uses presterilized funnels and membranes on lever-action filtration support

MIAC 01P 01 (left) and MIAC 03P 01

- Disposable, stackable, recyclable polypropylene 100mL or 250mL funnels
- Eliminates autoclaving and minimizes waste
- Manifold-mounted supports for laboratory use or stand-alone supports for onsite filtration
- "Push-fit" funnels seal tightly to manifold supports without clamps or O-rings
- Leak-free operation and uniform microorganism recoveries
- Faster than all-glass filter apparatus
- Lever breaks vacuum and lifts membrane for removal with forceps

Membrane Filters

- 0.22µm pore size for specific test regulations
- 0.45µm for general microbiological analysis
- 0.7µm for chlorinated effluents
- 0.8µm for yeast or molds applications
- 100mL funnels are available with convenient accessory dispensers

INCLUDES:

47mm gridded MCE membrane filters or EZ-Pak* membrane cartridge

COMPLIANCE:

CEN, *Standard Methods for the Examination of Water and Wastewater,* WHO guidelines

Millipore* Microfil* V Filtration Device

Faster and easier than conventional filter holders used to test drinking water

MVHA WG1 24

Uniform microorganism recovery is promoted by unique "push-fit" seal; smooth, hydrophobic funnel surface reduces aqueous sample residues sticking to funnel walls; and support's convex shape eliminates membrane distortion, thus maintaining uniform contact between membrane and medium surface.

- No need to assemble filter holders, clean funnels, or sterilize filter support after each filtration
- Microfil V filtration device snaps off the carrying tray and onto a standard No. 8 stopper or a vacuum syringe with Luer connection
- Funnels attach with "push-fit" seal to prevent sample bypass without clamps or O-rings
- Filter support has a curved edge to easily remove membrane after filtration while vacuum is still applied

ORDERING INFORMATION:

Sold in three trays of eight

INCLUDES:

Filtration device; 100mL polypropylene funnel; white, gridded sterile 47mm MCE membrane with 0.22 or 0.45µm pore size

COMPLIANCE:

Conforms to international standards for testing drinking water, *Standard Methods for the Examination of Water and Wastewater,* and WHO *Guidelines for Drinking Water Quality*

CERTIFICATIONS:

Membrane is certified in accordance with *Standard Methods for Coliform Analysis*

Filter Pore Size	Cat. No.	Pack of
0.22µm	**MVGS WG 124**	24/91.00
0.45µm	**MVHA WG 1 24**	24/83.00

Millipore* Pad Dispenser

Reduces contamination risks

AP10 045 S1

- Rapidly dispenses large numbers of absorbent pads without individual forceps handling
- Plastic dispenser comes with tube that holds pads
- Sterile pads are absorbent and conform with requirements of *Standard Methods for the Examination of Water and Wastewater*

Description	Cat. No.	Price
Pad Dispenser with 200 Sterile Pads	**AP10 045 S1**	Ea./54.00
Sterile Pads	**AP10 045 S0**	Pk. of 1000/128.00

*Trademark. See Trademark Reference.

Prices subject to change.

Millipore* Microfil* S Filtration Devices

Fast, dependable alternative to conventional multi-step methods

Devices consist of a funnel, protective lid, and filtration support so routine microbiological testing is fast and easy.

MVHA WGS 24

- Ensure consistent recovery of microorganisms
- Smooth, hydrophobic funnel surface repels aqueous sample residues to ensure that microorganisms are collected on the membrane, not on funnel walls
- Convex support shape eliminates pleating and distortion of membrane due to expansion
- Three membrane selections offer versatility for your specific application

Benefits

- Presterilized, individually packaged
- No membrane handling prior to filtering
- No filter holders, funnels and attachments to assemble and sterilize
- No sterilizing the filter support after each filtration
- Protective lid reduces external contamination risk
- Pre-assembled to speed sampling and shorten preparation
- Easy-to-remove funnel and membrane reduce test time

COMPLIANCE:

Comply with USP/EP Guidelines. Certificate of Quality demonstrates that the device has been quality-control tested with Pharmacopoeia organisms and demonstrates acceptable growth.

Millipore* Hydrophobic Edge Membranes

Nonwetting edge prevents solution intrusion under holder sealing rings

HAEP 047 A0

- Hydrophobic edge membranes are standard MF-Type (mixed cellulose ester) filters
- 47mm diameter

APPLICATIONS

For microbiological and sterility testing of antibiotics and bacteriostatic drugs, as well as for filling machine operations

Hydrophobic 3mm Edge Membranes

Millipore* PetriSlide* Containers

Use in place of Petri dishes

Sterilized polystyrene storage and examination containers for culturing microorganisms.

PDMA 047 00

- Hold 47mm filter securely in place
- Transparent cover allows microscopic examination without removal
- Rectangular base has rounded corners for mounting on microscopic stage
- Stored in cartons or standard slide cases
- Use pure cellulose pads for microbiological analysis
- Use without pads for contamination analysis

Description	Cat. No.	Pack of 100
With pads	**PDMA 047 00**	37.00
Without pads	**PD15 047 00**	52.00

Nalgene* Analytical Test Filter Funnels

Low-cost, disposable, sterile filter funnels for microbiological analysis testing

Graduated, polypropylene funnel separates easily for access to membrane.

- High-impact polystyrene collars
- Preassembled and sterile
- Adapters accommodate No. 8 stoppers for use with ½" hole in vacuum manifolds or filter flasks
- Designed for single use only
- 47mm diameter cellulose nitrate membrane
- 250mL size is useful when testing beverages that may foam

APPLICATIONS:

Test water quality, foods, beverages, pharmaceutical quality control and raw material, as well as sterility testing and finished product QC

INCLUDES:

Six funnel adapters with each case

COMPLIANCE:

0.45µm model is certified to meet requirements of APHA *Standard Methods* for water quality work.

09-740 Series

Pore Size	Membrane Color	Mfr. No.	Cat. No.	Case of 50
100mL Funnel Capacity				
0.2µm	White	145-0020	**09-740-30G**	173.50

0.45µm	White with gray grid	145-2045	**09-740-30K**	191.50

Nalgene* Sterile Analytical Filter Units

Disposable, preassembled, presterilized units with removable membranes

- Upper chamber snaps away from receiver for retrieval of membrane with sterile forceps
- EtO-sterilized, individually wrapped
- Provide superior recovery and growth of microorganisms
- Receiver is graduated from 20 to 115mL
- 0.2µm size is ideal for sterility tests
- 0.45µm size has gray grid

Lower left: 09-740-308; right: 09-740-21A

APPLICATIONS:

Culturing; membrane analysis, such as water quality testing; and cold sterilization in field work

INCLUDES:

Polystyrene cover; upper chamber with reference mark at 100mL and receiver; removable, 47mm Triton*-free cellulose nitrate (CN) membranes; cellulosic support pad; cellulosic vent plug side arm; quick-disconnect tubing adapter; and color-coded blue support plate.

COMPLIANCE:

0.45µm size conforms to Specification 909A, B and C of APHA *Standard Methods*, 16th ed.; EPA certification sheets included.

Membrane	Pore Size	Mfr. No.	Cat. No.	Pack of 12	Case of 6 Pack
CN	0.2µm	130-4020	**09-740-21A**	102.50	410.00
CN	0.45µm	130-4045	**09-740-21B**	102.50	410.00

Filter Funnel

Safer, easier to use than cumbersome glass and metal funnels

- Disposable, presterilized funnel
- Removable 47mm diameter membrane for use with filtering flasks and manifolds
- 0.45µm Triton*-free cellulose nitrate membrane with gray grid
- EtO-sterilized, individually sealed in plastic bag

INCLUDES:

115mL upper chamber with reference mark at 100mL; polystyrene cover; membrane; support pad; polystyrene support plate/funnel that fits a stopper or adapter with 9⁄16" hole; quick-disconnect adapter for ¼ or 5⁄16" tubing. Each pack of 12 funnels includes one vacuum gasket that replaces stopper or adapter with 9⁄16" or larger opening.

COMPLIANCE:

Membrane conforms to APHA *Standard Methods*, 16th ed., Section 909A, B, C. Meets EPA requirements for water quality work.

Membrane Dia.	Pore Size	Mfr. No.	Cat. No.	Pack of 12	Case of 6 Pk.
47mm	0.45µm	140-4045	**09-740-30B**	109.94	439.75

Millipore* Filter Forceps

Handle membrane filters without damage

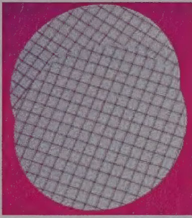
- Made from highly polished stainless steel with beveled, unserrated tips
- Sterilize by autoclaving or flaming

XX62 000 06

Cat. No.	Each
XX62 000 06	12.07

Whatman* Type WCN Gridded Cellulose Nitrate Membranes

White cellulose nitrate membranes, recommended for the majority of routine applications



09-529-710

- Improved strength and flexibility to tolerate abuse without sacrificing integrity
- Low extractable levels—approximately 2%
- Autoclavable at 121°C (250°F), with low shrinkage
- Can be heated to 130°C (266°F) without damage
- Can be autoclaved two or three times without major changes in physical properties
- Gridded surface (3.1mm intervals) make filters ideal for colony counting after incubation
- Special nontoxic ink used is completely free from bacterial growth inhibitors
- Manufactured under strictly controlled cleanroom conditions
- Pore size: 0.45µm

ORDERING INFORMATION:

Autoclavable pack has 10 envelopes of 10 filters/pads for sterilization in the microbiological laboratory

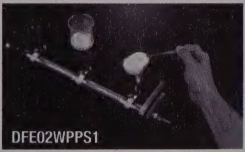
GE* Disposable Sterile Analytical Filter Funnels

Preassembled, sealed, sterile units for aqueous samples

- GE Nitrocellulose-Mixed Esters cellulosic membranes have 14.4cm^2 (2.23 sq. in.) filtration area
- Tape-seal design allows clean removal of membrane from the funnel after filtering



APPLICATIONS:

Quality control, microbiological, and water/wastewater testing; patch testing of hydraulic and boiler fluids; sample clarification

INCLUDES:

115mL funnel, base, polystyrene cover, 47mm white membrane with polypropylene support pad tape-sealed into funnel base, extender for adapting the unit for side arm flask filtrations

Pore Size	Flowrate† (mL/min./cm^2)	Type	Cat. No.	Pack of

GE* Presterilized 47mm Membranes in 1+ PACs

Consistent porosity plus high strength

E04WG047S2

Gamma radiation sterilized—no ethylene oxide residue to contaminate solutions.

- Naturally hydrophilic
- Biologically inert
- Exceptional strength
- 47mm diameter fit standard 2" (5cm) Petri dish
- Gridded surface

Magna Nitrocellulose Mixed Esters

- White membranes are mixed esters of cellulose

Magna Nylon

- White membranes made by impregnating nylon onto an inert nonwoven polyester support
- Dimensionally stable—won't tear, crack, break or distort

APPLICATIONS:

For effective retention and recovery of *E. coli* bacteria, stressed organism recovery, sterility and bioburden testing in QC/QA laboratories

ORDERING INFORMATION:

Membranes are individually wrapped in peel-open pouches, with or without absorbent nutrient pads. Each pack contains certificate guaranteeing specifications in *Standard Methods for the Examination of Water and Wastewater.*

CERTIFICATIONS:

Certified to meet APHA standards

TYPICAL CHARACTERISTICS

Pore Size	Flowrates		Bubble Point[3]
	Water[1]	Air[2]	
0.10µm[4]	7	1	80psi
0.22µm	19	2	52psi
0.45µm	50	4	30psi
0.65µm	128	9	14psi
0.80µm	198	17	9psi
1.2µm	265	20	9psi
5.0µm	650	34	6psi

[1] In mL/min./cm^2 of filtration area, measured at 520mmHg (10psi, 20°C (68°F).
[2] In L/min./cm^2 of filtration area, measured at 520mmHg (10psi, 20°C (68°F).
[3] Pressure at which air is first forced through the pores of water-wet membrane.
[4] 0.10µm membranes are 130µm thick; all others, 150µm thick.
Manufactured by GE Water & Process Technologies.

BEFORE YOU BUY SYRINGE FILTERS

TECHNICAL TIP:
Never reuse a syringe filter, even if it looks perfectly clean. Whatman products filter out extremely fine particulate that may not be visible to the naked eye.

Ensure the consistency of your results by discarding filters after a single use.

HOW CAN FILTRATION HELP YOU?

Syringe filters are a cost-effective way to improve the quality of HPLC analysis, improve consistenc column life, and reduce maintenance. By removing particulates before the sample enters the colu Whatman syringe filters allow unimpeded flow. Without particulates to create obstructions, your will work more efficiently and last longer.

In addition to HPLC, syringe filters have a multitude of other applications. A syringe filter adds a fe and a minimal expense to your testing process, but you will see a big return on your investment.

WHAT TO CONSIDER WHEN CHOOSING A SYRINGE FILTER:

- **Sample Type**—Choose a membrane compatible with the sample—e.g., some mem bind proteins
- **Solvent Type**—Consider solvent compatibility of filtration membrane
- **Particle Retention**—Choose appropriate pore size for application
- **Application/Analysis Type**—e.g., HPLC-certified filters for HPLC applic
- **Sample Volume**—Choose appropriate diameter filter
- **Amount of Particulates in Sample**—High particulate loaded sam require a syringe filter with a prefilter
- **Automated or Manual Filtration**—Some filter designs are opt automation
- **Sterility**—Must the syringe filter be sterile?

SYRINGE FILTERS

*Fisherbrand** Nonsterile Wall-Mount Dispenser with 25mm Syringe Filters

Handy 150–filter dispenser box

- Mounts on wall or cabinet, freeing up counters and valuable drawer space
- Attaches simply with Velcro* fastening strips
- Reclosable tip-out drawer puts filters within easy reach for one-at-a-time use

Nylon Membrane

- Excellent chemical resistance and low protein binding
- Ideal for aqueous/organic/HPLC applications
- Hydrophilic

PTFE Membrane

- Hydrophobic PTFE membrane has low protein binding and great temperature resistance
- Ideal for degassing/clarifying aqueous and solvent samples

PVDF Membrane

- Hydrophilic membrane binds far less protein than nitrocellulose, nylon or PTFE
- Ideal for filtration of protein-containing aqueous, mild organic solutions and other biological/biotech solutions

09-730-25

ORDERING INFORMATION:

Available with filters having 0.2, 0.22, and 0.45µm pore sizes and four membrane types

Membrane Type	Pore Size	Cat. No.	Pack of 150
Nylon	0.2µm	**09-730-16**	322.85
	0.45µm	**09-730-17**	324.85
PTFE	0.2µm	**09-730-19**	318.00
	0.45µm	**09-730-21**	331.81
PVDF	0.22µm	**09-730-25**	315.00
	0.45µm	**09-730-27**	314.00

*Fisherbrand** Syringe Filters

Low hold-up volume—recover virtually all of your sample after filtering

Tested for 100% membrane and housing integrity, eliminating concerns about fluid loss.

09-719D

PVDF* Membrane

- Hydrophilic membrane binds far less protein than nitrocellulose, nylon or PTFE
- Ideal for filtration of protein-containing aqueous, mild organic solutions and other pharmaceutical/biological/biotech solutions
- Sterilized by gamma radiation

Nylon Membrane

- Excellent chemical resistance and low protein binding
- Ideal for aqueous/biological (filters sterilized by gamma radiation) and aqueous/organic/HPLC (nonsterile filters) applications
- Hydrophilic

PTFE Membrane

- Hydrophobic PTFE membrane has great temperature resistance
- Nonsterile
- Ideal for degassing/clarifying aqueous and solvent samples

Mixed Cellulose Ester (MCE) Membrane

- Hydrophilic membrane has fair chemical and temperature resistance
- EtO sterilized
- Use for clarifying or sterilizing aqueous solutions

ORDERING INFORMATION:

Available in 0.22 and 0.45µm pore sizes

Membrane	Pore Size	Diameter	Cat. No.	Pack of

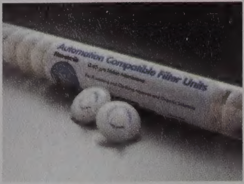
Millipore* Automation Compatible Filters

Trouble-free performance on a variety of automated systems

Use with Zymark* BenchMate*, TPW* II, and MultiDose* workstations, as well as Zymate* stations that use filtration.



SLHN DZ5 NZ

- Pressure-resistant, high-density polyethylene housing prevents instrument stoppage
- Some membranes also include a borosilicate glass fiber prefilter to process solutions containing high particle levels
- Nonsterile
- Hydrophilic Durapore* PVDF membrane: For lowest protein binding sterilization/clarification of aqueous and mild organic solutions
- Hydrophilic PTFE membrane: Low protein binding, LCR membrane for processing and clarifying aqueous and organic solutions
- Nylon membrane: Broad chemical compatibility for processing and clarifying aqueous and organic solutions
- Glass Fiber B Prefilter: For processing and clarifying aqueous and organic solutions containing high particle levels

ORDERING INFORMATION:

Filter units come in packs of 200 (8 tubes containing 25 filter units that load directly onto the system) or in bulk packs of 1000 (without tubes)

Membrane	Pore Size	Cat. No.	Pack of
Hydrophilic PVDF	0.45µm	**SLHV DZ5 NZ**	200/420.00
	0.45µm	**SLHV DZ5 NK**	1000/1499.00

TYPICAL CHARACTERISTICS

Diameter	25mm
Volume	<100mL
Effective Filtration Area	3.9cm²
Filter Hold-up Volume (after Air Purge)	<100µL (for units with membrane only) <200µL (for units with membrane and prefilter)
Pressure Limit	100psi
Temperature Limit	45°C (113°F)

Millipore* HPF Millex* Nonsterile Syringe Filters

Up to 50% greater throughput and easier filtration than traditional syringe filters

SLHVM25NS

- Choice of two different media for better performance
- Graduated glass fiber prefilter (10.0 to 0.7µm) to remove larger particles
- 0.45µm membrane filter for fine filtration
- Low-extractable polypropylene housing

PVDF Membrane

- Hydrophilic, Durapore* low-protein-binding membrane
- Recommended for filtering proteinaceous solutions

Nylon Membrane

- Provides broad chemical compatibility
- Recommended for filtering solvents

NOTE:

Filters SLHVM25NZ and SLHNMZ5NZ are Automation Certified* by Zymark* for use with their workstations

Membrane	Pore Size	Cat. No.	Pack of
HPF Millex-HV			
PVDF, with graduated glass fiber prefilter	0.45µm	**SLHVM25NS**	50/130.00
	0.45µm	**SLHVMZ5NZ**	100/520.00
	0.45µm	**SLHVM25NK**	1000/1584.00
HPF Millex-HN			
Nylon, with graduated glass fiber prefilter	0.45µm	**SLHNM25NS**	50/134.00
	0.45µm	**SLHNMZ5NZ**	100/520.00
	0.45µm	**SLHNM25NK**	1000/1632.00

Millipore* Millex* Nonsterile Syringe Prefilters

Use to prefilter contaminated solutions

With Type AP 20 glass fiber (2.0µm nominal pore size) in polyvinyl chloride (PVC) or polypropylene (PP) housings.

- SLAP 025 50 has female Luer-Lok* inlet and male slip Luer outlet
- SLAP 050 10 has stepped hose barb/female slip Luer interior inlet and outlet

Membrane/Housing	Pore Size	Diameter	Cat. No.	Pack of
AP 20 Glass Fiber/PVC	2.0µm	25mm	**SLAP 025 50**	50/78.00
AP 20 Glass Fiber/PP	2.0µm	50mm	**SLAP 050 10**	10/47.00

Millex Selection Guide

This guide will help you decide which Millex unit fits your requirements.

SL Series

Determine the Application	
For Particle Removal:	**Choose Unit with Pore Size**
Fine	0.2µm
Medium	0.45 to 0.8µm
Coarse	2.0 to 5.0µm
Determine the Solution	
For Solution:	**Choose Unit with Membrane/Housing**
Aqueous Solutions	Durapore PVDF, hydrophilic PTFE, nylon
Organic Solutions	Fluoropore hydrophobic PTFE, hydrophilic PTFE
Aqueous/Organic Solutions	Durapore PVDF, hydrophilic PTFE, nylon
Determine the Volume	
For Volume:	**Choose Unit with Filter Diameter**
<1mL	4mm
1–10mL	13mm
10–100mL	25mm

Millipore* Millex* Sterile Syringe Filters

Ready-to-use syringe-driven units, designed for sterilizing and clarifying sterile solutions

- 100% integrity tested, individually packaged, and sterilized
- Female Luer-Lok* inlet and male Luer slip outlet
- Manufactured in a controlled environment using an automated process
- Human hands never touch the filter during assembly
- Color-coded band clearly indicates which membrane is inside
- 0.2µm filters are sterilizing grade
- Larger pore sizes are for clarification and prefiltration
- Include a Certificate of Quality

SLGP 003 RS

Millipore Express* (PES) membrane

- Provides a unique combination of speed and six times less protein binding than competitive polyethersulfone membranes
- Recommended for sterile filtering protein solutions, tissue culture media, and additives
- Gamma irradiation sterilized

MF-Millipore* (MCE) membrane

- Mixed cellulose ester provides reliable, general purpose filtration
- Use for sterilization/clarification of water, buffers, and salt solutions
- EtO sterilized

Durapore* (PVDF) membrane

- Lowest protein binding sterilization/clarification of biological solutions
- Made of polyvinylidene fluoride
- Gamma irradiation sterilized

COMPLIANCE:

Meet USP Class VI Biological tests for plastics. All 33mm filters are CE-marked and suitable for both medical and laboratory applications outside the U.S.

TYPICAL CHARACTERISTICS

† Medical filter unit, should only be used in the U.S. for direct patient care and hospital pharmacy applications

‡ With male Luer-Lok outlet.

Millipore* IC Millex* Nonsterile Filter Units

LH Filter Units

Low-extractable filter specifically designed for this product ion chromatography

Low binding membrane, low IC extractables (chloride and nitrate <0.20µg/mL, sulfate <0.50µg/mL). Clarifies both aqueous and mild organic solutions.

SLLG C13 NL

- Remove particulates from aqueous and mild organic solutions
- High-density polyethylene housing and low binding hydrophilic polytetrafluoroethylene (PTFE) membrane are both low in extractables
- 13mm units are recommended for filtering volumes from 1 to 10mL
- 25mm units are recommended for filtering volumes from 10 to 100mL
- Certified for reliable performance
- Lot release criteria include: bubble point, flowrate, housing pressure, downstream particles, and IC levels

ORDERING INFORMATION:

Each unit individually packaged to minimize risk of extraneous ionic contamination

INCLUDES:

Certificate of quality with complete specifications

TYPICAL CHARACTERISTICS

Diameter	13mm	25mm
Volume	1–10mL	10–100mL
Filtration Area	0.65cm²	3.9cm²
Flowrate at 25°C	3mL/min. at 0.7bar (10psi)	55mL/min. at 0.7bar (10psi)
Hold-up Volume (after air purge)	≤25µL	≤100µL
Pressure Limit	100psi	100psi
Temperature Limit	45°C	45°C

LG Filter Units

For clarification of both aqueous and mild organic solutions

13 and 25mm low-extractable filters designed specifically for ion chromatography. Hydrophilic PTFE membrane is low-binding, low-extractable polytetrafluoroethylene; removes particulates larger than 0.2µm from aqueous and mild organic solvents for cleaner IC spectra.

- Low-extractable HDPE housing
- Inlet connection: female Luer-Lok*
- Outlet: male Luer slip
- Tested to ensure compliance with strict quality control standards

ORDERING INFORMATION:

Each unit is individually packaged to minimize risk of extraneous ionic contamination

INCLUDES:

Certificate of quality with complete specifications

TYPICAL CHARACTERISTICS

Diameter	13mm	25mm
Volume	1-10mL	10-100mL

PTFE/HDPE	0.2µm	25mm	**SLLG C25 NS**	50/144.00

Millipore* Millex* Nonsterile Syringe Filters for Sample Preparation

Remove particulates, reduce signal-to-noise ratios, maintain flat baselines

Choose from a variety of membrane types, diameters and pore sizes. Available with tube outlets for autosampler vials and cuvets. Polyethylene (PE) housings or polyvinyl chloride housings (next page).

SLHA 025 NB

Millipore Express* Plus PES Membrane

- Polyethersulfone membrane provides low protein binding and ultrafast filtration of tissue culture media, additives, buffers, and other aqueous solutions

Durapore* PVDF Membrane

- Lowest protein binding
- Use for aqueous and mild organic solutions

Durapore Hydrophobic PTFE Membrane

- Compatible with more aggressive organic solutions
- Can also be used to filter aqueous solutions

Nylon and Hydrophilic PTFE Membranes

- Broad chemical compatibility
- Choose for filtering aqueous and organic solutions
- Hydrophilic PTFE is low protein binding

MF-Millipore* MCE Membrane (see next page)

- Mixed cellulose ester membrane for sterilization/clarification of water, buffers, and salt solutions

Filter units with PE housing

All have female Luer-Lok* inlet and male Luer slip outlet except as noted in table.

Nalgene* Nonsterile Syringe Filters

Nontoxic Triton*-free membranes integrally sealed within housing to eliminate bypass, minimize fluid loss

Choice of 4mm diameter (for volumes to 1mL), 13mm (for volumes from 2 to 10mL), or 25mm (for volumes from 10 to 50mL). Use with both slip-fit and locking-type Luer syringes; accept standard hypodermic needles. 25mm membranes are supported on both sides, for vacuum or pressure filtration.

Surfactant-free Cellulose Acetate (SFCA)

- Low protein binding
- Good chemical resistance to alcohols and various hydrocarbons
- Have no wetting agents
- 25mm diameter membrane
- With modified acrylic housings
- Membrane of choice for sterilization

Cellulose Acetate (CA)

- Low protein binding
- Ideal for sterilization and clarification of biological/immunological samples, cell culture media components, biological fluids, most other aqueous solutions and reagents
- 4 or 25mm diameter membranes
- With polypropylene or modified acrylic housings

Nylon

- Naturally hydrophilic, low extractables
- Useful for sterilizing cryoprotectants such as DMSO and with aqueous/biological and nonaqueous/HPLC/GC applications
- 4 or 25mm diameter membranes in polypropylene housings

4mm Diameter Filters

- Excellent for small-volume assays such as EIA and ELISA.
- Sample volume size: 0.5 to 1.0mL.
- Housings are color coded.

NOTE:
All 4mm filters are also available in case quantities. Contact your Fisher Scientific Customer Service Representative for details.

09-740 Series

PTFE

- Naturally hydrophobic
- Ideal for sterile venting of air or other gases during filtration
- 13 or 25mm diameter membrane in polypropylene housing that is resistant to corrosive acids and bases, organic solvents
- Excellent for HPLC/GC solvent filtration

Polyethersulfone (PES)

- Higher flowrates, lower protein binding and lower extractables than cellulosic membranes
- Naturally hydrophilic; contains no wetting agents
- 13 or 25mm diameter filters in modified acrylic housings

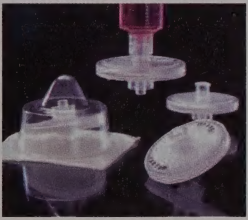
Nalgene* Syringe Prefilter and Prefilter Plus

Clarify small volumes of highly viscous solutions, remove large particulates from suspensions



Use with standard and Luer-Lok* syringes; also accepts hypodermic needles. For serial filtration, Luer-Lok outlet provides positive-locking connection to downstream syringe filter.

Syringe Prefilter

- Disposable 25mm prefilter
- Prevents clogging of final filter
- Increases sample recovery
- One-piece modified acrylic housing provides leak-resistant seal, eliminating bypass and minimizing fluid loss
- Glass fiber medium
- Contains no adhesives that can affect results

Syringe Prefilter Plus

- Filter and prefilter in one disposable unit
- 25mm filter with cellulose acetate membrane and integral glass fiber prefilter
- Provides two-stage filtration for sterilization of highly viscous solutions or solutions with high particulate loads
- Prefilter increases sample yield by preventing larger particles from clogging downstream membranes
- Pore size: 0.2µm
- Certified noncytotoxic and nonpyrogenic

Description	Sterile	Mfr. No.	Cat. No.	Case of 50
Syringe Prefilter	No	189 2000	**09-740-48C**	108.75
Syringe Prefilter Plus	Yes	192 2520	**09-740-48D**	156.59

Corning* Syringe Filters

High burst strength for assured performance

For tissue culture and HPLC applications.

Diameters

- 4, 15, 25, or 26mm diameters handle volumes ranging from 0.5 to 100mL
- 50mm diameter PTFE syringe filter is ideal for protecting vacuum lines and pumps
- 26mm PES and SFCA filters feature effective filtration areas that are 25 to 45% larger than other brands; with modified acrylic housing for very low protein binding and minimal loss of valuable proteins

Pore Sizes

- 0.2µm filter for very fine particulate removal
- 0.45µm pore size for most clarification applications
- 0.2µm SFCA filter available with or without built-in prefilter that extends filter life when using viscous, proteinaceous or high-particulate samples

ORDERING INFORMATION:

Pore size and membrane type is printed on every syringe filter. Sterile filters are individually blister-wrapped in cases of 50, nonsterile in cases of 50. The 50mm PTFE syringe filter is supplied in case of 12.

COMPLIANCE:

Manufactured to ISO 9002 and GMP standards, and 100% integrity tested. HPLC-certified filters (RC, NY, and PTFE) undergo extensive testing to ensure no extraneous peaks in UV range.

NOTE:

PTFE, RC and NY membranes are certified not to cause extraneous peaks in the UV region in HPLC applications. RC, PES and SFCA are certified noncytotoxic and nonpyrogenic.

‡ Except 09-754-28, which is not HPLC certified and is sterile.

Whatman* GD/X 13 and 25mm Disposable Nonsterile Syringe Filters

Designed for easy filtration of hard-to-filter samples

Use 13mm diameter filters for samples ≤10mL, 25mm for samples >10mL.

- Polypropylene housing
- Female Luer-Lok* inlet
- Male slip Luer outlet
- Autoclavable at 121°C (250°F) at 15psi for 20 min.
- Maximum temperature: 131°C (267°F)
- Filtration area: 13mm - 1.3cm²; 25mm - 4.6cm²
- Pressure limit: 13mm - 100psi; 25mm - 75psi
- **Nylon (NYL)**—hydrophilic, good resistance to most common HPLC solvents; limited resistance to acids, bases, halogenated hydrocarbons, aldehydes and strong oxidizing agents

WHATMAN
0.45µm NYL
WHATMAN
0.45 µm NYL

09-927-26D

- **Polyvinylidene Fluoride (PVDF)**—suitable for most HPLC sample prep applications; slightly hydrophobic with low water breakthrough values; good chemical resistance to common HPLC solvents, low protein binding and negligible extractables
- **Polytetrafluoroethylene (PTFE)**—hydrophobic, does not allow water to pass without high pressures; aqueous solutions can be filtered if the membrane is initially "wetted" with alcohol or another appropriate solvent
- **Polyethersulfone (PES)**—meets special filtration requirements of durability, high temperature resistance, good chemical compatibility, and low protein adsorption; for filtration of protein-containing solutions where minimal adsorptive protein loss is desired
- **Polysulfone (PSU)**— low protein binding membrane for samples in aqueous solutions
- **Polypropylene (PP)**—provides high flow with both solvent and aqueou compatibility; broad range of solvent/chemical resistance
- **Cellulose Acetate (CA)**—surfactant-free; minimizes risk of filtrant contamination from aqueous-based extractables; for biological solutions where high loading capacity and low protein binding are important concern
- **Glass Fiber (GF)**—all are borosilicate glass microfibers
  - **GF/A:** for fine particle retention, high flowrate, good loading capacity; no binders; used for filtration of precipitated proteins; attains high counting efficiencies in radioassays of weak B-emitter
  - **GF/B:** provides higher wet strength and significantly increased loading capacity; combines fine particle retention with good flowrat
  - **GF/C:** fine retention of particles and microorganisms, good flowrate, high loading capacity; ideal for collecting suspended particles in potable water, natural and industrial wastes
  - **GF/D:** for high loading capacity and wet strength, extremely high speed; ideal for repetitive routine filtrations
  - **GF/F:** meets requirements of U.S. EPA Toxicity Characteristic Leaching Procedure (TCLP); very rapid flowrate and extremely high loading capacity; effective in filtering finely precipitated proteins
- **934-AH*** —specified in official methods for testing suspended solids in water pollution monitoring; borosilicate glass microfiber membrane for high loading capacity and high retention efficiency at high flowrate
- **GMF**—resistant to weakening or disruption of the fibrous matrix by inorganic or organic solutions and has a broad chemical compatibility; made of borosilicate glass microfibers

ORDERING INFORMATION:

PVDF, PES, CA, and GMF filters are available sterile

INCLUDES: Stack of Whatman Multigrade GMF 150 (10:1µm) and Grade GF/F 0.7µm prefilters

COMPLIANCE: All materials are biosafe—pass USP Class VI requirements

Whatman* GD/XP* Nonsterile Syringe Filters

Ideal for trace metal analysis

09-930-26

Designed to prepare and enhance inorganic ion analysis of hard-to-filter samples >10mL. Suitable for a variety of applications.

- Polypropylene housing
- **25mm** diameter with **0.45µm** pore size
- Contain a unique prefiltration stack of proprietary polypropylene prefilters
- Inlet is female Luer-Lok*, outlet is male slip Luer
- Choice of nylon (NYL), polyvinylidene fluoride (PVDF), polytetrafluoroethylene (PTFE), polypropylene (PP), depth filter polypropylene (DpPP) and polyethersulfone (PES) membranes

LOOKING FOR MORE SYRINGE FILTERS FOR AUTOMATION?

Whatman* Roby 25 Filters for robot systems have been specially developed for automatic sample preparation for the clarification of samples. A wide range of these ready-to-use filter holders fitted with various membrane filters is available. For more information,

Visit www.fishersci.com and search for Whatman Roby

Whatman* Puradisc* 25mm Syringe Filters

Low hold-up volume—less than 0.1mL with air purge

05-713-386

Disposable syringe filters for purifying aqueous and organic solutions. All six filter types have polypropylene housings, female Luer-Lok* inlet and male slip Luer outlet.

Puradisc PES

- Polyethersulfone (PES) membrane for filtering aqueous solutions
- Low protein binding
- Nonsterile packages or radiation-sterilized "medical grade" blister packs

Puradisc GD

- Graded-density membrane, very high loading capacity
- Designed for HPLC, TLC or GC applications requiring 1µm particle retention
- Use for filtering high debris, hard-to-filter solutions
- Made of multilayered glass microfiber
- Nonsterile

Puradisc GF/F

- High loading capacity for air/gas filtration, HPLC, TLC, and GC sampling
- Membrane made of binder-free glass microfiber
- Nonsterile

Puradisc NYL

- For filtering aqueous or solvent-based solutions, HPLC, TLC, and GC sampling
- Membrane made of nylon
- Nonsterile

Puradisc TF

- For filtering solvents, chemicals and nonaqueous solutions
- Typical applications include HPLC, TLC, and GC sample clarification; HPLC solvent filtration
- Made of hydrophobic polytetrafluoroethylene (PTFE)
- Nonsterile, autoclavable

Puradisc PP

- Polypropylene media designed for aqueous and organic solutions containing high debris levels and for hard-to-filter solutions
- Nonsterile, autoclavable
- Biosafe (USP Class V)

Whatman* Puradisc* 4mm and 13mm Nylon Syringe Filters

Nylon Membrane

For aqueous or aqueous-organic samples

- Polypropylene-housed filters
- Nonsterile or presterilized by gamma radiation
- Good resistance to methanol; limited resistance to acetonitrile
- Inlet is a female Luer-Lok*; outlet has male slip Luer

ATMAN
0.45µm NYL

09-913-7

4mm dia. Filters

- For samples ≤2mL
- Filter area 0.2cm²
- Hold-up volume with air purge <10µL

13mm dia. Filters

- Handle samples up to 10mL
- Filter area 1.3cm²
- Hold-up volume with air purge ≤25µL

COMPLIANCE:

Polypropylene-housed filters pass USP Class VI requirements for biosafety

PTFE Membrane

Nonsterile, with hydrophobic membrane for use with organic samples

Excellent resistance to all organic solvents.

- Polypropylene-housed filters
- Inlet is female Luer-Lok*; outlet is male slip Luer
- Autoclavable

4mm Filters

- For samples up to 2mL
- Filter area of 0.02cm²
- Hold-up volume (with air purge) of <10µL

13mm Filters

- For samples to 10mL
- Filter area of 1.3cm²
- Hold-up volume (with air purge) of ≤25µL

COMPLIANCE:

Pass USP Class VI requirements for biosafety

NOTE:

Not recommended for aqueous samples

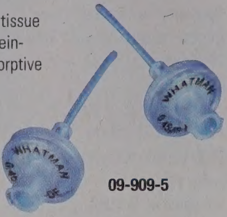
Polysulfone Membrane

For minimal adsorptive protein loss



09-909-5

Suitable for filtering serum, plasma and tissue culture solutions—as well as other protein-containing solutions where minimal adsorptive protein loss is required.

- Polypropylene housing
- Autoclavable
- Female Luer-Lok* on inlet side; male slip Luer on outlet side

4mm dia. Filters

- For samples up to 2mL
- Filter area 0.2cm^2
- Hold-up volume (with air purge) ≤7.5µL

13mm dia. Filters

- For samples ≤10mL
- Filter area 1.3cm^2
- Hold-up volume (after air purge) ≤25µL

COMPLIANCE:

Pass USP Class VI requirements for biosafety

Whatman* Anotop* Disposable Syringe Filters

Remove virtually 100% of particulates larger than pore size

09-926 Series

Compatible with aqueous suspensions and a wide range of organic solvents. Handle volumes up to 5mL (10mm diameter filter) or 100mL (25mm diameter filter).

- Nondeformable, honeycombed Anopore* membrane
- Inherently hydrophilic membrane is free of adhesives and surfactants; noncytotoxic
- Low protein binding, low fluid retention for maximum sample recovery
- Unidirectional flow

ORDERING INFORMATION:

Hexagonal, thermal-welded polypropylene housing is free of adhesives and binders. Sterile units are individually packaged to avoid contamination.

TYPICAL CHARACTERISTICS

Filter	Anotop 10	Anotop 25
Medium	Anopore inorganic membrane (alumina matrix)	
Applications	HPLC aqueous/organic sample preparation, cold sterilization of growth media, solvent filtration for spectroanalysis, phage and virus filtration, liposome extrusion, removal of high molecular weight proteins or polymers, colloid removal from deionized water.	
Diameter	10mm	25mm
Filter Area	0.55cm²	2.45cm²
Pore Size	0.02, 0.1, 0.2µm	0.02, 0.1, 0.2µm
Hold-up Volume	<20µL	<150µL
Housing	Polypropylene	Polypropylene
Temperature Limit	45°C (113°F)	45°C (113°F)
Pressure Limit	7kg/cm² (100psi)	5.2kg/cm² (75psi)
Connections	Inlet: female Luer-Lok*. Outlet: male slip Luer.	

Whatman* Anotop* Plus 10 and 25mm Syringe Filters

Include glass microfiber prefilter

09-926-21, -22, -23

Similar to Anotop filters, but include binder-free, glass microfiber prefilter with Anopore* inorganic membrane in a polypropylene housing.

Glass Microfiber Prefilter

- Prevents blockage; increases throughput
- Maintains membrane performance
- Reduces need for centrifuging before filtering, sequential filtering, or refiltering
- Permits use of 0.1µm pore size Anotop Plus filters to remove mycoplasma contaminants from tissue culture

Characteristics

- Hold-up volume: <30µL (10mm size), <200µL (25mm)
- Pressure limit, 7kg/cm² (100psi)

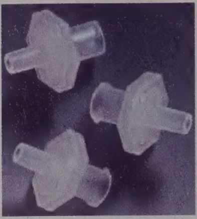
Whatman* Anotop* 10mm IC Syringe Filter

Ultraclean IC sample preparation

- 10mm diameter, 0.2μm pore size filter
- Provides extremely low anion leaching levels and hold-up volume
- Highly efficient retention of particles larger than stated pore size
- Anopore* inorganic membrane in polypropylene housing
- Nonsterile, disposable



09-926-28

Mfr. No.	Cat. No.	Pack of 250
6809-9235	09-926-28	657.19

TYPICAL CHARACTERISTICS

Filter	Anotop IC
Medium	Anopore inorganic (alumina matrix)
Applications	Sample preparation for ion chromatography. Typical anion leaching levels:[1] fluoride, <10ppb; chloride, <15ppb; bromide, <20ppb; sulfate, nitrite or nitrate, <30ppb; phosphate, <75ppb.
Diameter	10mm
Filter Area	0.78cm^2
Pore Size	0.2μm
Hold-up Volume	<20μL
Housing	Polypropylene
Temperature Limit	45°C (113°F)
Pressure Limit	7kg/cm^2 (100psi)
Connections	Inlet: female Luer-Lok*. Outlet: male slip Luer.

[1] *In 18megohm H_2O at 20°C (68°F).*

GE* Nylon Syringe Filters

Compatible with acetone, methylene chloride, acetonitrile and other organic solvents

- Disposable
- Inherently hydrophilic Magna* Nylon membranes contain no wetting agents
- Yield exceptionally low extractable levels ($<0.0015\text{mg/cm}^2$)
- Autoclavable
- Available in nonsterile or sterilized packaging

3mm dia. (3R) Filters

- For direct injection of aqueous and organic samples of 1mL or less into sample loop systems
- Virgin Nylon 66 housing resists heat, common aggressive solvents

17mm dia. (17R) Filters

- Designed to filter aqueous and organic samples of 12mL or less directly injected into HPLC loop systems or other small sample preparation
- Polypropylene housing

25mm dia. (25RS) Filters

- Sterile
- For aqueous samples including biological fluids, buffer solutions, tissue culture media
- Modified acrylic housing supports membrane bidirectionally for injection or aspiration
- 100% integrity tested

30mm dia. (30R) Filters

- Designed for sterilization or clarification of aqueous and solvent samples up to 120mL in a wide array of analytical and research applications
- Allow direct injection of sample into HPLC loop systems
- Polypropylene housing

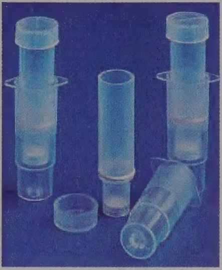
SYRINGELESS FILTERS

Whatman* UniPrep* Syringeless Filters

Process samples in one-third the time of conventional syringe filters



09-923 Series

Single, disposable units replace syringe-coupled filtration devices. Self-contained, preassembled filtration devices for removing particulates from samples are ideal for HPLC sample preparation.

- Consists of external sample test tube, plunger (which incorporates membrane filter and prefilter), removable cap
- Medical-grade polypropylene
- Diameter 17mm
- Filtration area 0.28cm²
- Holdup volume 50µL
- Safe, efficient—prefilter and membrane can't pop off
- Air purge unnecessary—inserting plunger into tube provides a positive pressure purge of sample through filter
- Sealed glass microfiber prefilter traps larger particles before they can clog the membrane

Benefits

- Increase lab productivity and efficiency
- Generate less waste
- Realize greater overall cost savings per test

Membrane	Pore Size	Mfr. No.	Cat. No.	Pack of

Whatman* Autovial* Syringeless Filters

Faster sample handling, up to 5 or 12mL in volume

09-921-4C

Replace syringe-coupled devices with single filter units for one-time use. Ideal for removing particulates from potentially hazardous samples. Pour or pipet sample into filter barrel, insert plunger and compress to filter into autosampler vial. Or fit a needle to its outlet for direct injection.

- Preassembled units consist of a filter barrel and a plunger
- Built-in air purge minimizes holdup
- Integrated construction eliminates filter pop-off
- Support stand protects slip-Luer tip, recessed to reduce chance of contamination

Autovial 5 Filters

- Remove particulates from samples up to 5mL in volume
- Diameter of filter 13mm
- Filtration area 1.7cm²

Autovial 12 Filters

- Handle samples up to 12mL in volume
- All have an integral 25mm diameter filter in barrel (graduated in 1mL intervals) with polyethylene plunger
- Filtration area 3.3cm²
- Glass microfiber prefilter ensures higher flow with less clogging
- Units with NYL, PTFE, and PVDF membranes are available sterile

Membranes

- Cellulose Acetate (CA): Low nonspecific protein binding, high loading capacity; for biologicals
- Glass Microfiber (GMF): High loading capacity, binder-free, fast flow rates; for clarifying aqueous or organic solutions, pH 3 to 8
- Nylon (NYL): Inherently hydrophilic; for clarifying aqueous and organic samples, pH 3 to 10
- Polypropylene (PP): For aqueous and organic solutions; ideal for aggressive samples and high debris
- Polytetrafluoroethylene (PTFE): Hydrophobic; for samples >50% organic solvents
- Polyvinylidene Fluoride (PVDF): Low protein binding; for aqueous samples, samples ≤60% organic solvents

† Sterile.
‡ PP Prefilter.

Whatman* Mini-UniPrep* Syringeless Filters

Quick and easy to use—process sample load in one-third the time

Self-contained, preassembled filtration devices for removing particulates from smaller sample volumes. These single, disposable units replace syringe-coupled filtration devices for less lab waste and greater overall cost savings per test.

- Available with amber colorant for light-sensitive samples
- Increase lab productivity and efficiency by processing samples in onethird the time of conventional syringe filters
- Consists of a 0.5mL capacity chamber and plunger with filtration membrane at one end and a preattached cap/septum at the other
- Can be used either manually or with compressor†
- Designed to fit into any autosampler that accommodates 12 × 32mm vials, or pierce septum with needle to draw sample off for manual injection into an analyzer

Membranes in 0.2 and 0.45µm pore sizes

- Glass Microfiber (GMF): High loading capacity, binder-free, fast flowrates; for clarifying aqueous or organic solutions, pH 3 to 8
- Nylon (NYL): Inherently hydrophilic; for clarifying aqueous and organic samples, pH 3 to 10
- Polyethersulfone (PES): For fast flow, low protein binding sterilization of aqueous solutions
- Polypropylene (PP): For aqueous and organic solutions; ideal for aggressive samples and high debris
- Polypropylene (dpPP): Depth filter polypropylene; high loading capacity and high flowrate; for aqueous and organic solutions; rated at 90% retention efficiency for 0.45µm particles; broad chemical compatibility
- Polytetrafluoroethylene (PTFE): Hydrophobic; for samples >50% organic solvents
- Polyvinylidene Fluoride (PVDF): Low protein binding; for aqueous samples, samples ≤60% organic solvents

APPLICATIONS

Routine analysis, composite assays, content uniformity, protein precipitation, solubility studies, light sensitive samples, and ion chromatography

NOTE:

Do not overfill filter unit or compress the device at an angle before the air-tight seal is made. Liquid could escape from air vent hole, resulting in sample loss or personal injury.

ORDERING INFORMATION

Filters are also available with a flared cap to enable trouble-free operation with Shimadzu* autosamplers. (Contact your Fisher Customer Service Representative.)

† Multi-sample compressor can process up to six samples at one time, further improving sample processing time.

Amber Mini-UniPrep for Light-Sensitive Samples

Produced with the same colorant used in pharmaceutical containers. Provide all-in-one filtration without photodegradation of light sensitive samples. Compared to darker amber vials, they also provide superior "see through" clarity to enable visual inspection. Meet USP specifications for light resistance.

LOOKING FOR COMPRESSORS?

Single- and multi-sample compressors are available for use with Mini-UniPrep* filter units. Especially helpful with viscous or particle-laden samples, these handheld devices aid in the compression of Mini-UniPrep filter units. For more information,

Visit www.fishersci.com and search for Mini-Uniprep Compressors

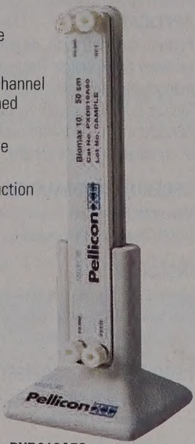
TANGENTIAL FLOW

Millipore* Pellicon* XL Devices

Small-volume tangential flow filter device

Designed for process development and sample preparation, with an optimal processing volume range of 50 to 1000mL.

- True linear scalability with same flow path, channel length, and channel height as other established Pellicon products
- Can operate with peristaltic pump or Labscale TFF system
- Robust thermoplastic (polypropylene) construction
- Controlled channel height
- Choice of Biomax* PES (polyethersulfone) or Ultracel* PLC (composite regenerated cellulose) membranes



PXB010A50

APPLICATIONS:

Concentration and desalting of proteins, buffer exchange, depyrogenation, clarification, and preparation of material for clinical trials

ORDERING INFORMATION:

Packaged one per box

INCLUDES:

Operating instructions, Certificate of Quality, and accessory kit (four Luer barb fittings, four tubing clamps, one retentate clamp, and 4' (1.2m) of LFL Tygon* tubing)

SPECIFICATIONS

Filtration Area	50cm² (0.05 ft.²)
L × W	7⅜ × 1¼"(18.8 × 30cm)
Fittings	Female Luer
Hold-up Volume (typical)	3.2mL
Max. Operating Pressure	80psig (5.6 bar)
Max. Forward Transmembrane Pressure for Optimum Scaling Performance	(feed to permeate) 40psig (2.7 bar) up to 45°C (113°F)
Optimum Tangential Flowrate for Polarized Solutions	30–50mL/min.
pH Compatibility	1–14 (Biomax PES); 2–12 (Ultracel PLC)
Extractables	Gravimetric extractables level ≤7.5mg/device after RO water flush. USP oxidizables test negative after RO water flush.
Prefiltration Requirements	Prefiltration of sample using 100μm nominal pore size filter is recommended.

ACCESSORIES

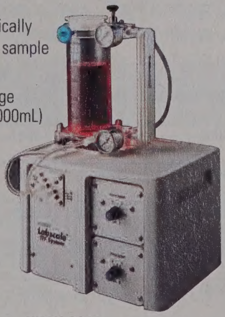
- **100mL Reservoir and Stand:** Used with the Pellicon* XL Device for simple separations of small volumes; stand mounts reservoir on Labscale system
- **Analog Pressure Gauge Kit (0-60psi):** Can be used with the Pellicon XL Device for accurate scaling studies; includes one pressure gauge and connection fittings
- **Multimanifold:** Mounts directly onto either Labscale system reservoir or standard peristaltic pump to allow simultaneous use of three Pellicon XL Devices
- **Pellicon XL Device Stand:** Supports one Pellicon XL Device

Description	Cat. No.	Each
Reservoir, 100mL	**XX42RES05**	199.75
Reservoir Stand	**XXRES05ST**	109.41
Gauge Kit	**XXPXLGAGE**	215.81
Multimanifold	**XXMULTIMN**	199.75
Pellicon XL Stand	**XXPXLSTND**	97.49

Labscale TFF System

Complete linear, scalable solution for small-volume processing designed specifically to use the Pellicon* XL Device for simple sample prep and more complex scale-up work.

- Use to concentrate, desalt, and exchange buffers (typical starting volumes, 50–1000mL)
- Easy to use for sample preparation
- Provides necessary controls for process development and scale-up work
- Can be operated in concentration or continuous diafiltration modes
- 500mL reservoir accepts direct docking of the Pellicon XL Device, eliminating need for tubing connections
- With diaphragm pump assembly, allows final working volume of <15mL, depending on starting volume



XX42LSS11

ORDERING INFORMATION:

Individual components are also available for a custom small-volume TFF system

INCLUDES:

Graduated 500mL acrylic reservoir with retentate backpressure valve, feed and retentate pressure indicators; stirrer assembly; diaphragm pump assembly with tubing and power supply

Description	Cat. No.	Each
Labscale TFF System Kit, 115V	**XX42LSS11**	4817.00
Components		
Reservoir, 500mL	**XX42RES01**	2476.00
Peristaltic Pump Drive, 115V, Variable speed, 60–600rpm	**XX8200115**	927.00

SPECIFICATIONS

Max. Pump Outlet Pressure	85psig (5.86 bar)
Feed Flowrate	10–100mL/min.
Min. Recirculation Volume	15mL
Operating Temp. Range	4° to 45°C (39.2° to 113°F)
L × W × H	8½ × 11 × 18" (21.6 × 27.9 × 45.7cm)
Net Weight	13 lb. (5.9kg)
Electrical Reqts.	115V 60Hz

ULTRAFILTRATION/STIRRED CELLS

Millipore* Stirred Cells†

Concentrate, desalt, and purify aqueous biological solutions

Process from 3 up to 400mL of biological solutions using either concentration or diafiltration operating modes.

- Sturdy construction; autoclavable
- Consists of clear pressurized vessel with integral magnetic stirring bar, nylon cap and tube fitting assembly, polysulfone body and membrane holder, acetal/polysulfone stirrer, silicone O-rings, and black aluminum stand

Concentration Mode

- Gas pressure is applied directly to ultrafiltration cell
- Solutes above membrane molecular weight cutoff are retained in cell, while water and solutes below cutoff pass into filtrate

Diafiltration Mode

- Ultrafiltration cell is connected to auxiliary reservoir containing diafiltrate solution; reservoir is then gas pressurized
- Fluid volume and macrosolute concentration remain constant as filtrate is replaced by diafiltrate solution
- Provides a simple means for rapid microsolute exchange
- Typically used as a substitute for dialysis

APPLICATIONS:
Perform concentration, desalting, recovery or exclusion. Recover monoclonal antibodies and growth factors from tissue culture supernatants. Concentration and buffer exchange of chromatography fractions.

ORDERING INFORMATION:
Use with Millipore Ultrafiltration Membranes

INCLUDES:
Connection for ¼" dia. (6.4mm) pressure tubing; max. operating pressure, 75psi (5.3 bar)

REQUIRED ACCESSORIES:
Magnetic stirrer required for operation

5123

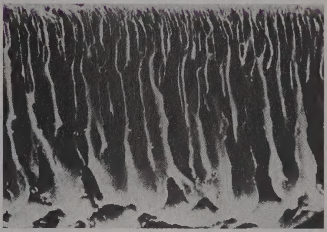
Millipore* Ultrafiltration Membranes

High-recovery or high-flow membranes

For stirred cells. Available in a variety of membrane types: Amicon* YM for high recovery; Biomax* PB and Amicon PM for high flow. Choose from several diameters (14 to 150mm) and a range of Nominal Molecular Weight Limits (1000 to 500,000 NMWL).



40424

Ultracel Amicon YM

- High-recovery, regenerated cellulose membranes
- For concentration of hydrophobic samples or to desalt extremely dilute solutions
- Hydrophilic, tight microstructure assures high retention with low adsorption of protein, DNA, or other macromolecules

Biomax PB and Amicon PM

- High-flow, polyethersulfone (PES) membranes
- Use to concentrate faster or to concentrate and desalt more concentrated samples
- Open microstructure provides extremely fast separation capability
- Recommended for serum, plasma, or conditioned tissue culture media samples

UNIQUE APPLICATIONS

ProWeigh* Preweighed Filters for Gravimetric Analysis

Eliminate filter washing, drying, desiccating and preweighing

Glass fiber filters meet all preparation requirements in *Standard Methods* for procedures 2540D and 2540E. Use in Total Suspended Solids and other gravimetric analyses.

09-735 Series

- Only routine blank testing is required; no equivalency testing necessary
- After washing, drying and desiccation, filters are weighed to the nearest 0.1mg on certified electronic analytical balances
- Weights are printed on heat-resistant Mylar* labels affixed to convenient aluminum pans

Choose from Three Filter Types

- 8% of all ProWeigh filters are redried and reweighed to ensure weight stability
- DoubleWeigh* filters are 100% tested to ensure weight stability to within 0.5mg
- ProWeigh filters for Volatile Solids (09-735-57) are recommended when measuring fixed or volatile solids—they're heated to 550°C (1022°F) in a muffle furnace to drive off volatiles, then desiccated and weighed

Description	Diameter	Cat. No.	Pack of 100
ProWeigh Filters for TSS	47mm	**09-735-56**	127.17
ProWeigh Filters for TSS	76mm	**09-735-105**	181.17
DoubleWeigh Filters for TSS	47mm	**09-735-68**	163.51
ProWeigh Filters for Volatile Solids	47mm	**09-735-57**	144.41

Whatman* 1PS Disposable Phase Separating Paper

High-purity paper impregnated with stable silicone

- Hydrophobic
- Passes immiscible organic solvent phases lighter or heavier than water but retains water phase
- Use folded in conical funnel
- Disposable
- Eliminates need for washing and drying separatory funnels, cross-contamination

09-874-50

Spectrum Spectra/Mesh* Woven Polymer Macrofiltration Squares

Ideal for macrofiltration

Ideal for straining, filtering and screening solutions or suspensions containing high-molecular-weight molecules or particles.

08-670-20

- Woven synthetic polymer squares, $11\frac{13}{16} \times 11\frac{13}{16}$" (30 × 30cm)
- Choice of three materials: nylon, polypropylene or fluorocarbon
- Precise mesh openings (from 10 to 1000µm) and mesh counts per inch
- All except Type F can be heat welded into tubular or cellular forms

Spectra/Mesh N (Nylon)

Nonabsorbent Combines high tensile strength with flexibility.

FLASH POINT TESTING

Koehler* Pensky-Martens Closed Tester

Determines the flash point of liquids, or liquids with suspended solids

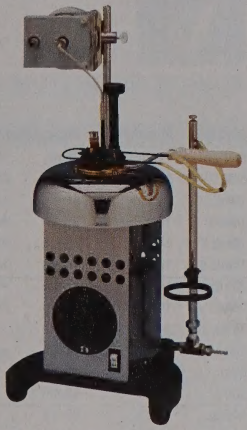
Provides stepless electric heat for variable temperature settings up to 371°C (700°F).

ORDERING INFORMATION:
For 115V 60Hz

INCLUDES:
Complete assembly: Cover assembly, cast-iron air bath mounted on tripod base, 750w electric heater, and brass flashpoint cup with handle (KL-K16020), stirrer assembly with motor drive coupling.

REQUIRED ACCESSORIES:
Stirring motor (KL-K16220) and thermometer (13-500 or 13-505)

COMPLIANCE:
Meets ASTM* D 93, AASHTO T-73-811 and all related specifications



KL-K16200 Closed Tester with KL-K16220 Electric Stirring Motor.

Mfr. No.	Cat. No.	Each
K16200	**KL-K16200**	1698.51

ACCESSORIES

Electric Stirring Motor

Mixes samples in KL-K16200 tester.

- Dual speed (115 or 250rpm)
- With steel rod and clamp for mounting onto base of tester

ORDERING INFORMATION:
For 115V 60Hz

Mfr. No.	Cat. No.	Each
K16220	**KL-K16220**	529.92

Replacement Cover Assembly

Mfr. No.	Cat. No.	Each
K16010	**KL-K16010**	784.35

Replacement Flash Point Cup

- Brass cup
- Heat-resistant handle
- Meets ASTM* specifications

Mfr. No.	Cat. No.	Each
K16020	**KL-K16020**	207.93

FLASKS

BOILING—ROUND BOTTOM

Pyrex* Flasks with \$ Joints, Short Necks, Round Bottom

Excellent chemical durability for contamination-free results

- Full length outer joints, both with shorter necks
- Carefully controlled wall thicknesses provide the proper balance between thermal expansion and mechanical strength
- Adapter Nos. 8800, 8820 and 8825 are used to connect flasks with different size joints
- Manufactured from No. 7740 borosilicate glass
- Normal working temperature, 230°C

Corning* Baffled Polycarbonate Flasks with Caps

NEW

Ideal for shaker culture applications

13-700-432

Baffles provide better agitation at lower speed resulting in gentler, more efficient aeration.

- Increased aeration provides better cell growth, especially for bacteria and insect cell lines
- Erlenmeyer style
- Made from optically clear polycarbonate
- Graduated at 50mL intervals
- Sterilized by gamma radiation and certified nonpyrogenic
- Available with vent caps for applications requiring sterile gas exchange
- Two-position polypropylene plug seal cap (U.S. Patent No. 4,763,804) can be opened for gas exchange or closed for a liquid-tight seal

Pyrex* Delong Culture Flasks

Heavy, fire-polished, long necks reduce splashing

- Three baffles provide greater agitation of solutions and improved oxygen or gas transfer when used with rotary or reciprocating shakers
- Necks accept two-position polypropylene closures (available separately; see Closures 14-957-85E, -85G, -85H and -85J)

Pyrex* Low Form Culture Flask

For culturing organisms requiring a large surface area-to-volume ratio

- Narrow mouth
- Neck O.D., 38mm

10-092A

Capacity	Approx. O.D. × H	Mfr. No.	Cat. No.	Each
2500mL	254 × 197mm	4422 2XL	**10-092A**	135.19

Pyrex* Shaker Flasks with Extra-Deep Baffles

Long neck reduces splashing

- Delong style
- Extra-deep baffles provide greater agitation and improved gas transfer when used with rotary or reciprocating shakers
- Two-position polypropylene closures are available separately (14-957-85E, -85G, -85H and -85J)

09-552-36

Capacity	Approx. Neck O.D.	Mfr. No.	Cat. No.	Case of

40mm	Orange	26799 40	**14-957-85K**	151.41

WARNING

Do not use standard flask on a heat source smaller than the base of the flask; uneven heating could cause breakage. Do not place baffled flasks on a direct heat source.

*Trademark. See Trademark Reference.

Pyrex* Fernbach Flasks

Wide surface area is ideal for growth of organisms requiring a large surface area-to-volume ratio

- Neck designs: plain, wide-mouth, beaded, or with screw cap
- Capacity: 2800mL

10-092

Description	Approx. O.D. × H	Mfr. No.	Cat. No.	Each	Case of
Standard					
Wide Mouth	205 × 230mm	4420 2XL	**10-092**	83.16	6/344.17

With GL100 screw cap	200 × 230mm	4427 2XL	**09-552-73**	221.88	----

Nalgene* Polycarbonate Baffled Culture Flasks

Feature growth curves equivalent to glass flasks for *E. coli* and *S. cerevisiae*

- Clear and break-resistant with molded-in graduations
- Bottom baffles provide increased mixing, aeration, and gas exchange
- Useful for fermentation, cell culture growth and cultivation, and genetic engineering procedures
- Autoclavable

10-042-5K

Capacity	Mfr. No.	Cat. No.	Pack of	Case of
250mL	4110-0250	**10-042-5K**	4/61.55	3 Pk./123.11
500mL	4110-0500	**10-042-5L**	4/91.71	3 Pk./183.44
1000mL	4110-1000	**10-042-5M**	2/73.13	3 Pk./146.26

2000mL	4113-2000	**10-346-8C**	4/53.60

[†] Nalgene assigns the term "leakproof": a) To bottle/closure systems with closures smaller than 100mm, after they are filled with water, inverted, withstand air pressure of 2psig for 2 minutes, and no water escapes;. b) To bottle/closure systems of 100 or 120mm after they are filled with water, inverted for 15 minutes, and no water escapes. **Note:** these tests, using other liquids, may not yield the same results. To ensure safe usage, Nalgene advises customers to test Nalgene bottles and closures under conditions of their planned applications. Nalgene bottles and carboys are leakproof at ambient temperature and pressure when used with their Nalgene closures.

Kimax* Baffled Culture Flasks

For fermentation, cell culture growth and cultivation, and genetic engineering procedures

- Erlenmeyer flask with thick-walled tubing neck
- Bottom baffles provide increased mixing, aeration, and gas exchange
- Neck O.D.: 25mm (1") for 125mL size; all others are Neck O.D.: 38mm (1½")

DEWAR

*Fisherbrand** Metal-Cased Cylindrical Dewar Flasks

Borosilicate glass with silvered double walls

- For use with liquefied gases
- Space between walls evacuated and sealed
- Metal casing surrounds glass to protect user from accidental breakage
- Special vented polyethylene stopper minimizes evaporation

10-196-11

Capacity	With Handle	O.D.	I.D.	Height	Cat. No.	Each

*Fisherbrand** Low-Form Dewar Flasks

Slightly curved bottom increases coolant capacity

- Cylindrical style
- For use with liquefied gases
- Vacuum tip-off tubulation is offset to minimize space between the bottom and magnetic stirrer
- Protective aluminum base extends to full height of the Dewar

10-196-6

Capacity	I.D.	Inside Height	Cat. No.	Each
11$\frac{13}{16}$ oz. (350mL)	80mm	75mm	**10-196-6**	208.59
28$\frac{11}{16}$ oz. (850mL)	130mm	75mm	**10-196-7**	238.90
84 oz. (2500mL)	170mm	135mm	**10-196-8**	428.32

Nalgene* Polyethylene Dewar Flasks

Can be used for dry ice solvent and hot baths

10-194-100 Series

- Break- and chemical-resistant, withstand temperatures from -196° to +100°C (-321° to +212°F)
- High-density polyethylene Dewar flasks with HDPE covers are well suited for cryogenic work
- Handy for storing frozen biological samples
- Double walls
- Annulus is filled with CFC-free foamed urethane to minimize heat leakage
- All flasks (except 10½ qt. size) have polyethylene-coated steel handle
- Built-in spout, finger grip on bottom, and ribbed sides for safer handling

Capacity	Height	I.D. at Mouth	Mfr. No.	Cat. No.	Each	Case of

Thermo Scientific* Thermolyne* Flasks*

Durable, corrosion-resistant, stainless-steel Dewar flasks

11-670-4 Series

- Borosilicate-glass inner vessels provide maximum coolant and extended temperature retention for samples stored in liquid nitrogen or solid CO_2
- For transporting liquid nitrogen; benchtop use storing crushed ice, dry ice, and alcohol; or as a hot-liquid container
- Carrying handles
- Rubber-cushioned bases
- Vented lids secured by toggle clamps

WARRANTY:
Two years

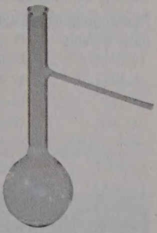
DISTILLING

Pyrex* 25 to 1000mL Distilling Flasks

Round bottoms, vial mouths, with side arms at 75° angle



- 125mL size has its side arm located approximately 5⅜" (137mm) from bottom of flask
- Side arms of all other flask sizes are approximately 3" (77mm) below tops, for immersion thermometers
- Without stopper

COMPLIANCE:
Meet Manufacturing Chemists Association Standards. Meet ASTM* D 233, D 86, and D 447 requirements.

Pyrex* Flasks with Reinforced Tooled Top

Ideal for routine usage

- Uniformly thick walls
- Durable white enamel marking spot
- Capacity scale accurate to ±5%
- Use stoppers (not included) as listed in ordering table
- 250, 300 and 500mL sizes also can use covers in place of stoppers

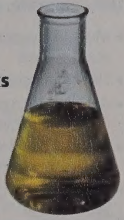
ERLENMEYER—PLASTIC

Nalgene* Polycarbonate Flasks, Narrow-Mouth

Clear, unbreakable, strong graduated flasks especially useful in clinical work

- Molded-in graduations
- 500mL size is superior combustion flask for microdetermination of fluorine
- Autoclavable, but repeated autoclaving may result in some loss of mechanical strength
- Without stoppers



10-041-15C

Capacity	Stopper Ŧ No.	Mfr. No.	Cat. No.	Pack of	Case of

FILTERING

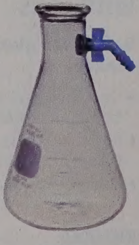
Pyrex* Filtering Flask with Plastic Tubulation

Replaceable plastic side arm secured by neoprene grommet

- Heavy wall glass flask
- Angled downward to reduce tendency of tubing to overturn flask
- Permanent white enamel graduations and marking spot

ORDERING INFORMATION:

Tubulation O.D. is ½" (12.5mm), accepts ⅜" I.D. (9.5mm) flexible tubing



10-180T

Capacity	Stopper No.	Mfr. No.	Cat. No.	Case of
500mL	7	5341 500	**10-180T**	1/38.16
4000mL	12	5341 4L	**10-462-849**	4/470.72

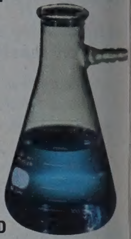
Pyrex* Filtering Flasks with Tubulation

Tubulations for easy connections to filter pumps

- Heavy walls, graduated on sides, flat bottoms
- Necks finished to give excellent fitting for rubber stoppers
- Sizes 25, 50, and 125mL suited for microanalysis
- All sizes are graduated except 25, 50, and 125mL

ORDERING INFORMATION:

Tubulation O.D. for 25 and 50mL flasks is 8mm; for sizes 125 to 1000mL, 10mm; for 2000 and 4000mL, 12.5mm



10-180D

Pyrex* Vista* Heavy-Wall Filter Flask

Sidearm tubulations and graduated to show approximate capacity

Neck finish affords a fit for rubber stoppers.

ORDERING INFORMATION:

Tubulation O.D. is 10mm

COMPLIANCE:

Designed to ASTM* E-1406 Type 2

07-250-096

Capacity	Mfr. No.	Cat. No.	Pack of 6	Case of 2 P
250mL	70340-250	**07-250-096**	75.46	110.1
500mL	70340-500	**07-250-097**	96.83	141.3
1000mL	70340-1L	**07-250-098**	204.44	298.4

yrex* Vista* Micro Filter Flask

mall flasks recommended for microchemical use

- Permanent blue enamel marking spots
- With tubulation

OMPLIANCE:
esigned to ASTM* E-1406 Type 2

07-250-095

apacity	Mfr. No.	Cat. No.	Pack of 6	Case of 2 Pk.
25mL	70360-25	**07-250-093**	103.99	151.80
0mL	70360-50	**07-250-094**	104.89	153.12

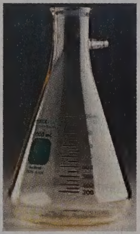
yrexPlus* Filtering Flasks with Tubulation

yrex* borosilicate glass with PVC coating reduces chance of breakage

- Graduated to show approximate capacity
- Uncoated tubulation allows easy connection of standard size tubing
- Autoclavable to 121°C (250°F)

RDERING INFORMATION:
ubulation O.D. is ⅜" (10mm) on 250, 500 and 1000mL izes; ½" (12.5mm) on 2000 and 4000mL sizes



10-180L

IOTE:
o not place over direct heat or open flame. Do not heat above 121°C 250°F) with moist heat or 110°C (230°F) with dry heat.

apacity	Mfr. No.	Cat. No.	Each	Case of
50mL	65340 250	**10-180J**	----	6/145.42

Nalgene* Polypropylene Flasks with Angled Tubulation

Vithstand vacuum to 30"Hg

- Molded in one piece for strength
- Tubulation at 45° lessens chance of tipping
- Oval marking area
- Autoclavable
- Stoppers not included

RDERING INFORMATION:
arbed adapter accepts ¼ to ⅜" I.D. tubing

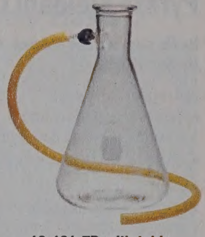
10-182-50A

apacity	Stopper No.	Mfr. No.	Cat. No.	Each
00mL	7	DS4101 0500	**10-182-50A**	15.34
000mL	8	DS4101 1000	**10-182-50B**	24.40
000mL	10	DS4101 2000	**10-182-51**	29.17

Kimax* Flasks with Quick-Release Hose Connector

Allow safe attachment of ¼" I.D. (6mm) tubing

- Tubing remains permanently attached to hose barb and opposite end attaches to flask tubulation with positive threaded seal
- Proper positioning of connector provides greater flask stability, as tubing angled downward has less tendency to tilt flask
- Graduated with approximate volume scale in durable white ceramic enamel
- Tubing and stoppers sold separately



10-181-7D with tubing (not included)

Capacity	Stopper No.	Mfr. No.	Cat. No.	Price	Case of

KJELDAHL

Pyrex* Kjeldahl Connecting Bulbs

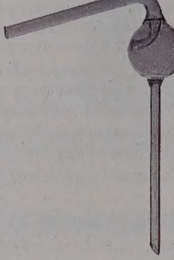
Bulb separates vapor from liquid in distillation

Spherical Bulbs

- Curved inner tube sealed to the upper arm prevents carryover during distillation
- Upper tube is 12mm long; lower is 9mm

Cylindrical Bulbs

- Low price trap designed to replace previously accepted types
- Square glass plate, sealed at the corners in lower part of bulb, acts as an efficient baffle
- Shown to be as efficient as more expensive type with two bent inner tubes
- Drains completely
- Large bottom tube facilitates the return of any condensate to the flask
- Upper tube is 12mm long; lower is 12mm



13-177A

Bulb Type	Bulb Diameter	Mfr. No.	Cat. No.	Pack of 2	Case of
Spherical	48mm	1980 48	**13-177A**	----	4/827.19

REACTION

Pyrex* Organic Reaction Kettles

Covers have four openings to accommodate interchangeable ₮ joints, allowing quick assembly with condensers, stirrers, funnels

- Glass kettles designed for organic reactions involving viscous materials
- Wide mouth for easy cleaning of interior
- Covers have heavy pressed construction
- Lower sections moldblown for breakage resistance
- Finely ground flanges for tight seal
- 500 and 1000mL sizes have interchangeable covers with four ₮ 24/40 joints; 2000, 3000, 4000mL sizes have one ₮ 34/45 and three ₮ 24/40 joints

CERTIFICATION:
CSA approved

11-847A kettle assembly is held together by 11-847-30A clamp and placed in 11-847-15A mantle to heat reaction (order all separately).

Complete Assembly

Includes bottom and cover. Order clamp and mantle separately.

Corning* Disposable Spinner Flasks NEW

Ready-to-use system comes with paddle and integrated magnet, eliminating the need for time-consuming assembly or cleaning and reassembly

07-201-152

- Made of ISO 10993 polystyrene
- Comparable to conventional glass spinner flasks for growth of suspension cell lines and any attachment-dependent cultures using microcarrier beads
- Paddle size and height are optimized for each vessel size
- Magnet provides a smooth, even rotation at required speeds on any laboratory slow speed stirrer
- Heat build-up in the vessel is reduced by means of a specially designed flange that raises the vessel off the stir-plate surface
- Flared base provides extra stability and support

Capacity	Center Neck Dia.	Side Arm Dia.	Mfr. No.	Cat. No.	Case of 12

Kontes* Cytostir* Stirred Bioreactors

Heavy borosilicate glass flasks with two large side arms and screw-cap closures that permit easy sampling

K882910 Series

- Domed bottom prevents microcarriers from accumulating directly under the stirring blades
- Large, height-adjustable PTFE-resin blades provide maximum stirring efficiency at slow speeds
- Center closure is PTFE-resin-lined polypropylene
- Sidearm closures are red polybutylene terephthalate (PBT) with a PTFE-resin-faced liner (100 to 500mL sizes) or blue polypropylene with a sealing ring (one liter and larger sizes)
- Flasks 1L and larger have antidrip pour lips
- Autoclavable

Capacity	Approx. Dia. × H	Screw Cap Size	Side Arm Size	Cat. No.	Each

DON'T SEE THE RIGHT PRODUCT?

For microcarriers to enhance the growth and attachment of anchorage dependent cells, see Growth Environments in the Cell Culture section.

Wheaton MantaRay* Single-Use Spinner Flasks

Cost-effective alternative to glass spinner flasks

22-288-528; Stir plate not include

- Eliminate washing and sterilization steps as well as potential exposure to broken glass and contaminated cultures
- Presterilized and disposable MantaRay consists of a freestanding polyethylene/polypropylene container with fill cap and two sealed ports for pumps or injectors
- Built-in stirrer efficiently mixes at low speeds while avoiding damage to fragile cells
- Use for suspension culture or adherent cells on microcarrier beads for increased surface area
- Working volume range is 400 to 1000mL
- Space-saving design is shorter than, yet has the same headspace as, similar volume flasks

Mfr. No.	Cat. No.	Case
W356805-1	**22-288-528**	1/62.
W356805-4	**22-288-529**	4/201.

Wheaton Magna-Flex* Spinner Flasks

Produce high-yield cultures by maintaining even circulation while keeping microcarriers in suspension

06-416-1 Series

- Borosilicate glass flasks
- Two large side arms with screw-cap closures
- Flex-type, bulb-shaped glass impeller rotates from a fixed position above the liquid level around an indentation in the base of the flask
- Graduated
- Removable stainless-steel pin immobilizes the impeller during handling or decanting to prevent damage to cells or microcarriers
- Autoclavable flasks and impellers for selected sizes can also be ordered separately
- U.S. Patent No. 3,854,704

Wheaton Celstir* Spinner Double Side Arm Flasks

NEW

Provide maximum surface between culture and glass flask

- PTFE-resin coated glass impeller does not protrude through cap and has bottom dimple for more efficient stirring
- Silicone rubber-lined cap
- Autoclavable

VOLUMETRIC—CLASS A

Class A Tolerances for Volumetric Flasks

The Fisherbrand*, Corning*, and Kimble* flasks on pp. 771-780 are calibrated within the following volume tolerances as specified in ASTM E288, E542, and E694 Standards:

Flask Capacity	Tolerance
1mL	±0.01mL
2mL	±0.015mL
5mL	±0.02mL
10mL	±0.02mL
25mL	±0.03mL
50mL	±0.05mL
60mL	±0.05mL
100mL	±0.08mL
110mL	±0.08mL
200mL	±0.10mL
250mL	±0.12mL
500mL	±0.20mL
1000mL	±0.30mL
2000mL	±0.50mL

Pyrex* Flasks Serialized and Certified with ₮ Barrelhead Stopper

Calibrated "To Contain" within Class A tolerances

- Individually serialized and supplied with a Certificate of Identification and Capacity
- Individually calibrated and certified against equipment whose calibration is traceable to NIST*

10-211E

Capacity	Stopper ₮ No.	Mfr. No.	Cat. No.	Each
10mL	9	5680 10	**10-211V**	35.87

*Fisherbrand** PFA Flasks with Screw Caps

Calibrated "To Contain" within Class A tolerances

Suitable for trace element analysis, isotope separations, sample digestions, and the handling of sensitive biological solutions.

02-617-15 Series

- Made from PFA copolymer
- Translucent
- Deliver outstanding chemical and solvent resistance over a temperature range of -260° to +270°C
- Extremely low absorption and permeability levels associated with PFA
- Graduation lines are highly legible, accurate, and permanent
- Autoclavable
- Can be sterilized using gas, dry heat, gamma irradiation, or chemical disinfectant

INCLUDES:
PFA screw closures to provide a secure seal from outside contamination

COMPLIANCE:
Meet ASTM* E 288, E 542, and E 694 standards

Capacity	Tolerance	Cat. No.	Each
25mL	±0.03mL	**02-617-152**	112.42
50mL	±0.05mL	**02-617-153**	131.45
100mL	±0.08mL	**02-617-154**	143.33
250mL	±0.12mL	**02-617-155**	203.85
500mL	±0.20mL	**02-617-156**	231.94

*Fisherbrand** White Line Flasks with ₮ Stoppers

- Economically priced for most analytical work
- White permanently etched graduation lines
- With ₮ ground-glass stoppers

COMPLIANCE:
Calibrated within listed volume tolerances for Class A as specified in ASTM* E 288, E 542, and E 694 standards

10-205D

Capacity	Tolerance	Stopper ₮ No.	Cat. No.	Each	Case of
25mL	±0.03mL	9	**10-205A**	85.94	12/711.24

LOOKING FOR MORE EZ ACCESS* FLASKS?

Heavy duty, wide-mouth flasks are also available. For a complete listing,

Visit www.fishersci.com and search for EZ Access

Pyrex* Class A Square Flasks

Calibrated "To Contain"

- Require less shelf space (15-20%) than round flasks
- Graduation line is sharp and permanent
- Large white block letters make the inscription easy to read
- With PTFE color-coded keyhole stopper

COMPLIANCE:

Manufactured to Class A tolerances as established by ASTM* E-694 for volumetric ware, ASTM E-542 for calibration of volumetric ware, and ASTM E-288 for volumetric flasks

With ₮ Stoppers

- Sizes 1 to 10mL are for microchemistry
- Sizes 1 and 2mL are test-tube shaped
- Sizes 3000 to 6000mL have ₮ pennyhead stoppers
- Sizes 1 to 2000mL have Corning* barrelhead stoppers with flat tops in order to stand the inverted stopper on the table and reduce plug contamination

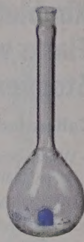
Pyrex* Vista* Volumetric Flasks

Necks are tooled for ₮ glass stoppers

- Provide precise volume measurement
- Graduation line is sharp and permanent
- Large blue block letters make the inscription easy to read

COMPLIANCE:
Manufactured to Class A tolerances as established by ASTM* E-694 for volumetric ware, ASTM E-542 for calibration of volumetric ware, and ASTM E-288 for volumetric flasks



07-250-103

Kimble* Heavy-Duty Volumetric Class A Flasks with PTFE Stoppers

Calibrated "To Contain"

- Wall thickness and weight are at least double that of standard volumetric flasks
- Marking spot
- Color-coded PTFE stopper

COMPLIANCE:
Conform to ASTM* E 288, Type I, Class A unserialized flask tolerances as listed in Class A Tolerance chart.

Kontes* Microflasks

Calibrated "To Contain"

- Class A, threaded flask
- PTFE-lined silicone septum for syringe access
- V-shaped bottom provides convenient sample retrieval
- Sandblasted base for writing
- 13-425 GPI thread finish
- Open-top phenolic cap

ORDERING INFORMATION:

Height, 2⅞" (7.3cm)

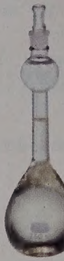
VOLUMETRIC—CLASS A SPECIAL PURPOSE

Pyrex* Class A Flasks with Bulbed Neck

Calibrated "To Contain" at 20°C (68°F)

- Bulb has 1⁄10 of flask capacity for all sizes except 2000mL, which has 1⁄20 of flask capacity
- Extra capacity in neck is used for preliminary titration, leaving full volume for adjustment of normality of solution
- Tolerances specified on Class A Tolerances chart
- ₷ Barrelhead stoppers
- Stopper ₷ sizes: 13 (100); 16 (250); 19 (500); 22 (1000); 27 (2000)



10-224C

COMPLIANCE:

Meet specifications of Manufacturing Chemists Association

Capacity	Mfr. No.	Cat. No.	Case of

Nalgene* Class B Polymethylpentene Flasks with Screw Caps

Calibrated "To Contain" and "To Deliver" at 20°C (68°F)

10-198-52 Series

- Chemically inert, break resistant
- Autoclavable; completely disengage closure before autoclaving
- Leakproof (see definition below)
- Individually hand calibrated
- Polypropylene screw closures

INCLUDES:

Polypropylene screw closures

COMPLIANCE:

Meet ASTM* and ISO standards and tolerances in Class B Volume Tolerances chart

Capacity	Mfr. No.	Cat. No.	Each	Case of
50mL	4001 0050	**10-198-52A**	27.10	12/216.75

Nalgene* Class B Polypropylene Flasks with Screw Caps

Calibrated "To Contain" and "To Deliver" at 20°C (68°F)

10-198-50D

- Break resistant, excellent chemical resistance
- Autoclavable; completely disengage closure before autoclaving
- Leakproof (see definition below)
- Individually hand calibrated
- Permanent color graduation line, oval marking spot
- No meniscus to confuse readings
- 200mL size has additional line at 203mL level for BOD and DO determinations
- Meet tolerances in Class B Tolerances chart
- Polypropylene screw closures

COMPLIANCE:

Meet ASTM* E 288 and ISO 384

Capacity	Mfr. No.	Cat. No.	Each	Case of
50mL	4000 0050	**10-198-50A**	26.94	12/215.50
100mL	4000 0100	**10-198-50B**	28.94	12/231.50

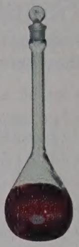
250mL	4000 0250	**10-198-50D**	35.66	12/285.25
500mL	4000 0500	**10-198-50E**	43.13	8/230.00
1000mL	4000 1000	**10-198-50F**	55.19	6/220.75

†Nalgene assigns the term "leakproof": a) To bottle/closure systems with closures smaller than 100mm, after they are filled with water, inverted, withstand air pressure of 2psig for 2 minutes, and no water escapes;. b) To bottle/closure systems of 100 or 120mm after they are filled with water, inverted for 15 minutes, and no water escapes. **Note:** these tests, using other liquids, may not yield the same results. To ensure safe usage, Nalgene advises customers to test Nalgene bottles and closures under conditions of their planned applications. Nalgene bottles and carboys are leakproof at ambient temperature and pressure when used with their Nalgene closures.

Kimax* Class B Flasks with $ Pennyhead Stopper

Calibrated "To Contain"



10-204F

- Tolerances as specified in Class B Volume Tolerances chart
- $ ground glass stoppers
- Stopper $ sizes: 9 (1, 10, 25, 50mL); 13 (100); 16 (200, 250); 19 (500); 22 (1000); 27 (2000)

FLOOR MATS

*Fisherbrand** Adhesive Entryway Mats

Trap contaminating dirt, dust, and bacteria before they invade cleanrooms

- Tear-off, adhesive-coated polyethylene sheets
- Patented pull-tab system makes it easy to peel off top sheet when it becomes soiled; remaining sheets stay intact and clean
- Will not curl, tear or wrinkle
- Adhesive will not transfer to footwear
- Treated with antimicrobial agent
- Clear sheets on white mat; 2mil thickness

L x W	Cat. No.	Case of
Low-Tack Mats (40 sheets per mat)		
18 × 45" (46 × 114cm)	**19-181-506**	3/198.41

*Fisherbrand** Adhesive Roll Mop

Effectively removes dirt, debris, and lint

- Suitable for use on many surfaces including glass, plastic, metal, and cloth
- Picks up contaminants from hard-to-reach areas such as walls, ceilings, floors, benchtops, windows and corners
- Rolling mop unit with adhesive sheets connects to lightweight, 4' long (1.2m) aluminum handle—handle extends to 7' (2.1m)

06-527-50

- Roll is 18" wide (46cm) and contains 20 disposable, high-tack poly-foam sheets with bounce-back memory
- Perforations approximately every 14" (41cm) give easy access to fresh sheet

ORDERING INFORMATION:
Replacement 20-sheet rolls sold separately.

INCLUDES:
Four rolls and extendable handle

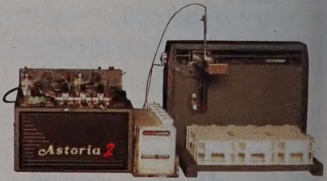
Description	Cat. No.	Each
Adhesive Roll Mop	**06-527-50**	320.89
Replacement Roll	**06-527-51**	48.13

FLOW ANALYZERS

Astoria-Pacific Astoria* 2 Micro Flow Analyzer System

Rapidly analyze microliters of sample for multiple analytes at sub-ppb and µM levels, with low dispersion, low carryover, and high reproducibility

Compact, integrated, dual-channel system combines the advantages of flow injection analysis (FIA) and segmented flow analysis (SFA), while minimizing the disadvantages. Highly reliable components ensure maximum system performance; technological innovations have resulted in improved performance at high rates of sample throughput. Offers several hundred methods in a diversity of applications ranging from nutrients and vitamins to fertilizers and pollutants.



200-S3 Series

Features and Benefits

- Rapid stabilization of detectors allows rapid start-up
- Tandem 2+2 model provides four channels of simultaneous analyses from a single sample
- Self-aligning flowcells allow for easy removal and replacement of flowcells
- Fast rinse-out of reagents and easy manifold detachment allow for rapid changeover of cartridges
- Pecking sampler and microbore glassware and tubing provide decreased dispersion and carryover, increased sample throughput
- Microliter flowrates/reagent usage, minimal reagent preparation time, and reduced hazardous waste mean reduced cost per sample
- Built-in self-monitoring system detects out-of-control and out-of-calibration conditions
- Results appear on screen in 15-20 minutes; printed results can be generated on demand at any time during or after the run; data between test channels can be manipulated and calculated automatically

Contd. on next page.

Astoria-Pacific Astoria* 2 Micro Flow Analyzer System, Contd.

FASPac Software System

- Controls the walk-away operation of the system, real-time reporting, calibration monitoring, and more; works within Windows* environment
- Controls, collects, and processes data from up to six digital channels and one analog channel simultaneously
- Offers sophisticated graphical presentation of information and data
- Easily customized to fit specific needs
- Sample tables can be imported from LIMS system and reports can be consolidated and exported to ASCII files or spreadsheet applications

ORDERING INFORMATION:

Electrical Requirements: Voltage: 105/125VAC, 220VAC (optional). Frequency: 60Hz, 50Hz (optional). Current: 5A.

Environmental Requirements: Operating Temperature: 15° to 35°C. Relative Humidity: Less than 80%.

REQUIRED ACCESSORIES:

A wide variety of cartridges is available to meet your application needs for the analysis of alkalinity, ammonia, chloride, hexavalent chromium, cyanide, fluoride, hardness, magnesium, nitrate/nitrite, nitrite, total Kjeldahl nitrogen, orthophosphate, phenol, total phosphorus, silicate, sulfate, sulfide and urea. Contact your Fisher Scientific Customer Service Representative to select a cartridge designed to meet your analysis needs.

WARRANTY:

Two years

Description	Includes	Cat. No.	Each
Astoria 2 System			
With 311XYZ Sampler	Astoria 2, 311XYZ Sampler, and FASPac II software	**200-S311-00**	33,499.38
Astoria 2+2 System			
With 311XYZ Sampler	Astoria 2+2, 311XYZ Sampler, and FASPac II software	**200-S311-01**	58,686.88

Model	Astoria 2
Sampler	311 XYZ random access sampler
Micropump	Integrated peristaltic pump with variable speed and leak detector
Cartridge	Space for two analytical cartridges. Two heating bath controllers.
Autodiluter	312 Autodiluter, software-controlled
Detector	Two integrated digital detectors. Built-in interface (IEEE port) allows the additional use of an external detector.
Software	FASPac II
Throughput	45–120 samples per hour, depending on method requirements
Sample Size	10–250µL, depending on method
Reagent Volume	Approximately 1mL/min., depending on method
Detection Range, Photometer	340-880nm
Limit of Sensitivity	As low as 0.5ppb, depending on method
Optical System	Digital dual-beam photometer
Light Source	Tungsten halogen lamp
Output	Digital with A/D conversion of an external analog detector

---

FLOW MONITORS

FLOW MONITORS

Visually monitor the flow of liquids or gas. Paddle-wheel monitor spins freely; ball model spins through circular course. Both increase speed with increase in flow.

Description	Monitors	Cat. No.	Each	Case of 12
Polystyrene Paddle Wheel	Liquids or gas, 5 to 95mL/sec.	**11-164-39**	47.44	486.61
Nylon Ball	Water, 100mL to 1L/min.	**K626250-0000**	15.89	----

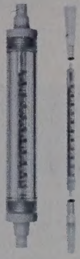
Thermo Scientific* Gilmont* Shielded Laboratory Flowmeters



15-078-103

- Made from corrosion-resistant materials
- Clear polycarbonate shield offers added strength and protection; ideal for pressure applications
- Fluid touches only borosilicate glass tube, PTFE inserts, Viton* fluoroelastomer O-rings, and either stainless-steel or glass floats
- Accept ⅜" (9.5mm) I.D. tubing
- Inserts accept flexible hose; polypropylene bushings are threaded to accept NPTF fittings
- Repeatability: ±1% of reading or ±0.5 scale division, whichever is greater
- Max. Temperature: 65°C (150°F) at full pressure rating

Calibrated/Correlated Style

Accuracy: ±2% of the reading or ±1 scale division[1].

INCLUDES:
Calibration table for air and water and comes with glass and stainless-steel floats.

---

[1] *For micro flowmeter, accuracy is ±5% of reading or ±2 scale division for air and ±10% of reading or ±3 scale division for water.*

Direct Reading Style[2]

Takes direct air and water readings without calibration curves. Accuracy: ±5% of reading or ±2mm of the scale length (whichever is greater).

INCLUDES:
An "R factor" chart (or use GF-4000 software formulas to convert scale readings for other fluids or for floats other than glass).

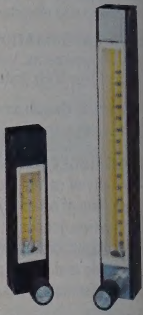
[2] *When using the stainless-steel float, refer to the correlation table (included) to obtain a proper reading.*

Thermo Scientific* Gilmont* Shielded Industrial Flowmeters

Ideal for measuring and controlling liquids and gases in lab and industrial applications



15-179-280 series and 15-179-130 series

Applications include gas chromatography, atomic absorption, chemical processing, and air and water pollution analysis. Conform to standard industry dimensions for easy retrofitting and direct replacements.

- Accuracy: ±5% of full scale
- Repeatability: 0.5% of reading
- Max. Pressure: 250psig
- Max. Temperature: 121°C (250°F)
- Front shields have 1.5X magnification for easy reading
- All models feature precision glass metering tubes, Unitized* tube holders for easy tube replacement, and glass, stainless-steel, or tungsten carbide floats

65mm Calibrated Models

Feature standard, 8-turn metering valve. Range: 10 to 1, 100% of full scale.

150mm Calibrated Models

Come in two styles: with standard, 8-turn metering valve or with 16-turn metering valve for critical flow regulation and adjustment. Range: 10 to 1, 100% to 10% full scale.

INCLUDES:
All models come with standard panel-mounting hardware and calibration tables for both air and water.

CERTIFICATIONS:
Certificate indicating instrument traceability to standards provided by NIST* available on request. Call your Fisher Scientific Customer Service Representative for details.

Scienceware* Riteflow* Flowmeters

For corrosive and noncorrosive liquids and gases

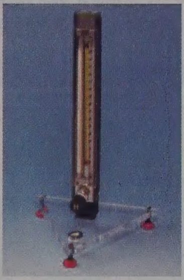
11-163-72A

Useful metering ratios are 10:1 or better. All flowmeters except size 1 may be used with dual float combinations to increase metering to 20:1. Pressure drop is negligible. Flow ranges are linear; low differential pressures are independent of flowrate changes.

- Heavy-walled borosilicate glass tubes with fused ceramic scales are shock resistant and chemically inert
- Can be used with almost any corrosive or noncorrosive gas or liquid
- Choice of five flowrate changes
- Accurate over a wide range of gas and liquid flowrates: from 0.03 to 1812mL/min. for water, and from 2.5 to 60,888mL/min. for air
- Accurate to within ±2% of full scale, with repeatability of ±0.25% of full scale

INCLUDES:

Calibration charts for air and water are included; charts for other gases and liquids are available from Bel-Art* on request at no charge.



11-163-77 Series with 11-163-80

NOTE:

Gaseous hydrofluoric acid may damage the glass.

[1] Flow capacities shown are based on calibrations at 70°F, 14.7psi

[2] Size 5 flowmeters are available with either stainless steel or Carboloy floats. Flowrates reflect stainless steel.

Mounted Flowmeters

Models with aluminum body have 1⁄8" female NPT connections with plastic hose barb for tubing with 5⁄16 to 3⁄8" I.D. PTFE body units have 3⁄8" O.D. (9.5mm) glass tube extensions.

ORDERING INFORMATION:

Overall housing length is 10½" (27cm). Length with leveling base is 12" (31cm). Order leveling base kit (11-163-80) separately below.

INCLUDES:

Metering tube mounted in an aluminum housing, an integral control valve, and two floats (one glass and one stainless steel; except size 5, which includes one glass and one Carboloy*).

FLUOROMETERS

Shimadzu* RF-5301 Spectrofluorometer

Offers superior sensitivity, sophisticated functionality, and increased user control

Wide-application use including pharmaceutical, biochemistry, and food science. Performs measurement, data processing, editing, and recording with one mouse-click. Supports microcells, high-sensitivity cells, and LC-flow cells.

Superior Sensitivity

- High-throughput optical system uses a blazed holographic grating, photomultiplier, and digital circuit, for top-of-the-line sensitivity
- Measures spectrum in just seconds with high-speed scanning of up to 5500nm/min.
- Monochromator slewing at ultrahigh speed of 20,000nm/min.; allows easy setting of two or more wavelengths

Sophisticated Functionality and Measurement Modes

- Records changes in intensity over time for kinetic assays, or performs quantitative analysis on several samples
- Recalls up to 20 fluorescence standards to find best calibration curve for data
- Easy DNA quantification with Ethidium Bromide or Hoechst dye, OPA-derivatives of amino assays, cell viability assays and FITC or Rhodamine-labeled ligands; reads and averages relative fluorescence intensities of unknown samples; fits data to first-order through third-order curve, or force curve through zero
- Spectrum Measurement Mode differentiates spectra using colors and line patterns, zooms to autoscale all data, tabulates and picks peaks and valleys, and displays up to 10 spectra on screen
- Time-Course Measurement Mode monitors changes and measures reaction rates such as dehydrogenase activity; data collected up to every 0.02 seconds

Integrated Software for Increased User Control

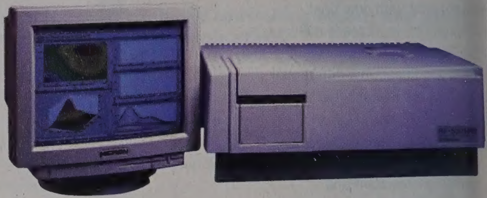
- Operating parameters are automatically verified when unit is turned on
- Noise level ratio check and light source usage monitoring help maintain optimal conditions
- Microsoft* Windows* environment features intuitive, menu-driven system, and online help
- SpeedBox* allows users to customize button shape or position, and eliminate keystrokes by assigning icons for common commands
- Easy data storage, retrieval, and file management
- RS-232 interface

APPLICATIONS:

Analyzing crude drugs; measuring trace components in foods, monitoring water and environmental pollutants; measuring trace components of organic and inorganic compounds.

ORDERING INFORMATION:

Dimensions (not including PC): 20⅞L × 26¼W × 10⅝"H (53 × 67 × 27cm). For 100–120V 50/60Hz, 400VA. Accessories, including sample holders and cell holders, available on our Web site.



22-092-33120 (monitor not included)

REQUIRED ACCESSORIES:

RS-232 cable (not included) to connect with computer, Microsoft Windows 3.1 or higher, plus PC with 486 or better processor, 8MB disk space, SVGA monitor, mouse, and CD-ROM drive.

Description	Cat. No.	Each
RF-5301PC Spectrofluorometer	22-092-33120	20,841.84

Specifications

Bandwidth	1.5, 3, 5, 10, 15 and 20nm†
Wavelength	
Range	220 to 750nm, 0 order standard
Accuracy	±1.5nm
Scan Speed	Survey (5500nm/min.), Super (3000nm/min.), Very Fast, Fast, Medium, Slow, Very Slow
Slewing Speed	20,000nm/min.
Response	0.02, 0.03, 0.1, 0.25, 0.5, 2, and 8 seconds for 98% of full scale
Sensitivity	High or Low‡
Lamp	Xenon lamp, 150w, Ozone-resolving housing
Optics	Concave, nonaberration, blazed holographic grating, F2.5, 1300 grooves/mm
Detector	Photomultiplier tube
Display	None
Temp. Range (Operating)	15 to 35°C (59 to 95°F)

† 6nm also available for half-sample height on excitation measurements.

‡ Signal-to-noise ratio is at least 150 for the Raman line of distilled water (@350nm excitation wavelength, 5nm spectral slitwidth, 2-second response for 98% of full scale).

Sample holders and cell holders are available online.

Visit www.fishersci.com and search for Sample and Cell Holders

Shimadzu* RF-1501 Spectrofluorometer

Provides exceptional sensitivity in a compact, economical instrument

Bright optical system and noise suppression digital filter allow for high sensitivity measurement.

Key Features

- Signal-to-noise ratio >300 for Raman line of distilled water
- 4-step selectable scanning speed—up to 3700nm/min.
- Wavelength slewing at ultrahigh speeds up to 30,000nm/min.
- Intuitive keypad operation
- Backlit LCD shows settings and parameters for wavelength scanning, quantitative analysis, and maintenance
- Manufactured with ISO 9001:2000-certified processes

Wavelength Scanning Functions

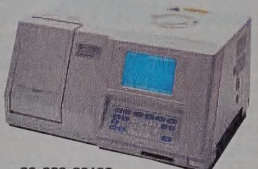
- Measurement of excitation and emission spectra
- Automatic search of optimal excitation and emission wavelengths
- Automatic response control
- Automatic shutter
- Spectrum expansion and compression
- Readout of spectrum values at cursor-specified points
- Peak pick
- Difference spectra
- Data printout

Quantitation

- Quantitation at fixed wavelengths
- Working curve generation (1st regression, 10-point)
- Working curve correction
- Repeated measurement and data averaging (up to 5 times repetition)
- Automatic shutter

Data Filing and Transmission

- Storage and recall of instrument parameters—three sets in main memory (60 in optional data packs)
- Storage and recall of measurement data—two sets in main (9 in optional data packs)
- RS-232-C interface



20-662-90192

ORDERING INFORMATION:

Dimensions: 15¾L × 19¾W × 10"H (40 × 50 × 25.5cm). Net weight: 51 lb. (23kg); for 100–120V 50/60Hz. Optional program packs, sample holders, polarizers (20-680-86000), and printer kit (22-092-35715) are available on our Web Site.

RF-1501 Spectrofluorometer	**20-662-90192**	13,847.59

Specifications

Spectral Slitwidth	10 and 20nm
Wavelength	
Range	220 to 750nm, 0 order standard
Accuracy	±5nm
Scan Speed	Super, Fast, Medium, Slow
Slewing Speed	30,000nm/min.
Response	0.02, 0.03, 0.1, 0.25, 0.5, 2, and 8 seconds for 98% of full scale
Sensitivity	High or Low†
Lamp	Xenon lamp, 150w, Ozone-resolving housing
Optics	Concave, nonaberration, blazed holographic grating, F2.4, 900 grooves/mm
Detector	Photomultiplier tube
Display	Backlit LCD
Temp. Range (Operating)	10 to 35°C (50 to 95°F)

† Signal-to-noise ratio is at least 300 for the Raman line of distilled water (@350nm excitation wavelength, 10nm spectral slitwidth, 2 second response)

Thermo Scientific* Quantech* Digital Filter Fluorometers

Compact, economical fluorometers ideal for life-science applications involving multiple samples

- Menu-driven software navigates operator through setup of standard curve
- Store up to nine multipoint (2 to 9 points) standard curves in memory
- Help guide aids operator to select correct filter for application, diagnostics/ status menu to troubleshoot performance
- Measure single point raw fluorescence or sample concentrations based on linear regression analysis of standard curve data

11-164-52

- Feature discrete signal averaging and excellent sensitivity
- Automatic gain adjustment
- Automatic optimization of linear range maximizes working concentration range
- Ergonomic, low-profile design
- RS-232-C interface

Models

- Choose from four models: Base, IR, Wide Band and Protein
- Protein model (11-675-906) quantifies protein without use of fluorescent dyes
- All models come with large, versatile sample compartment to accommodate wide variety of cells or cuvets including 12.5 × 12.5 × 45mm square cuvets, 12 × 75mm round tubes and flow cell option

APPLICATIONS:

Quantitative biochemical assays; DNA and RNA quantification; quantification of nucleic acids in drug preparations; cell proliferation assays; wastewater analysis; hydrocarbon monitoring

ORDERING INFORMATION:

Dimensions: 15½D × 6¾H × 11½"W (39.4 × 17 × 29cm). For 120V 50/60Hz.

INCLUDES:

Unit, one excitation filter (11-164-68), and one emission filter (11-164-64)

WARRANTY:

Two years

CERTIFICATIONS:

CSA approved

† Mercury line is a discontinuous source. Peak intensity of UV light at 254, 313, 360nm.

Hoefer* DQ 300 Fluorometer

Fast, easy, and convenient quantitation of DNA, RNA and protein

03-500-415

- UV and blue light sources enable accurate quantitation
- Internal memory stores up to 1000 data points
- Spreadsheet interface software enables export of data to a PC via an RS-232 interface
- Two reading modes (discrete and continuous) allow unit to be adapted to different experimental protocols
- Optional minicell adapter (Hoefer Cat. No. DQ310) can be used to measure sample volumes from 50 to 200µL with minicell cuvets
- Built-in rack accepts 10 × 10mm cuvets or minicell cuvets

INCLUDES:

Spreadsheet Interface Software CD with instructions, four 10 x 10mm methacrylate cuvets, power supply kit

Description	Mfr. No.	Cat. No.	Each
DQ300 Fluorometer	DQ300	**03-500-415**	3084.00

SPECIFICATIONS

Excitation Range	365-395nm (UV); 465-485nm (blue)
Emission Range	440-470nm (UV); 515-575nm (blue)
Dynamic Range	Three orders of magnitude
Measurement Range	300-1000nm
Calibration	Single-point or blank
LCD	2 × 16 characters
Weight	1.8 lb. (0.67kg)
L × W × H	7¼ × 5½ × 2¾" (18.42 × 14 × 6.9cm)

Turner BioSystems TBS-380 Mini-Fluorometer

Compact, economical, intuitive instrument supports DNA, RNA, and protein quantification

Delivers fast, accurate fluorescence measurements of low concentrations of nucleic acids and protein in low volume samples (<50µL). Dual-channel unit (UV and Blue) is lightweight and easy to use.

11-600-53

- LCD readout
- Uses common nucleic acid tags such as PicoGreen*, RiboGreen*, NanoOrange*, and Hoechst 33258 dye
- Discrete and continuous reading modes
- Built-in spreadsheet software allows transfer of data to Microsoft* Excel* via RS-232-C serial interface
- Attached storage cart holds and protects samples
- Recommended temperature range is 15° to 35°C (59° to 98°F)
- Use with optional minicell adapter and focusing lenses (11-600-54, sold separately) to measure small quantities of nucleic acids in a small assay volume (50µL), without losing sensitivity
- Accepts 10 × 10 × 45mm square plastic cuvets (not included)

ORDERING INFORMATION:

Dimensions: 7½L × 5½W × 2¾"H (19 × 14 × 6.9cm); for 100/240VAC 50/60Hz; accessories, including Minicell Adapter Kit (11-600-54), Inkjet Printer Package (11-600-56) and cuvets, are available online.

INCLUDES:

Unit, user manual, spreadsheet interface software and 9V power supply kit

REQUIRED ACCESSORIES:

Cuvets (sold separately)

WARRANTY:

One year

FREEZE DRY

Labconco* FreeZone* and FreeZone Plus* Freeze-Dry Systems

Benchtop, Console and Cascade models

Freeze-dry systems with environmentally safe, CFC-/HCFC-free refrigerants that do not harm the ozone layer. FreeZone Plus Cascade models are designed specifically for samples with low eutectic points.

10-271-16

System Characteristics

- Upright collector chamber simplifies defrosting; many models include built-in hot gas defrost to quickly melt any collected ice
- Automatic one-button startup initiates condenser cooldown and vacuum pulldown
- LCD indicates temperature in °C or °F; vacuum in mbar, Pa, and torr
- LED vacuum and temperature "waves" on all except 1L models show relative system vacuum and collector temperature
- LED alarm light on all except 1L models flashes for abnormal events, including power interruptions, improper power supply, when collector temperature rises above -40°C, and required vacuum pump service
- Vacuum control valve on all except 1L systems maintains vacuum level

Connectivity

- RS-232 port on all models except 1L can be used to transmit data to a computer

Features

- Easy to service with retractable drain hoses
- Cabinets are white epoxy-coated steel with brushed stainless-steel front panels and blue accents
- Console models have removable front panels and are roomy enough to accommodate vacuum pump
- Benchtop models easily fit on laboratory benchtop to process light to moderate loads
- PTFE-coated collector chamber and coil for processes involving corrosive compounds are available

ORDERING INFORMATION

Contact your Fisher Scientific* Customer Service Representative for pump con patibility.

REQUIRED ACCESSORIES

All require vacuum pumps and glassware; all except 4.5L models require drying accessories (4.5L models come with permanently installed 10-port stainless-steel drying chamber for bulk sample connection). Contact your Fisher Scientific* Customer Service Representative for pump compatibility an drying accessory details.

INCLUDES:

8' (2.4m) cord. Models wired for 115V, 60Hz include 3-wire cord with 20A NEMA 5-20P plug. Models wired for 220/240V 50Hz or 208/230V 60Hz includ 3-wire cord with 20A NEMA 6-20P plug.

COMPLIANCE:

Conform to ETL listed for UL standard (60Hz), CAN/CSA (60Hz), CE marked (220V/240V, 50Hz models)

FreeZone* Console Freeze-Dry Systems

Available in several system configurations and collector capacities to meet sample load requirements

- Cabinets are white epoxy-coated steel with brushed stainless-steel front panels and are mounted on 3" (7.6cm) casters for mobility
- Refrigeration system cools collector to -50°C (-58°F)
- 4.5L model comes with permanently installed 10-port stainless-steel drying chamber for bulk sample connection
- 6L models available with optional built-in shell freezer with stainless-steel bath, 12½L × 5½W × 7½"H (30.5 × 14 × 19cm) for easier prefreezing
- Purge Valve option with switch prevents back streaming of vacuum pump oil and minimizes chance for sample contamination of power if interrupted

ORDERING INFORMATION:

All models are also available with PTFE-coated collector chambers and with internal electrical configurations; contact your Fisher Scientific* Customer Service Representative for details.

Basic 4.5L Model with 10-273-19 Drying Chamber (sold separately)

10-271-46

18L Model (with included purge valve) and 10-273-2 48-port ampule manifold (sold separately)

SERVICE AGREEMENTS

Fisher Scientific offers several types of service agreements for the equipment featured here. For details on these agreements, equipment repairs and calibration services, see the Services section.

Labconco* FreeZone* and FreeZone Plus* Freeze-Dry Systems, Contd.

FreeZone* Benchtop Freeze-Dry Systems

NEW

With a small footprint and four rubber feet, these smaller capacity models fit easily on benchtop and are ideal for light and moderate loads.

- Refrigeration system cools collector to -50°C (-58°F)
- 4.5L Model has stainless-steel drying chamber with 10 valves to connect serum bottles, ampules, or freeze-dry flasks with ½ to ¾" adapters (available separately)
- Stoppering Tray Dryer option on 6L model allows bulk processing of large batches of material in small containers or large specimens
- PTFE-coated collector chamber and coil for processes involving corrosive compounds are available

ORDERING INFORMATION:

International Models are also available.

10-030-126 with 12-port Drying Chamber 10-273-19 (pump not included)

Labconco* FreeZone* Bulk Tray Dryers

For use with 6, 12, or 18L FreeZone Freeze-Dry Systems

16-317-92

Unique Shelf-heating System

- Three 16⅝L × 12¾"W (42.2 × 32.2cm) shelves, each with 210 sq. in. of space, accommodate bulk samples or batches of serum bottles, vials, or ampules (two additional shelves [order separately] can be added as needed)
- Microprocessor-controlled 200-watt heater on each shelf ensures efficient heating, up to +60°C, +/- 3°C of setpoint
- Three sensor probes monitor sample or shelf temperature; can add two more sensors for a total of five (sensors sold separately)

User-friendly Operation

- LCD display of setpoint and temperature of each shelf and indicates RUN (R) or STOP (S) modes
- Vacuum release valve vents chamber to open door after drying
- Rear-mounted RS-232 cable connection to IBM*-compatible computer; use connection to monitor parameters: shelf setpoint temperature, actual shelf temperature, run time, and operating status

Exterior Features

- Clear ¾" (1.9cm) thick acrylic viewing door
- Cabinet is white epoxy-coated steel with a brushed stainless-steel front with blue accents

Integral support stand

- Six-port manifold is included in 16-317-92 and 16-317-94; accommodates either ½ or ¾" flask adapters to allow connection of flasks and freeze dry glassware so that samples attached to manifold and in Tray Dryer may be lyophilized simultaneously

ORDERING INFORMATION:

Dimensions for all models (L × W × H): 19½ × 32 × 27½" (50 × 81 × 69cm)

REQUIRED ACCESSORIES:

Vacuum pump with displacement of 144L/min., 0.002mbar ultimate pressure, ¾" (1.9cm) I.D. fitting for vacuum hose; sold separately; freeze dry glassware if not bulk freeze drying

COMPLIANCE:

ETL listed to UL standards (115V models), CAN/CSA (115V models), CE marked (230V models)

Description	Electrical Reqts.	Shipping Weight	Mfr. No.	Cat. No.	Each

Labconco* Stoppering Tray Dryers

Use with any 6, 12, or 18L FreeZone* freeze-drying syster to lyophilize and bulk stopper samples under vacuum

10-274-50

Features

- Built-in pneumatic mechanism for stoppering
- Front panel LCD displays system chamber vacuum in mbar, Pa, or torr and system and probe temperatures in °C or °F; warning lights alert to power failure, temperature fluctuations, or vacuum decay
- Three processing shelves accommodate serum bottles, vials, or ampules; remove one or two shelves to allow for containers of various heights (samples may be pre-frozen on these shelves)
- Three probes monitor sample temperature
- Cabinet is constructed of brushed stainless steel and white epoxy-coated steel with blue accents; with clear ¾" (1.9cm) thick acrylic viewing door
- Support stand
- ⅛" (0.3cm) backfill port

Microprocessor Control

- Temperature programmable up to five different segments; also includes temperature ramp
- Built-in memory allows repetition of identical protocols
- Automatic and manual modes for setting system parameters
- 3" (7.6cm) diameter outlet on bottom of cabinet allows dryer to be connected to FreeZone systems
- Rear-mounted RS-232 port enables communication of the tray dryer with the system
- 1hp CFC-free refrigeration system and 1000w heater for shelf cooling and heating
- Temperature of fluid circulating through channels in the shelves can be set from -40° to +40°C within ±1°C of setpoint

INCLUDES:

8' (2.4m) 3-wire cord with plug. Models with 115V 60Hz have 20A NEMA 5-20P plug; models with 230V 50 or 60Hz have 15A NEMA 6-20P plug.

REQUIRED ACCESSORIES:

Vacuum pump with 144L/min. or higher displacement; freeze-dry glassware if not bulk freeze drying

COMPLIANCE:

ETL listed to UL standards (60Hz versions), CAN/CSA (60Hz versions), CE marked (220/240 50Hz version)

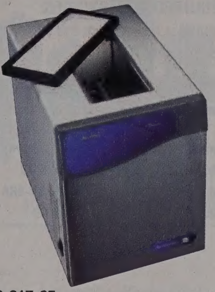
Labconco* FreeZone* Benchtop Shell Freezer

NEW

Compact system for prefreezing samples for lyophilization



16-317-95

- ½hp refrigeration system prefreezes samples to -40°C
- Stainless-steel bath with two rollers to rotate flasks in low-temperature heat transfer solution; produces a uniform thin coating of sample on container interior wall, ensuring efficient vapor flow from sample to collector during lyophilization
- Accepts serum bottles, ampules, and flasks up to 1200mL in size
- Does not contain ozone-depleting chlorofluorocarbons (CFCs)
- LED display of bath temperature from -20° to -42°C in predetermined increments
- Left-mounted retractable bath hose facilitates cleaning of bath
- Fits on countertop or lab cart
- Shipping weight, 95 lb. (43kg)

Cabinet Features

- White epoxy-coated steel with a brushed stainless-steel front with blue accents
- Dimensions (L × W × H): 22⅛ × 14½ × 19¾" (56.1 × 36.8 × 50cm)

Bath Features

- Stainless steel with urethane foam insulation and white HDPE cover
- Dimensions (D × W × H): 12 × 5½ × 6½" (30.5 × 14 × 16.5cm)

INCLUDES:
8' (2.4m) 3-wire cord and plug

REQUIRED ACCESSORIES:
2L of transfer solution (not included)

COMPLIANCE:
ETL listed to UL standards, CAN/CSA

Electrical Reqts.	Mfr. No.	Cat. No.	Each
115V 60Hz, 6A	7949020	**16-317-95**	4005.00

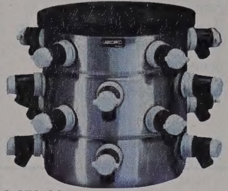
Labconco* Drying Chambers

For use on FreeZone* Freeze-Dry Systems: 12-port for 1, 2.5, 6, 12, and 18L models; 16-port for 6, 12, and 18L models

- Place small sample inside freeze-dry flasks and attach to valves
- Type 304 stainless-steel construction
- Weld-free for dependable vacuum operation
- Neoprene valves accommodate both ½" and ¾" adapters, gaskets and clear acrylic top for complete visibility during bulk drying

10-273-19



10-273-20

Ports	Diameter	Mfr. No.	Cat. No.	Each
16	13" (33cm)	7522900	**10-273-20**	2420.00
12	8" (20cm)	7522800	**10-273-19**	1460.00

Labconco* Clear Drying Chambers

For visible bulk drying

- Durable and corrosion-resistant
- Chambers without valves include clear acrylic top and bottom lids, gaskets, vacuum break valve, and electrical pass-through for transformer cords
- Chambers with valves include aluminum lid with eight valves that accommodate both ½" and ¾" adapters for connecting flasks
- Use with or without product shelves (shelves available separately, visit our Web Site.

10-030-155

Description	For Use with	Dia. × H	Mfr. No.	Cat. No.	Each

Labconco* Secondary Vacuum Traps

For any mechanically refrigerated freeze-dry system; ensure efficient processing of samples with low eutectic points

- Trap will cool to approximately -75°C (-103°F) with dry ice and solvent in its removable well
- Can be used as an inexpensive collector: connect a sample to incoming port, vacuum pump to outgoing port, and system is complete
- Stainless steel, with cover

10-269-46A

REQUIRED ACCESSORIES:
A pump is required for the use of this trap; see our selection of pumps in the Pumps section.

Labconco* Freeze-Dry System Manifolds

4-Port Manifold

- Four valves accommodate both ½ or ¾" adapters
- For use with FreeZone* 1, 2.5, and 4.5L Freeze-Dry Systems
- Dimensions (L × W × H): 8¾ × 8¾ × 9" (22.1 × 22.1 × 22.9cm)
- Attachment Port Lid Accessory required for connection to 4.5L System (sold separately)

20-Port Manifold

- 20 neoprene valves that accommodate both ½ or ¾" adapters
- For use with all FreeZone* Freeze-Dry Systems
- Dimensions (L × W × H): 5 × 19 × 9" (13 × 48 × 23cm)
- Attachment Port Lid Accessory required for connection to 4.5L System (sold separately)

10-Port Manifold with Support Shelf

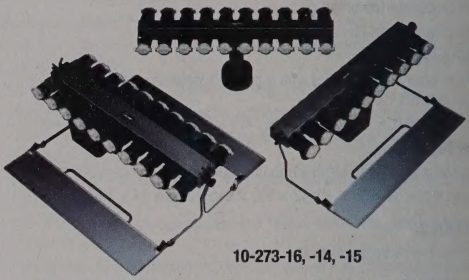
- 10 neoprene valves accommodate both ½ or ¾" adapters and adjustable support shelf
- For use with FreeZone 6, 12, and 18L Freeze-Dry Systems
- Dimensions (L × W × H): 6⅝ × 26 × 10" (17 × 66 × 25cm)

20-Port Manifold with Support Shelves

- 20 neoprene valves accommodate both ½ or ¾" adapters and two adjustable support shelves
- For use with FreeZone 6, 12, and 18L Freeze Dry Systems
- Dimensions (L × W × H): 9½ × 26 × 10" (24 × 66 × 25cm)

48-Port Valveless Manifold

- Tree-type manifold, complete with 48 ports with ¼" O.D. pipe stems that accommodate gum rubber or Tygon* tubing, fitting over any Labconco ampule
- Tubing not included



10-273-16, -14, -15

- For use with FreeZone 4.5, 6, 12, and 18L Freeze-Dry Systems
- Attachment Port Lid Accessory required for connection to 4.5L System (sold separately)
- Dimensions (L × W × H): 5 × 5 × 28⅝" (13 × 13 × 73cm)

Description	Mfr. No.	Cat. No.	Each
4-Port Manifold	7522200	**10-030-157**	555.00
20-Port Manifold	7522300	**10-273-14**	2820.00
10-Port Manifold with Support Shelf	7522400	**10-273-15**	2045.00
20-Port Manifold with Support Shelves	7522500	**10-273-16**	2960.00
48-Port Valveless Manifold	7868500	**10-273-2**	1865.00

LOOKING FOR SHELVES?

Prices subject to change.

Labconco* Fast-Freeze* Flasks

Easy to handle and fast to load

- Flat borosilicate glass
- Silicone rubber snap-on tops provide reliable high-vacuum seals
- Eliminate risk of contamination by vacuum grease; reduce spillage and sample loss
- No easily misplaced small parts
- Wide openings
- Should be filled no more than ⅓ of the volume so a maximum surface area is achieved
- Compatible with all major brands of freeze-drying equipment, including Labconco and Virtis*

10-269 Series, plus 10-272-06

REQUIRED ACCESSORIES

Adapters are required to attach flasks to freeze dry valves—40 and 80mL flasks use a ½" (1.3cm) adapter; larger sizes use a ¾" (1.9cm).

½ to ¾"	45° Bend	75460-00	**10-269-59B**	27.92
Stainless Steel				
½"	Straight	75470-00	**10-269-60A**	24.40
¾"	Straight	75472-00	**10-269-61A**	24.40
½"	45° Bend	75474-00	**10-269-60B**	49.04
¾"	45° Bend	75476-00	**10-269-61B**	51.55

Lyph-Lock* Flask Adapters

For connecting Lyph-Lock flasks to valve ports on drying chamber or manifold

Borosilicate glass, with 90° bend

Connects	Mfr. No.	Cat. No.	Each
$ 19/38 to ½" port	7568000	**10-269-69A**	38.98
$ 19/38 to ¾" port	7568200	**10-269-69B**	38.98
$ 24/40 to ½" port	7568400	**10-269-69C**	42.25
$ 24/40 to ¾" port	7568600	**10-269-69D**	42.25

Labconco* Lyph-Lock* Freeze-Dry Flask Assembly

Complete three-piece flask consists of high-strength borosilicate glass molded top and bottom with silicone rubber seal

- With $ 24/40 joints
- Seal grasps top and bottom securely—never comes in contact with sample
- Flat bottomed
- Wide mouth lets you load samples easily and lyophilize quickly
- Compatible with Labconco, Virtis* and other major brands of freeze dryers
- Flasks should be filled to no more than ⅓ the volume so that maximum surface area is achieved for efficient lyophilization

10-269-68 Series

REQUIRED ACCESSORIES

Adapters are required to attach flasks to freeze dry valve ports.

BEFORE YOU BUY FUME HOODS AND ENCLOSURES

CONSIDER YOUR APPLICATION

Choose a hood that fits your present and future applications and safety requirements.

Select a **fume hood** or **ductless carbon-filtered hood** if your work involves noxious or toxic fu vapors. Ducted fume hoods are generally preferable to ductless enclosures because they can han broadest range of applications and do not require filter maintenance and replacement. However, ducting is not feasible, ductless enclosures provide a practical solution.

Select a **Class II biological safety cabinet**, also known as a biohazard laminar flow hood, work involves hazardous airborne particulates, microorganisms, genetic material or carci The cabinet exhaust can be recirculated to the room but should be ducted to the outsi work requires minute quantities of toxic chemicals or trace amounts of radionuclide

CONSIDER YOUR SIZE REQUIREMENTS

Select the width of the hood based on the space required to accommodate t person(s) and apparatus needed to conduct the procedures.

OSHA 29 CFR-1910 recommends laboratories provide an average of 2.5 feet of hood space per person. Multi-step experiments may require mo Space and location in your lab may limit your size selection.

LABCONCO

CONSIDER OPTIONAL AND REQUIRED ACCESSORIES

Once you've narrowed your selection to the type of hood and size needed, select the options and accessories required to complete your ventilation system.

Optional accessories may include service fixtures and airflow monitors.

Required accessories may include a remote blower, ductwork, filters and supporti

For a full selection of Labconco® Hoods and Enclosures, see pp. 805–812, 818–82

FUME HOODS

Thermo Scientific* Hamilton* SafeAire* II Constant-Volume/Bypass Fume Hoods

NEW

Industry's first UL 1805-compliant fume hood

Designed for exact balancing of room ventilations system with hood exhaust volume. Double bypass maintains constant exhaust volume at all sash positions.

- Full-view, laminated safety glass vertical sash with full-width recessed pull
- Unique rectangular exhaust collar for more vertical space, less noise
- Louvered bypass helps maintain consistent face velocities by supplementing exhaust air when sash is lowered

Safety Features

- Perimeter side slots reduce fume accumulation or containment
- Secondary trough contains spills
- Gasketed access panel eliminates seepage into sidewall
- Metal-free liners resist high temperatures, meet NFPA 45 standards
- Sash lock/release sets and holds operating position
- Exterior lighting is remote from fumes and vapors
- Remote baffle control
- Optional safety monitor available (next page)

Construction

- Full-perimeter steel frame for long-term strength and durability
- Counterbalance system holds sash even if cable breaks
- Low-profile airfoil for obstruction-free access to hood interior
- WaterSaver* remote-control fixtures
- One 2-tube (T-8) fluorescent light fixture (96" model has two light fixtures)
- Two duplex 120V receptacles
- Chemical- and abrasion-resistant powder-coat exterior finish
- White polyresin liner
- Field-convertible to restricted-bypass or auxiliary-air type hood

Benchtop Models

- Exhaust volumes from 485 to 1081cfm (0.09 to 0.13H_2O), depending on hood size
- Sash opening: 18" (46cm) (28½" [72cm]) opening for set-up only)

Floor-Mounted Models

- Designed for large and complex laboratory apparatus setups and roll-in equipment
- Exhaust volumes from 850 to 1900cfm (0.18 to 0.29H_2O), depending on hood size
- Sash opening: 66½" (169cm)
- One cupsink and two side-wall access panels with PVC gasket
- Plugged holes for future service fixture installation

ORDERING INFORMATION:

Benchtop Models: For installation on 30 to 36" (76 to 107cm) deep work surface, available separately. Contact your Fisher Scientific Customer Service Representative for more information. Shipped assembled; installation required. Overall H × D: 54¼ × 31¼" (138 × 79cm). For 120V 60Hz.

Floor-Mounted Models: Shipped knocked down. Require extensive jobsite assembly; installation by a certified Thermo Scientific Hamilton installer strongly recommended. Overall H × D: 90 × $32\frac{11}{32}$" (228.6 × 82.2cm). For 120V 60Hz.

Thermo Scientific* Hamilton* Concept* Fume Hoods

NEW

35" (89cm) sash opening for optimal visibility

- Exhaust volumes from 484 to 1084cfm (0.09 to 0.15H_2O), depending on hood size
- Designed for 60 to 100fpm face velocities
- Downdraft bypass for increased volume, less resistance, quieter operation
- Low-profile airfoil provides obstruction-free access to the hood interior
- Frameless vertical rising sash
- Chain and sprocket sash support with alignment shaft and sash leveling system
- Fixed-baffle system requires no adjustment

Safety Features

- Secondary trough provides an additional safeguard for the containment of spills
- AutoSash* locks in the setup position, automatically returns to maximum operational height when released

Construction

- Asbestos-free white polyresin lining
- Side wall access panels with PVC gasket
- Plugged holes for fixture installation on both posts
- Two-tube fluorescent light fixtures
- Light switch
- Two duplex 120V electrical receptacles

ORDERING INFORMATION:

Overall H × D: 63½ × 31¼" (161 × 79cm). Not pre-wired or pre-piped. Shipped assembled; installation required. For 120V 60Hz.

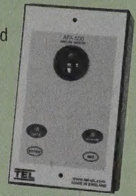
ACCESSORIES

Fume Hood Alarm

For use with Thermo Scientific* SafeAire* II, Concept*, and Pioneer* fume hoods



HM54LAFA05

Thermal sensors constantly monitor actual fume hood velocity. Should it fall below a set level, operator is alerted by an illuminated red light and 85db alarm. Sensors are exposed to clean laboratory air only.

- Alarm range: 30-400fpm (0.15-2.0 m/s)
- Accuracy: ±10%
- Field-adjustable setpoints to activate alarm signal
- Low-air alarm relay output, with fixed 5 sec. delay
- Pushbutton single-point calibration
- Relay input for night setback to mute audible alarm
- Mounting: Semi-flush
- Operating Temperature: 55° to 86°F (13° to 30°C)

ORDERING INFORMATION:
H × W × D: 5¼ × 3¼ × 2" (132 × 81 × 51mm). For 120V 60Hz.

Thermo Scientific* Hamilton* Horizon* Fume Hoods

A higher level of visibility for your lab

Designed to provide maximum visibility, allowing identification of potentially hazardous situations from virtually any location in the room. Restricted-bypass operating type, single-faced wall style or double-faced island models—can be "ganged" side-by-side.

- Exhaust volumes range from 550 to 1700cfm (0.15 to 0.35H_2O), depending on hood size and model
- 18" (45.7cm) sash opening during fume hood operation reduces exhaust air requirement by approximately 50% for significant energy savings
- Automatic 18" (45.7cm) sash stop, 34" (86.4cm) high opening for setup

Safety Features

- Upper 12" (30cm) of fume hood face opening is covered by sash glass during operation, protecting face and upper body
- Integral spill trough along front edge of work surface for secondary spill containment
- Narrow air foil front posts for enhanced visibility and airflow
- Flush sill air foil for easy access to work surface

Construction

- Back panel on single-faced units is white polyresin; side panels and vertical sash are ¼" (6.4cm) laminated safety glass
- Back, side and sash panels on double-faced units are 7⁄32" (5.6cm) laminated safety glass
- Dished epoxy resin work surface
- Isolated service drop allows vertical fixture mounting for maximum work surface area
- Perimeter exhaust slots provide uniform airflow
- Two-tube (T-8) fluorescent lighting
- **48" (122cm) model:** One combination light switch/receptacle and flush plate in right base cabinet
- **60" (152cm) model:** One combination light switch/receptacle and flush plate in right base cabinet; one 120V duplex receptacle and flush plate in left base cabinet
- **72" (183cm) model:** One light switch and flush plate, one 120V duplex receptacle and flush plate in right base cabinet; one 120V duplex receptacle and flush plate in left base cabinet

93-520

ORDERING INFORMATION:
For 120V 60Hz. Units ship knocked down.

INCLUDES:
Fume hood superstructure; work surface; base cabinets; service fixtures (right side only): remote-control gas, air, vacuum and cold water fixtures with 3 × 6" (7.6 × 15.2cm) cupsink

COMPLIANCE:
Meet or exceed ASHRAE* 110-95 standards

WARNING
Not applicable to highly corrosive environments.

Thermo Scientific* Hamilton* PaceAire Fume Hood

HM54L51300B

Designed for small working spaces and limited budgets

Fits any standard laboratory benchtop. Constant volume/bypass airflow system efficiently removes fumes and vapors while keeping the airflow and duct velocity constant.

- Low-speed blower exhaust, 0.11sp at 75fpm face velocity (492cfm)
- High-speed blower exhaust, 0.28sp at 100fpm face velocity (657cfm)
- Face velocity adjustment to coordinate with a wide range of duct conditions: low speed, 1140rpm, ⅛hp; high speed, 1725rpm, ¼hp
- Fixed baffle in center position for an even flow of air
- Two-speed integral blower allows operation at a lower mode to conserve energy
- Full-view safety glass vertical sash with full-width recessed pull; 29" (73.7cm) sash opening
- Exhaust collar is 8" diameter (20cm)
- Constructed of double-walled, reinforced steel
- Liner and interior finished in gloss white

ORDERING INFORMATION:
Overall dimensions, 23¾L × 36W × 53"H (60.3 × 91.4 × 134.6cm). For 115V 60Hz. Choice of 18 colors. Contact your Fisher Scientific Customer Service Representative for color samples.

Labconco* Protector Premier* Fiberglass-Lined Laboratory Hoods

Benchtop fume hoods for general-purpose laboratory work

One-piece molded fiberglass liner in standard and explosion-proof models provides superior corrosion and chemical resistance, durability and light reflectivity, with flame spread less than 25 per ASTM* E-84.

- Exhaust volumes from 730 to 1660cfm (0.17 to 0.22"H_2O), depending on model
- Preset baffle and bypass airflow design ensure stable face velocities across large 28" (71cm) sash opening
- Vertical-rising, counter-balanced 3⁄16" (0.5cm) tempered safety glass sashes with epoxy-coated aluminum frames
- Ergonomic air foil with Clean-Sweep* airflow openings pull inflow air from under air foil for maximum containment and continuous flow of clean air
- Front and side panels easily remove for lamp replacement and access to electrical connections
- Instant-start vaporproof T8 fluorescent or incandescent lighting (except explosion-proof models)
- Light and blower switches (except explosion-proof models)
- Glacier white, epoxy-coated steel exteriors

Explosion-proof Models

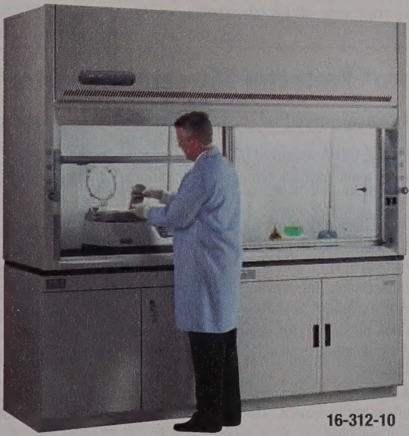
- Furnished without switches, electrical receptacles or wiring for conformance to local code
- Incandescent explosion-proof lighting (instead of T8 fluorescent lighting); bulb not included
- Explosion-proof built-in motor blower

Fixtured Models

- Pre-wired 115V 60Hz duplex electrical receptacle
- Two remote-controlled, color-coded service fixtures with forged brass valves
- Pre-plumbed brass tubing for gas fixture, copper tubing for cold water
- Includes components required to convert fixtures to air and vacuum

Models with Built-in Motor Blower

- Simplify installation for use in nontoxic applications where short, straight duct runs are required
- Motor blower is mounted behind front panel



16-312-10

ORDERING INFORMATION:
Exterior L × H: 33¼ × 59" (84.3 × 150cm). 115V 60Hz.

REQUIRED ACCESSORIES:
Ductwork, work surface and base cabinet or stand (available separately); motor blower required if not supplied with hood

COMPLIANCE:
Conform to SEFA 1-2005, NFPA 45-2004, ASTM E-84-01, ASHRAE* 110-95, ANSI* Z9.5-2003, CAN/CSA C22.2, UL 3101-1/61010-1 and 1805 standards

CERTIFICATIONS:
ETL listed

‡ 96" (243.8cm) models come with two exhaust collars.

Labconco* Protector XStream* Benchtop Hoods

Excellent containment of general chemistry fumes and vapors

When operated at OSHA-approved 60fpm face velocity, hood provides an excellent economic payback compared to traditional hoods running at 80 or 100fpm.

- Bypass airflow design with exhaust volumes from 280 to 640fpm with 18" (45.7cm) working sash opening, 730 to 1660fpm with 28" (71.1cm) loading sash opening
- Manual-release sash stop prevents sash from being raised vertically over 18" working height to conserve energy
- Upper dilution-air supply sweeps upper interior, eliminates stagnant pockets of air, prevents accumulation along sash plane without additional blowers
- Horizontal laminar air flowing toward dual baffle system is directed into rear downflow baffle system, then exhausted upward around a secondary baffle in a single pass
- Curved airfoil sweeps work surface with air while Clean-Sweep* openings pull inflow air from under airfoil
- Perforated air passage on sash handle bleeds air into chamber, directing fumes away from user
- 27¾" (69.3cm) interior working depth
- Anti-racking 3⁄16" (0.5cm) thick tempered safety glass
- Front and side panels remove easily for interior access
- Chemical-resistant, fiberglass-reinforced composite panel liner with flame spread less than 25 per ASTM* 84
- Prewired T8 fluorescent lighting, ADA-compliant light, blower switches
- Service fixture on lower right has brass tubing for gas; left is copper tubing for water (components to convert fixtures to air or vacuum included)
- 12⅞" (23.5cm) ID exhaust collar (two collars on 96" [244cm] models)
- Glacier white, dry powder epoxy-coated steel exterior

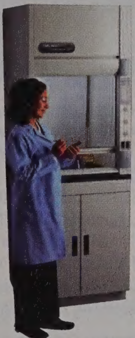
Labconco* Fiberglass 30 Fume Hoods

Compact hoods with bypass airflow for efficient fume removal

Designed for small working spaces—footprint is just 30" (76.2cm) square. Mount safely on base cabinet or stand, lab cart or benchtop (available separately).



16-315

- Corrosion-resistant, direct-drive exhaust blower built in on 16-315 and 16-319; maximum external static pressure of 0.12"H_2O at 310cfm (100fpm)
- Static pressure loss for 16-317 (designed for use with remote blower, not included) does not exceed 0.14"H_2O
- Pivoting air foil
- Pre-set baffle with flame spread index less than 25 per ASTM* E-84
- Sash opens 20" (50.8cm), provides viewing height of 28" (71.1cm)
- 3⁄16" (0.2cm) thick tempered safety glass vertical-rising sash with epoxy-coated aluminum handle
- 6 11⁄16" I.D. (17cm) exhaust collar
- One-piece molded fiberglass liner
- Fixture panel accepts up to three service fixtures, one electrical duplex and one airflow monitor (sold separately)
- Prewired 100w vapor-proof incandescent lighting, light and blower switches (except on Explosion-Proof model, to conform with local codes)
- Explosion-proof model (16-319) features factory-installed ¼hp explosion-proof blower approved for Class I, Group D, and Class II,Groups E, F, and G

ORDERING INFORMATION:
W × L: 30 × 30⅛" (76.2 × 76.5cm). For 115V 60Hz. Contact your Fisher Scientific Customer Service Representative for information about optional fixtures and models with international electrical configuration.

REQUIRED ACCESSORIES:
Ductwork, work surface, base cabinet or stand. Explosion-proof modelwiring and switches must be supplied onsite to conform to local codes.

COMPLIANCE:
Conform to SEFA 1-2005, NFPA 45-204, ASTM* E-84-01, ASHRAE* 110-95, ANSI* Z9.5-2003, UL 3101-1/61010-1, CAN/CSA C22.2, UL 1805

WARNING
Not for radioisotope, perchloric acid, or acid digestion use.

Labconco* Protector* XVS Ventilation Stations

An economical alternative to large, heavy-duty fume hoods

10-304-29

Compact, ventilated work enclosures can be used as light duty fume hoods, science classroom work stations, solvent cleaning work bays, weighing stations or for pathology and cytology. Low-profile enclosure protects user by containing powders and fumes during light-duty, fume-generating or weighing procedures.

- Clean-Sweep* airfoil sweeps the work surface for maximum containment
- Upper containment sash foil bleeds air into the enclosure to direct contaminants away from operator area
- Upper dilution air supply introduces room air at the top of sash to dilute upper chamber concentrations
- Rear baffle with perforation zones promotes horizontal laminar flow
- Side-entry air foils allow air to sweep across interior surfaces
- 2 × 10" (5 × 25.4cm) rectangular exhaust collars on top and bottom allow connection to ductwork for exhausting to the outside or to a FilterMate* Portable Exhauster (10-304-31, -33, -35, -37) for filtered removal of powders, particulates or fumes
- ¼" (6.4mm) tempered safety glass sash
- **22¾" high model:** Hinged, 20° angled sash with 8" (20.3cm) opening; swings up to provide 20" (50.8cm) opening
- **32" high model:** Hinged, 14° angled sash with 10" (25.4cm) opening; swings up to provide 29¼" (74.3cm) opening
- 23"D (58.4cm) interior work space
- Two utility ports for tubing and electrical cord connection to services
- Glacier white and gray, dry powder epoxy-coated aluminum frame and steel rear plenum and baffle
- 3⁄16" thick (4.8mm) tempered safety glass top and sides

REQUIRED ACCESSORIES:
Connection to a remote blower or FilterMate Portable Exhauster (10-304-31, -33, -35, -37); work surface; supporting base

WARRANTY:
One year against defects in materials and workmanship

COMPLIANCE:
ASHRAE* 110-95 (Method of Testing Performance of Laboratory Fume Hoods), SEFA 1-2002 (Laboratory Fume Hoods), ANSI* Z9.5-1993 (Laboratory Ventilation)

Labconco* Basic* Laboratory Hoods

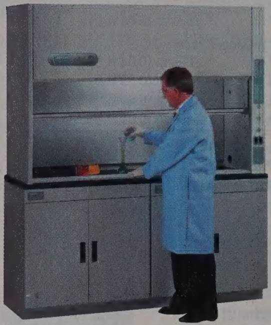
Ideal for rooms with ceilings below eight feet and shallow countertops

Automatic bypass system has openings above front panel and below airfoil to reduce face velocity fluctuation when sash is lowered, assuring continuous and efficient removal of fumes.

- Exhaust volumes of 720 or 1120cfm (0.25 or 0.57"H_2O), depending on hood width
- 10⅜" (26.2cm) OD duct collar for connection to exhaust system
- With two-piece adjustable baffle to direct airflow
- Removable curved air foil and front panel for easy cleaning
- Vertical-rising 3⁄16" thick (0.48cm) tempered glass counter balanced sash
- 25" (63.5cm) deep working area
- Switches for blower and vapor-proof incandescent light included on nonexplosion-proof models
- Right-side fixture panel is factory prepared to accept up to three service fixtures, one duplex electrical receptacle and airflow monitor (sold separately)
- Right-interior wall is factory-prepared for one cupsink with turret (sold separately)
- Durable glacier white epoxy-coated 16-gauge steel exterior and interior

Explosion-Proof Models

- With incandescent lighting fixture (order bulb separately)
- Without switches and wiring to permit conformity to local codes



16-080-4 (Base cabinet and work surface available separately.)

16-080-2 (Base cabinet and work surface available separately.)

ORDERING INFORMATION:

Exterior L × H: 25 × 48" (64 × 122cm). Add 5" (12.7cm) to height for models with built-in blower. Available with or without blower. Blower may be mounted in hood liner, above hood, or at remote roof location. Fully assembled units are pre-wired. Unassembled models not pre-wired; fit into carton less than 50% size of fully assembled hoods for more economical shipping.

REQUIRED ACCESSORIES:

Remote blowers, ductwork, base cabinets, adjustable-height base stands, solid epoxy flat work surfaces

COMPLIANCE:

SEFA 1-2002 (Laboratory Fume Hoods); NFPA 45-2000 (Fire Protection for Laboratories Using Chemicals) section 6-1 through 6-14; ASTM* E84-01 Surface Burning Characteristics of Building Materials; ASHRAE* 110-95 (Method of Testing Performance of Laboratory Fume Hoods) ; ANSI* Z9.5-1993 (Laboratory Ventilation); UL 3101-1/61010-1; CAN/CSA C22.2 No. 1010.1

Acid Storage Cabinets

Safely store and vent acids and other highly corrosive liquids

- Manual-closing, nonlocking door(s)
- Corrosion-resistant polyethylene-lined interior
- Vacuum-formed polyethylene liner tray and two rear vent connection cutouts for venting the cabinet into a fume hood
- Work surface, shelf, and vent kit sold separately

Labconco* Protector* Workstations

Designed for pathologists and histotechnologists

- Hinged sash of ¼" thick (6.3mm) safety glass provides 8" (20.3cm) work opening and swings up to 20" (50.8cm) for loading or cleaning
- Foil with Clean-Sweep* openings directs air for efficient fume removal
- Baffled, stainless-steel rear baffle captures fumes and houses filters (when applicable)
- 30w fluorescent lighting
- Rear electrical receptacle
- Side walls are ¼" thick (6.3mm) safety glass
- Frame and rear plenum are epoxy-coated aluminum and steel

With Built-in Blower

- Exhaust volume 150-250cfm (60-1000fpm face velocity)
- Returns clean, filtered air back into room
- Blower speed control
- Designed for use with two carbon filters (not included)

Without Blower

- Returns clean, filtered air back into room when connected to a FilterMate* portable exhauster
- Can also be connected to an external duct sytem with a remote blower
- 2L × 10"W (5 × 25.4cm) exhaust openings on top and bottom for FilterMate Portable Exhauster or connection to duct system

ORDERING INFORMATION:

Dimensions: 29D × 48W × $25\frac{7}{10}$"H

REQUIRED ACCESSORIES:

Models with built-in blower require carbon filters (16-108-303 or 16-108-304, available separately). Models without built-in blower require remote blower (static pressure loss 0.06-0.16"H_2O).

Electrical Requirements	Shipping Weight	Mfr. No.	Cat. No.	Each
With Built-in Blower				
115V 60Hz, 10A	120 lb. (54kg)	3930000	**16-108-294**	6275.00
230V 50Hz, 5A	120 lb. (54kg)	3930020	**16-108-296**	6275.00
Without Built-in Blower				
115V 60Hz, 10A	100 lb. (45kg)	3930001	**16-108-295**	4220.00
230V 50Hz, 5A	100 lb. (45kg)	3930021	**16-108-297**	4220.00

Labconco* Paramount* Filtered Enclosures

Self-contained work stations require no ducting

Suited for applications that generate annoying or unsafe concentrations of organic solvents, acid gases, formaldehyde or ammonia fumes. Carbon filters rid the lab of these fumes and vapors. Duet models use both carbon-based and 99.99% efficient HEPA filters for removing gaseous and particulate contaminants. They are suited to cleanroom and other applications requiring ISO Class 5 (formerly Class 100) conditions.

- Exhaust volume of 236 or 472cfm, depending on model
- Angled ¼" (6.4mm) thick tempered safety glass sash, adjustable to 13" and 15" (33 and 38cm) operating heights, pivots to full open position (24¼" [61.6cm]) for cleaning and transfer of material
- 30" (76.2cm) viewing height to work surface
- Vapor sensors (on selected models) detect organic vapors with concentrations of 50ppm or greater and activate audible/visual alarm
- Control panel with LCD display of filter time elapsed; programmable timer for audio/visual alarm; ALARM/MUTE switch with LED indicator; SET FILTER TIME, UP/DOWN, and ENTER programming switches; and event timer
- With air-mixing, epoxy-coated steel rear baffle or glass baffle that pivots down for cleaning
- Two roughing prefilters†
- Two 1½" dia. (1.3cm) utility ports with plastic plugs†
- One gas-assisted filter clamping mechanism†
- One built-in nonsparking motor/blower†
- Two pre-wired 20w fluorescent lights and switches for blower and light†
- Air sampling test port and syringe
- Glacier white, dry powder epoxy-coated aluminum construction
- 3⁄16" (0.48cm) thick tempered safety glass sides

16-105-41

ORDERING INFORMATION:

All units are 29" (74cm) deep. Duet model height is 56⅞" (144cm), others are 53⅜" (136cm) high. Shipped fully assembled. For 115V 60Hz. Contact your Fisher Scientific Customer Service Representative for information about 230V models.

REQUIRED ACCESSORIES:

Available separately: work surface, base, ColorSmart Filter Cells (72 models require two sets), HEPA Color-Smart Filter Cells (Duet models only; 72 Duet models require two sets).

COMPLIANCE:

Labconco* Benchtop Fume Adsorbers

Capture xylene, toluene, formaldehyde and ammonia fumes; recirculate filtered air

Lightweight and portable, these units fit available bench space.

- Built-in blower draws fumes through carbon filter at average face velocity of 35fpm
- Venting not required
- Epoxy-coated stainless-steel baffle and cabinet houses blower and easily replaceable filter(s)
- Clear, ⅜" thick (6.3mm) acrylic enclosure with 5° angled front shields
- 14½D × 13½"H (36.8 × 34.3cm) work area
- ON/OFF switch and 8' (2.4m) three-wire cord

ORDERING INFORMATION:

Overall: 23⅜L × 15⅜"H (59.4 × 39.1cm)

INCLUDES:

30" models come with one filter, 60" models with two filters. Replacement organic (10-090-104) and formaldehyde (10-090-105) filters available separately.

10-090-100 on lab cabinet (not included)

Labconco* FilterMate* Portable Exhausters

Remove a broad range of contaminants and particulates

Filter contaminated air generated by procedures performed in the Protector* XVS Ventilation Station, XPert* Balance Enclosure, and Protector Work Station.

- One FilterMate is capable of exhausting 24", 36" and 48" wide enclosures (22¾"H models)
- Epoxy-coated steel exterior base and rubber feet
- Quiet, nonsparking, variable-speed, motorized impeller
- Negative pressure plenum to capture and refilter leaked fumes

INCLUDES:

8' (2.4m) of 5" I.D. (12.7cm) flexible duct, two clamps, transition adapter, and IEC electrical cord with plug

REQUIRED ACCESSORIES:

Cat. No. 10-304-35 requires outside ducting

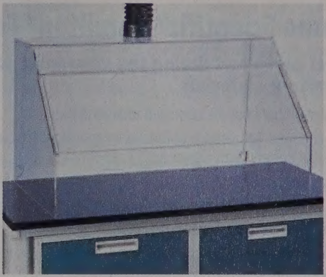
hermo Scientific* Hamilton* Vented Workstations

laximum safety, optimum comfort, and high visibility

Vork with balance applications, tissue trimming, pipetting, titrating, and ther lab procedures. Workstations fit easily on a benchtop.

- Allow for safe containment at lower face velocities (50fpm) while reducing dangerous exposure levels in accordance with ASHRAE*-110-1995 guidelines
- Baffle system located at the rear of the enclosure provides flow patterns comparable to laboratory fume hoods
- Perimeter flow on top, bottom, and sides reduces turbulence and reverse flows typically found in nonbaffled enclosures
- Made of clear ¼" thick (0.6cm) acrylic
- Fused and polished edges ensure optimum clarity
- Hinged access shield facilitates setup and removal of apparatus from inside chamber
- 4" (10cm) outlet on 24" (61cm) and 36" (91.4cm) stations, 6" (15cm) outlet on 48" (121.9cm) station help minimize sound levels
- Can be easily connected to new or existing exhaust system with properly sized flex-ducts



54L27300

REQUIRED ACCESSORIES:
Duct and blower. Contact your Thermo Scientific Hamilton Customer Service Representative at **1-800-955-0707.**

Width	CFM at 50fpm	Cat. No.	Each
24" (61cm)	66	**54L27200**	1278.20
36" (91.4cm)	98	**54L27300**	1356.46
48" (121.9cm)	131	**54L27400**	1434.71

Misonix* Economy Workstation

Captures fumes and particulate matter

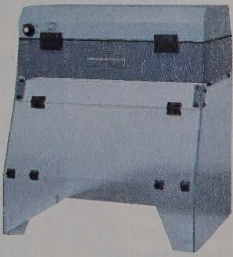
Use for drug and chemical analysis, pipetting, slide staining, coverslipping and graphic arts, and as a balance enclosure.

- Airflow manually adjusts from 0 to 120fpm—useful for powder weighing with hood as balance enclosure
- Durable epoxy-coated metal construction
- One-piece acrylic frame base section features hinged sash for easy access to hood interior
- Head and base separated for moving or storing unit

ORDERING INFORMATION:
External dimensions: 16L × 26W × 29¼"H (40 × 65 × 73.1cm). Internal dimensions: 15¾L × 25½W × 10"H (39.4 × 63.8 × 25cm). For 110V 60Hz.

REQUIRED ACCESSORIES:
99.997% efficient HEPA filter is required (Cat. No. 15-338-144, not included). For graphic arts applications, use carbon filter 15-338-141. Filters available online.

NOTE:
Prefilters extend the life of the main HEPA filter, so prefilter should be changed every six months.



15-338-157

Mfr. No.	Cat. No.	Each
FE-2620	**15-338-157**	2486.75

Misonix* Downflow Workstation

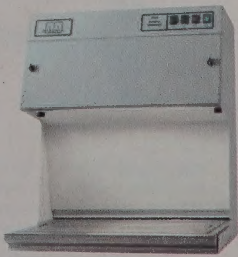
Stand-alone, ductless unit protects workers from small volumes of chemicals or powders

Useful for fingerprinting with powders, histology, powder weighing, and microscopy. Open design allows close inspection of samples while maintaining high level of operator protection.

- Particles/fumes drawn downward through stainless-steel work surface
- Contaminants removed by series of filters
- After fumes or powders are filtered, clean air is returned to the room
- Pressure switch for indicating when filters need replacement
- Aluminum frame with a powder-coated exterior
- Worksurface removes for easy cleaning
- Internal 15w fluorescent light

ORDERING INFORMATION:
Measures 24L × 28W × 32"H (60 × 70 × 80cm). For 110V 60Hz.

REQUIRED ACCESSORIES:
HEPA filter 15-338-175, prefilters 15-338-150, available online



15-338-158

Mfr. No.	Cat. No.	Each
FE-WS6	**15-338-158**	3852.89

Thermo Scientific* Hamilton* Forensics Cabinets

Protect personnel during the treatment of evidentiary materials

- Three chambers can be operated independently
- Each chamber has vaporproof incandescent light fixture and electrical outlets with power cord pass-through
- Padlock hasp on chamber doors
- Hanging rods in each chamber
- Plastic laminate and particle board construction
- Chemsurf* chemical-resistant plastic laminate interior
- High-pressure gray plastic laminate exterior
- Self-latching stainless-steel handles; stainless-steel piano hinges
- Laminated safety glass

Floor-Mounted Cabinet

- 31 cu. ft. of containment area
- Exhausts 31 cu. ft. of air per minute
- Shelf in large chamber
- 2" (5cm) I.D. exhaust collar

Base Cabinet

- Two drawers
- Two swing-out doors

Counter-Top Cabinet

- 13 cu. ft. of containment area
- Exhausts 13 cu. ft. of air per minute
- 1½" (3.8cm) I.D. exhaust collar

COMPLIANCE:

ASHRAE* 110-1995 tracer gas tested for containment

BEFORE YOU BUY SAFETY CABINETS

Class II, Type A2 biological safety cabinets (BSC's) can be used for work with biological agents at Biosafety Levels 1 through 3 and BSL4 with appropriate facility design. Selection and use of any biological safety cabinet should be reviewed and approved by the appropriate safety officer. We have compiled some considerations to assist you in identifying the cabinet configuraton and additional equipment for your applications.

ERGONOMIC CONSIDERATIONS

With many improvements in safety containment performance, serviceability, and gas and vapor handling, today's BSC's are very effective in controlling and containing aerosols and volatile compounds. However, assuring a safe environment goes beyond containing aerosols and being certified to NSF standards. The next step in the evolution process is reducing accidents and laboratory-acquired infections through improved ergonomics.

Slanted Front—Poor posture and positioning are the most common problems encountered when using a BSC, and these can ultimately lead to mistakes. Working at a cabinet requires the operator to hold his head, shoulders and arms in a forward position. Choosing a cabinet with an ergonomic angled front allows the operator to extend his reach and assume a comfortable and relaxed working position, effectively eliminating musculoskeletal strain and fatigue during extended procedures.

Noise Levels—Noise is the number one irritant for BSC users. Noise distracts and irritates the operator, which decreases performance and increases the likelihood of errors. While NSF International requires BSC's to operate at no more than 67dBA, cabinets are available that operate at less than 64dBA. As noise is measured on a logarithmic scale, a difference of 3dBA below the NSF specification of 67dBA is equivalent to a more than 50% decrease in sound levels, which will make a big difference to the operator experience.

Bright work space—Laboratory research requires high-quality lighting for close work, and good lighting inside a BSC ensures a safer and more comfortable working environment. In addition, cabinets with white back walls reduce glare and make it easier to see variations in texture and color. Samples are easier to see against the white background.

Thermo Scientific® 1300 Series A2 Biological Safety Cabinet

Thermo
SCIENTIFIC

Thermo Fisher Scientific

COST SAVING CONSIDERATIONS

Energy consumption—Consider selecting biosafety cabinet designs that use brushless DC motor technology to reduce overall operating costs. Not only are DC motors more reliable in speed control applications, but they are more than 60% more energy efficient than AC motors. This energy efficiency is directly proportional to the amount of money spent on operating the cabinet.

Timed UV disinfection—While most users continue to use UV disinfection as a method of decontaminating the biosafety cabinet work surface, few follow the proper maintenance routine for replacing UV bulbs. As the bulb is used, the effectiveness of the UV light is diminished. UV shut-off timer options are now available to ensure that the bulb life is preserved for several years, rather than needing replacement within six months.

For a full selection of Thermo Scientific® Biological Safety Cabinets, see pp. 816–817.

BIOLOGICAL SAFETY

Thermo Scientific* 1300 Series Class II, Type A2 Biological Safety Cabinets

NEW

Ideal for working with biological agents at Biosafety Levels 1–3

Less energy consumption and heat output deliver unparallelled cost savings: energy-efficient DC motor technology provides savings in excess of 65% over competitive units.

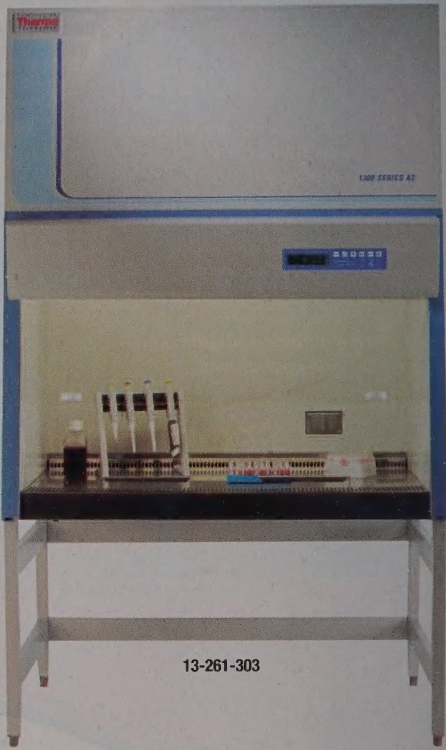
- Exhaust volumes from 328 to 541cfm, depending on model
- Patented, laminated safety glass front window has 10° slope for less glare and ergonomically comfortable working posture; lowers easily for interior cleaning
- Easy-to-reach control panel with LED displays hours of use, inflow/downflow velocities, services in use, filter usage status
- Sash opens to 10" (25cm); 21" (54cm) maximum opening
- Large, single-piece work surface provides ample space for optimizing productivity
- HEPA filter, 99.995% at 0.3μm
- Independent DC motors simultaneously control both inflow and downflow; reduce energy consumption, heat output, and vibration inside cabinet
- Motor operates at reduced speed when front window is closed—keeps interior cleaner and reduces lab noise
- No internal damper needed—continuous airflow adjustment maintains proper inflow

Safety Features

- Meet NSF Standard 49
- Real-time airflow adjustments ensure inflow and downflow velocities remain steady
- Pressure sensor filter monitoring measures total airflow across the working area
- Patented front window design simplifies cleaning for a safer working environment

Construction Features

- Work surface height ranges from 28 to 36" (71 to 91cm), with adjustable stand
- Armrest (included with package) supports ergonomic posture; prevents accidental blockage of front air grill
- Thimble exhaust connection has a zero leak damper; joins cabinet to standard 8" (20cm) dia. exhaust duct
- Two service connections (noncombustible gas, combustible gas, vacuum, water) can be ordered separately and installed on each side
- UV light (included with package) is programmable for different decontamination cycle lengths; timed UV light option preserves bulb life
- White interior walls reduce glare to improve ergonomics



13-261-303

INCLUDES:

Packages come with standard 30" (76.2cm) high stand, UV light and armrest. Accessories also available separately; contact your Fisher Scientific Customer Service Representative for more information.

WARRANTY:

Three years parts and labor on equipment

CERTIFICATIONS:

NSF Standard 49, TUV, EN; cUL listed. CE marked.

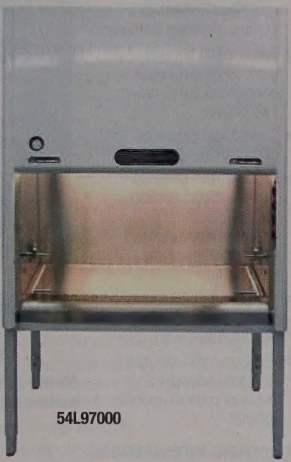
Thermo Scientific* Hamilton* SafeGuard* Biological Safety Cabinets

Class II Type A1/A2 protection for the operator, environment, and product

- Adjustable sliding sash seals during contamination
- Gasketed filter access panel eliminates contaminant seepage into sidewall
- Rolled airfoil and angled viewing window for easy access to fixtures and power
- Indicators for three sash positions: too high, too low, and proper operating position
- Light override keeps light off while sash is open
- Motor override shuts down the motor when sash is fully closed to prevent overheating of air space or motor
- Audible safety alarm
- Chemical-resistant finish in 18 standard urethane powder coat colors



54L97000

NEW

Thermo Scientific* Hamilton* ProVent* Laboratory Fume Hoods

Commonly used features and cost effective, with safety built in

- Exhaust volumes from 485 to 1570cfm, depending on hood size and sash opening
- Collar design reduces noise and conserves energy by maintaining lower static pressure
- Exterior fluorescent lighting optimizes visibility and safety

Safety Features

- Unframed sash for greater impact resistance
- 18" (46cm) sash lock/release with manual override
- Perimeter baffle slots contain fumes and eliminate dead spaces where fumes can accumulate

Construction

- Unique rectangular exhaust collar for more vertical space
- Polyresin liner has low flame spread rating, meets NFPA standards
- Blank cutout provided for optional blower switch or safety monitors

ORDERING INFORMATION:

Overall H × D: 57½ × 31¼" (146 × 79cm). Order base separately. Shipped assembled; installation required.

COMPLIANCE:

UL 1805 classified and labeled; adheres to ASHRAE* 110 tracer gas test parameters

Labconco* Purifier* Logic* Biological Safety Cabinets

Patented filter monitoring system precisely controls airflow without need for airflow sensors

Class II, Type A2 and B2 (total exhaust) cabinets feature a built-in electronically commutated motor (ECM) programmed to consistently deliver the precise volume of air required, even as filters load. The motor is in constant communication with the unit's information center, for rapid, accurate performance data. ECM consumes 50% less energy, which allows for cooler and quieter operation, and provides more power for increased HEPA filter loading.

- Exhaust volumes range from 203 to 554 (A2 models), 743 to 1151 (B2 models)
- 29" (74cm) sash-open viewing height
- Touchpad control of blower, light, timer, audible alarm mute and menu selection
- Smart-Start* System to program operations such as activation/deactivation of blower, fluorescent and UV lights when opening and closing sash
- Interior-mounted, line-of-sight LCD information center displays status, data and component icons for at-a-glance monitoring
- FILTER LIFE REMAINING bar graph displays an accurate percent of HEPA filter life remaining
- STATUS line communicates alarm conditions such as "sash too high"
- Alerts warn when filter life diminishes to 20% or airflow changes indicating an inlet grille or exhaust outlet obstruction
- Night-Smart* System idles blower when sash is fully closed to help maintain a clean, particulate-free environment inside the cabinet

Construction Features

- Built-in interval or elapsed timer for UV light control or experiment monitoring
- Supply and exhaust 99.99% efficient HEPA filters†
- Two electrical duplex receptacles (one on each side)
- Fully closing, clear ¼" (6.4mm) tempered safety glass sash with two handles; counterbalanced anti-racking mechanism; and 10" (25cm) slope
- Stainless-steel liner and removable stamped, one-piece dished work surface with two lift knobs
- Towel catch beneath work surface prevents wipes from being drawn into blower
- Curved stainless-steel inlet grille can serve as armrest
- Reserve-Air* Secondary Airflow Slots* prevent airflow blockage should operator inadvertently block portions of the inlet grille
- Glare-free fluorescent lighting outside contaminated work area
- Electronic security lock (optional activation) requires code to operate cabinet

09-681-120 (base and work surface not included)

ORDERING INFORMATION:
A2 Model dimensions: 61½H × 31¼"D (156 × 79cm). B2 Model dimension 71¼H × 31¼"D (181 × 79cm). For 115V 60Hz.

†Contact your Fisher Scientific Customer Service Representative for optional 99.999% efficient ULPA filters.

Labconco* Purifier* Class I and HEPA-Filtered Safety Enclosures

Personnel and environmental biohazard protection

Meet requirements for Biosafety Level 1, 2, or 3 containment without product protection, making these an economical alternative to Class II biosafety cabinets. Also suitable for chemical and particulate powder weighing and other procedures generating fine dusts or aerosols. HEPA-filtered enclosures require no outside exhausting.

- Total exhaust from 155 to 310cfm, depending on hood width
- Sash pivots 10°, from 9½" (24cm) operating position to 20" (50.8cm) opening for loading and maintenance
- Quiet variable-speed, solid-state internal blower maintains appropriate air velocity
- Airfoil with Clean-Sweep* airflow openings
- Optional built-in Guardian* Airflow Monitor to alert user of face velocities outside preset range (where applicable)
- Front-mounted Minihelic pressure gauge monitors pressure differential against the HEPA filter
- HEPA filter is 99.99% efficient on 0.3µm particles (where applicable)
- Negative pressure design ensures containment—should a leak occur, the system traps the contaminated air and recirculates it through the filter
- Class I Enclosures have a 15w, 254nm germicidal UV lamp to use in conjunction with surface disinfection to ensure decontamination of biohazardous particulates while unattended
- ¼" (6.4mm) tempered glass side panels and sash
- Glare-free fluorescent lamp mounted outside contamination area
- Blower and light switches are front-mounted for easy access
- Epoxy-coated aluminum frame and steel rear plenum and zone-perforated rear baffle
- Back panel has two utility ports for service connections
- Open bottom allows enclosure to be placed on existing cabinetry or accessory dished work surface

ORDERING INFORMATION:
28¾L × 37"H (73 × 94cm). 115V 60Hz, 3A.

COMPLIANCE:
ASHRAE* 110-1995 conformity tested. Biological containment verified per NSF Standard Number 49 Personnel Protection Test

CERTIFICATIONS:
ETL listed (certified to UL 3101-1/61010-1 and CAN/CSA C22.2 No. 1010.1)

10-304-115

NOTE:
For operator safety, UV lamp cannot be turned on when fluorescent lamp is in use.

Labconco* Utility Shelf Kit

Keep accessories in reach

Three one-piece, epoxy-coated steel shelves attach to rear baffle perforations.

- Printer shelf (can also be inverted and rest atop enclosure); 6¾W × 10"D
- Utensil shelf with scalloped front edge supports spatulas, brushes and other items; 5¼W × 9"D
- Miscellaneous shelf, 5¼W × 7"D
- Fits XPert* Balance Enclosure, Station or System; Protector* XVS Ventilation Station; Purifier* Class I and HEPA-Filtered Enclosures (manufactured after July 2004); and Protector Work Station (manufactured after August 2004)

LAMINAR FLOW

Fisher Scientific PCR Workstation

Controlled, clean environment for PCR sample preparation

PCR WORKSTATION
Fisher Scientific

FB-PCR2

Compact vertical laminar flow cabinet—less than 5 sq. ft.—turns any area of the lab into a PCR cleanroom; provides sample protection during PCR work. Positive airflow system continually sweeps contaminants through the HEPA filter to reduce risk of contamination. Between amplifications, the built-in UV sterilizer destroys all potentially contaminating DNA and RNA.

- Airflow velocity: 70fpm
- 99.99% efficient HEPA filter delivers ISO 5 (Class 100) clean air
- 254nm UV lamp with 15 min. timer provides decontamination
- Large viewing area is slanted 7° for better visibility
- 1½" (3.8cm) dia. utility port
- Three-way light switch
- Fan switch
- Rear exhaust grill
- Stainless-steel work surface is removable and easy to clean
- Detachable clear polycarbonate front panel (safety switch prevents UV lamp activation when removed)
- Durable painted steel cabinet

ORDERING INFORMATION:
Dimensions: 24½ × 28¾ × 35½" (62 × 73 × 90cm). Shipping weight: 162 lb. (73.5kg). For 115V 50/60Hz.

INCLUDES:
HEPA filter and prefilter

WARRANTY:
12 months

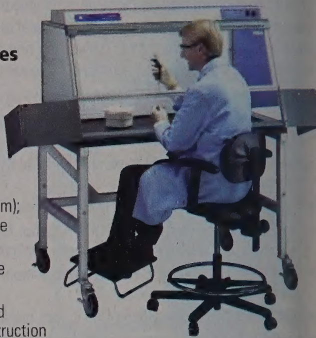
CERTIFICATIONS:
UL listed CSA US approved.

Cat. No.	Each
FB-PCR2	4096.69

WARNING
Workstation does not provide personal protection.

Labconco* Purifier* Non-Ventilated PCR and Tissue Culture Enclosures

Designed to reduce cross-contamination during PCR procedures and culture manipulations



16-108-286

- 7¾" (19.7cm) high sash opening
- 20°-angled, hinged sash pivots upward, locks to a loading height of 20" (51cm); has wiping seals to reduce cross contamination
- Bifold doors that close the sash opening
- UV-resistant epoxy-coated aluminum and steel construction
- UV-opaque and resistant, ¾" (1.5cm) thick tempered safety glass sash and sides
- Fluorescent and 254nm UV lamp
- Front-mounted switches for three-way light (fluorescent, UV and off)
- One interior electrical receptacle and one auxiliary electrical receptacle
- Two utility ports with iris openings and plugs

ORDERING INFORMATION:
Dimensions: 48W × 26¾D × 25¾"H (122 × 68 × 65cm). Shipping weight: 100 lbs. (45kg). Airflow monitor not included.

INCLUDES:
Variable timer for UV exposure with eight settings in minutes of 5, 10, 15, 30, 60, 120, 240 and continuous.

REQUIRED ACCESSORIES:
Supporting base, work surface (available separately)

CERTIFICATIONS:
ETL listed (115V models); CE marked (230V model)

Description	Electrical Reqts.	Mfr. No.	Cat. No.	Each

Labconco* Purifier* Horizontal Clean Benches

Benchtop units for electronics and semiconductor testing, clinical labs and hospitals

Benches direct HEPA-filtered air horizontally over the work area to provide ISO Class 5 (formerly Class 100) conditions and protect work from particulate contamination. Applications include plant tissue culture, media plate preparation, electronics inspection, medical device assembly and pharmacy drug preparation.

- Draws room air through top of cabinet, filters out 99.99% of particles of 0.3µm and spreads sterile air over work area
- Provides ISO 5 (Class 100) air: fewer than 100 particles 0.5µm or larger per cubic foot of air
- Angled profile is free of protrusions that could interfere with visibility or obstruct taller users
- Differential pressure across the HEPA filter is monitored via a Minihelic* II pressure gauge
- Easy-to-clean, melanine-laminated hard board interior work surface, epoxy-coated steel on exterior
- Optional factory-installed 254nm UV lamp aids in decontamination while bench is not in use
- Chrome-plated forged brass service fixture(s) with quarter-turn knobs are mounted on the right-side panel

16-107-168

ORDERING INFORMATION:
Overall: 34¾L × 48½"H (88 × 123cm). Work surface: 19"D (51cm). 115V 60Hz. Shipped assembled.

INCLUDES:
Replacement prefilter (to trap large particles), one HEPA filter, variable-speed motor blower(s), light switch, blower switch, and three-wire cord and plug. 36" and 48" models have one polarized, grounded electrical receptacle; 72" models have two.

REQUIRED ACCESSORIES:
Supporting base

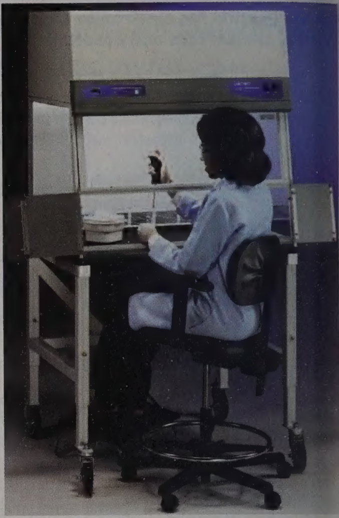
Labconco* Purifier* Vertical Clean Benches and Filtered PCR Enclosures

Protect work from particulate contamination

Available as clean benches or specially fitted for PCR procedures, units use a 99.99% efficient HEPA filter to maintain ISO Class 5 (Class 100) conditions within the work area.

- Intrinsically sound negative pressure design
- Room air is drawn into top-mounted prefilter, then through HEPA filter before circulating air vertically through work area (nominal downforce velocity of 45-65fpm)
- 10° sash pivots from 9⅜" (23.9cm) operating position to 20" (50.8cm) opening for loading and cleaning
- Air diffuser protects surface of HEPA filter from possible damage from apparatus
- Rear exhaust grille disperses air evenly across work area with minimal air turbulence
- Quiet variable-speed, solid-state internal blower with motorized impeller
- Blower and light switches are front-mounted and easily reached; UV lamp models have switch to power only one light at a time
- UV-opaque and resistant, ¼" thick (6.4mm) safety glass side panels and sash
- Epoxy-coated steel upper cabinet and back panel
- Front-mounted Minihelic* pressure gauge
- Fluorescent lamp is placed outside of work area
- Back panel has two utility ports for service connections
- Open cabinet bottom enables unit to fit on existing cabinetry or custom dished work surface

ORDERING INFORMATION:
Dimensions: 28⅝D × 36¾"H (72.6 × 93.5cm). For 115V 60Hz; 24" models are 3A, 36" and 48" models are 5A. Vertical Clean Benches can be ordered with bifold doors; specify when ordering. Guardian* Airflow Monitor is offered as factory-installed option on all benches and PCR Enclosures; specify when ordering.



16-108-273

INCLUDES:
Three-wire 15A line cord and plug. Filtered PCR Enclosures also include 15w, 254nm UV lamp for secondary decontamination; variable digital UV lamp timer (8 settings) and LED display; bifold doors for complete closure.

REQUIRED ACCESSORIES:
Work surface and base stand (sold separately)

WARRANTY:
One year parts and service

Labconco* PuriCare* Bedding Disposal Station

Convenient, mobile system for disposing of used small animal bedding

10-269-135

- Nominal inflow velocity of 50 to 60fpm (15.2 to 16.8m/min.)
- 99.99%-efficient HEPA filter
- Rear baffle optimizes airflow and distributes air evenly across the entire work area
- Interior panel protects prefilter and HEPA filter from contact with animal cages placed inside the enclosure
- Top-mounted prefilters adsorb odors, low molecular weight contaminants, and other gases from the exhaust airflow; also extend HEPA filter life
- Variable-speed blowers with solid-state control
- Fits easily through doorways and aisles; large, nonmarking polyurethane casters can lock in position
- Large access opening accommodates larger cages
- Large LDPE waste container on casters holds 40 gal. standard-size trash bags
- Glacier white epoxy-coated stainless-steel exterior
- Type 304 stainless-steel interior sides, back, upper panel, rear baffle and work surface
- 20w fluorescent light
- Work surface features 12" (30.5cm) square receptacle with removable trim ring

ORDERING INFORMATION:

Exterior L × W × H: 35 × 36 × 75½"H (89 × 91 × 192cm). Interior D × W × H: 28 × 34½ × 21½" (71 × 88 × 55cm). Shipping weight: 400 lb. (182kg). Replacement waste container (09-039-122), exhaust filters (09-039-127), and dolly (09-039-123) available separately. For 115V 60Hz.

INCLUDES:

Nalgene* Squibb Pear-Shaped Funnels

Transparent FEP Squibb with Screw Cap

Teflon*-fluorocarbon–resin FEP funnels with leakproof† stopcocks and Tefzel* ETFE screw closures

Funnel can be autoclaved; stopcock can be chemically sterilized. No stopcock lubrication needed.

- Nonwetting
- Break resistant and impervious to any chemical used in a separatory funnel
- Useful in radiological and hazardous separations
- So transparent, phase interface of even colorless liquids can be easily seen down to stopcock housing

10-437-25A

- Stem length, 65mm

Capacity	Closure Size	Mfr. No.	Cat. No.	Each	Case of
125mL	28mm	4301-0125	**10-437-25A**	128.15	4/341.75
250mL	33mm	4301-0250	**10-437-25B**	142.60	4/380.25
500mL	43mm	4301-0500	**10-437-25C**	205.40	4/547.75
1000mL	53mm	4301-1000	**10-437-25D**	238.60	4/636.25
2000mL	53mm	4301-2000	**10-437-25E**	367.32	2/489.75

†Nalgene assigns the term "leakproof": a) To bottle/closure systems with closures smaller than 100mm, after they are filled with water, inverted, withstand air pressure of 2psig for 2 minutes, and no water escapes;. b) To bottle/closure systems of 100 or 120mm after they are filled with water, inverted for 15 minutes, and no water escapes. **Note:** these tests, using other liquids, may not yield the same results. To ensure safe usage, Nalgene advises customers to test Nalgene bottles and closures under conditions of their planned applications. Nalgene bottles and carboys are leakproof at ambient temperature and pressure when used with their Nalgene closures.

Polypropylene with Screw Cap

Break-resistant polypropylene funnels with TFE stopcock

- Separation lines between immiscible liquids easily observed
- TFE stopcocks need no lubrication
- Resist virtually all chemicals, including hydrofluoric acid
- Autoclavable except for stopcock assembly, which is easily removed for chemical sterilization

10-437-30A

- Stem length, 65mm

FURNACES

MUFFLE

Fisher Scientific* Isotemp* Programmable Forced Draft Furnaces

Rugged, programmable furnaces meet ASTM* D 3174 ash content testing requirements

24-step programmability plus four-program storage capability allows repeatable, ailored heating programs.

Control Features

- Variable temperature control to maximum 1125°C (2057°F)
- LED display shows set and actual temperature, and furnace sequences
- Timed or continuous-run modes
- Up to 12 heating/cooling ramps or dwell periods up to 99 hours 59 minutes each may be specified in any combination
- Self-tuning feature automatically provides the best parameter values during operation
- Automatic program-end alert and shutoff
- User-settable visual alert with auto shutoff guards against temperature fluctuations over setpoint (from 1° to over 100°C from the setpoint, can be set in 1°C increments to a maximum of 1125°C)

eating Features

- Exceptional temperature uniformity with two to four air changes per minute
- Ample air supply ensures complete oxidation of pyritic sulfur, removing all SO_2 formed
- Side and bottom heating elements are easily removable and replaced
- Element wire withstands high-sulfur coal and coke atmospheres
- Top-mounted exhaust port allows easy venting

esign and Safety Features

- Programmable automatic restart: units can be set to restart, hold or shut down after power loss
- Multilayer asbestos-free internal insulation keeps exterior cool to touch
- Sensor shuts off power to heating elements when door is opened
- Built-in circuit breaker protects internal elements from power surges
- Welded steel cabinet with baked-enamel finish

10-750-58

Models

- ▸ 0.14 cu. ft. (3.96L) model: 20 Fisherbrand* quartz crucibles or up to 15 standard porcelain crucibles
- ▸ 0.58 cu. ft. (16.4L) model capacity: 84 Fisherbrand quartz crucibles or up to 50 standard porcelain crucibles (when equipped with optional 10-651SN Accessory Shelf)
- ▸ 1.26 cu. ft. (35.7L) model capacity: 168 Fisherbrand* quartz crucibles or up to 100 standard porcelain crucibles (when equipped with standard 10-750S Shelf and two 10-651SN Accessory Shelves)
- ▸ 0.58 and 1.26 cu. ft. models have ceramic fiber rope door gaskets that prevent heat loss from the chamber

ORDERING INFORMATION:

Atmospheres other than air (N_2, CO_2, etc.) connect easily to the ⅜" (9.5mm) injection port using 10-550P Port Kit. (Order on our Web site.)

INCLUDES:

All units supplied with 10-year lithium battery for memory backup; 1.26 cu. ft. (35.7L) capacity model comes with one shelf.

COMPLIANCE:

Meet ASTM* E 145 for average temperature uniformity; meet ASTM D 3174 for ash content testing

s performed per ASTM E 145.

500° to 1125°C (932° to 2057°F).

ccuracy offset differences are customer adjustable by ±30°C (±54°F).

r loads over 3 lb. (1.4kg), replace 10-750SN Shelf with 10-650H Solid Hearth Plate.

ntact your Fisher Scientific Customer Service Representative for details.

SA approved.

is unit is also suitable as an International Model.

SERVICE AGREEMENTS

Fisher Scientific offers several types of service agreements for the equipment featured here. For details on these agreements, equipment repairs and calibration services, see the Services section.

For immediate assistance, call 1-800-395-5442.

Fisher Scientific* Isotemp* Programmable Muffle Furnaces

Microprocessor control of linear heating and cooling rates and program duration; heat to 1125°C

- Available in three capacities
- 24-step programmability plus one-program storage capability allows up to 12 heating/cooling ramps or dwell periods up to 99 hours 59, minutes each to be specified in any combination
- LED displays furnace sequence, set temperature and actual temperature (°C or °F)
- 24-ramp/soak profiles can be repeated continuously for an infinite number of cycles—furnace will automatically ensure that temperature at end of each segment is within a specified tolerance before the profile continues
- One-program storage for frequently used run parameters
- Auto shutoff with flashing alert at end of heating sequence
- Continuous-run mode
- Bottom and side-mounted heating elements are embedded in removable, molded alumina-silicate ceramic fiber panels for easy replacement
- Light ceramic chamber makes unit easily portable; eliminates chipping and dust of traditional firebrick furnaces
- Welded steel cabinet with baked-on finish
- Solid hearth plate

Safety Features

- Selectable restart after power interruption (Restart, Hold, or Shut Down modes)
- Overtemperature protection with display code alerts if temperature deviates from 1°C to over 100°C from the setpoint (settable in 1°C increments), to a maximum of 1125°C (2057°F)
- Asbestos-free multilayer, internal insulation keeps exterior surfaces cool to touch
- Automatic heating shutoff when door is opened
- Manually resettable circuit breaker protects internal components from power surges
- Ventilated base prevents damage to benchtop
- Top-mounted exhaust port allows easy venting

Models

10-650-14A

- 0.14 cu. ft. (3.96L) model: 20 Fisherbrand* quartz crucibles or up to 15 standard porcelain crucibles
- 0.58 cu. ft. (16.4L) model: 84 Fisherbrand quartz crucibles or up to 50 standard porcelain crucibles (when equipped with optional 10-651SN Accessory Shelf)
- 1.26 cu. ft. (35.7L) model: 168 Fisherbrand quartz crucibles or up to 100 standard porcelain crucibles (when equipped with standard 10-750S Shelf and two 10-651SN Accessory Shelves)
- 0.58 and 1.26 cu. ft. models have ceramic fiber rope door gaskets that prevent heat loss from the chamber

APPLICATIONS:

Precipitate drying, enameling, ash determinations, fusions, ignitions, tempering

ORDERING INFORMATION:

Atmospheres other than air (N_2, CO_2, etc.) can be injected easily through the ⅜" (9.5mm) injection port using 10-550P Port Kit.

INCLUDES: 10-year lithium battery for memory backup

WARRANTY: 12 months

COMPLIANCE:

Meet ASTM* E 145 for average temperature uniformity

Fisher Scientific* Isotemp* Basic Muffle Furnaces

Economical muffle furnaces heat up quickly with minimal power consumption

Digital proportional controller and display that show setpoint and actual temperature are flush mounted on the front for easy access and reading.

- Basic muffle furnace with 1125°C (2057°F) maximum heat
- Simple three-button control with toggle to display setpoint or actual temperature during operation
- Chamber is heated by side-mounted electric resistance heaters
- Elements are embedded in removable, molded alumina-silicate ceramic fiber panels for easy replacement
- Top-mounted exhaust port allows easy venting
- Welded steel cabinet with baked-on finish

Safety Features

- Asbestos-free internal insulation keeps exterior surfaces cool to touch
- Microprocessor automatically cuts power to heating elements and alerts if door is opened, if temperature deviates 25°C (45°F) above the setpoint, or if temperature rises above maximum 1125°C (2057°F)
- Manually resettable circuit breaker protects internal components in case of a power surge
- Ventilated base prevents damage to benchtop

ACCESSORIES

Stainless-Steel Racks for Quartz Crucibles

For use with Fisher Scientific* Isotemp* Furnaces.

- For use with 10-490-4 (25mm dia.) crucibles in all Isotemp furnaces
- Handle for racks (10-490-17) sold separately; order online

10-490-6Q

For Capacity	Crucible Dia.	Max. No. of Crucibles	Dimensions (L × W × H)	Cat. No.	Each
0.14 cu. ft.	25mm	20	7¼ × 5⅝ × ⅞" (18.4 × 14.25 × 2.25cm)	**10-490-6Q**	198.33
0.58 and 1.26 cu. ft.	38mm	15	10 × 8½ × ⅞" (25 × 21.5 × 2.25cm)	**10-497-5**	277.25

Stainless-Steel Racks for Porcelain Crucibles

- Accept crucibles up to 38mm size
- Hold 25 crucibles
- Handle (10-490-17) sold separately; order online

For Capacity	Dimensions (L × W × H)	Cat. No.	Each
0.58 and 1.26 cu. ft.	9½ × 9¼ × ¾" (24 × 23.5 × 2cm)	**10-497-10N**	264.78

Accessories Contd. on next page.

ACCESSORIES

Ceramic Shelves

For use with Fisher Scientific Isotemp* Furnaces. Accessory freestanding shelf with legs for 0.58 and 1.26 cu. ft. furnaces. Use surface on top and underneath.

- 0.58 cu. ft. furnace takes one shelf
- 1.26 cu. ft. furnace takes two shelves
- Replacement flat shelf is for 1.26 cu. ft. furnaces
- All shelves support 3 lb. (1.4kg)

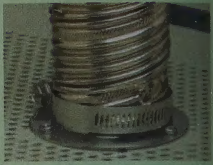
10-651SN

Shelf Style	Length × Width	Cat. No.	Each
Freestanding	13½ × 10" (34.3 × 25.4cm)	**10-651SN**	223.24
Flat	13½ × 11¼" (34.3 × 28.6cm)	**10-750S**	177.78

Exhaust Tubing

- Flexible stainless-steel
- Vents fumes formed during volatiles run
- In 10' (3m) section

INCLUDES:
Mounting hardware



10-490-10

Diameter	Cat. No.	Each
2" (5cm)	**10-490-10**	267.47

Thermo Scientific* Programmable and Automatic Large-Chamber Muffle Furnaces

1.6 cu. ft. (45.3L) capacity furnaces with choice of programmable or single-setpoint controller

Ideal for ashing, ignitions, suspended solids, drying and evaporating, heat treating.

Operating Features

- Temperature range: 100° to 1093°C (212° to 2000°F), ±5°C (±9°F)
- Maximum heat-up rate: 6°C/min. (11°F/min.)
- Advanced LED digital-set/digital-display temperature controller is microprocessor-controlled
- LED display simultaneously shows both setpoint and actual furnace temperatures in °C or °F
- User-selectable overtemperature protection
- Open thermocouple protection
- Adjustable power output from 1 to 100%

Design Features

- Four electric resistance heaters embedded (top, bottom and sides of chamber) in high-purity aluminum oxide refractory material
- Molded ceramic fiber insulation reduces energy consumption, speeds heatup and recovery
- Swing-out door design permits easy access to chamber
- Safety switch disengages heaters when door is opened
- Prepunched gas ports on furnace rear for atmosphere injection
- Built-in venting system removes contaminants

16-Segment Controller

- Four-program capability
- RS-232-C interface for computer control
- Programs incorporate "holdback" feature that will "hold" program until furnace temperature heats up or cools down to preprogrammed parameters—program will never outrun furnace performance

Single Setpoint Model

- Simple ramp to setpoint and a dwell

ORDERING INFORMATION:
Dimensions, chamber: 14D × 14W × 14"H (36 × 36 × 36cm); overall: 25½L × 21½W × 29½"H (65 × 55 × 75cm). Shipping weight, 260 lb. (118kg). All units must be hardwired.

INCLUDES:
Two refractory shelves

10-505-13

Thermo Scientific* Basic Large-Chamber Muffle Furnace

Economical furnace provides automatic single-setpoint control

- Capacity: 0.5 cu. ft. (14.2L)
- Temperature range: 100° to 1000°C (212° to 1832°F)
- Oval-shaped heating elements ensure even heat distribution
- User-selectable overtemperature protection
- Open thermocouple protection
- Self-tuning feature provides optimum temperature accuracy
- Easy-to-open, swing-out door is sealed with a ceramic fiber rope gasket
- Top vent port allows quick release of contaminants

10-505-40

ORDERING INFORMATION:
Dimensions, chamber: 11D × 11W × 7½"H (28 × 28 × 19cm); overall: 13¾L × 21½W × 14¼"H (35 × 55 × 36cm). Shipping weight, 47 lb. (21kg).

INCLUDES:
Thermocouple, ceramic fiber hearth tray, grounded three-wire cord, and plug

---

hermo Scientific* Medium-Chamber Muffle Furnaces

.5 cu. ft. capacity (14.2L) with choice of three controllers

- Temperature range: 100° to 1200°C
- Digital display
- Microprocessor control
- Temperature overshoot protection
- High-efficiency heating chamber with heating elements on four sides
- Built-in venting system removes contaminants
- Safety switch disengages heating elements when door is opened

rogrammable Model
- Four stored programs of 16 segments
- RS-232-C interface

asic Model
- Single-setpoint control

asic Automatic Model
- Single setpoint; single ramp to setpoint and a dwell
- Single digital display indicates chamber or setpoint temperature

RDERING INFORMATION:
mensions, chamber: 10D × 12¾W × 6¾"H (25 × 32 × 17cm); overall oor open): 29½L × 19⅛W × 21"H (74.9 × 49 × 53cm). Shipping weight, 4 lb. (60.8kg).

CLUDES:
rnace 10-557A supplied with line cord and plug; other models supplied th conduit connector. All models include thermocouple.

10-557E

Controller	Mfr. No.	Electrical Reqts.	Cat. No.	Each
16-Step (4 programs)	F6030CM	240V 50/60Hz, 18.3A, 4400w	**10-557E**	6044.00
Single Setpoint	F6020C	240V 50/60Hz, 18.3A, 4400w	**10-557C**	4378.00
Basic Automatic	F6010	240V 50/60Hz, 12.9A, 3095w	**10-557A**	2566.00

SERVICE AGREEMENTS

Fisher Scientific offers several types of service agreements for the equipment featured here. For details on these agreements, equipment repairs and calibration services, see the Services section.

For immediate assistance, call 1-800-395-5442.

Thermo Scientific* Benchtop Muffle Furnaces

Compact, lightweight benchtop furnaces in two heating chamber sizes: 0.07 and 0.2 cu. ft. (2 and 5.7L)

- One-program, eight-step, 16-step/four-program, or single-setpoint temperature controllers
- Operating temperature range: 100° to 1200°C (212° to 2192°F)
- LED simultaneously shows both setpoint and actual furnace temperatures in either °C or °F (programmable models only)
- User-selectable overtemperature protection
- Open thermocouple protection
- Adjustable power output from 1 to 100%
- Open coil heating elements provide fast heatup with minimum gradient
- Ceramic insulation surrounds chamber and spring-loaded door, reducing heat loss
- Safety switch deactivates heating elements when door is opened
- Ventilation system easily removes contaminants and moisture from chamber atmosphere
- ⅜" diameter (9.5mm) port on rear of furnace allows gas injection or monitoring of chamber temperature

Controller Options

- **Basic automatic** models display setpoint or chamber temperature on a single digital display
- **Single-setpoint** model offers automatic nonprogrammable operation
- **Eight-step programmable** models feature ramps to vary heat-up rate and dwell cycles to hold temperature at set levels from 0.1 to 999.9 minutes
- **Sixteen-step, four-program** models allow eight ramps and eight dwells, plus standard RS-232-C interface for computer control and four-program storage
- Programs incorporate "holdback" feature that will "hold" program until furnace temperature heats up or cools down to preprogrammed parameters—program will never outrun furnace performance

Small Models

- Capacity: 0.07 cu. ft. (2L)
- Dimensions, chamber: 6D × 5W × 4"H (15 × 13 × 10cm)

10-554-25

- Dimensions, overall (door open): 22L × 11¼W × 18"H (56 × 28.5 × 46cm)
- Shipping weight, 41 lb. (18.5kg)

Large Models

- Capacity: 0.2 cu. ft. (5.7L)
- Dimensions, chamber: 10D × 7W × 5"H (25 × 18 × 13cm)
- Dimensions, overall (door open): 27L × 13¼W × 19"H (68.5 × 33.5 × 48cm)
- Shipping weight, 60 lb. (27kg)
- Shelf included

ORDERING INFORMATION:

Eight-step programmable model (for 208V 50/60Hz) also available in both sizes; to order, contact your Fisher Scientific Customer Service Representative.

INCLUDES:

Unit, thermocouple, grounded three-wire cord, and plug; large models also supplied with one shelf

Thermo Scientific* Heavy-Duty Benchtop Muffle Furnaces

Compact, heavy-duty benchtop furnaces offer choice of single-setpoint or programmable control

- 0.08 cu. ft. (2.3L) capacity
- Temperature range: 100° to 1200°C (212° to 2192°F)
- Variable power output from 1 to 100%
- LED display simultaneously shows both setpoint and actual furnace temperatures in either °C or °F (programmable models only)
- Four individual embedded elements in special refractory cement permit excellent heat distribution in the chamber
- Open thermocouple protection
- Adjustable Alarm or Overtemperature Protection (OTP) setting can be used to protect the furnace or loaded chamber from excessive heat
- Counter-weighted door swings upward, directing heat away from operator
- Heavy-duty firebrick insulation surrounds chamber opening for added durability
- Door safety switch protects operator by removing power to the heating elements upon opening the door
- Rear-mounted 0.38" (0.95 cm) diameter port for monitoring chamber temperatures with independent measuring devices

Single setpoint controller

- Single ramp to setpoint and a dwell
- Single display shows actual temperature or setpoint

Eight-step Programmable controller

- Ramps to vary heat-up rate and dwell cycles to hold temperature at set levels from 0.1 to 999.9 minutes
- "Holdback" feature "holds" program until furnace temperature heats up or cools down to preprogrammed parameters—program will never outrun furnace performance

RDERING INFORMATION:

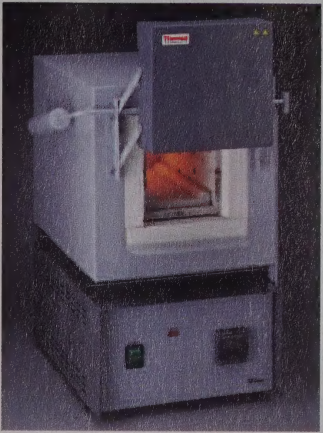
imensions, chamber: 9D × 4W × 3¾"H (23 × 10 × 9.5cm); overall (door open): 8L × 11W × 25 H (46 × 28 × 63.5cm). Shipping weight, 52 lb. (24kg); 2240w.

NCLUDES:

latinel* II thermocouple and a ceramic hearth plate to protect the bottom eating element.

OTE:

20V models require fixed wiring and are not supplied with a power cord.



10-554-28

Controller	Mfr. No.	Voltage	Cat. No.	Each

LOOKING FOR CRUCIBLES?

You'll find a full selection of metal, glass, porcelain and metallurgical crucibles in the Crucibles section.

SERVICE AGREEMENTS

Fisher Scientific offers several types of service agreements for the equipment featured here. For details on these agreements, equipment repairs and calibration services, see the Services section.

For immediate assistance, call 1-800-395-5442.

Thermo Scientific* Portable Muffle Furnaces

Ideal for ashing organic and inorganic samples, heat treating small steel parts, ignition tests, gravimetric analysis, and determination of volatiles and suspended solids

Digital temperature control provides accuracy and reliability.

- Choice of 0.04 or 0.07 cu. ft. (1.1 or 2L) capacities
- 1100°C (2012°F) maximum temperature
- Embedded elements on top and both sides of chamber for improved chamber gradient (compensated for room temperature variations)
- Welded steel case with baked-on enamel finish and ceramic fiber insulation
- Door safety switch disengages heating elements when door is opened
- Door serves as shelf when open

Small Models

- Capacity: 0.04 cu. ft. (1.1L)
- Temperature range: 100° to 1100°C (212° to 2012°F); stability ±0.3°C at 1000°C
- Dimensions, chamber: 5D × 4W × 3¹³⁄₁₆"H (12.7 × 10.2 × 9.7cm)
- Dimensions, overall: 13L × 9W × 14"H (33 × 22.9 × 35.6cm)
- Shipping weight, 20 lb. (9kg)

Large Models

- Capacity: 0.07 cu. ft. (2 L)
- Temperature range: 100° to 1100°C (212° to 2012°F); stability ±0.5°C at 1000°C
- Dimensions, chamber: 6D × 5W × 4¼"H (15.2 × 12.7 × 10.8cm)
- Dimensions, overall: 15¾L × 10W × 14½"H (40.1 × 25.4 × 36.8cm)
- Shipping weight, 28 lb. (12.7kg)

ORDERING INFORMATION:
Accessory heating elements and thermocouples available separately online.

INCLUDES:
Thermocouple, line cord and plug

TUBE

Thermo Scientific* Split Tube Furnaces

Ideal for hot applications

Choice of three control modules. All feature a chamber that can be moved approximately 5' (1.5m) from base and mounted in horizontal or vertical position.

- Split tube design allows easy access
- Operate to 1200°C (2192°F)
- Accept 1, 2, and 3" diameter (2.5, 5.1, and 7.5cm) process tubes
- Ceramic fiber insulation surrounds tube chamber for maximum energy efficiency and rapid heatup
- Include 1, 2 and 3" (2.5, 5.1, and 7.5cm) ceramic fiber chamber collars
- With overtemperature protection at a user-selected setpoint
- Thermocouple break protection cuts electricity to the heating element if the thermocouple fails
- Chamber safety switch cuts electricity to the heating element when tube chamber is opened

Single-Setpoint Control Model

- Simple ramp to setpoint and a dwell

Eight-Step Programmable Control Models

- Simple program with eight segments

10-559-15

16-Step (4-program) Control Model

- Set up to 16 segments
- With RS-232 communication port

APPLICATIONS:
Growing electronic crystals, catalytic material experimentation, radiation studies, and melting lead oxide glass

Temperature Controller	Heating Zone	Overall L × W × H	Electrical Requirements	Mfr. No.	Cat. No.	Each
Single-Setpoint	12" (30.5cm)	18⅞ × 21⅞ × 23⅛" (47.9 × 55.6 × 58.7cm)	120V 50/60Hz, 24.0A, 2880w	F79325	**10-559-15**	4706.00

*Trademark. See Trademark Reference.

Thermo Scientific* Basic Tube Furnaces

Benchtop units, ideal for classroom, chemical and industrial labs

Removable furnace chamber gives these economical tube furnaces exceptional flexibility. Choice of manual or single-setpoint control models. All models automatically compensate or line voltage and ambient temperature changes.

Chamber features

- Easily removable—slides on and off bracket mounted on base
- Can be mounted vertically, horizontally, or angularly
- 12" long (31cm)
- Cavity accommodates 2" (5.1cm) tubes
- Perforated metal case contains self-insulating, lightweight ceramic fiber vestibule (asbestos-free)
- Embedded heating elements surround tubular heating cavity within vestibule
- Low-density insulation provides rapid heat-up, cool-down, and recovery times

Manually Controlled Model

- Displays temperature on a dual-scale pyrometer to 1100°C (2012°F)
- Maintains temperature to ±2% full scale

ingle-setpoint Controlled Models

- Provide automatic setpoint control to 1200°C (2192°F)
- LED simultaneously shows both setpoint or actual furnace temperatures in either °C or °F
- Overtemperature protection at user-selectable temperature
- Open thermocouple protection
- Adjustable power output from 1 to 100%

PPLICATIONS:

rowing electronic crystals, doping silicon wafers, pilot processing amples, high-temperature reactions and catalytic material experimentation

RDERING INFORMATION:

imensions: 12L × 16W × 15"H (30 × 41 × 38cm). Shipping wt.: 26 lb. (11.8kg).

10-559-13, 10-559-10

INCLUDES:

FURNITURE

PLANNING AND INSTALLATION

Thermo Scientific* Hamilton* Laboratory Furniture

Thermo Scientific Hamilton furniture adapts easily and attractively to your changing needs, even if you have to add a cupboard, install a sink, or remove a fume hood. Choose from modular steel and wood furniture and accessories, including some styles available for shipment within 10 days of order placement (see QuickShip, next page). Additional furniture lines are available to fit every installation and budget requirement.

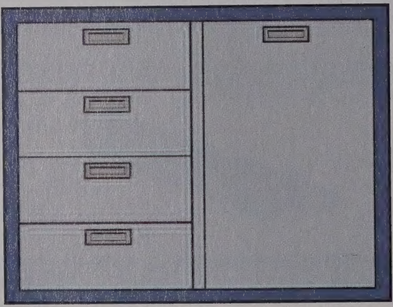
Modular Steel Line

- Made of 18-gauge cold-rolled steel reinforced at stress points
- Install easily and can be reconfigured
- All exposed cabinet surfaces—inside and out—are finished in an epoxy powder coating for excellent abrasion and chemical resistance
- When ordering, indicate color choices from those listed below†: one color for the cabinet shell and one color for the doors and drawer fronts, or one color for the entire unit

Wood Line

- Hardwood, full-frame construction
- Acrylic urethane finish provides excellent chemical and abrasion resistance

Wood Line Furniture on following pages has Oak veneer (shown here); also available in Maple, and with following finishes: Natural, Wheat, Honey Tan, Toasted Almond, Acorn, Rich Cinnamon, Burnt Umber. (Call your Fisher Scientific Customer Service Representative for details.)



- **Petal White - PW**
- **Shell White - SW**
- **Chameleon - CH**
- **Platinum - PL**
- **Sand - SA**
- **Sandstone - SS**
- **Dove Gray - G1**
- **Gray Slate - G3**
- **Khaki - KK**
- **Dark Khaki - DK**
- **Piedmont Green - PM**
- **Hunter Green - HG**
- **Blue Slate - BS**
- **Blue - BL**
- **Indigo - IN**
- **Purple - PA**
- **Brown Burgundy - BD**
- **Black - BK**

† Color reproductions shown here are representative only. It is recommended that you obtain actual colo samples from your Fisher Scientific Customer Service Representative prior to making a final selection.

Expert Laboratory Planning and Installation

- Available through our local full-service dealers
- Expert designers can help plan your laboratory using CAD
- Simple installations can be designed over the phone
- Factory-trained installers available

NOTE: There is a fee for planning and installation services. Please contact your Fisher Scientific Customer Service Representative for more information.

Thermo Scientific* Hamilton*—A Name That Means Quality

When you order Thermo Scientific* Hamilton furniture, you benefit from more than a century of research, design, and manufacturing.

- Headquartered in Two Rivers, Wisconsin, Thermo Scientific Hamilton is the largest laboratory furniture manufacturer in the world
- Over 1,000,000 sq. ft. (92,900m^2) of production facilities are dedicated to the manufacture of laboratory furniture products, including steel fixed casework systems and fume hoods
- Stringent product testing assures that all furniture meets or exceeds federal and industry standards for quality and safety

Thermo Scientific* Hamilton* Modular Steel* and Wood Line QuickShip* Furniture

ome cabinets pictured available on special order only. Call your Fisher Scientific Customer Service Representative for details.

or quality lab furniture that combines versatility with convenience and unctionality, choose Thermo Scientific Hamilton QuickShip Modular Steel nd Wood Line furniture products. Labs can be quickly installed or econfigured to eliminate downtime. All components fit together neatly and asily in a wide variety of configurations. Furniture ships within 10 working ays from the time of order placement. Call your Fisher Scientific Customer ervice Representative for more information at **1-800-766-7000**.

hoices

- Wall and floor cabinets
- Standard sitting- and standing-height base cabinets with a variety of door/drawer configurations
- Workstation assemblies
- Specialty sink, corner, fume hood base, and acid- and solvent-storage options

Features

- Base cabinets available in 18 different colors
- Shipped with doors and drawer fronts factory installed
- Nonstick drawers have easy-to-clean coved corners and corrosion-resistant stainless-steel hinges; self-closing, but can be locked open when desired
- Leveler access holes are located in the front cabinet toespace
- Casework complemented by epoxy resin or Chemsurf* tops, sinks, SafeAire* fume hoods, plus fixtures and accessories

CABINETS

hermo Scientific* Hamilton* Wood abinets

ak cabinets have wheat stained finish

- Sitting-height cabinets measure 28½H × 21½"D (72.4 x 54.6cm)
- Standing-height cabinets measure 35H × 21½"D (88.9 x 54.6cm)
- Cabinets with drawers: drawer ends, back, and front are ½" (1.2cm) hardwood plywood; drawer bottoms are ¼" (0.5cm) MDF

RDERING INFORMATION:

ntact your Fisher Scientific Customer Service Representative for furniture tions. (See choice of additional veneers and finishes, p. 842. Cabinet neer finish selection must be indicated to complete your order.)

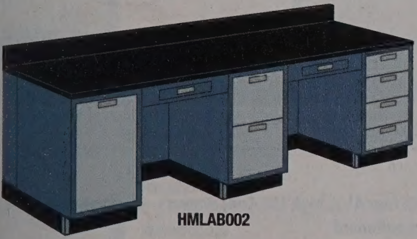
Thermo Scientific* Hamilton* Modular Steel* Workstation Assemblies

Order a complete workstation with a single catalog number

We have taken our most popular components and combinations to create our workstation assemblies. Each assembly includes all necessary components right down to the epoxy cement used to join work surfaces for a seamless appearance. All units are shipped disassembled and must be assembled at the installation site.

ORDERING INFORMATION:
All workstation assemblies are part of our QuickShip* program—they'll be manufactured and then shipped within 10 working days of order placement. Color selection must be indicated to complete your order. You must specify the color for (a) the cabinet shell, and (b) drawer and door fronts. Reference color chart on p. 842.

Sitting-Height Wall Assembly

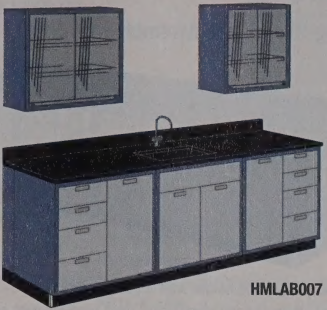


HMLAB002

- Three-cabinet sitting-height wall assembly with two knee areas
- Includes 1" thick (2.5cm) black epoxy resin worktop with curb
- Assembly measures 30D × 30⅜"H (76.2 × 77.2cm) with countertop assembly required

Length	Cat. No.	Each
8½' (259.1cm)	**HMLAB001**	4798.97
10' (304.8cm)	**HMLAB002**	5122.26
10½' (320cm)	**HMLAB003**	5422.24

Standing-Height Wall Assembly with Wall Cabinets

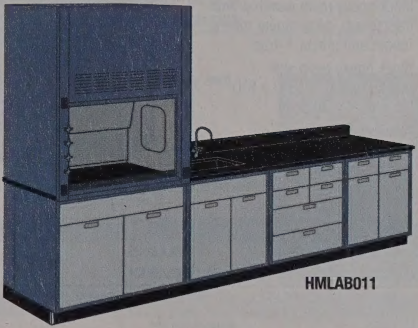


HMLAB007

- Three-cabinet standing-height wall assembly with sink and two wall cabinets with unframed glass sliding double doors
- Includes 1" thick (2.5cm) black epoxy resin worktop with curb, deck-mount mixing faucet and plastic P-trap
- Assembly measures 30D × 36¼"H (76.2 × 92.1cm) with countertop

Length	Cat. No.	Each
9' (274.3cm)	**HMLAB007**	7912.76
10' (304.8cm)	**HMLAB008**	8006.60
11' (335.3cm)	**HMLAB009**	8629.23
12' (365.8cm)	**HMLAB010**	8722.58

Standing-Height Wall Assembly with Safe Aire* Fume Hood



HMLAB011

- Four-cabinet standing-height wall assembly with sink and a constant volume/bypass fume hood
- Includes 1" thick (2.5cm) black epoxy resin worktop with curb, deck-mount mixing faucet, and plastic P-trap
- Measures 30D × 35¼"H (76.2 × 89.5cm) with countertop
- Fume hood superstructure is 48" wide (121.9cm) and equipped with four remote-control service fixtures for hot/cold water, gas/air/vacuum, and cupsink
- Installation required; minimum height (floor to ceiling) of 110" (279.4cm) needed
- Order blower and exhaust duct transition separately; see the Fume Hoods section.

Length	Cat. No.	Each
13' (396.2cm)	**HMLAB011**	13,229.50
14' (426.7cm)	**HMLAB012**	13,447.59

Thermo Scientific* Hamilton* Sitting-Height Base Cabinets

Pullboards add increased functionality

Choose from cabinets with 10¼" high (26.7cm) file drawers and 4½" high (11.4cm) drawers.

- File drawers are equipped with full-extension slides
- Drawers self-close for safety, but can be locked open to allow hands-free access
- Coved edges make them easy to clean and corrosion-free
- All models have a toespace area with leveler access; backs include a cutout for service access
- Sound-deadening material in drawers
- Cabinets measure 21⅝D × 29⅜"H (54.9 × 74.6cm)

ORDERING INFORMATION:

Cat. Nos. and prices listed are for Modular Steel cabinets that are part of our QuickShip program—units will be shipped to you within 10 working days of order placement.

Color selection must be indicated to complete your order. You must specify the color for (a) the cabinet shell, and (b) drawer and door fronts. Check p. 842 for color choices. Wood and Plastic Laminate cabinets are also available; call your Fisher Scientific Customer Service Representative for ordering information.

REQUIRED ACCESSORIES:

Worktops must be ordered separately (see p. 851). Finished back is required if cabinet back is exposed (p. 849); call your Fisher Scientific Customer Service Representative for ordering information.

With two 4½" high (11.4cm) drawers, one 10¼" high (26cm) file drawer, and pullboard

*Trademark. See Trademark Reference.

Prices subject to change.

Thermo Scientific* Hamilton* Standing-Height Base Cabinets

Choose from cabinets with combinations of double-walled doors, 10¼" high (26.7cm) file drawers, 7⅜" high (18.7cm) drawers, and 4½" high (11.4cm) drawers. See drawings for door/drawer configurations.

- Cabinets with single doors can be hinged on the right or left side; HM180H and HM181H Series models (see next page) can have the cupboard door on the right or left side and drawers on the opposite side
- Sink cabinets include hanger brackets for supporting sinks
- All models have a toespace area; backs include a cutout to allow service access
- Cabinets feature a unique design which permits leveler access through the toespace, and include sound-deadening material in doors and drawers
- Measure 21⅝D × 35¼"H (54.9 × 89.5cm)
- All door cabinets include one shelf adjustable in ½" (1.3cm) increments

ORDERING INFORMATION:
Modular Steel* cabinets are part of our QuickShip* program—units will be shipped to you within 10 working days of order placement.

Color selection must be indicated to complete your order. You must specify the color for (a) the cabinet shell, and (b) drawer and door fronts. See p. 842 for color choices.

Wood and Plastic Laminate cabinets are also available; call your Fisher Scientific Customer Service Representative for details.

REQUIRED ACCESSORIES:
Worktops must be ordered separately (see p. 851). If cabinet backs are exposed, a finished back is required (see p. 849); for ordering information, contact your Fisher Scientific Customer Service Representative.

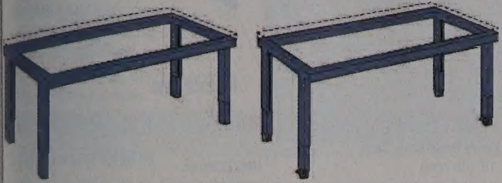
Thermo Scientific* Hamilton* Four-Leg Adjustable-Height Tables

Durable steel tables require minimal tools for adjustment



HMAFX94800 (left), HMAEX94800 (right)

- Height adjusts from 26 to 37" (66 to 94cm)
- Table with levelers holds up to 600 lb. (272kg); mobile table with lockable casters holds up to 300 lb. (136kg)
- All table frames are 29" deep (74cm)

RDERING INFORMATION:

ops must be ordered separately (see p. 852). Add optional shelf (below) or more storage space. Adjustable-height tables, tops and storage shelves re part of our QuickShip* program—products will be shipped 10 working ays after order placement.

Vidth	Cat. No.	Each
Vith levelers

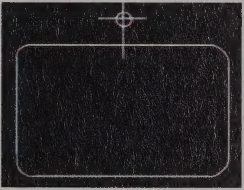
Thermo Scientific* Hamilton* Work Surfaces for Wall Assemblies

All work surfaces are part of our QuickShip* program—products will be shipped within 10 working days of order placement.

Linear Work Surfaces with Cutout for Epoxy Resin Sink

For HM115H5320B, HM115H6320B, HM115H8320B, HM116H7320B and HM118H9320B Sink Cabinets (see p. 848).



HM21L3054ES

- 1" thick (2.5cm) black, chemical-resistant epoxy resin work surface
- 15D × 23"W (38.1 × 58.4cm) sink cutout (see epoxy resin sinks, p. 853)
- 1⅜" diameter (3.5cm) fixture hole (see fixtures, p. 853-854).
- Not designed for use with stainless-steel sinks
- Work surface depth: 30" (76.2cm)

ORDERING INFORMATION:

Order curb separately (see next page); smooth-on epoxy resin cement for attaching curb also appears on next page.

Width	Cat. No.	Each
30" (76.2cm)	**HM21L3030ES**	382.02

Scienceware* Drawer Organizers

Stay organized

		Mfr. No.	Cat. No.	Each	Case of 6
	Open-Area Tray Flat, open tray holds large objects or light bulk materials. Depth, 2½" (6.4cm).	18655 0000	**15-252-4**	49.20	252.32
	Three-Compartment Tray Safely holds pipets and other slender, fragile items up to 16" long (40.6cm). Two 4" wide (10.2cm) compartments and one 5½" wide (14cm) compartment; all are 2½" deep (6.4cm).	18648 0000	**15-252-5**	45.45	233.07
	Five-Compartment Tray All compartments are 2½" deep (6.4cm). Center compartment for long items is 4 × 16" (10.2 × 40.6cm). Two side compartments are 7½ × 4" (19.1 × 10.2cm), and two are 7½ × 5½" (19.1 × 14cm).	18654 0000	**15-252-6**	49.20	252.32
	Twelve-Compartment Small Parts Tray Holds small articles easily lost in cluttered drawers. Each compartment is 3⅞L × 3⅞W × 2⅞"D (9.8 × 9.8 × 7.3cm).	18652 0000	**15-252-7**	49.20	252.32
	**Beaker, Flask or Jar Tray** With 20 wells of various diameters for beakers and flasks up to 600mL, as well as other containers up to 3⅞" (9.8cm) in diameter.	18650 0000	**15-252-8**	49.20	252.32
	**Scintillation Vial Tray** 63 wells in a 9 × 7 row format hold standard glass or plastic scintillation vials. Generous spacing makes handling easier and prevents vial-to-vial contact.	18653 0000	**15-252-9**	49.20	252.32
	Thermometer Sorter 14 "V" grooves hold thermometers or volumetric pipets in place to prevent chipping from glass contact, and permit quick identification. Flat areas between grooves are good for labeling, and depressions provide easy gripping. Overall, 14W × 17L × 1⅜"H (43.2 × 35.6 × 3.5cm).	18656 0000	**15-252-10**	49.20	252.32

STEPSTOOLS

Kik-Step* Stool

Rolling stool has rubber bumper to protect walls and equipment

11-931 Series

- Step on it and spring-loaded casters retract for safe, sure footing
- Step off and stool rolls smoothly
- Two steel steps cushioned with rubber treads
- Epoxy finish protected by wide rubber bumper around base

ORDERING INFORMATION:

Base, 15½ dia. × 14½"H (39 × 37cm). Load capacity, 500 lb. (227kg)

GAS ACCESSORIES

PURIFIERS AND TRAPS

Thermo Scientific* Super Clean* Cartridge Filters

Replace easily without tools

- 99.9999% pure gas (or 6.0 grade) output
- No carrier gas line contamination during cartridge change
- Cost effective
- TUEV approved

Description	For Gas	Capacity	Mfr. No.	Cat. No.	Each
Moisture with Indicator	Inert; Air; H_2, He	7.2g H_2O	5182-0817	**601-808-19**	145.00
Oxygen with Indicator	Inert	1000mL O_2	5182-0818	**601-808-20**	145.00
Hydrocarbon	Inert; Air; H_2	12g (*n*-butane)	5182-0820	**601-808-21**	145.00

601-808 series

601-808 Series cartridges on baseplates/manifolds; also available are combi and triple cartridges

Thermo Scientific* Super Clean* Cartridge Filter Baseplates/Manifolds

One-time installation procedure

- Can be configured to the individual user requirements
- Needle valves ensure gas line is not contaminated during cartridge change

601-808-14

601-808-17

Description	Includes	For Use With	Mfr. No.	Cat. No.	Each
Single Position Baseplate/ Manifold	Triple Filter	Carrier Gas Only	5182-0815	**601-808-14**	235.00
Two Position Baseplate/ Manifold	2 × Combi Filter	Air and Fuel Gas	5182-9706	**601-808-15**	435.00

Restek* Super-Clean* Gas Filters

Gas filter cartridges with a high-purity output to ensure 99.9% pure gas for laboratories

- Feature "quick-connect" for easy, leak-free filter cartridge changes
- Glass interior prevents diffusion; plastic exterior ensures safety
- Easy-to-read indicators with color change code printed on the filter cartridge aid in replacement
- **Ultra-High Capacity Filters** are available for removing hydrocarbons, moisture, or oxygen impurities. Maximum pressure: 11 bar. Estimated lifetime of filter cartridges is approximately two years.
- **Replacement Triple Filter Cartridge** removes oxygen, moisture, and hydrocarbon impurities. Ideal for use in mass spectrometry analyses, ECD detectors, and for protecting analytical columns against damage for contaminated carrier gas. Maximum pressure: 11 bar. Estimated lifetime of filter cartridge is approximately one year.
- **Replacement Fuel Gas Filter Cartridge** removes moisture and hydrocarbon impurities. Use for purifying flame ionization detector (FID) fuel gases to produce a stable baseline, improve overall reproducibility and sensitivity. Maximum pressure: 11 bar. Estimated lifetime of filter cartridge is approximately 1½ years.

06-711-833, 06-711-832, 06-711-831

ORDERING INFORMATION:
Dimensions of all cartridge filters: 10⅝L × 1¾" dia. (27 × 4.4cm)

REQUIRED ACCESSORIES:
Use filter cartridges with single-, two-, or three-position baseplates (sold separately, visit our Web site for more information).

Filter Type	For Gas	Capacity	Mfr. No.	Cat. No.	Each
Ultra-High-Capacity Moisture Filter	Inert Carrier Gas, Air, Hydrogen	7.2g H_2O	22028	**06-711-831**	127.00

Restek* Filter and Baseplate Kits

Single-position mounting baseplate with 1⁄8" inlet/ outlet fittings (06-711-828)

Carrier Gas Cleaning Kit contains triple filter for oxygen, moisture, and hydrocarbon impurities (06-711-824).

Fuel Gas Purification Kit contains single-position mounting baseplate with ⅛" inlet/outlet fittings (06-711-828) Fuel Gas Filter for moisture and hydrocarbon impurities (06-711-826).

Description	Mfr. No.	Cat. No.	Each
Carrier Gas Cleaning Kit	22019	**06-711-823**	350.00
Fuel Gas Purification Kit	22021	**06-711-825**	357.00

Restek* High-Capacity Oxygen and Moisture Traps

Reduce oxygen or water to less than 15ppb

High-capacity Oxygen Traps purify more than five 200 ft.² cylinders. Remove up to 2g of moisture and 600mg of oxygen.

High-capacity Moisture Traps are purged with ultrahigh–purity helium and shipped ready to use.

ORDERING INFORMATION:
Dimensions for the oxygen and moisture traps: 11L × 1½" dia. (28 × 3.8cm)

06-711-805

06-710-843

Fitting	Mfr. No.	Cat. No.	Each
High-capacity Oxygen Trap

¼"	20638	**06-710-867**	90.00

Restek* High-Capacity Indicating Oxygen Traps

High capacity design for long life; usable with all carrier gases

- Built-in microparticulate frit
- Color indicator notifies user as oxygen and water are trapped
- O_2 discharge gas purity is <0.1ppm where inlet does not exceed 15ppm; H_2O discharge gas purity is < 0.5ppm where inlet does not exceed 10ppm
- With an ambient operating temperature and 100psig maximum operating pressure
- Replacement cartridge can be used for oxygen traps with either ⅛ or ¼" fittings

06-710-855

ORDERING INFORMATION:

Dimensions: 9¼L × 2" dia. (23.5 × 5.1cm)

INCLUDES:

Cartridge housing and one cartridge

Description	Mfr. No.	Cat. No.	Each
With ⅛" compression tube fittings	20624	**06-710-855**	222.00
With ¼" compression tube fittings	20623	**06-710-854**	222.00
Replacement Cartridge	20625	**06-710-857**	109.00

Restek* Indicating Oxygen and Moisture Traps

Prepurged for fast stabilization time

- Feature a heavy-walled glass body to prevent oxygen and water diffusion
- Color indicator notifies user as oxygen or moisture is trapped

06-711-815

06-711-819

Indicating Oxygen Traps reduce oxygen from supply gases to 0.1ppm. With Vespel* sealing rings. Maximum operating pressure is 100psig. Dimensions: 10L × 1¼" dia. (25.4 × 3.2cm). Choice of ⅛ or ¼" fittings.

Indicating Moisture Traps reduce water to less than 10ppb; also decrease noise for high-sensitivity detectors. Indicator changes color at 5% relative humidity. A 40µm frit protects needle valves and flow controllers from microparticulate damage. Dimensions: 13L × 2" dia. (33 × 5.1cm). Choice of ⅛ or ¼" fittings.

¼"	22015	**06-711-820**	99.00

Gas-Specific Purifiers

Ideal for removing moisture, hydrocarbons and oxygen from gas chromatography gas supplies

Used inline with the GC carrier gas or detector gas supply to produce gases that are at least a factor of ten higher in purity than a 99.9999% "Chromatography Grade" cylinder of gas (when the purifier is supplied by a 99.995% "High Purity" cylinder of gas).

- Available with ⅛ or ¼" compression fittings

For Gas	Cat. No.	Each
With ⅛" compression fitting

REGULATORS

*Fisherbrand** Heavy-Duty Single-Stage Regulators

Ideal for applications requiring short intervals of use

- For noncorrosive gases
- Rugged forged brass body ensures strength
- Sintered metal filter inlet stem protects regulator from dirt
- Large 2¾" diameter (7cm) diaphragm assures accurate delivery pressure

INCLUDES:
Chrome-plated brass outlet needle valve with ¼ NPT male thread

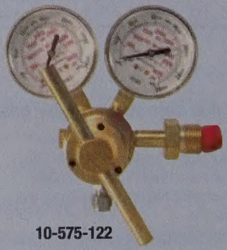
*Fisherbrand** High-Pressure Single-Stage Regulators

Safe, accurate delivery pressure control for noncorrosive gases



10-575-122

Use in hydrogenation, catalytic reduction, dead-end and pressure testing.

- Delivery range up to 3000psig (20.7MPa)
- Constructed without solder for easy disassembly and repair; built to give long life
- Single-stage design features machined brass body and cap, 2½" brass gauges, bronze sintered inlet filter with PCTFE seat
- All have ¼" stainless-steel Swagelok* type fitting outlets
- Cylinder gauge of all regulators has pressure range of 4000psi (27.5MPa)
- ¼" NPT inlet

COMPLIANCE:
Conforms to CGA E-4

For Gas	Delivery Pressure Range, psig (MPa)	Max. Outlet Gauge Pressure, psig (MPa)	CGA	Cat. No.	Each
Hydrogen	100–1500 (0.689–10.3)	2000 (13.7)	350	**10-575-120**	779.76

*Fisherbrand** High-Purity Brass Single-Stage Regulators

Made from materials that will not outgas impurities into the gas stream—for noncorrosive gases

Ideal for instrument and OEM applications employing very high-purity, noncorrosive gases and gas mixtures where some variations in delivery pressure can be tolerated.

- Made from chrome-plated brass bar stock
- Ultrasonically cleaned and machined under statistical process control (SPC)
- 10-micron stainless-steel inlet filter
- Low internal volume
- PCTFE seat
- Viton* seal
- Diffusion-resistant 316L stainless-steel diaphragm packless valve on the outlet controls gas flow
- 2" dual-scale gauges
- Inboard leak rate <1 × 10^{-9}cc/sec. (helium) allows resistance to atmospheric contaminants
- Threaded housing cap for easy panel mounting and drilled body for rear-bracket mounting
- Operating temperature range: -40° to +60°C (-40° to +140°F)
- ¼" NPT outlet port
- Delivery pressure change ≤0.53/100psig

NOTE:
Specify cylinder outlet connection (CGA) at time of order.

Delivery Pressure Range, psi (MPa)	Max. Inlet Pressure, psig (MPa)	Outlet Gauge Pressure Range, psig (MPa)	Cat. No.	Each

*Fisherbrand** High-Purity Stainless-Steel Single-Stage Regulators

10-575-129

For semi-corrosive gases

For use with extremely high-purity gases, mildly corrosive or reactive gases, and toxic gases where slight variations in delivery pressure can be tolerated.

- Ultrasonically cleaned 316L stainless-steel construction is highly resistant to inboard diffusion of air
- Electropolished 316L stainless-steel bar stock body
- 10-micron sintered inboard filter, nozzle, poppet and other internal parts
- PCTFE seat
- PTFE-resin seals to minimize outgassing and contamination of gas stream
- Diffusion-resistant, 316L stainless-steel diaphragm packless valve installed on the outlet
- 2" dual-scale gauges
- Withstand internal vacuums generated during purging operations
- Inboard leak rate $<1 \times 10^{-9}$cc/sec. (helium)
- Operating temperature: -40° to +60°C (-40° to +140°F)
- ¼" NPT outlet port
- Delivery pressure change ≤0.53/100psig

NOTE:
Specify cylinder outlet connection (CGA) at time of order.

*Fisherbrand** Multistage Cylinder Regulators

10-575-139

For noncorrosive gases

Ideal for applications requiring maintenance of a constant delivery pressure until cylinder contents are empty.

- Feature neoprene diaphragms reinforced with nylon fabric, nylon seals, Orthane* seats for first and second stages
- Dual-scale gauges, brass bonnet, internal self-reseating relief valve, and easy pressure-adjusting knob
- Outlet needle valve with ¼" NPT male thread

WARNING
Not for use with corrosive, toxic, or high-purity gases.

Restek* Ultra-High-Purity Brass Body Regulators

For use with noncorrosive, high-purity, or liquified gases

Ideal with ultra-high-purity carrier gas for sensitive GC applications using MS, PID, HID, or ECD detection methods.

- Brass construction for minimum dead volume
- Oxidation-resistant chrome plating
- 10µm sintered bronze filter, metal-to-metal seals for long-term leak tightness, and PTFE-resin seats
- Type 316 stainless-steel regulator diaphragm with ¼" FPT-fitting outlet-valve ensures ultra-high–purity control of gases and leak-free shutoff
- 2" (5.1cm) dia. gauge displays pressure in psi/kPa
- Multiturn shutoff handle
- Helium leak-test -to 2×10^{-8}cc/sec.
- Operating temperature range: -4° to +60°C (24.8° to 60°F)
- Fully assembled and tested
- **Single-stage regulators:** Use where there is secondary pressure regulation downstream
- **Dual-stage regulators:** Recommended for stable outlet control when using high-pressure gas-cylinders (secondary pressure regulation not needed)

Restek* Ultra-High-Purity Brass Line Regulator

For use with critical purity and corrosive gases

Ideal for MS, PID, HID, or ECD detection methods when the line pressure needs to be reduced by 20psig (137.9kPa) or more.

- Single-stage
- Brass construction for minimum dead volume
- Features a 10µm sintered Type 316 stainless-steel filter and PTFE-resin seats
- 2" (5.1cm) dia. gauge that displays pressure in psi/kPa
- Helium leak-test—certifiable to 1×10^{-8}cc/sec.
- Operating temperature range: -40° to +60°C (-40° to +140°F)

Restek* Critical Purity Switchover System for Noncorrosive Service

Allow the replacement of a depleted gas source without interrupting the gas supply to the instrument or process

Provide a continuous supply of high-purity gas to the laboratory, process, or instrument by setting the two regulators at slightly different pressures to discharge one side of the system at a time.

- Allow the replacement of a depleted gas source without interrupting the gas supply to the instrument or process
- Choice of brass or stainless-steel systems with line regulators
- All models feature flexible, all-stainless-steel pigtails with armor casing
- CGA connection on each pigtail has check valve to prevent contamination and minimize purging requirements

Restek* Ultra-High-Purity Stainless-Steel Body Regulators

For noncorrosive, high purity, or liquified gases

Ideal for all-stainless cylinder systems where welded tubing and special fittings are used, and thorough cleaning and specific gas management are practiced.

- Body constructed out of Type 316 stainless steel that is more easily purged of atmospheric contaminants than brass and resistant to attack from dry corrosive gases
- Include 10μm sintered bronze filter, metal-to-metal seals for long-term leak tightness, and PTFE-resin seats
- Type 316 stainless-steel diaphragm with ¼" FPT-fitting outlet-valve ensures purity of gas flow and leak-free shutoff
- Features 2" (5.1cm) dia. gauge that displays pressure in psi/kPa, and multiturn shutoff handle
- Helium leak-test-certifiable to 1×10^{-8}cc/sec.
- Operating temperature range: -40° to +60°C (-40°°to +140°F)
- Fully assembled and tested
- **Single-stage regulators:** Use where there is secondary pressure regulation downstream
- **Dual-stage regulators:** Recommended for stable outlet control when using high-pressure gas cylinders (secondary pressure regulation not needed)

Kontes* Double Vacuum/Gas Manifold

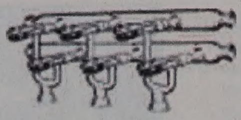
Grease-free operation

K216040 Series Vacuum/Gas Manifold

- Forward-facing valves
- Compact for assembly in fume hood
- Modular and easily disassembled for cleaning
- Ports spaced 100mm apart

K215050 Series Vacuum/Gas Manifold

- An all-glass manifold for connecting inert gas and vacuum sources to sidearm stopcocks
- Each stopcock has a metering groove cut into the plug to provide fine control of vacuum and inert gases
- Distance between stopcocks is 65mm for the 3 position size and 100mm for the 5 position size
- Supplied with patented pressure/vacuum retainers



K216040 Series

K216060 Series Vacuum/Gas Manifold

- For connecting inert gas and vacuum sources
- Sample contacts only PTFE and borosilicate glass
- Beams ½" O.D. with upper-left and lower-right ends open
- Delivery ports 9mm O.D.
- Distance between valves 100mm

Description	No. of Stations	L x H x D	Cat. No.	Each

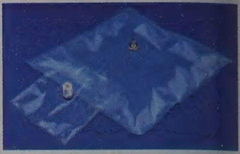
SAMPLING BAGS

Chemware* FEP Gas Sampling Bags

5mL thick FEP film for low permeability and maximum sample retention

For gas sample analysis, extracting air samples from exhaust systems, monitoring air quality or calibrating instruments in the field.

- Nonabsorbent, nonreactive to resist most corrosives
- Heat-sealed on all four sides
- Second outboard seal not required
- Available with either a nickel-plated brass ON/OFF valve which accepts ¼" I.D. flexible tubing, or with a PTFE/silicone septum fitting in a polypropylene housing for use with a hypodermic needle
- Individually packaged



10-923-7, 10-923-4

Chemware* Tedlar* PVF Gas Sampling Bags

Good for use with carbon monoxide, sulfur dioxide, hydrogen sulfide, radon, and mercaptans

Can also be used for liquid sampling, when supported with tray, and for gas sampling trains.

- 2mm thick PVF
- Sealed on all four sides
- Second outboard seal not required
- Available with either a nickel-plated brass ON/OFF valve which accepts ¼" I.D. flexible tubing, or with a PTFE/silicone septum fitting in a polypropylene housing for use with a hypodermic needle

GAS GENERATORS

domnick hunter* High-Purity Nitrogen Gas Generators

Generate in-house uninterrupted gas flow up to 99.999 or 99.9995% purity

Generators transform atmospheric air into high-purity nitrogen gas. Continuous gas flow eliminates need for high-pressure cylinders and liquid Dewars—prevents interruptions created by untimely cylinder changeouts. Choose from models compatible with a variety of chromatography applications.

- Units use patented pressure swing adsorption (PSA) technology to trap oxygen, carbon dioxide and moisture in a bed of carbon molecular sieve (CMS) that alternates between regeneration and purification modes
- Feature digital hours-run meter and service indicator
- Standard integral oil-free air compressor with Oil-X*Plus filter
- Easily installed under a standard laboratory bench
- Connector Type: ¼" Swagelok*

Ultra-high-Purity Models

- Produce a guaranteed consistent 99.999% pure nitrogen gas flow without secondary downstream filtration
- Ideal for applications including GC carrier and make-up gas and instrument purging
- Incorporate oil-free compressor that prefilters air using domnick hunter Oil-XPlus technology
- Single bed of carbon molecular sieve (CMS)
- Residual oxygen content: <10ppm
- Manufactured using ISO 9001:2000-certified processes

Ultra-high-Purity Zero Model

- Produces 99.9995% pure nitrogen gas capable of maintaining a flat GC baseline with no peaks or fluctuations
- Air from integral compressor is prefiltered using domnick hunter Oil-XPlus technology before being passed through alternating beds of carbon molecular sieve; catalyst system oxidizes hydrocarbons
- Processes combine to remove oxygen to <10ppm and hydrocarbon content to <0.1ppm (as methane)

High-Purity Models

- Produce 99.5% pure nitrogen gas flow
- Single bed of carbon molecular sieve (CMS)
- 14-950-5 includes integral compressor, while 14-950-6 does not

domnick hunter* Pure Air Generators

mproves compressed-air quality

Removes water, oil and dirt from the existing compressed-air supply, eliminating corrosion and damage to pneumatic and analytical instruments.

- Easily connects to existing compressed-air supply line using ¼" NPT inlet/outlet connections
- Two beds of high-performance desiccant remove moisture to a dew point of -40°C (-40°F) at 100psig (7barg)
- Integral pre- and post-filtration units remove particles to <0.01ppm and non-methane hydrocarbons of <0.01ppm
- Unit automatically switches between purification and regeneration on a two-minute cycle

COMPLIANCE:

domnick hunter* Zero-Air Generators

roduce a continuous flow of clean, dry air with an ultralow residual methane ontent of <0.1ppm from an existing compressed air supply

eatures

- Compact, modular design has interchangeable top panel to allow for direct mounting of a UHP hydrogen generator, providing an all-in-one flame gas solution for GC-FID, FPD, and NPD applications
- Guaranteed consistent purity reduces baseline noise and improves stability
- Operates over the temperature range 35° to 150°F
- Digital temperature display
- Autodrain on the inlet filter

imple Operation

- Three-stage generators use an Oil-X* Evolution grade AO filter to remove oil, water and particulates
- Heated platinum high-performance catalyst converts hydrocarbons, including methane, to carbon dioxide and water before a final pass through a high-efficiency Oil-X Evolution grade AA 0.01µm particulate filter
- Inlet design ensures a balanced airflow through catalyst unit
- Can achieve total hydrocarbon concentration of <0.1ppm

PPLICATIONS:
se to supply zero air for nebulizer and exhaust gas for LC/MS pplications, zero gas and combustion gas for total hydrocarbon nalyzers, and calibration/dilution gas for gas sensing equipment

PECIFICATIONS

domnick hunter* LC/MS Nitrogen Gas Generators

Specifically designed to meet the gas flow, purity, and pressure requirements of modern LC/MS instruments

Units use fully regenerative patented pressure swing adsorption (PSA) technology to trap oxygen, carbon dioxide, and moisture in a bed of carbon molecular sieve (CMS) that alternates between regeneration and purification modes.

- Provide a continuous stream of clean, dry nitrogen without the need for secondary purification
- Suitable for nebulizing, sheath, and drying gas
- Digital interface; units are fully compatible with APCI and ESI interfaces
- With FEP tubing for phthalate-free operation
- Soundproofed compressor box
- Space saving—can fit under a bench
- LC/MS 15 is designed for use with Agilent* 1100 Series LC/MS products
- Some models include integral oil-free compressors–external supply is not needed

14-950 Series

- For those models without the integral compressor: 7barg specified outlet pressure, 9barg specified inlet pressure; 70L/min. minimum constant air requirement for 15 and 20 models, 130L/min. minimum constant air requirement for 30 and 40 models
- International models also available

COMPLIANCE:
CE marked, UL listed, CRN approved

domnick hunter* Hydrogen Generators

Research-grade hydrogen gas on demand

Provide a safe and economical alternative to high-pressure gas cylinders and can be easily installed on the lab bench. Ideal for carrier and fuel gas applications and suitable for use with any laboratory instrument requiring a supply of ultra-high-purity hydrogen. Eliminate interruptions in analyses to change cylinders. Three models available with 160, 250, and 500cc/min. outlet flowrates.

- LCD display shows system status and diagnostic capabilities
- Automatic leak detection
- Integrated microprocessor control
- Low water and poor quality water detection and alarms
- Built-in switch-mode power supply unit accepts electricity supplied between 100 and 230V and 50 to 60Hz

APPLICATIONS:
Produce a continuous stream of research-grade hydrogen gas from deionized water using a proprietary ion exchange membrane and drying cartridge.

Using hydrogen as a GC carrier gas increases speed and sensitivity compared to helium, decreasing analysis time without discernible loss of resolution.

ORDERING INFORMATION:
Connector: ⅛" Swagelok*; additional cartridges and bags sold separately.

INCLUDES:
One desiccant cartridge, two deionizer bags

WARRANTY:
Two years

CERTIFICATIONS:
CE marked, UL listed, CSA approved

GLASS DISTILLATION TRAPS/TUBES

Pyrex* Barrett Trap

For Barrett test to determine water content in petroleum or bituminous products

- Receiver has 20mL capacity
- Graduated upward from stopcock to 3mL in 0.2mL divisions, and from 3 to 20mL in 0.5mL divisions
- With two $ 24/40 joints that provide connections for flasks and condensers
- Stopcock $ Plug No. 1

ORDERING INFORMATION:
Overall H, 228mm (9")

09-150-5

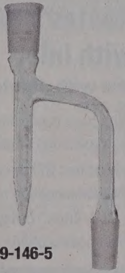
Mfr. No.	Cat. No.	Pack of 2	Case of 2 Pk.
622 20	**09-150-5**	510.61	772.02

Pyrex* Dean-Stark Trap

For water from petroleum or bitumens with volatile solvents

- With two $ 24/40 joints
- 10mL receiver graduated from 0 to 1mL in 0.1mL divisions ±0.05mL, and 1 to 10mL in 0.2mL divisions ±0.1mL

COMPLIANCE:
Meets ASTM* E 123-92 specifications



09-146-5

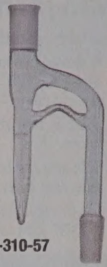
Mfr. No.	Cat. No.	Each	Case of 4
602 10	**09-146-5**	147.23	413.13

WARNING
Because of variations in conditions, glassware cannot be guaranteed against breakage under vacuum or pressure. Adequate precautions should be taken to protect personnel who are doing such work.

Kimax* Distilling-Moisture Receiver

With two arm outlets

- Modified Dean-Stark trap calibrated "To Contain" with $ 24/40 joints and a side arm bridge to equalize pressure
- 10mL receiver graduated from 0 to 1mL in 0.1mL divisions ±0.05mL, and from 1 to 10mL in 0.2mL divisions ±0.1mL
- Durable white scale
- Designed from ASTM* E 123-92, Style A



10-310-57

Mfr. No.	Cat. No.	Each
22012 10	**10-310-57**	141.39

Pyrex* Connecting/Distilling Adapter Tube with Full-Length Inner $ Joints

Tube 22mm O.D. with 24/40 inner $ joints

- Arm is approximately 75° angle from vertical and 200mm long (7⅞")

01-034-5A

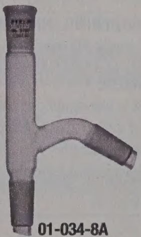
Mfr. No.	Cat. No.	Each
8930 24	**01-034-5A**	77.50

Pyrex* Distilling Adapter Tube with 60° Angle and Three $ Joints

Three-way connector with 60° angle

- Contains three $ 24/40 joints

ORDERING INFORMATION:
Approximate length: 206mm (8⅛")



01-034-8A

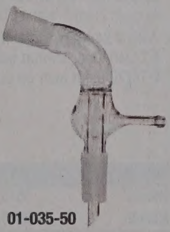
Mfr. No.	Cat. No.	Each
8950 24	**01-034-8A**	107.69

Pyrex* Distilling Adapter Tube with Side Arm and $ Joints

Adapter with $ 24/40 outer joint at top and $ 24/40 inner joint at bottom

- Drip tip sealed through bottom joint extends 20mm below end of joint
- Bent at 105° angle
- Serrated side arm O.D., 10mm

ORDERING INFORMATION:
Overall length, 175mm



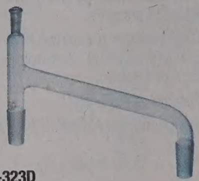
01-035-50

Mfr. No.	Cat. No.	Each	Case of 6
8946 24	**01-035-50**	121.51	502.24

Pyrex* Distilling/Connecting Tube Adapter with Thermometer Opening and ₮ Joints

Permits monitoring temperature when distilling

- Three-way connecting tube with side arm at 75° angle from vertical tube
- Joint on side arm at 105° angle to arm
- Side arm and bottom of vertical tube with inner ₮ 24/40 joints
- Top of vertical tube has outer ₮ 10/30 joint for thermometers



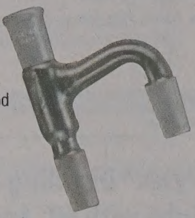
15-323D

Mfr. No.	Cat. No.	Case of 6
9060 24	**15-323D**	852.10

Pyrex* Solvent Recovery Head

Allows for condensation and collection of solvents while performing concentrations with a traditional Kuderna-Danish concentrator

- Simple ₮ 24/40 design permits use with other existing apparatus
- Contains ₮ 24/40 top and bottom joints
- 96 to 99% solvent recovery allows for concentrations to be done outside fume hood
- Allows for convenient recovery of sample in case of a BLEVE (Boiling Liquid Expanding Vapor Explosion)



07-770-1

ORDERING INFORMATION:

Length: 150mm

NOTE:

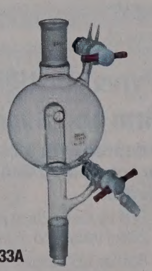
It is recommended that some type of ventilation system be used in case of a drop in condenser water temperature or loss of condenser cold water supply.

Mfr. No.	Cat. No.	Case of 4
2159 24	**07-770-1**	439.95

Pyrex* Solvent Still Head

Apparatus for maintaining oxygen-free solvents

- Head has sufficient storage space to allow solvent removal by syringe or drainage through 2mm T-bore PTFE-resin stopcock
- With ₮ 24/40 outer joint at top, ₮ 24/40 inner joint at bottom and ₮ 14/20 inner joint on drainage arm



09-133A

Capacity	Mfr. No.	Cat. No.	Each
250mL	3575 250	**09-133A**	436.26
500mL	3575 500	**09-133B**	452.50

GLASS JOINT ADAPTERS

Pyrex* Bushing Type Reducing Adapters

With ₮ inner and outer joints for changing ₮ joint sizes

- Shorter than conventional adapters
- Larger ₮ joint size is on outside of bushing; smaller ₮ joint size is within the bore of bushing
- Fabricated with heavy walls for mechanical strength
- Heavy uniform rim at top serviceable as finger grip

01-033 Series

Outer ₮ Joint	Inner ₮ Joint	Approx. Length	Mfr. No.	Cat. No.	Pack of 2	Case of

Kontes* Universal Adapters with Inlet

Use with pipets and syringes

With hose connection for vacuum or introduction of gases.

- Modified GPI thread, 13-425
- Accommodation range, 5.5-6.5mm
- With Viton* O-ring, size 010
- Without septum

Kontes* Bevel-Seal* Inlet Adapter

For use with pipets, syringes or other small items with outer diameters from 1/16 to 5/8" (2 to 17mm)

- Provides vacuum-tight seal with compression cap and O-ring, to allow adjustable immersion of thermometers, etc.
- Cap can be used to 150°C (302°F)

INCLUDES:

Adapter, cap and Viton* O-ring

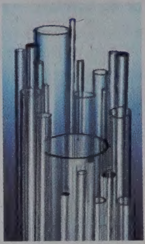
GLASS TUBING

TUBING

Pyrex* Standard Wall Tubing

Low coefficient of expansion, great mechanical strength

- Softening point, 821°C (1509°F)
- Working (forming) point, 1252°C (2885°F)
- Small sizes can be bent after heating over a blast burner using gas and compressed air
- Larger sizes must be heated over a blast burner using gas and oxygen



11-366-10

WHAT IS A GLOVE BOX?

A glove box is a sealed enclosure that allows handling of materials through long, relatively imper gloves secured to ports in the walls of the enclosure. The purpose of a glove box is protection or is which is provided by the physical barrier. There are two main types of glove boxes:

Controlled Atmosphere—Isolates a sensitive material inside the box from environmental cont tion. Choose from Protector® and Precise™ Controlled Atmosphere Glove Boxes. Precise Basic Boxe customized with accessories to function as a controlled atmosphere glove box.

HEPA-filtered—Protects the operator from hazardous materials and establishes a cleanroom environment inside the box. Choose from Protector Multi-Hazard, Precise HEPA Filtered and XPert® Weigh Boxes.

SELECTION CRITERIA

Leak rate—Low leak rate ensures that the internal environment is maintaine little degradation. Low oxygen and low moisture levels are important in cont atmosphere boxes; in HEPA filtered boxes, low particulate levels are require

Desired oxygen/moisture level—The more oxygen sensitive the wo lower the oxygen level required. Oxygen levels below 1% (10,000ppm) achieved with oxygen and moisture removal columns. Maintaining lev as 1ppm requires a regenerative drying train accessory.

Materials of construction—Fiberglass and polyethylene liners excellent chemical resistance, as well as excellent moisture tolera stain resistance for cleanability. Stainless steel has good stain resi cleanability and chemical resistance (although subject to attack acids) and excellent heat resistance.

LABCONCO

For a full selection of Labconco® Glove Boxes, see p. 877–880.

Labconco* XPert* Weigh Boxes

Protect operator when weighing hazardous samples

In addition to HEPA inlet and outlet filters, these boxes include an antistatic ionizer fan to reduce static charge and a balance vibration isolator.

Design Features

- One-piece molded, medium-density polyethylene shell
- Dry powder epoxy-coated steel superstructure and interior shelf of transfer chamber
- Approx. 13 cu. ft. main chamber
- ¼" thick (0.64cm) laminated safety glass viewing window with powder-coated steel frame and neoprene gasket; cut-out is 26⅜ × 12½" (67.1 × 31.8cm)
- Upward-pivoting inner and outer transfer chamber doors counterbalanced and equipped with quick-latches
- Black, chemical-resistant phenolic core work surface sealed to glove box floor

Performance

- Dual HEPA filters boast 99.99% efficiency against particulates down to 0.3 microns
- 0.05ppm or lower average tracer gas levels detected during perimeter scan testing surpasses ASHRAE* 110 standards
- Factory testing with mass spectrometer reveals no detectable leaks greater than 1×10^{-3}mL/sec. when tested while glove box is pressurized with helium at 1" water gauge
- Vibration is less than 1.5×10^{-5} inches displacement when measured at work surface at both minimum and maximum airflow volumes

RDERING INFORMATION:

verall dimensions: 31⅝L × 52¾W × 40"H (80 × 134 × 102cm). Main hamber interior measures 27½D × 33½W × 25"H (69.9 × 85.1 × 63.5cm). ransfer chamber is 11" nominal I.D. × 12"L (28 × 30cm). Vibration solator slab measures 20⅜D × 13⅜W × 2¾" thick. Shipping weight: 50 lb. (159kg).

NCLUDES:

ntegral neoprene gloves (size 9¾, 30" [76cm] long, 15mil gauge); 22w uorescent lamp; interior ceiling-mounted electrical duplex receptacle vith 5A (115V model) or 2A (230V model) circuit load; built-in blower with peed control capable of airflow from 13 to 100cfm; antistatic ionizer fan ounted on interior ceiling; switches for light, blower, and innermost interior ceptacle wired for ionizer fan; balance vibration isolator, consisting of arble slab with isolator pads and Type 304 stainless-steel cover; inlet and utlet HEPA filters and test port for challenging HEPA filter; main chamber atic pressure gauge to monitor HEPA filter loading integrity.

EQUIRED ACCESSORIES:

pporting base (see 10-358-108 and -109, p. 880)

OMPLIANCE:

rborne particulate cleanliness (measured under positive and negative essures per ISO 14644-1 test method) exceeds ISO Class 5 conditions quivalent to Class 100) and achieved ISO Class 3 conditions (equivalent Class 1) at both minimum and maximum operational airflow volumes. onforms to UL 3101-1/61010-1 and CAN/CSA C22.2 No. 1010.1 15V model).

ERTIFICATIONS:

L listed (115V model). CE marked (230V model).

ACCESSORIES

Replacement Labconco* Glove Box Sleeves

16-200-5

16-200-10

- For use with neoprene or latex glove hands
- Made of neoprene
- Straight or accordian
- Supplied in pairs, complete with O-rings and springs

Style	Length	Mfr. No.	Cat. No.	Pack of 1 Pair
Straight	19" (48cm)	5005800	**16-200-5**	298.38
Accordian	15" (38cm)	5005900	**16-200-10**	425.54

Labconco* Protector* Glove Boxes

Designed for use in controlled atmospheres (dry boxes) or for use with hazardous materials

Two models available: Controlled Atmosphere Glove Box and Multihazard Glove Box. One-piece, epoxy-coated steel cabinets have smooth interior surfaces for easy cleaning. Large glove ports 8" (20cm) in dia. are spaced 17" (43cm) apart.

Laminated Safety Glass Window

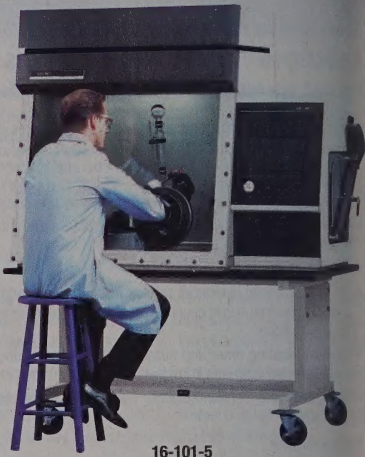
- Large viewing area, 36W × 27⅝"H (91 × 71cm)
- ⅜" (1cm) thick
- Angled at 10° to reduce reflection
- Frame is epoxy-coated 12-gauge steel with one-piece molded neoprene gasket
- 30w fluorescent lamp provides glare-free lighting

Transfer Chamber

- Large transfer chamber, 20L × 11W × 13"H (51 × 28 × 33cm)
- Inner and outer doors pivot upward to conserve space when open
- Includes two interior electrical receptacles
- Front mounted control panel has switches for lamp and interior electrical receptacles; controlled atmosphere models also have pressure gauge for transfer chamber

ORDERING INFORMATION:

Special order combinations are available: Double Box with double-width chamber door and Combination Box which combines the features of controlled atmosphere and multihazard boxes.



16-101-5

INCLUDES:

Both models offered with either chemical-resistant, molded fiberglass liner with acrylic transfer doors or stainless-steel liner with stainless-steel transfer doors, and both feature integral neoprene gloves (size 9¾, 30" [76cm] long, 15mil gauge).

REQUIRED ACCESSORIES:

Supporting base (see 19-101-27 and -28, p. 880)

Controlled Atmosphere Glove Boxes

Provide leak-tight environment for working with contamination-, moisture-, or oxygen-sensitive materials such as organics, inorganics, or biochemicals.

- Four manually operated valves regulate gas input/exhaust as well as vacuum purge and backfill of transfer chamber
- Pressure relief bubbler protects against over- and under-pressurizations
- Rear-mounted, 3-wire electrical receptacle for accessory vacuum pump
- Control panel has pressure gauges for glove box and transfer chamber as well as switches for lamp and interior/exterior electrical fixtures
- Pressure Control Module and Foot Pedal automatically monitor and control glove box pressure
- Purge/Fill Control Module automatically controls evacuation and backfill of transfer chamber
- Switches provided for selection of the following functions: number of purge/fill cycles, level of vacuum achieved at each purge cycle, and choice of backfill gas source
- LED display indicates number of purge/fill cycles selected and countdown of cycles, status of each cycle (purging or filling), and end of purge/fill cycles

ORDERING INFORMATION:

Overall dimensions: 37⅝L × 62⅜W × 38½"H (96 × 158 × 98cm).
Electrical Requirements: 115V 60Hz, 20A.

Liner Material	Shipping Weight	Mfr. No.	Cat. No.	Each
With Pressure Control Module and Foot Pedal				
Fiberglass	500 lb. (227kg)	5070000	**16-101-25**	19,610.00
Stainless steel	650 lb. (295kg)	5070100	**16-101-19**	23,535.00
With Pressure Control Module, Foot Pedal, and Purge/Fill Control Module				
Stainless steel	650 lb. (295kg)	5080100	**16-101-22**	26,795.00

Multihazard Glove Box

Provides protective physical barrier when working with hazardous materials such as low-level radioisotopes, bacteriological agents, or carcinogens.

- Inlet and exhaust HEPA filters trap particulate contaminants and prevent them from entering the box or being exhausted; 99.99% efficient on particulates 0.3µm dia.
- High efficiency polyester inlet prefilter traps large particles which extends the life of the HEPA filter
- Location of secondary exhaust filter allows user to customize system by adding an additional HEPA or carbon filter
- Manually controlled, built-in variable speed blower permits the box to be exhausted to the outside for additional safety
- 3" (7.6cm) square collar on top of box connects to ducting system
- Pressure differential gauge shows glove box pressure and condition of inlet HEPA filter
- Front-mounted transfer chamber control panel contains the blower speed knob, pressure differential gauge, and switches for the fluorescent lamp and interior electrical receptacles
- Manual inlet control damper adjusts internal negative pressure
- LED display indicates high/low span and actual pressure
- Audible alarm sounds when pressure is beyond ±6" water gauge; LED indicator remains on until alarm is reset
- Foot pedal has 8" (2.4m) cable and permits convenient insertion and removal of hands by momentarily adjusting glove box to negative pressure

ORDERING INFORMATION:

Overall dimensions: 31⅛L × 62⅜W × 46⅜"H (79 × 158 × 118cm).
Electrical Requirements: 115V 60Hz, 15A.

Labconco* Precise* Glove Boxes

Design Features

- One-piece molded, medium-density polyethylene shell
- Dry epoxy-coated steel superstructure, transfer sleeve and interior shelf
- Inner and outer transfer chamber doors are pivoted, counterbalanced and equipped with quick-release latches
- Black, chemical-resistant phenolic core work surface sealed to box floor
- Nominal 13 cu. ft. interior space in main chamber
- ¼" thick (0.64cm) laminated safety glass viewing window with powder-coated steel frame and neoprene gasket; cut-out is 26⅜ x 12½" (67.1 x 31.8cm)

ORDERING INFORMATION:
Dimensions: Main chamber: 27½D × 33½W × 25"H (70 × 85 × 64cm); transfer chamber: 11 nominal I.D. × 12"L (28 × 30cm); window: 26⅜W × 12½"H (67 × 32cm); pressure relief valve: 4" nominal dia. (10.2cm); overall: 31⅝D × 52¾W × 40"H (80 × 134 × 102cm).

REQUIRED ACCESSORIES:
Support base (see 10-358-108, -109) vacuum source for purging, and inert gas for filling. Contact your Fisher Scientific Customer Service Representative for assistance.

CERTIFICATIONS:
ETL listed (115V models). CE marked (230V models).

Basic Precise* Glove Box

Simple design allows user to customize box with ptional accessories to meet specific applications

esigned to provide leak-tight physical barrier between user and materials nside box.

erformance

- Factory testing with mass spectrometer reveals no detectable leaks greater than 1 x 10^{-4}mL/sec. when tested while glove box is pressurized with helium at 5" water gauge

RDERING INFORMATION:
hipping weight: 255 lb. (166kg)

NCLUDES:
tegral neoprene gloves (size 9¾, 30" [76cm] long, 15mil gauge); 22w uorescent lamp and control switch; interior ceiling-mounted electrical uplex receptacle and switch with 5A (115V model) or 2A (230V model) ircuit load

COMPLIANCE:
Meets Class 1 atmosphere containment conditions for oxygen leak rates per SO 10648-2 test method. Conforms to UL 3101-1/61010-1 and CAN/CSA C22.2 No. 1010.1 (115V model).

---

ontrolled Atmosphere Precise* Glove Box

rovides leak-tight environment for contamination-ensitive materials

eal for procedures requiring low levels of oxygen (<5ppm) or moisture 50ppm) such as work with organometallics, alternative energy cells, or drophilic chemicals.

erformance

- Performance-tested to maintain <5ppm oxygen/<50ppm moisture levels
- Automatic pressure relief valve activates at ±6" of water gauge

RDERING INFORMATION:
hipping weight: 260 lb. (118kg)

CLUDES:
tegral neoprene gloves (size 9¾, 30" [76cm] long, 15mil gauge); 22w orescent lamp and control switch; interior ceiling-mounted electrical plex receptacle and switch with 5A (115V model) or 2A (230V model) cuit load; six manual valves with ⅜" compression fittings and hose rbs: main chamber, four (two purge/fill, two drying); transfer chamber, o purge/fill; main chamber pressure gauge calibrated from -5 to +5 of ater gauge; transfer pressure chamber gauge from 0 to -0.29" Hg

MPLIANCE:
eets Class 1 atmosphere containment conditions per ISO 10648-2 st method

Labconco* Precise Glove Boxes, Contd.

HEPA-Filtered Precise* Glove Box

Provides a leak-tight physical barrier to protect operator from hazardous airborne particulates and powders

Leak-tight design and HEPA inlet and outlet filters make this box suitable for pharmaceutical research, nanotechnology and biochemistry. Also suitable for work with microorganisms, low-level radiochemicals, chemical carcinogens and asbestos, as well as cleanroom applications requiring ISO Class 3 conditions

Performance

- Dual HEPA filters boast 99.99% efficiency against particulates down to 0.3 microns
- 0.05ppm or lower average tracer gas levels detected during perimeter scan testing surpasses ASHRAE* 110 standards
- Factory testing with mass spectrometer reveals no detectable leaks greater than 1×10^{-3}mL/sec. when tested while glove box is pressurized with helium at 1" water gauge
- Vibration is less than 1.5×10^{-5} inches displacement when measured at work surface at both minimum and maximum airflow volumes

ORDERING INFORMATION:

Shipping weight: 280 lb. (127kg)

INCLUDES:

Integral neoprene gloves (size 9¾, 30" [76cm] long, 15mil gauge); 22w fluorescent lamp; interior ceiling-mounted electrical duplex receptacle with 5A (115V model) or 2A (230V model) circuit load; built-in blower with speed control capable of airflow from 13 to 100cfm; switches for light, blower, and innermost electrical receptacle; inlet and outlet HEPA filters and test port for challenging HEPA filter; main chamber static pressure gauge to monitor HEPA filter loading integrity

10-358-104

COMPLIANCE:

Airborne particulate cleanliness (measured under positive and negative pressures per ISO 14644-1 test method) exceeds ISO Class 5 conditions (equivalent to Class 100) and achieved ISO Class 3 conditions (equivalent to Class 1) at both minimum and maximum operational airflow volumes. Conforms to UL 3101-1/61010-1 and CAN/CSA C22.2 No. 1010.1 (115V model).

Electrical Requirements	Liner	Mfr. No.	Cat. No.	Each

ACCESSORIES

Base Stands for Labconco* Glove Boxes

- Firmly support glove boxes
- Epoxy-coated welded steel with black phenolic laminate work surface
- Lower shelf provides convenient storage for accessories
- Mobile stands furnished with 5" (13cm) swivel casters with locking brakes
- Stationary stands have adjustable leveling feet

ORDERING INFORMATION:

Work surface measures 31L × 60W × 1⅛"H (79 × 152 × 3cm). Height adjusts between 30 and 36" (76 and 91cm) on base stands for Protector* Series Glove Boxes; adjusts between 30 and 40" (76 and 101.6cm) for Precise* Series stands.

Plas-Labs* Anaerobic Chamber

Versatile unit can be used as a controlled atmosphere or anaerobic chamber

lluminated, rigid acrylic glove box with transfer compartment, for manipulation of anaerobic materials at factory-set temperature f 37°C (98.6°F).

General Features

- Equipped with two pressure/vacuum diaphragm pumps, catalyst heater/oxygen remover, desiccant train, and system of purge valves for adjusting interior atmosphere
- Thick, clear acrylic walls are essentially impermeable to ambient oxygen
- Usable on a lab cart or table
- All controls are illuminated

Work Chamber

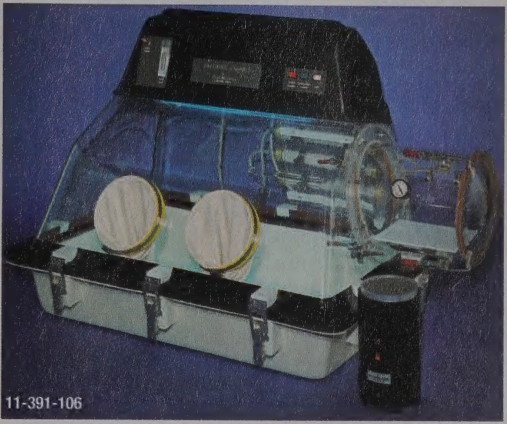
- Consists of clear acrylic hood and white thermoset base which clamp together against a double neoprene gasket; clamps adjust for wear
- Includes two ground key cock valves for purging (not for use with oxygen)
- Superstructure contains a fluorescent light system and two pumps: one recirculates chamber atmosphere through the desiccant train; the other is for evacuating and purging the transfer compartment and/or work chamber

ransfer Compartment

- Equipped with two ground key cock purge valves and vacuum gauge
- Inner door, when unlocked, is self-opening upon equilibration of internal pressure
- A leveling tray fits bottom of compartment to assist loading and unloading of liquids

esiccant Cartridges

- Three clear polycarbonate desiccant cartridges (supplied) are attached in series externally on back of unit
- Can be disconnected quickly from their self-sealing hose connections without disturbance to the internal atmosphere
- Each cartridge contains molecular sieve and silica gel medium
- Contents can be rejuvenated by heating at 163°C (325°F)



11-391-106

ORDERING INFORMATION:

Overall dimensions: 35L × 55W × 38"H (89 × 140 × 96.5cm). Work chamber is 41L × 28W × 26"H (104 × 71 × 66cm). Transfer compartment is 11 I.D. × 12"L (28 × 30cm) of thick, clear acrylic. Electrical Requirements: 120V 60Hz.

INCLUDES:

Glove ports are fitted with a pair of white, ambidextrous Hypalon* gloves with straight sleeves. With transfer tray and hospital-grade outlet strip. Catalyst heater includes two palladium canisters.

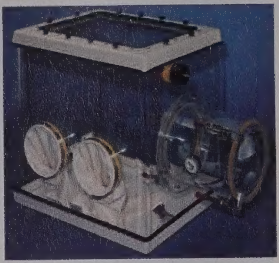
Plas-Labs* Compact Glove Box

For safe containment of hazardous materials when being weighed



11-389-6

Work chamber accommodates analytical and toploading balances, bench scales and moisture analyzers.

- Work chamber top is removable for installation of balance or scale
- Transfer chamber has a white leveling tray, two purging gas valves (not for use with oxygen) and one adjustable vacuum gauge
- Glove ports have ambidextrous Hypalon* gloves with superior abrasion, chemical and UV resistance
- Relief valve balances pressures when hands are inserted in gloves
- HEPA filter on relief valve prevents escape of particulates and organic vapors

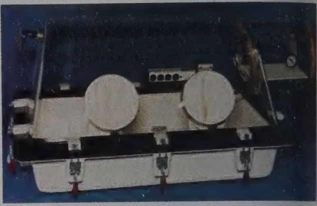
ORDERING INFORMATION:
Overall dimensions: 24L × 43W × 31"H (61 × 109 × 79cm). Work chamber is 23L × 28W × 30"H (58 × 71 × 76cm). Transfer chamber measures 11 I.D. x 12"L (28 × 30cm). Electrical Requirements: 120V 60Hz.

INCLUDES:
Two purging gas valves on the work chamber (not for use with oxygen), and hospital-grade electrical outlet strip.

Shipping Weight	Mfr. No.	Cat. No.	Each
200 lb. (91kg)	830 ABC	**11-389-6**	6788.26

Plas-Labs* Basic Glove Box

Economical glove box for general lab or industrial use



11-389

Clear, one-piece, ⅜" (9.5mm) acrylic top for a full view of isolated material and white thermoset base.

- Top and bottom are sealed airtight with double-layered closed cellular neoprene gasketing system
- Adjustable clamps compensate for wear
- All corners are rounded for easy cleaning
- Glove ports are fitted with ambidextrous Hypalon* gloves with superior abrasion, chemical and UV resistance
- Gloves are held in place with stainless-steel O-rings
- Transfer chamber has a vacuum gauge adjustable to ambient pressure

ORDERING INFORMATION:
Overall dimensions: 35L × 55W × 27"H (89 × 140 × 69cm). Work chamber is 28L × 41W × 26"H (71 × 104 × 66cm). Transfer chamber is clear acrylic, 11 I.D. x 12"L (28 x 30cm). Electrical Requirements: 120V 60Hz.

INCLUDES:
Four ground key cock valves for purging (not for use with oxygen). Shipped with hospital-grade electrical outlet strip. A white leveling tray for transferring liquids through the transfer chamber is also included.

North* Dry Box Gloves

Gloves come in hand-specific pairs for a comfortable fit

Three styles of shoulder-length gloves made from neoprene, butyl and Hypalon*.

- Cuff diameters match 8" dia. (20cm) dry box or glove box ports
- Fit a hand size of 9¾" (25cm)
- Unsupported, with smooth-finish grips
- 32" long (81cm)

Black Neoprene Dry Box Gloves

- Ideal for work requiring good sensitivity and dexterity
- Seamless one-piece construction provides high tear resistance

Black Butyl Dry Box Gloves

- Provide exceptionally high permeation resistance to gases and water vapors
- Offer superior resistance to toxic chemicals (including most missile fuels), and resist oxygenated solvents and most oxidizing chemicals

White Hypalon* Dry Box Gloves

- Offer outstanding abrasion resistance; naturally soft for greater comfort
- Provide superior resistance to ozone attack (a major cause of premature failure in dry box gloves), acids, or oxidizing chemicals

ORDERING INFORMATION:

For chemical resistance data on these gloves, call your Fisher Safety Customer Service Representative at **1-800-772-6733**.

11-395-41B

11-395-42A

11-395-43A

11-395-41A

Also available in ambidextrous style in sizes of 9¾" (25cm) and 10½" (27cm). (North Viton* dry box gloves are available on special order. Other sizes available include 8½" [22cm], 10½" [27cm], and 11½" [29cm]. Please call your Fisher Safety Customer Service Representative for pricing information.) All gloves in pack of one pair.

Ansell* Neox* Supported Neoprene Gloves

Reinforced neoprene coating results in exceptional resistance to abrasion, cutting, and chemicals

19-014-958

Ideal for applications involving refining and petrochemicals; degreasing; plating; metal fabrication; Haz Mat work; and oils, acids, caustics, alcohols, and many other solvents.

- Seamless, two-piece knit lining prevents hand irritation and enhances puncture and snag resistance
- Curved fingers and wing thumb provide a natural, comfortable fit
- Fully coated gloves available in gauntlet and shoulder-length gauntlet styles

Fully Coated Shoulder-Length Gauntlet

- Available in 12" (30cm), 14" (36cm), or 31" (79cm) lengths
- Ideal for reaching into drums or tanks

Lighter Weight Style

- Length: 12" long (30cm)
- Fully coated gauntlet

Hi-Lo Temperature Gauntlet

- Length: 12" long (30cm)
- Insulates against intermittent contact with heat or cold
- Operating temperature range: -34° to +204°C (-30° to +400°F)

WARNING

These products contain natural rubber latex, a component of which may cause allergic reaction in some users. Use only as directed and in accordance with manufacturer instructions and warnings. Please consult your institution's policies regarding use of these products.

Best* Chem Master* Neoprene/Natural Rubber Gloves

Self-flushing, tractor-tread grip pattern improves gripping effectiveness by encouraging fluid runoff

11-394-114B

Neoprene-over-natural-rubber construction provides Chem Master gloves resistance to a broad range of chemicals, including acids, alcohols, oils, grease, caustics, salts, ketones, detergents, petroleum-based solvents and animal fats. Appropriate for use in chemical plants, automotive and battery manufacturing, pesticide manufacturing, and plant maintenance

- Flexible and tactile-sensitive for easy donning and doffing
- Offer good resistance to abrasion, tear, and puncture
- Black-over-blue wear-indicator construction provides additional safety
- 100% cotton flock lining enhances worker comfort
- Length: 12" (33cm)
- Thickness: 26mil

COMPLIANCE:
Comply with 21 CFR 170–199, and are acceptable for food and pharmaceutical applications. Both ASTM* Test Methods F739 (total immersion) and F1383 (intermittent contact) were used to determine the chemical resistance properties.

MAPA Professional* Stanzoil* Knit-Lined Multi-Layer Supported Neoprene Gloves

Combine flexibility with abrasion, cut, and tear resistance

11-392-31C

Unique multi-dip construction offers liquidproof hand protection and excellent chemical resistance to most oils, grease, acids, caustics, alcohols, and solvents. Ideal for applications involving assembly, degreasing, lubricating; castings; steam cleaning; motor parts; chemical processing; petroleum refining; grinding, filing, and metal finishing; and general maintenance.

- Neoprene overdip in glove work area eliminates pinholes and weak spo
- throughout the glove and cuff
- Nonslip finish ensures a safe grip—even on wet or oily parts
- Two-way stretch cotton interlock knit lining insulates from heat and col
- and absorbs perspiration
- Seamless liner in work area protects hands from chafing
- Roomy thumb crotch for long-wear comfort
- Pinked cuff
- Washable

COMPLIANCE:
Meet 21 CFR 170-199.

INSPECTION

*Fisherbrand** Low-Lint Nylon Inspection Gloves

ISO Class 7 (Class 10,000 suggested)

Moisture-absorbent ambidextrous gloves.

19-013-621

Nylon Style

- 40-denier tricot fabric in a two-piece construction
- Easily identify size by color-coded hem on rolled cuff
- Can be used as a liner

Stretch Nylon Style

- Heavyweight fabric constructed in a full-fashion pattern
- Easy size identification by color-coded hem on "zig-zag" stitched cuff
- Provides limited heat protection

Cardinal Health* CR100* Sterile Latex Cleanroom Gloves

Enhanced fit and comfort

19-120-2994

Powder-free, gloves are versatile and suitable for use in critical environments with stringent aseptic procedures. Low in natural proteins, ≤50µg of total water-extractable protein per gram.

- 100% natural rubber latex
- Gamma sterilized in a quality-regulated facility
- Provide excellent dexterity and barrier protection
- Bisque finish ensures a secure grip
- Fitted cuff for easy donning
- Hand-specific
- Fingertip thickness: 7mil
- Length: 12" (30cm)
- Color: natural

ORDERING INFORMATION:

Performance tested and traceable with batch documentation on each pack. Certificate of sterility available upon request.

COMPLIANCE:

Meet or exceed ASTM* D 3577 physical property requirements.

IAPA Professional* TRIonic* Tripolymer Cleanroom Gloves

Ianufacturer-suggested ISO Class 4 (Class 10)

eal for acid etching, chemical mixing, and wet quartzware, instrument and uipment handling. Tripolymer blend (nitrile, neoprene and natural rubber) itperforms natural rubber in applications involving aggressive chemicals.

Natural rubber protein levels test below detection

Very strong and durable; highly resistant to tears, snags, cuts

In three hand-specific styles, all 20mil

Meet 21CFR170–199 specifications for food and drug handling

Meet or exceed ASTM 3577 requirements

Quality assurance procedure includes IEST-RP-CC-005.2 wet test for particle levels

Finished, inspected, tested and packaged in ISO Class 5 (Class 100) cleanroom

Pair-packaged in individual heat-sealed polybags, 12 pairs per pack

npigmented, "Z" Grip

Triple-washed: twice in a 5ppm calcium carbonate solution; third ultra-pure deionized water wash extracts reactive ions

Individually air-tested for pinholes

Flat cuff and embossed "Z" grip

Unlined

Length: 14" (36cm)

npigmented, Diamond Grip, Banded Cuff

Banded tapered cuff helps keep glove up over forearm

Orange band aids in acid application identification

Raised diamond grip provides sure handling of wet and dry objects

Length: 14" (36cm)

igmented, Diamond Grip, Flat Cuff

Orange-pigmented gloves with tapered flat cuffs—fit snugly over sleeves to protect forearm

Raised diamond grip

Length: 14" (36cm)

RDERING INFORMATION:

nished, inspected, tested and packaged in ISO Class 5 (Class 100) clean-iom; pair-packaged in individual heat-sealed polybags.

COMPLIANCE:

Meet 21CFR170–199 specifications for food and drug handling. Meet or exceed ASTM* 3577 requirements. Quality assurance procedure includes IEST-RP-CC-005.2 wet test for particle levels.

North* AK Latex Gloves

Manufacturer-suggested ISO Class 5 (Class 100)

Manufactured in a powder-free facility designed specifically for clean, high-tech rubber processing. Resists acids, caustics, punctures, tears. Ideal for use in agitating wafers in an acid bath, handling or mixing etching and cleaning acids or caustics, fab room maintenance, and transportation and handling of chemicals.

19-067-714

- Specially formulated 100% natural rubber latex material
- Case-hardened glove that's soft enough for dexterity
- Diamond-embossed palm provides a secure grip in wet or dry applications
- Thickness: 20mil
- Length: 15" (38cm)
- Color: orange

ORDERING INFORMATION:
Each pair individually packaged in a polybag.

COMPLIANCE:
Tested using a modified, more stringent IEST-RP-CC05.3 method to ensure low particulates and extractables.

Tempshield* Cryo-Gloves*

Breathable stay-dry lining

Left to right: 11-394-323, 11-394-305, 11-394-306, 11-394-308

Ideal for use in cryogenic atmospheres (such as liquid nitrogen, oxygen or helium; liquified natural gas; dry ice; liquid baths; or blast freezers) where organs, blood units, pharmaceuticals, or specimens are frozen.

- Comfortable and lightweight with excellent dexterity
- Protect hands and arms in temperatures as low as -162°C (-260°F)
- Water-resistant and waterproof styles with breathable, stay-dry lining
- Contain no asbestos

NOTE: Not for immersion in liquid nitrogen or for use near open flame or in hazardous areas where ignition could occur.

Stainless-Steel Graduates

Graduated inside in oz. and mL

- Convenient handle
- Smooth-pour spout

11-420-10A

Capacity	Cat. No.	Each	Case of 6
17 oz. (500mL)	**11-420-10A**	81.87	358.54
34 oz. (1000mL)	**11-420-10B**	105.23	460.84
68 oz. (2000mL)	**11-420-10C**	130.83	573.01

GREASE AND LUBRICANTS

*Fisherbrand** Cello-Seal* Grease

Won't add to pressure in vacuum system

- Low vapor pressure lubricant maintains consistency of petrolatum at 100°C (212°F)
- May be blended with Cello-Grease* Lubricant for heavier consistency
- Size: 100g jar

C601-100

Cat. No.	Each	Case of 6
C601-100	138.38	653.82

*Fisherbrand** Cello-Grease* Lubricant

May be blended with Cello-Seal* Grease

- Similar to Cello-Seal* Grease except that it is heavier and darker
- Maintains consistency of petrolatum at 119°C (246°F)
- Size: 100g jar

STORAGE CONDITIONS:
ChemAlert Storage Code: Gray (no major health hazard)

Cat. No.	Each	Case of 6
C602-100	127.29	597.83

Apiezon* Greases

Low vapor pressure sealing agents and lubricants for high-vacuum applications

Apiezon products are silicone-free, high-purity hydrocarbons distilled from selected petroleum feedstock in a molecular still.

14-638-15A

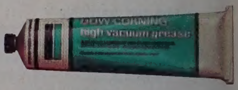
- **L Grease** (14-638-15B)is an all-purpose high-vacuum lubricant that is also recommended for stationary liquid phase in gas-liquid chromatography
- **M Grease** (14-638-15C) is inexpensive enough to be used as general-purpose grease
- **N Grease** (14-638-15D) is a special cryogenic vacuum grease which forms a rubbery cushion at ambient temperature to protect glassware
- Both **T Grease** (14-638-15E) and **H Grease** (14-638-15A) are for high-temperature applications, with H Grease having the broadest range

Type	Temperature Range	Vapor Pres. at 20°C Torr	Size	Cat. No.	Each	Case of
L	+10° to +30°C	7×10^{-11}	50g	**14-638-15B**	177.49	5/758.50
M	+10° to +30°C	1.7×10^{-9}	100g	**14-638-15C**	147.12	5/628.73
N	-269° to +30°C	6×10^{-10}	25g	**14-638-15D**	217.32	10/1857.46
T	+10° to +120°C	4.6×10^{-9}	25g	**14-638-15E**	191.47	10/1636.51
H	-10° to +240°C	1.7×10^{-9}	25g	**14-638-15A**	199.40	10/1704.30

Dow Corning* High-Vacuum Grease

Designed for sealing and lubricating vacuum and pressure systems

- Low vapor pressure, stiff, nonmelting silicone lubricant maintains its consistency from -40° to +204°C (-40° to +400°F)
- Resists oxidation and chemicals; noncarbonaceous



14-635-5D

Size	Mfr. No.	Cat. No.	Each	Case of 12

Prices subject to change.

ow Corning* 7 Release Compound

eat-stable, silicone release agent

01-185-4C

ontains inert silica filler and selected olydimethyl silicone fluids. For plastics, ubber, metals and adhesives.

- Retains much of its light consistency from -40° to +204°C (-40° to +400°F)
- Gives long-lasting release, yet remains inert to most materials
- Excellent dielectric properties, nontoxic, nonmelting
- Shows little tendency to dry out in service
- Shelf life, 60 months from manufacture date
- Size: 5.3 oz. tube

fr. No.	Cat. No.	Each
927582	01-185-4C	12.44

luorocarbon Lubricant in Spray Can

afe for a variety of plastic and rubber surfaces

CROWN
DRY FILM LUBRICANT
6075

12-008-8

orms slippery, frictionless film of TFE on glass, wood, nd metal. Ideal for tapered glass joints, stopcocks, icroscope tracks, stirrer bearings, bolts, slide rules, struments, and tools.

- Retains lubricating properties and releasing qualities to 260°C (500°F)
- Prevents galling, freezing, abrasion
- Durable, chemically inert, greaseless, and nonstaining
- Will not pick up dust
- Size: 10.5 A.V. oz. (300g) spray can

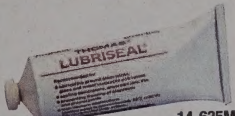
OTE:

lways test on surface before using product.

at. No.	Each	Case of 12
2-008-8	20.26	213.67

ubriseal* Stopcock Grease

or lubricating ground-glass joints, glass and metal topcocks and valves



14-635M

deal for sealing desiccators, anaerobic ulture jars and similar utensils, has a ow vapor pressure. Also recommended or use in high-vacuum systems. Smooth extured and stable. Free from oil or ilicone and practically insoluble in water.

- Retains lubricating properties up to 52°C (125°F)
- Has low vapor pressure and resists attack by acidic and alkaline solutions
- Mobility in film-like quantities permits lubrication and prevents freezing of stopcocks, ground joints
- Size: 2.7 oz. tube (75g)

Cat. No.	Each	Case of 6
14-635M	24.75	135.00

HEATERS

ELECTRIC MANTLES

Fisher Scientific* Three-in-One Heating Mantle

One mantle, three capacities, and no overheating

12-142-3

- Heats up to 450°C (842°F)
- For round-bottom flasks; heat zone adjusts to flask size
- Solid-state external power controller for precise manual control
- Double-pole ON/OFF switch, power and heater indicator lamps, and flexible cord
- Spun aluminum-coated housing remains cool during operation
- Chemical-resistant and easy to clean
- Can be used in fume hoods and operated with extension cord set (not supplied; contact your Fisher Scientific Customer Service Representative) and controller
- For 115V 50/60Hz

ORDERING INFORMATION:

Mantle dimensions: 12 dia. × 6"H (30.5 × 15.2cm); weighs 3.7 lb. (1.7kg). Controller dimensions: 6L × 2W × 4"H (15.2 × 5.1 × 10.2cm); weighs 0.9 lb. (0.4kg)

CERTIFICATIONS:

CE marked, CSA

For Flask Capacity	Watts	Cat. No.	Each
250mL, 500mL, 1L	240	12-142-3	381.02

Thermo Scientific* Economical Unimantle

50mL size boils 50% full flask of water in as little as eight minutes

11-473-50

- Heats to 450°C (842°F)
- Ceramic fiber thermal insulation
- Vacuum-formed polypropylene case
- Nonslip feet

INCLUDES:

Support clamp for ½" diameter (1.3cm) support rod; 6.5' (2m) 3-wire cord

REQUIRED ACCESSORIES:

Requires power controller (see 11-436-46, 115V 50/60Hz) to avoid exceeding 450°C (842°F)

Flask Size	Watts	Mfr. No.	Cat. No.	Each

Thermo Scientific* Flask and Funnel Mantle with Controller

Heat flasks and funnels

11-473 Series

- Heats to 450°C (842°F)
- Built-in energy regulator
- Mantle fits snugly against pear-shaped or round-bottom flasks
- Bottom outlet accommodates 60° funnels of various diameters from 50 to 300mm for heated filtrations[1]
- Standard features: safety grounded screen between heating element and flask or funnel, replaceable heater cartridge, and indicator lights for POWER ON (clear) and HEATER ON (amber)
- Housing made of chemical-resistant polypropylene
- All models have two circuits except 11-473-25, which has one
- For 115V[2]

ORDERING INFORMATION:
220V available on special order; contact your Fisher Scientific Customer Service Representative

INCLUDES:
One bracket for ½" (1.3cm) support rods (5000mL size has three)

Flask Size Range	Watts	Mfr. No.	Cat. No.	Each
10-50mL	72	EMV-0050-CEX1	**11-473-25**	418.52
100-250mL	1 × 50; 1 × 100	EMV-0250-CEX1	**11-473-27**	476.59
500-1000mL	1 × 100; 1 × 200	EMV-1000-CEX1	**11-473-29**	549.00
2000-5000mL	1 × 300; 1 × 500	EMV-5000-CEX1	**11-473-31**	860.00

[1] *Bottom outlet diameters: 50mL, 18mm; 250mL, 18mm; 1000mL, 33mm; 5000mL, 68mm.*
[2] *Mantles with two circuits have upper circuit switch for greater mantle efficiency.*

Thermo Scientific* Mantle with Insulated Heater and Controller

Maximum heat transfer with minimum risk of flask breakage

11-474-105 Series

- Heats to 450°C (842°F)
- For round-bottom flasks from 50mL to 5L
- Built-in energy regulator
- Insulating material in removable heater cartridge
- Chemical-resistant polypropylene housing
- Pilot lamps for power and heater operation
- All models have one circuit except 11-474-105H, which has two
- For 115VAC

ORDERING INFORMATION:
220VAC available on request; contact your Fisher Scientific Customer Service Representative

INCLUDES:
Supplied with clamps for ½" diameter (1.3cm) support rods, grounded line cord

Flask Size	Watts	Mfr. No.	Cat. No.	Each
50mL	72	EM0050/CX1	**11-474-105A**	346.00
100mL	72	EM0100/CX1	**11-474-105B**	351.00
250mL	150	EM0250/CX1	**11-474-105C**	374.00
500mL	200	EM0500/CX1	**11-474-105D**	390.00

5L	1 × 300; 1 × 500[†]	EM5000/CX1	**11-474-105H**	621.00

[†] *Maximum watts per circuit.*

LOOKING FOR FLASKS?
Round bottom, pear-shaped or flat-bottom? You'll find a complete selection of flasks for boiling and heating in the Flask section.

*Trademark. See Trademark Reference.

Thermo Scientific* Stirrer Mantle with Controller

Bidirectional stirring with variable speed

11-473-18

- Heats to 450°C (842°F)
- Offers single directional stirring up to 520rpm and bidirectional stirring with auto capture of stir bar (reverses stirring direction about every 20 seconds)
- Heating element is attached to thermal insulation bowl for easy replacement; built-in energy regulator
- Solid-state controls
- Preformed stainless-steel screen above heating element is grounded to line cord
- Polypropylene case
- Indicator lights: POWER ON (clear), HEATER ON (amber)
- All units have two circuits
- For 115V 50/60Hz

ORDERING INFORMATION:
220V available on special order; contact your Fisher Scientific Customer Service Representative.

INCLUDES:
50 to 1000mL sizes have one ½" diameter (1.3cm) rod support clamp; 2000mL units have three; 3-wire cord

Flask Size	Watts	Mfr. No.	Cat. No.	Each
50mL	1 × 60; 1 × 20	EMA0050/CEBX1	**11-473-18**	1174.00
100mL	1 × 60; 1 × 20	EMA0100/CEBX1	**11-473-19**	1201.00
250mL	1 × 150; 1 × 20	EMA0250/CEBX1	**11-473-20**	1245.00

1000mL	1 × 300; 1 × 20	EMA1000/CEBX1	**11-473-22**	1323.00
2000mL	1 × 500; 1 × 20	EMA2000/CEBX1	**11-473-23**	1402.00

HEAT GUNS

Wagner Spray Tech Milwaukee* Heat Guns

Rugged industrial heat guns provide up to 5700 BTUs and 1680w of power

09-201-32

- Adjustable hot-air temperature up to 540°C (1000°F); also cool-air setting
- Body is diecast magnesium; heating element is replaceable
- With stationary stand for hands-free operation

ORDERING INFORMATION:
For 120V 50/60Hz

CERTIFICATIONS:
UL listed

Temperature Range	Current	Cat. No.	Each
400° to 540°C (750° to 1000°F)	14A	**09-201-13**	157.70
Ambient to 540°C (1000°F)	14A (at maximum heat setting)	**09-201-32**	168.35

HEATING TAPES

Thermo Scientific* BriskHeat* Heating Tapes

Outstanding thermal properties

11-463-48A

Standard heating tape

- Heats to 480°C (900°F)
- Fibrox* fibrous glass insulation
- Finely stranded resistance wires double-insulated with braided fibrous glass
- With two-piece connector and separable cap
- 2' (0.6m) insulated lead wires emerge from opposite ends
- Not suitable for direct contact with metal

Heavy insulated tape

- Heats to 480°C (900°F)
- Fibrox* fibrous glass insulation
- Two-piece connector and separable cap
- 2' (0.6m) insulated lead wires emerge from opposite ends

Silicone rubber extruded tape

- Heats to 260°C (500°F)
- Standard insulated tape enclosed in high-strength silicone rubber
- Resists moisture and vapors
- With two-piece connector and separable cap
- 2' (0.6m) insulated lead wires emerge from opposite ends

REQUIRED ACCESSORIES:
Use with power regulator or input controller with appropriate voltage rating to limit temperature to the recommended maximum. Regulators used with pyrometer and thermocouple will provide appropriate reference settings for reproducible temperatures.

Length × Width	Watts	Mfr. No.	Cat. No.	Each

Thermo Scientific* BriskHeat* Heating Tapes with Controllers

Heat to 260°C (500°F)

11-488 Series

- For direct contact with metal
- Constructed of finely stranded resistance wires doubly insulated with braided fiberglass and knitted into flat tapes with fiberglass yarn
- Tapes contain flexible 1" wide (2.5cm) heating element to wrap around pipes as small as ½" diameter (1.3cm)
- Percentage controller regulates heating of tapes
- Tapes encapsulated in silicone rubber to resist moisture and vapor

Length × Width	Watts	Mfr. No.	Cat. No.	Each

TEMPERATURE/POWER CONTROLLERS

Thermo Scientific* Single and Double Proportional Voltage Power Controllers

Precise manual control of heating mantles, tapes, cords, and other resistive loads

14-259-1

- Solid-state
- Adjust output range from 3 to 100% of rated voltage; dial controller is completely linear from 2 to 100% of rated voltage
- Double controller can control two separate circuits
- Units are enclosed in modular, low-profile housing
- Double-pole ON/OFF switch, power and heater indicator lamps, and flexible cord

ORDERING INFORMATION:

Dimensions: Single controller, 6L × 2W × 4"H (15 × 5 × 10cm); double controller, 12L × 2W × 4"H (30 × 5 × 10cm)

Voltage	Watts	Mfr. No.	Cat. No.	Each
Single Controller				
115V	10	MC239X1	**14-259-1**	164.62
Double Controller				
115V	14	MC240X1	**14-259-3**	235.88
230V	14	MC240	**14-259-5**	235.88

Thermo Scientific* Electrothermal MC 228 Power Controller

Variable power controller

11-463-46

For Thermo Scientific* Unimantle (available separately, see p.911) or other mantles and tapes without controllers.

- 100 to 125V range
- Rugged, grounded, diecast zinc case, a clamp for ½" diameter (1.3cm) support rod and an amber pilot light
- For 115V

INCLUDES:

Unit, 3-wire cord and plug, connector leads, a replaceable fuse, and instructions.

Mfr. No.	Cat. No.	Each
MC228X1	**11-463-46**	174.66

Thermo Scientific* MC240 Power Controller

Regulates mantles, tapes, cords, small furnaces, and hotplates

11-472-76

- Manually adjusted from 5½ to 100% of full power with percentage-timer design
- Effects positive break when OFF
- Full-view pilot light
- User-controlled operation needs no sensing element
- Anodized-aluminum case, with no-mar rubber feet.

ORDERING INFORMATION:

Dimensions: 4¼L × 2½W × 2"H (11 × 6.5 × 5cm)

INCLUDES:

Unit, 6' (1.8m), 3-wire SJT cord and receptacle; for 120VAC, 13A.

CERTIFICATIONS:

CSA

55 gal.	23-253-998	555.04	----

DON'T SEE THE RIGHT PRODUCT?

We also carry empty containers that eliminate formalin evaporation as well as pre-filled containers in a variety of sizes. For a complete listing, look in the Histology Supplies section or visit our Web site and search for: Histology Formalin.

Fisher Diagnostics PROTOCOL* SafeFix* II All-Purpose Fixative

General-purpose fixative utilized for routine, manual or automated tissue fixation as well as autopsy specimens

23-042-601, 23-042-600

- Works well with all tissue types including breast, colon, lymph nodes, bone marrow and brain biopsies
- Will not dry out small biopsies over time
- Optimized for use with routine semi-rapid histological procedures; provides fixation results comparable to formalin or B-5
- Completely compatible with most other fixatives and decalcifiers
- Safe—does not contain formaldehyde, mercury or glutaraldehyde; odorless and nontoxic
- Replaces most formalin-based, alcohol-based and other fixatives and does not leave damaging precipitates when used in tissue processors
- Maintains the morphological integrity of cells/tissues and enhances staining results
- Ideal for immunohistochemical mRNA and RNA procedures

Quantity	Cat. No.	Each	Case of
1 gal.	23-042-600	68.46	4/237.59
5 gal.	23-042-601	199.82	----

Fisher Scientific* HistoPrep* Chemicals in Bulk Sizes

DOT-approved containers are lighter than metal and safer than glass

HC Series

- High-quality solvents packaged in economical 1 gal. polyethylene containers
- Molded handle for easier use, helps prevent spills
- Inner seal in the screw cap prevents leaking
- Labels contain safety information and meet all current regulatory requirements

FisherChemical* Cal-Ex* Decalcifier

Ready-to-use for human and animal calcified tissues, bone, cartilage, and other hard specimens

Solution of efficient chelating agent in dilute hydrochloric acid completely removes and binds all calcium in specimen under treatment, with minimal distortion of tissue and loss of structure after decalcification, or interference with subsequent staining.

CS510-1D

Quantity	Packaging	Cat. No.	Each	Case of
1L	Poly Bottle	CS510-1D	29.33	6/139.78
10L	PolyPac*	CS510-10D	147.91	-----

FisherChemical* Cal-Ex* II Fixative/Decalcifier

Provides simultaneous fixation and decalcification to prevent loss of cellular structures from putrefaction or autolysis

- Quick penetration preserves cells' structural elements without additional steps required in normal decalcification procedures
- Enhances hematoxylin staining

Quantity	Packaging	Cat. No.	Each	Case of
1L	Poly Bottle	CS511-1D	41.34	6/197.01
4L	Poly Bottle	CS511-4D	111.22	4/348.07

Fisher Diagnostics PROTOCOL* SafeClear* Xylene Substitutes

Nonhazardous, nonflammable clearing and deparaffinization agent specifically designed for use in processing and staining histological/cytological specimens

- Essentially odorless with low toxicity
- Less irritating to the skin than xylene- and d-limonene-based clearants
- Can be used during staining in the same manner as xylene and with a variety of tissue processors

23-314-629

SafeClear

- Not oily like some d-limonene clearing agents
- Will not harden tissues or cause difficulty in producing thin tissue sections

SafeClear II

- With the added chemical behavior of traditional xylene and a quicker drying time

Description	Quantity	Cat. No.	Each	Case of 4
SafeClear Clearing Agent	1 gal.	**23-314-629**	64.42	223.57
SafeClear II Clearing Agent	1 gal.	**23-044-192**	71.58	241.97

WARNING
SafeClear* II has a lower flash point than SafeClear. Do not use near open flames or ignition sources.

*Fisherbrand** CitriSolv* Clearing Agent

Xylene substitute for use in histology, cytology and parasitology

- Pleasant-smelling, limonene-based solvent derived from citrus
- Soluble with absolute alcohol, paraffin embedding media, and mounting media
- Causes minimal tissue shrinkage and enhances some stains
- Dissolves paraffin waxes, glues, and adhesives; dries slowly with no residue
- Can safely be used in most histology, cytology, hematology, and microbiology procedures that require xylene
- Biodegradable

Fisherbrand
CitriSolv

Decon Hyde-Away Aldehyde Decontaminant

Converts used aldehydes into nonhazardous materials for disposal

Crystalline Hyde-Away turns aldehydes into a solid polymer at 1:30 ratio and the liquid version turns aldehydes into a fluid suitable for sewer system disposal at 1:15 ratio.

- Highest neutralization ratio available
- Useful for formaldehydes, formalin, and glutaraldehydes
- Tested via EPA methods and proven safe for drain or trash disposal

Decon SlideRite* Cytology Fixative

A water soluble fixative for use in exfoliative cytology

04-355-88

- Forms a clear protective coating over specimens and fixates cells immediately
- Protects samples during transportation and while in storage
- Dries in as little as five minutes

Cat. No.	Each	Case of 12
04-355-88	18.44	189.13

Fisher Scientific* Permount* Mounting Medium

For both mounting and long-term storage of slides

SP15-100

- Low viscosity
- Gives a thinner adhesive layer for better optical quality
- A refractive index near that of fixed protein helps keep image free of optical imperfections such as diffraction halos
- Suitable for mounting cover slips to slides with thick or thin specimens
- Won't shift the colors of biological dyes
- Won't lose its cohesiveness, adhesive quality, or color with age
- Preserves most biological dyes with little or no fading when slides are stored in darkness

Quantity	Cat. No.	Each	Case of 6
100mL	**SP15-100**	20.71	117.42
500mL	**SP15-500**	42.30	236.39

Fisher Diagnostics PROTOCOL* Mounting Media

Thermoplastic resins for mounting and preserving microscope slide specimens

- Size: 480mL

23-245-695

Description	Cat. No.	Each	Case of 2
Xylene Mounting Media	**23-245-691**	52.41	87.83
Toluene Mounting Media	**23-245-695**	66.45	114.19

Fisher Diagnostics PROTOCOL* Hema 3* Manual Staining System

For 30-second, three-step staining comparable to the Wright-Giemsa method

23-123-869

Description	Quantity	Cat. No.	Each	Case of
Hema 3 Stat Pack (includes Fixative and Solutions I and II)	3 × 90mL	**23-123-869**	48.48	12/482.76
Hema 3 System (includes Fixative and Solutions I and II)	3 × 500mL	**22-122-911**	199.14	10/1757.61
Fixative	1 gal.	**23-122-929**	218.88	4/772.74
Solution I	1 gal.	**23-122-937**	368.32	4/1300.32
Solution II	1 gal.	**23-122-952**	368.20	4/1299.91

Biomeda* Mounting Media

For immunohistochemical and fluorescence-stained tissue sections

Crystal/Mount*

- Water-based mounting media for the preservation of tissue sections stained by immunohistochemical techniques
- Useful when working with chromogens that are sensitive to or soluble in organic solvents; tissue sections stained with chromogens such as 3-amino-9-ethyl carbazol, fast red and those using coupled dye systems with BCIP, naphthol-phosphate salts, etc., are best preserved using aqueous mounting media
- Permits postmounting of specimens with Fisher Scientific* Permount* mounting medium
- Nonhazardous

BMM-02 (left); BMM-01

Gel/Mount*

- Aqueous-based mounting medium for the preservation of fluorescence-stained tissue sections
- Especially recommended when mounting sections stained with tracers containing phycocrythrin, phycocyanin, allophycocyanin or FluoroBlue; can also be used with conventional fluorescent tracers such as fluorescein (FITC), Rhodamine (TMRITC), Texas Red, Cy2, Cy3 and Cy5

Media	Quantity	Cat. No.	Each
Gel/Mount	20mL	**BMM-01**	33.87
Crystal/Mount	30mL	**BMM-02**	39.90
	250mL	**BMM-03**	238.54

Fisher Scientific* SureStain* Stains

Fast, reliable staining for differential blood cell analysis

- For manual staining
- Produce uniform results
- Use for immersion or rack-type staining procedures
- Entire procedure can be performed in 30 seconds

ORDERING INFORMATION:
32 oz. bottles

STORAGE CONDITIONS:
Store at room temperature.

Stain	Cat. No.	Each	Case of 12

MICROM EC350 Embedding Center

22-050-850, 22-050-851

Modular format provides flexibility and saves space

Dispensing Console

- With a 5L paraffin reservoir, heated dispenser nozzle, heated work surface, heated forceps holder, and a cold spot
- Includes separate heated compartments for molds and cassettes

Cryo-Console

- Features a large, nonstick surface for cooling paraffin embedded blocks
- Temperature can be controlled from 0° to -15°C
- Unit features programmable operating times including automatic start
- All heated surfaces are independently controlled and range in temperature from 50° to 75°C
- Can be placed to the left or right of the Dispensing Console
- A second Cryo Console can also be added

Description	Mfr. No.	Cat. No.	Each
Dispensing Console	802352	**22-050-850**	7006.79

Thermo Scientific* Shandon* Excelsior* ES Tissue Processor

NEW

Economical, walk-away xylene-free tissue processing with superior tissue quality

A78400006

Continuous agitation of circular vessels evenly distributes reagents around specimens for consistent processing. Automatic, in-process rotation along with the Excelsior Reagent Management greatly reduces reagent usage.

Improved Productivity

- Dehydrant and clearing reagents can be preheated for more rapid and consistent processing
- Vacuum or cycling vacuum is available
- Laboratory Information Management System (LIMS) interface
- Three wax baths are included in the reagent rotation management system
- 222 cassette capacity with the organized basket; up to 300 with the random basket (when using 5L reagent bottles)

Safety

- Downdraft fume control minimizes exposure to hazardous vapors
- Built to flammable cabinet specifications
- Two remote alarms signal potential problems
- Battery back-up for specimen safety and protection provide up to four hours of continuous processing during the power outage
- Seven password-protected areas

Advanced Design

- Sloped lid prevents excess condensation build-up
- Glass lid enables viewing during processing
- Baskets are microwavable; designed for use with microwave pre-fixation using the Thermo Scientific Shandon TissueWave* 2 microwave oven
- Organized baskets have unique interlocking design
- Complete temperature control with ambient option

Easy to Use

- 10 customized programs and five flush options
- Five speeds of counter-stir agitation available
- Accommodates most commercial 3.8 to 5L reagent bottles
- User-friendly software with multilingual screen displays

ORDERING INFORMATION:

D × W × H (to top of cabinet): 20½ × 26½ × 63" (52 × 67 × 63cm. For 100-240V 50/60Hz.

INCLUDES:

Potassium Permanganate filter (for formaldehyde), charcoal vapor filter, six organized baskets, one random basket, one each organized and random basket lids, large block metal divider, water flush bottle, two 5L storage bottles, waste wax drawer kit (two drawers, one each lid and cover), monitor, spatula, wax fill chute, 20 wax waste liners, wrench/spanner, operator manual, service book

Cat. No.	Each
A78400006	50,300.00

LOOKING FOR REPLACEMENT PARTS?

Filters, bottles, adapter kits, and other accessories are available for the Thermo Scientific* Shandon* Excelsior* ES Tissue Processor.

Visit www.fishersci.com and search for Excelsior

Thermo Scientific* Shandon* TissueWave* 2 Microwave Specimen Processing and Staining System

Can be used for the entire tissue processing cycle

Utilizes PolarHeat* sheets to convert microwave energy to heat, safely heating paraffin without the need for additional ovens or paraffin dispensers. Ideal for small samples and batches, the TissueWave 2 delivers excellent results in a fraction of the time needed for traditional methods.

Features

- Facilitates regular and special staining procedures as well as epitope retrieval used in conjunction with IHC staining
- Flexible temperature probe provides accurate temperature control to ±1°C
- Ventilation system with operation interlock safely removes vapors and fumes
- Delivers one cycle/one second pulsing power mode
- Provides detailed processing information throughout the processing cycle
- Enhanced vacuum pump and accumulator

Design

- Programmable for temperature or power control
- User-friendly, tri-colored key pad
- Easy-to-operate display screen
- Compact unit fits on table top
- Compatible with Thermo Scientific Shandon Excelsior* organized baskets

APPLICATIONS:
Tissue processing, immunohistochemistry, decalcification, non-automated special stains

INCLUDES:
Air agitator tubing, air adjustment screw, 15A fuse, AC input fuse holder, interior lamp, microwavable specimen containers, two Excelsior organized baskets, temperature probe, vacuum chamber, operator's guide

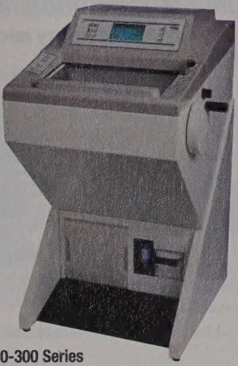
Thermo Scientific* Richard-Allan Scientific* HM 550 Cryostat

Open top cryostat with ergonomic design for working while standing or sitting



22-050-300 Series

Features

- Stainless-steel construction with maintenance-free cross-roller bearings
- Motorized coarse feed and reset movement
- Automatic Cryo Approach (ACA) system for exact and safe approach of the specimen toward the knife
- Battery backed storage and self-diagnostic system
- Automatic defrosting with immediate defrosting and interruption function

Operation

- LCD shows relevant data such as set and actual temperature, section sum, remaining travel, number of sections, time, trim and fine section thicknesses, retraction function
- Movable chamber illumination reduces light reflection
- Standby and sleep modes reduce energy consumption and operating noise

Models

- **HM 550 P** - basic unit with integrated fast freezing device with separate cooling element that cools up to four specimens to -60°C (max)
- **HM 550 VP** - basic unit with Peltier and integrated Vacutome system for flattening of specimens and extraction of sectioning debris
- **HM 550 OP** - basic unit equipped with Peltier and object cooling from 10°C to -55°C
- **HM 550 MP** - basic unit equipped with Peltier and motorized specimen cutting movement from 0 to 250mm/second; can be controlled by foot pedal or from the control panel; accelerated return stroke; programmable cutting window; brake and emergency stop button
- **HM 550 MVP** - basic unit with Peltier, motorized sectioning, and Vacutome
- **HM 550 OMP** - basic unit with Peltier, object cooling, and motorized sectioning
- **HM 550 OMVP** - basic unit with Peltier, object cooling, motorized sectioning, and Vacutome

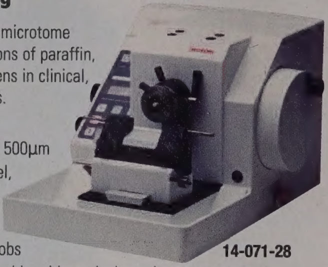
MICROM HM 360 Rotary Microtome

Heavy-duty automated rotary microtome for paraffin and plastic sectioning



14-071-28

Electronic, motorized rotary microtome is designed for all applications of paraffin, semi-thin, and hard specimens in clinical, research, and industrial labs.

- Ergonomic design
- Feed range: 0.25µm up to 500µm
- Smooth-turning handwheel, easy-to-use control panel that can be moved to either side of microtome, and large-sized control knobs
- Cutting window programmable with vertical specimen movement of 64mm
- Reproducible precision and comfortable operation for automated paraffin block sectioning
- Electronically controlled motor drive that generates high cutting forces; e.g., in methyl-methacrylate embedded undecalcified bones
- Integrated specimen retraction on return stroke with ability to disengage retraction
- Dove-tailed knife support stage for greater stability
- Vertical movement on maintenance-free cross-roller bearings
- Knife system advance of 28mm through stepping motor technology with three-speed motorized advance

APPLICATIONS:

The HM 360 is also suitable for scientific applications with the ability to program a series of sections; also suitable for semi-thin technique.

Max. Horizontal Feed	28mm
Max. Vertical Stroke	64mm
Section Counter	Five-digit LC Display with reset
Sum of Section Thickness	Five-digit LC Display with reset
Remaining Travel to Front End Position	Five-digit LC Display
Cutting Drive	Motorized, electronically controlled
Dimensions (W × D × H)	16 × 20¼ × 11" (51 × 52 × 28cm)

MICROM HM 325 Auto-Retracting Rotary Microtome

Manual sectioning and coarse advance

23-900-667

Easily sections routine paraffin-embedded specimens for any clinical, research and industrial application.

- Adjust microns from left or right side for user comfort
- Wing-style dovetail knife support
- Removable blade carrier levers help protect settings; protective blade guard design moves blade without exposing blade edge
- Zero position specimen head
- Smooth turning handwheel and precision micrometer feed system
- Vertical movement on maintenance-free cross roller bearings
- Section thickness range from 0.5 to 60µm with a full-feed range of up to 28mm
- Integrated specimen retraction on return stroke protects knife and specimen
- Integrated section trimming device automatically trims block at 10 and 30m
- Integrated waste tray with arm rests

MICROM HM 430 Sliding Microtome

With adjustable course advance and memory function

22-050-855

- Automatic or manual fine sectioning
- Designed to section paraffin and frozen specimens
- Course advance can be adjusted in 100µm increments up to 800µm
- Accommodates specimens up to 80 × 60mm
- Automatic specimen advance
- Knife holder with integrated, movable knife guard
- Memory function saves time for multiple sample advancing

INCLUDES:

Three specimen stages, one anti-roll plate, 2-oz. Neg-50, 100mL cryostat oil, one brush, brush shelf, section waste tray, tools, and instruction manual

Description	Mfr. No.	Cat. No.	Each
HM 430	910010	**22-050-855**	10,000.65

Cutting Range	1–60µm
Maximum Specimen Size	80 × 60mm
Total Specimen Stroke	40mm
Coarse Advance	Up to 800µm in 100µm increments
Dimensions (W × D × H)	12¼ × 19 × 13" (310 × 480 × 320mm)
Weight	26kg

MICROM HM 650 V Vibrating Blade Microtome

Electronic microtome with vibrating blade for cutting tissue and unfixed specimens

22-050-852

- Micrometer and vibration systems enclosed in an ergonomically designed housing
- All sectioning and operational parameters can be stored and recalled
- Fine and trim section thickness via stepping motor from 0 to 1500µm
- Amplitude adjustable from 0 to 1.2mm in 1mm increments
- Frequency of vibration adjustable from 0 to 100Hz
- Maximum specimen size of 45 × 45mm
- Motorized cutting movement from 0 to 5mm

Mfr. No.	Cat. No.	Each
920110	**22-050-852**	14,968.27

MICROM HM 450 Sliding Microtome

With automatic fine sectioning and trimming features, and selectable specimen retraction

Integrated knife carrier glides along a maintenance-free precision cross-roller bearing system ensuring fast, comfortable and non-tiring operation.

22-050-856

- Accommodates specimen sizes up to 80 × 60mm (up to 155 × 90mm with special stage)
- Precise, accurate specimen advance to the knife is assured by incorporation of stepping motor technology
- Trimming function allows for precision block trimming prior to the fine sectioning function
- Automatic or manual sectioning can be selected
- User-friendly control panel allows for programming of settings and sectioning parameters
- Important sectioning information including section counter, step sum, remaining travel and specimen position memory function are retained

Additional Features

- Memory function for time-saving specimen advance to the knife
- Knife holder with integrated, movable knife guard
- Three-speed motorized coarse feed
- Ergonomic handle for moving knife carrier
- Specimen fine orientation on X/Y axes

MICROTOME ACCESSORIES

Thermo Scientific* Richard-Allan Scientific* Edge-Rite* Disposable Microtome Blades

Consistent quality from blade to blade and sample to sample

- Surgical grade steel
- High and low profile blades are specially coated to increase longevity and optimize section quality

14-070-60 Series

Low profile blades:

- 20% thicker than traditional blades to increase knife edge stability, which allows for excellent ribboning and facilitates usage in cryostats
- Blades are 5% longer allowing for more sections per blade
- Fit any low profile blade holder

Description	Mfr. No.	Cat. No.	Pack of 50
High Profile	4275H	**14-070-61**	109.14
Low Profile	4280L	**14-070-60**	109.14

Fisher Scientific* Tissue Path* High-Profile Microtome Blades

Available in two thicknesses

- Heat-treated, high carbon blades are precision-ground for optimal angle and facet configuration
- Thicker size has greater rigidity to prevent chattering and produces excellent ribboning characteristics

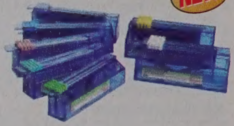
MX35 Premier Plus

NEW

Provides superb performance for sectioning hard tissues and high-quality thin sections



- Low profile
- Sharper edge with increased durability for longer blade life
- L × W: 31½ × 3⅛" (80 × 8mm)
- Thickness: 0.1" (0.25mm)
- Cutting Angle: 30°

Cat. No.	Pack of 50
3052835	113.68

MX35 Premier

NEW

Excellent for routine applications with a high proportion of harder tissue

- Low profile
- Increased durability
- L × W: 31½ × 3⅛" (80 × 8mm)
- Thickness: 0.1" (0.25mm)
- Cutting Angle: 35°

Cat. No.	Pack of 50
3051835	104.03

MB22 Premier

NEW

Great for applications where extremely thin, high-quality sections are required, such as cryostats, renal biopsies and lymph nodes

- Low profile
- L × W: 31½ × 3⅛" (80 × 8mm)
- Thickness: 0.1" (0.25mm)
- Cutting Angle: 22°

Cat. No.	Pack of 50
3050822	98.94

MB35 Premier

NEW

Best for routine sectioning applications

- Low profile
- Increased durability
- L × W: 31½ × 3⅛" (80 × 8mm)
- Thickness: 0.1" (0.25mm)
- Cutting Angle: 35°

Cat. No.	Pack of 50
3050835	92.82

HP35

NEW

Ideal for routine applications with a high proportion of harder tissue

- High profile
- Increased durability
- L × W: 29½ × 5½" (75 × 14mm)
- Thickness: 0.122" (0.31mm)
- Cutting Angle: 35°

Non-Coated	**3152735**	109.62

EQUIPMENT

Fisher Scientific* TissuePrep* Circular Flotation Bath

Eliminates wrinkles and distortions in specimen sections after microtoming

- Maintains temperatures from ambient to 70°C
- One piece, seamless aluminum chamber prevents leaks
- Front mounted on/off switch and temperature control with indicator light
- Bath capacity: 2.3L
- For 120V, 300W

ORDERING INFORMATION:

Chamber Dimensions (H × Dia.): 2.5" × 8.5" (6 × 22 cm).

Cat. No.	Each
15464Q	551.76

*Trademark. See Trademark Reference.

Prices subject to change.

Fisher Scientific* TissuePrep* Rectangular Flotation Bath

Functional, easy-to-clean bath for flattening out tissue sections wrinkled by microtoming

15-464-10Q

- Sleek base houses thermostatic temperature control and fluorescent lamp
- Clear borosilicate glass flotation tray sits in bath well—simply lift it out for fast and easy water changes and cleaning
- Illuminated removable flotation tray; tissues are always easy to see during processing
- Tissues illuminated from above and below water surface by built-in fluorescent lamp
- Bath temperature can be adjusted from ambient to 55°C (131°F) ± 1°C (±1.8°F)
- Use temperature-control knob to stabilize bath at desired temperature, as indicated on glass thermometer (order separately), which is immersed in bath in holder provided
- Finished in baked-acrylic enamel
- Front panel includes power switch, temperature-control knob, heat indicator light, and lamp switch

ORDERING INFORMATION:
× W × H: 14½ × 13 × 4½" (37 × 33 × 11cm).
Electrical Requirements: 115V 60Hz.

WARRANTY:
One year

INCLUDES:
Three-wire cord and plug

COMPLIANCE:
CSA approved

ACCESSORIES

Thermo Scientific* Richard-Allan Scientific* Signature Series Paraffin

NEW

Unique blend of polymers and highly refined paraffin with narrow carbon chain distribution that minimizes compression

- Triple filtered to eliminate impurities
- Both Type L and Type H can be used for infiltration and embedding and have a melting point of 55° to 57°C
- Type H allows for ultra-thin sections; Type L may reduce infiltration times during processing
- Packaged in easy-to-open, resealable 2 lb. bags

Description	Mfr. No.	Cat. No.	Each
Type H, high polymer	8338	22-050-128	104.61
Type L, low polymer	8339	22-050-129	104.61

Thermo Scientific* Shandon* MicroWriter* Cassette Labelers

Permanently mark tissue cassettes with easy-to-read black type

Use foil tape and a heated stylus to imprint characters that maintain legibility, even through processing solutions. Print barcodes on cassettes via manual data entry, or choose optional Barcode Printing Systems that take data from requisition barcode and print cassettes automatically.

- Mark approximately 200,000 characters per roll of tape
- Printing can be inverted for reading in either direction
- Prints on all 45° flat-faced cassettes
- Hoppers hold 75 cassettes
- For 110-120V, 50/60Hz

Compliance:
UL listed; CSA approved; CE marked.

Carousel Cassette MicroWriter*

Change cassette color and style easily with fully automated dispensing and labeling process

- Easy-to-change hoppers for maximum flexibility
- Choice of collection systems makes organizing cassettes easy
- Each unit holds six hoppers for up to 450 cassettes

INCLUDES:
Carousel MicroWriter, six hoppers, power cord, RS-232 cable, Thermo Scientific* Shandon BarcodeWriter CD, Operator Guide

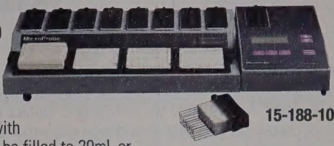
FisherBiotech* MicroProbe* Manual Staining System

Performs multistep staining protocols and simplifies standard chemical staining, immunostaining, and *in situ* hybridization



15-188-10

Compact system stains 20 slides at a time using capillary gap technology.

Staining Station

- Eight reagent buckets with removable lids that can be filled to 20mL or 100mL levels
- Removable tray retains four plastic holders that accept Isolon* reagent isolators or absorbent pads

Slide Holder Assembly and ProbeOn* Microscope Slides

- Allow users to move 20 ProbeOn slides (10 pairs) between staining station and incubator
- Patented holder has lightweight, chemical-resistant plastic handle with numbered positions and indexing bump

Isolon Reagent Isolators

- Available with three wells that contain milliliter volumes or with 30 smaller wells for microliter volumes of antibodies or DNA probes
- Disposable, 30-well glass isolators are also available

MicroProbe Incubator

- Heats from 30° to 110°C (86° to 230°F) in less than ten minutes
- Internal fan
- Anodized aluminum incubation chamber

INCLUDES:

MicroProbe Staining Station with eight reagent buckets and lids; locator tray for Isolon holders; four Isolon holders; five 30-well rubber reagent isolators; five 3-well rubber reagent isolators; six absorbent pads; slide holder with 72 ProbeOn microscope slides; MicroProbe Incubator with lid, calibration block, and power cord; user's Manuals; and applications Guide.

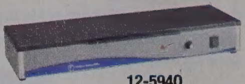
Fisher Scientific* Slide Warmer

Fast-heating aluminum warming plate



12-594Q

- Holds up to fifty-six 1 × 3" (25 × 76mm) or twenty-four 2 × 3" (50 × 76mm) slides
- Coated with black fluorocarbon resin to resist corrosion and provide high-contrast background for viewing slides
- Easy to clean
- Graduated dial thermometer is mounted on front panel instead of warming surface; provides more usable surface area, eliminates problem of contaminant buildup on and around thermometer
- Heats from ambient to 40° to 45°C (104° to 113°F) range (commonly used for nonadhesive mounting of sections) in just 15 minutes, and to 54°C (129°F) for dehydrating; setting adhesives takes 20 minutes

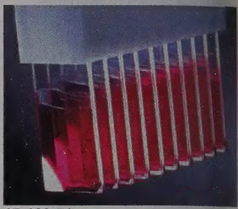
FisherBiotech* ProbeOn* and ProbeOn Plus Slides

Provide the precise capillary gap required for the MicroProbe System

- Both slides easily accommodate 5µm thick control and sample sections
- Slides measure 1 × 3" (25 × 75mm) and are 1mm thick
- ProbeOn Plus slides are enhanced for superior tissue adherence—eliminating the need for water bath additives or polylysine pretreatment



15-188-51

*Fisherbrand** Securline* Marker II Pens

Specially designed for marking Superfrost* and frosted microslides and plastic embedding cassettes

Perform well on ceramic, vinyl, paper, porcelain, metal, Mylar*, and other types of glass and plastic.

- Ink is resistant to many normal laboratory solutions when used in procedures that do not require abrasive contact
- Perfect for histology and cytology work
- Ink will withstand steam or gas sterilization and temperatures from cryogenic to approximately 200°C (392°F)
- Line width is approximately 0.015"
- Ink dries to the touch almost immediately, but should be allowed to fix for five minutes before processing in solvent baths
- Removes easily with a variety of such solvents as acetic acid, methylene chloride, methyl benzoate, 2-ethoxyethanol
- Black or red

HOMOGENIZERS

ROTOR/STATOR

isher Scientific* PowerGen* Model 125 lomogenizer

ightweight, ergonomic unit for PCR and other mall-volume applications

14-261-02

isperses liquid volumes from 0.03 to 100mL. Ideal for use ith sinewy materials such as plant and animal tissue, or r hard materials such as grains and soil material.

eatures

- Speed range: 8000 to 30,000rpm
- Use with sterilized stainless-steel or disposable generators (sold separately see p. 933
- Can be used as handheld unit, or stand-mounted (Stand 14-261-02S, sold separately)

vailable in three configurations:

- **Unit-only** includes: Model 125 Homogenizer, manual, power cord, and tools
- **Package** includes: Model 125 Homogenizer and accessories listed above, stand assembly 14-261-02S, 5 × 95mm flat-bottom generator 14-261-11, 7 × 95mm sawtooth generator 14-261-15, and 10 × 95mm sawtooth generator 14-261-17
- **PCR Kit** includes Model 125 Homogenizer, selected generators for PCR, adapter for disposable generators, and carrying case; to order, see Cat. No. 14-261-28 at right

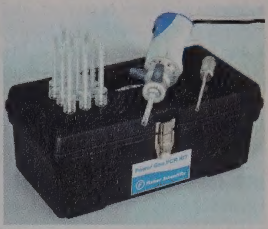
Fisher Scientific* PowerGen* Model 125 Homogenizer PCR Kits

All-in-one kits—with homogenizer, generators and carrying case—designed specifically for PCR work



14-261-28

Powerful Model 125 Homogenizer delivers complete homogenization for most samples with just three to four short bursts at top speed.

Model 125 Features

- Process volumes from 0.03 to 100mL
- Variable speed control to 30,000rpm for efficient cell disruption
- Disposable plastic generators eliminate sample cross-contamination
- Flat-bottom stainless-steel generators process liquid or soft tissues
- Saw-tooth stainless-steel generators handle tough, fibrous tissues

ORDERING INFORMATION:

Kits do not include a stand assembly; order separately (14-261-02S). Model 125 Homogenizer (14-261-02) can be ordered separately, at left.

INCLUDES:

One PowerGen Model 125 Homogenizer; a selection of disposable plastic and/or reusable stainless-steel generators (combinations vary by kit; see ordering chart); one Adapter 14-261-35 (Kits with disposable generators only; adapter is required to use disposable generators with Model 125); carrying case

WARRANTY:

Two years, parts and labor.

LOOKING FOR TUBES?

Fisher Scientific offers a wide variety of microcentrifuge, polypropylene, and sterile tubes from Fisherbrand*, Corning, and other leading suppliers. Find them in the Tubes section.

Fisher Scientific* PowerGen* Model 500 Homogenizer

High-performance homogenizer for mid-sized volumes from 0.03 to 5000mL

Ideal for creating solid/liquid dispersions and liquid/liquid emulsions, or for sample preparation.

- Speed range: 6500 to 24,000rpm
- Accepts wide range of stainless-steel generators for a variety of applications (sold separately, see p. 933)
- Also accepts 7 × 65mm and 7 × 110mm disposable generators (sold separately and requires adapter 14-261-35)

ORDERING INFORMATION:
Available as unit only or in a package with accessories

INCLUDES:
Model 500 homogenizer unit only, or as Package with:

- Unit (14-261-04)
- Stand assembly (14-261-04S)
- 35 × 195mm flat-bottom generator (14-261-14)
- 10 × 95mm sawtooth generator (14-261-17)

NEED TO CLEAN YOUR GENERATORS?

Use a sterilizer to safely clean your reusable stainless-steel generators. For a selection of models, see the Sterilizers section.

Fisherbrand* **EASY READER PLASTIC CENTRIFUGE TUBES**

Conical-bottom graduated tubes in 15 or 50mL sizes with a large labeling area. Available sterile or nonsterile. Closures included. To find these, look to the Tubes section.

isher Scientific* PowerGen* Model 1800 Homogenizer

ugged, high-performance homogenizer for large volumes from 250mL to 30L

Speed range: 4000 to 10,000rpm with variable speed control

Suitable for continuous run

Speed remains constant even with viscosity changes for better reproducibility

Electronic safety circuit and smooth start

Accepts wide range of stainless-steel generators for a variety of applications (sold separately)

ACCESSORIES

Fisher Scientific* PowerGen* Generators

For use with PowerGen Homogenizers as indicated in the chart below

Choose from durable stainless-steel generators in flat-bottom or saw-tooth styles, or disposable generators. All generators are autoclavable.

- **Stainless-steel generators** are designed for working with difficult, frozen or fibrous tissues, or where sample-to-sample contamination is not a concern
- Oversized windows allow larger sample pieces to pass through the processing head, where shearing occurs
- Disassemble easily for cleaning and bearing maintenance
- Flat-bottom styles for liquid or soft tissues
- Saw-tooth styles for processing fibrous tissues
- Compatible with older PowerGen models; no adapter required (**Note:** 45 × 300mm sizes cannot be used with older PowerGen units.)
- **Disposable generators** are ideal for applications where molecular cross-contamination is a concern
- Fit directly into most microcentrifuge tubes
- Homogenize tissues from 0.25 to 20mL
- Can be cleaned, sterilized or disinfected for reuse, or discarded
- Autoclavable at 121°C (30 psi for 20 min.) up to five times
- Plastic construction reduces risk of cuts
- Nonsterile
- For use in Models 125, 500 and 1000 only; require adapter 14-261-35 (sold separately)

REQUIRED ACCESSORIES:

Disposable Tip Adapter (14-261-35) required to use disposable plastic generators with Models 125, 500, 1000, or older PowerGen models

Fisher Scientific* PowerGen* Model 35 Handheld Homogenizer

Handheld unit with battery-powered option

Processes small liquid or soft tissue samples (such as for DNA extraction or cell disruption) from 0.05 to 100mL.

15-338-35P

Features

- Lightweight, 11 oz. (311g) design and built-in thumb notch reduce hand strain
- Portable—runs from rechargeable NiCd battery that clips on belt or rests on table
- Small footprint, just 2½ sq. in. (16cm^2)

Performance

- With battery power: fixed speed (25,000rpm); 40 minutes continuous use with no load before recharge
- With pulse feature: fixed speed (30,000rpm)
- With transformer and speed control unit: variable speed from 5000 to 30,000rpm
- Store on accessory transformer and speed control unit (15-338-35PB), or stand unsupported on lab bench
- Available as a single unit or as a complete package with accessories and generators

Transformer and Speed Control Unit

- Use for continuous-duty processing with built-in speed control from 5000 to 30,000rpm
- Doubles as storage shelf for PowerGen Model 35 motor unit and three generators

PowerGen* Model 35 Homogenizer includes:

- Homogenizer unit with 35w motor in Noryl* plastic double-insulated housing
- Two-position rocker switch control (fixed speed and pulse)
- Polarized 2-wire, 6' (1.8m) cord
- Tool kit
- Instruction manual
- Rechargeable NiCd battery with belt clip (15-338-1)
- 115V battery charger (15-338-2)
- Does not include generators; order separately. For stationary use, order motor stand assembly (14-670B, 05-754, and 15-338-21)

PowerGen* Model 35 Package adds:

- Transformer and speed control unit (15-338-35PB)
- 5mm diameter × 95mm long flat-bottom generator (14-261-11)
- 7 and 10mm diameter × 95mm long saw-tooth generators (14-261-15 and -17)
- Spare bearings
- Generator cleaning kit

REQUIRED ACCESSORIES:

Generators, order separately

Description	Electrical Requirements	Cat. No.	Each
PowerGen 35 Package	115V 50/60Hz	**15-338-35P**	5395.41

Transformer and Speed Control Unit	115V 50/60Hz	**15-338-35PB**	628.12
Replacement Battery Pack	----	**15-338-1**	285.07
Charger Unit	----	**15-338-2**	57.50

ACCESSORIES FOR POWERGEN* 35

Motor Stand Assembly

Mount PowerGen* Model 35 on this assembly for stationary use.

- **All three components listed are needed and must be ordered separately.** Epoxyn* solid epoxy resin base is chemical and mar resistant, measures 5W × 8"L (13 × 20cm) and comes with a ⅜" diameter (9.5mm) nickel-plated steel rod. Castaloy* clamp links base rod with ⅜" diameter (9.5mm) nickel-plated motor unit support rod.

Description	Cat. No.	Each
Base with Rod	**14-670B**	44.35
Castaloy Clamp	**05-754Q**	16.38
Motor Unit Support Rod	**15-338-221**	35.00

Fisher Scientific* Tissuemiser Homogenizer

Economical small-sample laboratory homogenizer with probe

Portable and lightweight. Ideal for homogenizing, dispersing and emulsifying samples in aqueous media with volumes of 0.25 to 30mL. Can also mix, disperse and emulsify.

15-338-420

- Continuously adjustable motor speed range from 5000 to 30,000rpm
- Liquid medium with suspended material is drawn into and repeatedly cycled by the action of a screw-shaped rotor
- High-speed mechanical shear disperses and disintegrates material
- Homogenization of tissues (e.g., muscle, liver, breast tissue) typically takes less than one minute
- Motor drive is housed in sturdy black plastic, textured for easy handling
- Can be stand mounted

INCLUDES:

Stainless-steel probe (7mm) that easily fits into small test tubes or vials. Comes with two-conductor cable.

Model	Fisher Scientific Tissuemiser
Motor Speed	Variable from 5000 to 30,000rpm
Dimensions (Probe L × Dia. × Overall L)	3¼ × 9⁄32 × 11¼" (8.3 × 0.7 × 28.6cm)
Net Weight	14 oz. (397g)
Electrical Requirements	115V 50/60Hz, 125w
Cat. No.	**15-338-420**
Each	900.00

WARNING

Not for use with flammable solvents.

*Trademark. See Trademark Reference.

Prices subject to change.

BEFORE YOU BUY HOMOGENIZERS

Homogenizers are devices that blend and emulsify a substance by forcing it through a fine opening against a hard surface. Homogenizers reduce small particles of uniform size and distribute them evenly – usually as a liquid.

IMPORTANT TERMS TO KNOW

Rotor/Stator Technology—The rotor is the moving part of a dispersing element. The stator is the static part (non-moving).

Emulsions—An emulsion is a homogenous mixture of two liquids that are normally unmixable with each other, e.g., oil and water.

Suspension—A suspension is a mixture of one solid (or more) and one liquid, e.g., toothpaste.

High Shear—A high shear mixer's distinguishing feature is a rotating element, or rotor, that rotates in very close proximity to a fixed element, or stator. The rotor tip speeds typically range from 10 to 50 m/s. High shear mixers have very high-energy dissipation and shear rates, and they are much greater than conventional mixers.

Dispersion—A stable or unstable system of fine particles, evenly distributed in a medium.

THINGS TO ASK YOURSELF BEFORE BUYING

Volume—What volume will I be working with?

Sample Size/Type—How large are my samples, e.g., 50mL, 500mL? What type of sample are you homogenizing, e.g., H_2O?

Dispersing Elements—There are three types of dispersing elements: e.g., coarse, fine, and medium. Depending on your sample and task at hand, this will help determine which tool you will need.

Pressure—Will you be working under pressure or vacuum?

IKA HOMOGENIZERS	VOLUME RANGE (H_2O)	MAX. VISCOSITY	SPEED RANGE (UNDER LOAD)	APPLICATIONS
Ultra-Turrax Tube Disperser † (Digital)	2-15mL	N/A	300 - 6000rpm	R&D, human medicine, chemistry, cosmetics
Ultra-Turrax T10 †	0.5 – 100mL	5000 mPas	8000 – 30,000rpm	Soft tissue, HPLC prep
Ultra-Turrax T18 †	1 – 1500mL (H_2O)	5000 mPas	3500 – 24,000rpm	Muscle, immulsions, suspensions
Ultra-Turrax T25 † (Digital)	1 – 2000mL (H_2O)	5000 mPas	3400 – 24,000rpm	Wastewater samples, medical diagnostics, paper
Ultra-Turrax T50 †	0.25 – 30L (H_2O)	5000 mPas	4000 – 10,000rpm	Bones, paint, pigments, polymer solution, fuel
Ultra-Turrax T65	2 – 50L	5000 mPas	7200rpm (fixed)	Large scale pilot plant situations

IKA* Ultra-Turrax* Homogenizers

Offer high-performance dispensing for wide range of applications, including medical and clinical diagnostics, wastewater and soil analysis, high-sheer mixing and tissue homogenization

Choice of dispersing elements adds versatility and value.

- Electronic speed control
- Handle viscosities to 5000mPas
- Overload protection

Model T10

- For small quantity process emulsions and dispersions, tissue decomposition, medical and clinical diagnostics and suspensions
- Volume range: 0.5 to 100mL
- Scale speed control
- Wide speed range allows work at high circumferential speeds
- Quick-release button for dispersing elements
- Ideal for manual operation with lightweight, ergonomic design
- Includes R200 clamp and storage case

Model T18

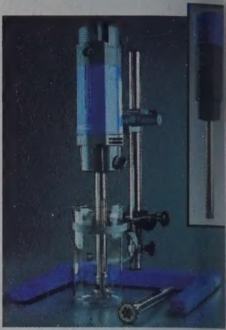
- Slender design for comfortable handheld use with volumes from 1 to 1500mL
- Scale speed control
- Quick-release button for fast generator change
- Smooth start feature eliminates spilling

Model T25

- High-performance dispensing for volumes from 1 to 2000mL
- Digital display
- Smooth-start feature

Model T50

- Heavy-duty unit handles volumes from 0.25 to 30L
- Reproducible results due to constant speed even with viscosity changes
- Smooth-start feature



14-260-34 (stand not included); 14-505-169 (insert)

ACCESSORIES

Ultra-Turrax* Rotor/Stator Generators

For use with Ultra-Turrax T10, T18, T25 and T50 Homogenizers

14-505-300

14-505-301

14-505-302

Suitable for a wide range of media.

- 14-259-137 and -76 achieve fine dispersions; all other generators produce coarse dispersions
- Generator for inline processing (14-259-137) is made of Kalrez* and stainless steel; requires wet chemical sterilization
- All other models made of PTFE and stainless steel and can be sterilized by all known methods
- All generators are appropriate for a pH range of 2 to 13 and can be used with solvents and abrasive substances

Brinkmann* Polytron* Homogenizers

Versatile units combine quality, convenience and high performance for rapid, reproducible sample processing and consistent sample-to-sample uniformity

- Variable speed control
- Accept wide range of stainless-steel Polytron generators (order separately)

Handheld Models

- Lightweight for comfortable processing of sample volumes from 0.1 to 100mL
- Powerful 100w motors achieve speeds up to 30,000rpm, based on model
  - Model PT 1200E features fingertip control
  - Model PT 1300D offers digital display and control and has a safety transformer that isolates handheld unit from high line voltage (can be turned off when not in use)

Benchtop Models

- For heavy-duty use
- High-speed, high-performance motors handle wide range of sample volumes (capabilities vary by model)
- Stand included
  - Models PT 3100 and PT 6100 deliver maximum speed of 30,000rpm for volumes up to 30L (capacity based on model)
  - Both feature LED display and digital speed control (100rpm) that maintains set speed regardless of sample changes, and have built-in noise reduction for greater operator comfort (72dB at maximum speed)
  - Soft-start motor prevents splashing and sample loss
  - Quick-connect: change generator with one hand
  - Economical Model PT 10/35 handles volumes to 2L

APPLICATIONS:

Pulverizing plant and animal tissues, grains and seeds; soil extractions; DNA/RNA extractions, Karl Fischer sample prep

ORDERING INFORMATION:

Model PT 1200E is available as homogenizer unit only or in System Bundle with homogenizer, three stainless-steel generators (5, 7 and 12mm), and one box of 7mm disposable generators

INCLUDES:

- ▸ Support stand (benchtop models only)
- ▸ PT 1200E System Bundle includes PT 1200E homogenizer, three stainless-steel generators (5, 7 and 12mm), and one box of 7mm disposable generators

REQUIRED ACCESSORIES:

NEED TO CLEAN YOUR GENERATORS?

Use a sterilizer to safely clean your reusable stainless-steel generators. For a selection of models, see the Sterilizers section.

LOOKING FOR SPECIAL PURPOSE HOMOGENIZERS?

Multi-sample processors, cryogenic homogenizers and more—see them in the Homogenizers/Specialty subsection.

SONIC

isher Scientific* Model 500 Sonic Dismembrator

leal for preparing samples for soil extractions

ompact, programmable and easy to operate. Disrupts cells, extracts imples, reduces particle sizes, accelerates chemical reactions, and mixes id dissolves particles in solution. Ideal for preparing samples for soil tractions. Microprocessor controller allows strict adherence to the most acting protocols.

perating Features

Processes 1 to 500mL

Programmable 20-level hard memory, useful for multi-user labs

Run durations can be set from 1.0 second to 10 hours, and pulsing sequences in both ON/OFF modes

Easy-to-read LCD screen with user prompts displays power output, parameter settings, alarms and messages

Five operating modes—continuous, timed, pulsed, timed/pulsed or temperature; front-panel screen displays

Can be programmed in English, Spanish, Italian, German or French

Automatic overload feature protects intricate circuitry and reduces costly downtime

Parallel printer and serial interfaces (I/O connector) allow connection to any computer and printing to any printer (with date stamp and parameters)

mer Features

Digital integrating timer shows 1-second increments from 1 second o 10 hours

Total desired processing time is set on a pressure-sensitive keypad; selected processing time and actual total elapsed processing time are displayed

START/STOP control initiates or reinitiates timed sonication, while a PAUSE control allows manual pulsing or delay

Total preset time of active sonication is unaffected by pauses or pulsing

DERING INFORMATION:

tional accessories increase processing volume, reduce noise. Choose anium alloy horns and tips in a wide range of sizes for efficient process- of volumes up to 1L, and a soundproof enclosure for eliminating pro- ssing noise and ensuring quiet operation. All sold separately.

INCLUDES:

Generator, converter, ½" tapped horn with one flat tip, wrench set and users manual

WARRANTY:

Full two-year

Tip Diameter	½" (1.3cm)

ACCESSORIES FOR MODEL 500 SONIC DISMEMBRATOR

Microtips

- Process liquids in small test tubes.
- Tapered ⅛" Microtip* attaches directly to the ½" tapped horn
- Upper coupler replaces horn and lower stepped section has a 3" reach into narrow test tubes and a ⅛" tip diameter

Description	Cat. No.	Each
Microtip		
Tapered ⅛" dia.	**15-338-67**	210.00
Two-part Microtip		
Upper coupler section	**15-338-68**	335.00
Lower stepped section	**15-338-69**	240.00

Tapped Horns

- High-gain "Q" horns maintain intensity when processing with large tip diameters
- Horns supplied with one replaceable tip

Description	Processing Volume	Cat. No.	Each
½" dia.	10 to 250mL	**15-338-56**	512.80
¾" dia.	200 to 500mL	**15-338-57**	531.41

Fisher Scientific* 150 Model Digital Sonic Dismembrators

Versatile units are suitable for a broad range of liquid processing applications

NEW

15-335-106

Consists of power supply, converter and mechanical probe or horn. Power supply/converter changes standard electrical power to high-frequency mechanical energy, which is then applied to the horn, where it is further amplified for use.

- Digital LED display and parameter entry
- Digital amplitude control (10 to 100% in 1% increments)
- Built-in auto-tuning for optimal control
- Continuous or pulsed operation
- Memory retains last settings (even after shut-off or power loss)
- Overall experiment timer
- Local or remote (plc) control capability
- Supplied probe is ideal for Eppendorf* or Falcon*-style vessels
- I/O port for external control

Timed Control Model 150T

- Variable time setting from 1 sec. to 99 hours

Energy Control Model 150E

- Variable energy settings from 1 to 10,000 joules

APPLICATIONS:

Biological cell disruption/homogenization, emulsification, reaction acceleration, dispersion, fine mixing, degasing

INCLUDES:

Power supply 1/8" microtip, converter, interconnects.

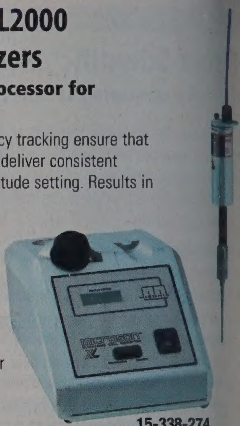
Model	Electrical Reqts.	Cat. No.	Each
150T (Time Control)	120V 50/60Hz	**15-335-106**	2816.00
150E (Energy Control)	120V 50/60Hz	**15-335-107**	2816.00

Model	150T	150E
Control	Timed	Energy
Output Frequency	40kHz	40kHz
Input Power	117V 50/60Hz	117V 50/60Hz
Output Power	150w	150w
Dimensions	12L × 7½W × 12"H (30 × 19 × 30cm)	12L × 7½W × 12"H (30 × 19 × 30cm)
New Weight	17 lb. (7.7kg)	17 lb. (7.7kg)

Misonix* Microson* XL2000 Ultrasonic Homogenizers

Economical small volume processor for volumes from 0.2 to 100mL

Improved load monitoring and frequency tracking ensure that the probe operates more efficiently to deliver consistent sonication intensity at any given amplitude setting. Results in shorter processing times and greater sample-to-sample consistency.



15-338-274

Features

- Operating modes: continuous run or pulse
- Automatic tuning—no need to tune probe before each use; saves time
- Thumb pulse switch provides greater sonication control
- Compact design—uses minimal benchtop space

ORDERING INFORMATION:

Optional probes available (sold separately), including Micro Cup Horn (15-338-259) for safe processing of hazardous samples inside sealed vials

INCLUDES:

Generator, converter, ⅛"L microprobe (Model P1), cable, wrench set and manual

Electrical Requirements	Cat. No.	Each
110V 50/60Hz	**15-338-274**	2595.95

Fisher Scientific* PowerGen* Cryogenic Homogenizer

For quick, efficient grinding of plant and animal tissue at cryogenic temperatures

02-215-500

Combines a powerful drive motor and stainless-steel tissue pestle with stainless-steel grinding tubes chilled in a liquid nitrogen reservoir. Samples of 1-2 grams can be processed rapidly.

- For sample processing, the 10 mL grinding tubes are placed in the liquid nitrogen reservoir
- Tissue samples are added to the grinding tubes and allowed to freeze
- Stainless-steel pestle, which is pre-chilled as well, is connected to the motor with a flexible coupling and inserted into the grinding tube
- By raising and lowering the grinding tube, the sample is mechanically ground to a fine powder
- To prevent sample melting, the grinding tube is replaced to the liquid nitrogen reservoir
- For higher throughput, use multiple grinding tubes and pestles
- All components are easily disassembled for cleaning and decontamination

ORDERING INFORMATION:

Accessories include Cryogenic Tubes (set of five stainless-steel 10mL tubes) and a Kit (with six tubes, six bits and tube holder)

INCLUDES:

Motor unit with stand, tube holder and support, reservoir, and stainless-steel tissue pestle

IKA* Ultra Turrax* Tube Disperser Workstation

The first closed homogenizing system for stirring, milling and dispersing

NEW

14-259-600

Easy to operate for quick, one-time sample preparation with no cleanup. Disposable tubes lock into place and remove quickly with a simple twist.

- Speed range: 300 to 6000rpm
- Continuously variable speed control
- Digital display
- Accommodates sample volumes from 2 to 15mL
- Hygienic—Tubes contain samples securely
- Hermetically sealed—protects internal components from accidental spills
- Anti-locking function ensures consistent results
- Low-voltage (24V) for added safety

ORDERING INFORMATION:

Replacement containers available

INCLUDES:

Tube drive unit, two DT-20 stirring tubes, two ST-20 dispersing tubes, two BMT-20G/S grinding/milling tubes, ceramic and stainless-steel grinding balls, power supply, carrying case

Omni Prep* Multisample Homogenizer

Homogenize six samples per cycle—up to 250 samples per hour

NEW

15-340-120 (tubes sold separatel

Modular system† allows one group of samples to be prepared while another group is being processed. Processes samples rapidly and efficiently in a variety of tube sizes, including 1.5/2, 15, and 50mL conical tubes.

- Unit works exclusively with Omni Tip* plastic probes
- Omni Tip probes are disposable to eliminate cross-contamination; may also be reused and autoclaved up to seven times
- Programmable time and speed—stores up to three programs
- Most samples processed in under one minute
- Movable rack is ideal for processing samples that require probe mobilit within the sample
- Ultra quiet, trouble-free performance
- Fan-driven positive airflow can be exhausted to a HEPA-filter or fume ho
- Ice tray (sold separately) keeps sensitive samples cold during processin

INCLUDES:

Omni Prep processing unit, two six-place processing racks, nine tube holders (three each of 1.5/2, 15, and 50mL sizes), 50 Omni Tip soft tissue probes, and 50 Omni Tip hard tissue probes

HOTPLATES

FISHER SCIENTIFIC

Fisher Scientific* Isotemp* Digital Hotplates and Stirring Hotplates

Designed for routine lab heating and sample drying, these low-profile hotplates provide exact temperature control, simple operation, and complete operating data on display

Operating Features

- Compact design with 7 × 7" ceramic or aluminum top plate
- LED displays actual and setpoint readings
- Temperature is adjustable in 1°C increments, 0.1°C for temperatures below 100°C with remote temperature probe
- User-programmable timer automatically shuts off unit—perfect for timed experiments
- "Favorites" feature allows users to store three commonly used settings

Safety Features

- Top plate and base are molded to divert liquids away from internal electronics
- Safety warning system protects users from accidental burns; red warning light alerts when heating surface exceeds 50°C and flashes when heat is shut off until surface is cool
- Incorporated base mount holds support rods up to 13mm diameter—ideal when using thermometers or pH probes

11-300-49SHP

Ceramic-top Models

- Heat to 540°C (1004°F)
- Reflective white ceramic surface is acid- and alkali-resistant and easy to cl
- Nonheating frame surrounds the heated ceramic plate for added protect

Aluminum-top Models

- Heat to 380°C (716°F)
- 49 in². heating surface will not crack or chip

Stirring Hotplate Models add:

- Variable analog stirring control from 60 to 1200rpm
- Separate LED displays for temperature and speed (actual or set point)
- INSTANT-ON feature begins stirring at low 60rpm to prevent splashing
- Direct-drive motor/magnet system runs silently

ORDERING INFORMATION:
100V and 230V UK models available on our Web site.

INCLUDES:
Detachable line cord, 6" (18cm) PTFE-coated stainless-steel temperature probe, 18"L (46cm) support rod and clamp, PTFE stir bar .

sher Scientific* Economy Hotplates and Stirring Hotplates

neral-purpose heating with retro styling

mpact, sleek general-purpose hotplates are available in hotplate or stirg hotplate versions in two top plate sizes—4 × 4" or 7 × 7".

- Heat from 150° to 590°C; reach maximum temperature in minutes
- Reflective white ceramic top plate resists alkalis and acids, cleans easily; drip edge guards against spills
- Durable die-cast aluminum base
- Stirring hotplates have variable analog speed control from 100 to 200rpm—stir up to 2L water; Instant-on at 100rpm ensures smooth, afe low-speed operation; come with support rod mount and PTFE-coated tir bar

DERING INFORMATION:
120V 60Hz

INCLUDES:
3-wire grounded cord; stirring hotplates include PTFE stir bar

WARRANTY:
12 months

COMPLIANCE:
CSA approved

Fisher Scientific* Infrared Hotplates

Offer faster, higher-temperature heating than other hotplates

11-493-614Q

Ensure more uniform heating throughout the sample since heat-up time is not affected by the flatness of the glassware.

Operating Features

- Variable temperature control from 95° to 615°C (203° to 1139°F)
- Variable power control from 0 to 100%
- 8 or 6" dia. (20 or 15cm) high heating area
- Two heating zones: High-heat circular center for boiling liquids; area outside circle for simmering
- Black glass-ceramic top surface cleans easily and resists mechanical, scratch and chemical damage
- Built-in support rod clamp secures odd-shaped containers

Model IR 6000

- 8" dia. (20cm) heating surface area
- Boils 1L of water in less than 17 minutes

Model IR 4000

- 6" dia. (15cm) heating surface area
- Boils 1L of water in less than 14 minutes

ORDERING INFORMATION:
Cleaning cream (11-493-621) for top surface is available on our Web site

INCLUDES:
Unit, 3-wire cord and plug

WARRANTY:
12 months

Stock up on Fisherbrand Magnetic Stir Bars—the perfect accessories for your stirring hotplate. We offer many different sizes, shapes and colors. Check them out in the Stirrers section.

SELECTING THE RIGHT TOP PLATE MATERIAL

Ceramic —The most popular top plate material, its white color enhances sample visibility and can withstand temperatures of up to 550°C. Ceramic offers excellent chemical resistance and is easily cleaned with any non-abrasive cleanser, but it can be broken or cracked upon impact. The heat distribution on a ceramic top is not as uniform as metal tops.

Aluminum—Provides the most uniform heat distribution of any surface. Aluminum tops can withstand a maximum temperature of 400°C. Aluminum offers the added durability to sustain point impacts that might break ceramic or glass surfaces; however, corrosion resistance is limited and chemicals may stain the silver surface causing discoloration.

Stainless Steel —Silver in color, stainless steel tops reach maximum temperatures of 450°C and offer excellent corrosion resistance and chemical compatibility. The heat uniformity of stainless steel is better than ceramic, but not as good as aluminum.

How important is solution and surface temperature control for your application?

Surface Temperature Control — Hotplates with a digital temperature display control the top plate surface temperature.

Solution Temperature Control—The addition of a temperature probe allows for more precise control. The hotplate measures and controls the solution temperature to within ±0.1°C

SAFETY FEATURES

Hot Surface Warning— Bright red warning light illuminates alerting user that the surface is over 50°C. Display flashes "HOT – OFF" when heating is turned off until the surface temperature is below 50°C

Overtemperature Protection—A redundant temperature control system limits top plate temperature to a user-selected temperature, preventing burnt samples or fires

Low Profile Design—Two-piece cast aluminum design deflects spills away from electronics and provides added stability

THERMO SCIENTIFIC

Thermo Scientific* Cimarec* Digital Hotplates and Stirring Hotplates

Digital performance, safety and control for general lab heating applications

Sleek, compact design is available in three sizes.

Operating Features

- Microprocessor-controlled feedback technology maintains consistent, repeatable temperature settings from 5° up to 540°C (41° to 1004°F), adjustable in 5° increments (based on model)
- Digital LED dislays temperature settings
- Ceramic-top models: seamless, high visibility surface cleans easily and resists alkalis and acids
- Aluminum-top model: superior durability and uniform heat distribution across surface
- Flat top and high-wattage heating elements provide superior heat transfer and fast time-to-boil
- Rugged cast aluminum body is stable and durable

11-675-909

Safety Features

- Hot surface alert protects from accidental burns; light activates when hea ing surface is above 50°C (122°F)
- Unit displays HOT OFF until unit reaches 50°C (122°F) or below, even whe heat control is turned off

Stirring Hotplates

Include all hotplate features, plus:

- Adjustable speed range from 60 to 1200rpm
- StirTrac* technology for improved low-speed stirring, consistent speed control and stronger magnetic coupling
- StirTrac braking brings stir bar to immediate stop for quick flash remova
- Integrated ring stand holder to accommodate ½" diameter (1.3cm) support rod

ORDERING INFORMATION:
220/240V, CE-approved models are available online

INCLUDES:
Unit, detachable line cord; stirring models also supplied with stir bar

WARRANTY:
Two years

hermo Scientific* Super-Nuova* Digital Hotplates and Stirring Hotplates

ovide superior flexibility, precision and safety

Camic- or aluminum-top general ppose hotplates with four-function mnory are excellent for labs with mtiple users. Low temperature austment is ideal for life science a biotechnology applications.

11-675-916Q

Cerating Features

- licroprocessor control ensures ccurate and stable setpoints for mperature (and stirring speed for irring models only)
- ectronic feedback controls monitor ther top plate surface or liquid mperature (when using external TFE-coated probe, included) and adjust to setpoint
- ngle control knob controls heat and speed (based on model); lock feature events accidental changes
- igital display for temperature or rpm (separate displays on stirring tplates)
- owerful motor and magnetic system prevents magnetic decoupling
- mperature adjusts 1° increments
- ur user-defined temperature/speed memory keys recall settings
- alibration mode allows remote probe to be calibrated to external andards; probe can be programmed as a system (probe, control, display) any user-selected temperature
- eramic tops clean easily, resists chemicals and provides fast boiling time
- luminum tops ensure uniform heating across surface; resist acking and chipping
- an be used in 0° to 27°C, 80% relative humidity, non-condensing nvironment
- S-232 port allows output of time count, temperature setpoint, top rface/remote probe temperature, stirring setpoint and actual speed

Safety Features

- Red "hot top" warning light activates when heating surface is above 50°C (122°F); unit flashes HOT OFF until surface temperature falls to 50°C or below, even when heat control is turned off
- Adjustable overprotection circuit limits top plate temperature, prevents runaway conditions
- Rugged low-profile cast aluminum body provides stability and durability
- Unit design protects internal components from accidental spills
- Walk-away timer shuts off heating, stirring or both after preset user-defined interval
- **Hotplate models** include all features described above
- **Stirring hotplate models** include all hotplate features, plus:
  - Stirring range from 50 to 1200rpm
  - StirTrac technology offers improved low-speed stirring, consistent speed control and superior magnetic coupling
  - Four-position model (11-475-30Q) functions as four stirring hotplates in one—each position is independently controlled

APPLICATIONS:

Solubility studies, titration, digestion, enzymatic studies

INCLUDES:

Unit, 6" Type K probe, detachable cord. Stirring models also include stir bar.

COMPLIANCE:

CSA approved

LOOKING FOR LABORATORY GLASSWARE?

You can find a wide selection of glass vessels for heating and stirring in the Beakers and Flasks sections.

Thermo Scientific* RT Elite* Stirring Hotplates

Integral temperature, stirring and time control

Enhanced operating features provide superior precision control and repeatability.

Hotplate Features

- Aluminum top plate, 5⅜" dia. (13.5cm)
- Heat to 350°C (662°F) with 0.1°C control increments
- Single control knob combined with separate LCD displays for temperature, speed and time
- Redundant temperature control system includes user-selectable overtemperature setpoint
- Walk-away timer shuts off heating, stirring, or both after 1 to 999 minutes
- RS-232 port outputs time count, temperature and setpoint to external PC

11-400-023Q

Stirring Features

- Stirs to 1200rpm (with 1rpm control increments)
- StirTrac* system provides improved low-speed stirring, consistent speed control and stronger manual coupling
- StirTrac braking feature brings stir bar to immediate stop for quick flask removal; prevents decoupling

WARRANTY:
Two years

SPECIFICATIONS

Type	Stirring Hotplate
Top Plate	Aluminum
Stirring Speed Range	50 to 1200rpm
Temperature Range	1 to 350°C (39 to 662°F)
Heating Surface Area	5⅜" dia. (13.5cm)
Overall L × W× H	11¼ × 6½ × 3⅞"H (28 × 17 × 10cm)

Each	1017.00

Thermo Scientific* Explosion-Proof Hotplate

For Class 1, Group D hazardous areas where flammable gas or vapors are present

Electrical contacts are enclosed in a sealed aluminum housing that contains and protects controls from explosive atmospheres.

Features

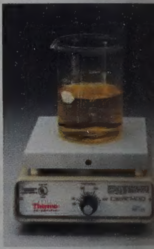
- Thermostatically controlled up to 243°C (469°F)
- Cast-aluminum top plate provides maximum heat transfer for excellent uniformity and stability
- Metal case finished in tan enamel

ORDERING INFORMATION:

- Dimensions: Thermometer well, 2L × ¼" diameter (51 × 6.7mm); Overall, 7L × 7⅝W × 3¼"H (17.8 × 19.4 × 8.3cm)
- Top plate: 6⅛L × 6⅛"W (16 × 16cm)
- Without dial thermometer 11-496-4 (sold separately)
- For 120V 50/60Hz, 600w, 5A

INCLUDES:
Mounting lugs for permanent installation

CERTIFICATIONS:
UL listed



11-496-3

Note: Professional installation required.

Electrical Requirements	Mfr. No.	Cat. No.	Eac
120V 50/60Hz, 600w, 5A	HP11515B	**11-496-3**	881.0

Thermo Scientific* Micro Hotplate

Tiny benchtop variable-control hotplates

Process delicate materials at low temperatures.

- Infinitely adjustable, demand-type control provides ±5°C (±9°F) temperature control over the entire operating range
- Reaches 260°C (500°F) in just 4½ minutes; 371°C (700°F) in 7½ minutes
- Cast-aluminum top plate
- Embedded heating elements
- Perforated stainless-steel case

THERMO SCIENTIFIC* NUOVA* HOTPLATES

Compact, easy-to-use hotplates reach maximum temperature in just eight minutes! Available online.

Visit www.fishersci.com and search for Nuova Hotplates

hermo Scientific* Remote-Control Hotplates

rge and extra-large hotplates that can be controlled from outside fume hoods d other corrosive environments

atures

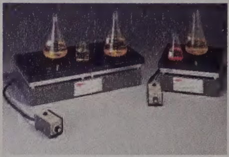
- laximum operating temperature: 371°C (700°F)
- emote control can be placed up to 5' (1.5m) from hotplate
- mbedded heating elements provide excellent temperature uniformity cross top-plate surface
- n-power light
- eramic-coated stainless-steel top plate is tough, durable and hemical-resistant
- tainless-steel hotplate housing case provides maximum corrosion esistance and strength
- emote control unit housed in baked enamel steel case
- ine cord from hotplate to control protected by chemical-resistant cover

Large models

- 12L × 12W × 6⅛"H (31 × 31 × 15.5cm)
- Top plate: 12L × 12"W (31 × 31cm)

Extra-large models

- 12L × 24W × 6⅛"H (31 × 61 × 15.5cm)
- Top plate: 12L × 24"H (31 × 61cm)



11-496-66Q, 11-496-6EQ

INCLUDES:
Each model comes with 5' (1.5m), 3-wire cord and plug

WARRANTY:
Two years

Model	Electrical Requirements	Cat. No.	Each
Large	120V 50/60Hz	**11-496-66Q**	1042.00
Large	240V 50/60Hz	**11-496-65Q**	1052.00
Extra-large	240V 50/60Hz	**11-496-6EQ**	1354.00

hermo Scientific* Extra-Capacity Hotplates

rge and extra-large hotplates for any constant temperature application where even at to 371°C (700°F) is required

atures

- emand-type thermostat provides temperature stability within ±3°C 5.4°F) at 100°C (212°F)
- tepless temperature selection easily reproduced
- luminum top-plate, reflective baffles, and thick insulation provide fast eatup and excellent temperature uniformity (±4.0°C at 100°C)
- mbedded heating elements
- erforated stainless-steel case
- ccommodates up to 40 lb (18.2kg) loads

Lge Model

- imensions: 13L × 12W × 6"H 3 × 31 × 16cm)
- p plate: 12L × 12"W (31 × 31cm)
- hipping weight 20 lb. (9.1kg)
- ith 3-wire line cord and plug

Extra-large Model

- Dimensions: 13¾L × 24W × 6¼"H (35 × 61 × 16cm)
- Top plate: 12L × 24"W (31 × 61cm)
- Shipping weight 39 lb. (17.7kg)
- Without line cord and plug; must be connected through conduit system

11-496-5BQ
11-496-5AQ

HPA2245M	120V 50/60Hz, 26.6A, 3200w[1]	**11-496-5BQ**	1065.00
HPA2240M	240V 50/60Hz, 13.3A, 3200w	**11-496-6BQ**	1065.00

[1] *Requires special heavy-duty 120V supply line.*

WARNING
Recommended for use with glass vessels only.

ACCESSORIES

Replacement Heating Element

- Fits all Thermo Scientific* extra-capacity hotplates

Electrical Requirements	Cat. No.	Each
120/240V	**11-496-7**	139.82

IKA

A RCT Basic IKAMAG* Safety Control Magnetic Stirrer

fers medium-viscosity stirring power with advanced hating protection for unsupervised operation

Splied with PT 1000 temperature sensor.

erating and Safety Features

14-261-100

- tegrated temperature control
- recise temperature/speed setting via digital isplay—even when turned off
- djustable safety circuit for heating plate temperature
- igital readout of set safety temperatureand error codes
- ot-top indicator alerts against accidental burns
- igh magnetic adhesion
- ' 42 enclosed assembly for long service life
- ighly polished aluminum alloy heating plate for optimal heat transfer
- IN 12878 bushing for connecting a contact thermometer

LUDES:
P1000 temperature sensor

SPECIFICATIONS

Stirring Capacity	5 gal. (20L)
Speed Range	50 to 1200rpm
Speed Stability	5%
Heating Temperature Range	50 to 310°C
Adjustable Safety Circuit Range	50 to 360°C
Permissible Ambient Temperature	5 to 40°C
Permissible Relative Humidity	80%
Power Input	610w
Motor Input/Output	9.5w/3.5w
Heat Output	600w
Max. Stir Bar Length	3¼" (80mm)
Top Plate Dia.	5¾" (135mm)
Overall Dimensions (L × W × H)	10¾ × 6½ × 3¼" (27.5 × 16.5 × 8.5cm)
Net Weight	5½ lb. (2.5kg)
Electrical Requirements	115V 50/60Hz
Cat. No.	**14-261-100**
Each	716.50

IKA RCT Basic IKAMAG* Stirrer

Low-profile, heating magnetic stirrer

Available separately or in kit form with support rod hardware.

- For volumes up to 5 gal. (20L)
- Stirs to 1100rpm
- Heats from ambient to 300°C (572°F) with safety circuit fixed at 370°C (698°F)
- Top plate diameter: 5⅜" (13.5cm)
- Maximum load: 55 lb. (24.9kg)
- Enclosed assembly ensures long product life
- With connection for optional contact thermometer (Cat. No. 14-260-28, included in kit) according to DIN 12878 Cl. 2

14-259-202 Stirrer Kit

ORDERING INFORMATION:
Overall dimensions: 11L × 6⅜W × 3½"H (27.9 × 16 × 8.9cm).

INCLUDES:
Stirrer, Thermometer (14-260-28), Support Rod (14-259-79), Holding Rod (14-259-87) and Boss Head (14-259-88). Stand-alone unit or kit.

Description	Mfr. No.	Cat. No.	Each
Stirrer, 115V 50/60Hz	2581001	**14-260-37**	723.45
Stirrer Kit, 115V 50/60Hz	L004270	**14-259-202**	1258.95
Stirrer, 230V 50/60Hz	25810.00	**14-259-112**	726.60

IKA RET Control-Visc IKAMAG* Stirrer

Safety magnetic stirrer with heat, for stirring up to 5 gal. (20L) at speeds up to 1100rpm

Features fuzzy logic control and microprocessor technology for maximum accuracy. Available separately or in kit form with support rod hardware.

Operating Features

- Digital display shows all functions
- RS-232-C and analog interfaces
- Temperature of contents controlled by sensor (Cat. No. 14-260-27, order separately [included in kit version])
- Maximum load: 55 lb. (24.9kg)

Operating Modes

- Variable control—allows user to change setpoints during operation
- Memory control—automatically returns stirrer to last selected setpoint
- Safety mode—locks in setpoints to prevent accidental changes

Safety Features

- Smooth-start stirring prevents spraying
- Optical warning activates when heating plate is hot, even when heating function is switched off
- At start, unit automatically tests all safety elements
- Design protects internal components and ensures maximum product life

14-259-206 Stirrer Ki

ORDERING INFORMATION:
Overall dimensions: 11L × 6⅜W × 3½"H (27.9 × 16 × 8.9cm). Top plate diameter: 5⅜" (13.5cm); For 115V 50/60Hz.

INCLUDES:
Stirrer and Labworldsoft* 2.6 Windows*-based software (Allows user to control, regulate and document temperature, speed and viscosity trend parameters); kits add sensor and mounting hardware (see above). Kit includes stirrer, Labworldsoft 2.6, Temperature Sensor (14-260-27), Support Rod (14-259-79), Holding Rod (14-259-87) and Boss Head (14-259-88)

Description	Mfr. No.	Cat. No.	Each
Stirrer	2673101	**14-260-29**	1418.60
Stirrer Kit	L004330	**14-259-206**	1859.40

IKA RO Multiplate IKAMAG* Stirrers

Multiposition magnetic stirrers with powerful rotary field drive

- Choice of 5-, 10- and 15-position models
- Serial stirring place alignment (1, 2 or 3 rows of 5 places each)
- Stirrer spacing for all models: 3½" (9cm)
- Speed range: 0 to 1200rpm
- Operating temperature range: 5° to 40°C (41° to 104°F)
- Max. L × dia. of magnetic bar: 1³⁄₁₆ × ⁵⁄₁₆" (3.0 × 0.8cm)
- Stainless-steel surface cleans easily, protects against penetration of liquids

Stirring Capacities

- Five-position model: up to ½ gal. of liquid (1.9L), distributed over all stirrers
- 10-position model: 1⅛ gal. (4.2L)
- 15-position model: 1⅝ gal. (6.1L)

ORDERING INFORMATION:
For 115V 50/60Hz

KA RH-C Magnetic Stirring Hotplate

ecise digital control with superior stirring strength

- × 7" square ceramic top plate
- Digital display
- Stirring capacity: 10L
- Speed Range: 100 to 1500rpm

- Temperature Range: 50° to 500°C
- Temperature Accuracy: ±3°C
- Heating Power: 1000w
- Motor Rating Input/Output: 15w/1.5w

INCLUDES:
Unit and temperature probe

WARRANTY:
Two years

DERING INFORMATION:
hensions: 13L × 9W × 4"H (33 × 23 × 10cm); For 115V 50/60Hz

Cat. No.	Each
14-259-230	385.48

ACCESSORIES

IKA ETS-D6 Electronic Contact Thermometer

Three patented operating modes guarantee optimum adjustment to your working method

For use with all magnetic stirrers with contact thermometer bushing according to DIN 12878, Class 2 (i.e., IKA, Brinkmann/Heidolph* and Corning* with adapter AD-C1). Ensures perfect temperature control without overshooting the set temperature, even in the case of quick heating.

Features

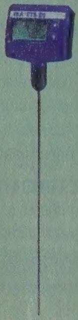
- Optimized PID control
- Reset function
- Stainless-steel sensor, H-62
- Integrated pH measuring instrument

Three Operating Modes

- A: Suitable for work with varying parameters (from -50° to 450°C); safety temperature adjustable
- B: Suitable for series operation under uniform conditions
- C: Suitable for unsupervised operation

Specifications

- Temperature range: -50° to +450°C
- Resolution: 0.01K
- Measuring accuracy: ±0.2K + tolerance PT1000 (DIN IEC 751 Class A)
- Heat control accuracy: ±0.1K
- Control accuracy with sensor: ±0.2K
- Immersion depth: 200mm
- W × D × H: 82 × 22 × 83mm (without sensor)
- Permissible ON time: 100%
- Permissible ambient temperature: 0-60°C
- Permissible relative moisture: 80%
- Protection class according to DIN EN 60529: IP 54
- Voltage: 8 - 16V



14-259-683

NOTE:
All values are taken from the memory. This ensures perfect protection against inadvertent improper adjustment.

Temperature	Cat. No.	Each
-50° to +450°C	**14-259-683**	376.71

CORNING

rning* Digital Hotplates and Stirring Hotplates

ramic-top benchtop units offer precise control with digital readouts for optimal heating and stirring

roprocessor controlled feedback technology maintains consistent eatable temperature and stir speed settings. Compact units have a small print and low profile to fit easily on a desktop or inside a hood.

erating Features

- eating Range: 5° to 550°C
- mple, easy-to-use controls
- gital temperature display is adjustable in 5° increments and indicates hen set temperature is reached
- ight LED icon for POWER and HOT TOP icon, which lights up when top ate is over 60°C
- parate temperature sensor provides power cutoff if unit overheats
- ass-ceramic Pyroceram* top cleans easily and resists scratches, rrosion, and chemicals
- pill-deflecting housing design
- uilt-in support rod mount for mperature probe

ring Hotplate Models

- ature separate temperature d speed displays
- irring Range: 60 to 1150rpm

ORDERING INFORMATION:
Accessories, including External Temperature Controller (07-250-143) and support rods, are available online. For stirring-only units, see Corning Digital Stirrers

INCLUDES:
Stirring Hotplate Kits include one each: stirring hotplate (see model for size), Temperature Controller 07-250-143, two 9" (22.9cm) Support Rods 07-250-144, and Stir Bar Retriever 14-972-50

REQUIRED ACCESSORIES:
Stir bars (stirring models only); sold separately

WARRANTY:
Two years

CERTIFICATIONS:

Fisher Scientific* Specific Gravity Hydrometers

Double scales can be read without turning hydrometer

- Measure true specific gravity of liquids.
- Meet or exceed ASTM* E 100 for accuracy, ASTM E 126 for calibration
- Chemical-resistant bulbs and stems
- Streamlined to avoid trapping air bubbles
- With directional device that stops the instrument with the scale facing the user for more convenient, more accurate readings

ORDERING INFORMATION:

A certificate of calibration is available; simply add the letter "C" to the end of the catalog number when ordering.

48° to 74°	0.5°	300mm	235mL	**11-585C**	54.57

Fisher Scientific* Alcohol Hydrometers

Used by distillers, law enforcement, and taxing agencies to measure the alcohol content of beverages

11-590

Calibrated on two scales: Tralle (0% by volume alcohol) and proof (2 × percentage of alcohol).

- Tralle scale, 0 to 100% graduated in 1% divisions
- Proof scale, 0 to 200 in 2-proof divisions
- Accuracy meets or exceeds ASTM* E 100 specifications
- Calibrated according to ASTM E 126 specifications
- Permanently marked with individual serial numbers
- Approximate liquid volume, 250mL

ORDERING INFORMATION:

A certificate of calibration is available; simply add the letter "C" to the end of the catalog number when ordering.

CERTIFICATIONS:

A certificate is provided to indicate traceability to standards provided by NIST*.

Cat. No.	Each
11-590	44.78

Fisher Scientific* Salimeters

Used to measure pickling and meat-packing brines

Saturated salt solution contains 26.4% by weight sodium chloride.

- Accuracy meets or exceeds ASTM* E 100 specifications
- Calibrated according to ASTM E 126 specifications
- Can be calibrated to read percentage saturation or percent salt at 60°F
- Permanently marked with individual serial numbers
- Approximate length, 305mm

ORDERING INFORMATION:
A certificate of calibration is available; simply add the letter "C" to the end of the catalog number when ordering.

CERTIFICATIONS:
A certificate is provided to indicate traceability to standards provided by NIST*.

Range	Division	Cat. No.	Each
0 to 100% Saturation	1%	**11-605**	38.23
0 to 26.4% Salt	0.5%	**11-606**	40.95

Fisher Scientific* Concentration Scale (ASTM* 152H) Soil Hydrometers

Use in soil particle size analysis

14-331-5C

For reading concentration directly when using ASTM* D 422 to determine particle size distribution.

- Accuracy meets or exceeds ASTM E 100 specifications
- Calibrated according to ASTM E 126 specifications
- Scaled from -5 to +60g/L in 1g/L divisions
- Permanently marked with individual serial numbers

CERTIFICATIONS:
Certificate of Accuracy and Compliance provided to indicate calibration against standards provided by NIST*.

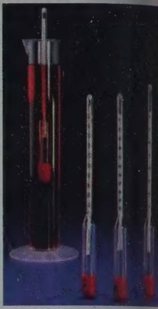
Cat. No.	Each
14-331-5C	49.55

Nalgene* Plain-Form Hydrometers

Safe, break-resistant alternatives to glass hydrometers

- Made from polycarbonate for glass-like clarity
- Available in three specific gravity ranges for fluids heavier than water
- Salt version also available for food, beverage and other testing
- Not autoclavable
- Use with Nalgene Polymethylpentene Cylinder (11-582-1) available separately

CERTIFICATIONS:
Individually calibrated to meet NIST* tolerances of accuracy.



11-603-6 hydrometers with 11-582-1 cylinder (available separately)

HYGROMETERS

Fisher Scientific* Traceable* Relative Humidity/Temperature Meters

Monitor air conditions in environmental chambers, chemical storage areas, cleanrooms, incubators and stockrooms

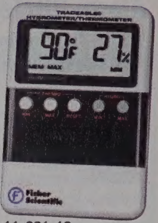
- Humidity range is 25 to 95% RH with an accuracy of ±2% (midrange) to ±4% (outside midrange)
- Continuously and simultaneously display relative humidity (11-661-11) or humidity/temperature (11-661-12) in extra-large, ⅝"-high (1.5cm) digits
- Made from high-impact, chemical-resistant ABS plastic

With Temperature Readout

- Temperature readout in °C or °F; ranges from 0° to 50°C (32° to 122°F) with ±1°C/°F accuracy
- Measures ¾L × 3¼W × 7"H (2 × 8 × 18cm)
- Net weight: 5 oz. (142g)
- Wall mount included

With Temperature Readout and Dual Min./Max. Memory

- Temperature readout in °C and °F; ranges from 0° to 50°C (32° to 122°F) with ±1°C/°F accuracy
- Minimum and maximum memories permit air monitoring overnight, during weekends, or for virtually any other time period
- Measures ⅝L × 2⅝W × 3⅞"H (2 × 7 × 10cm)
- Net weight: 2 oz. (57g)
- Wall mount and bench stand included



11-661-13

INCLUDES:
Two 1.5V batteries for one year of continuous service. Replacement batteries available on **www.fishersci.com**.

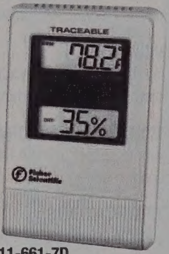
COMPLIANCE:
Cat. No. 11-661-13 meets federal requirements for CLIA Specification 493.1207 for monitoring temperature and humidity in clinical laboratories.

CERTIFICATIONS:
A certificate is provided to indicate instrument traceability to standards provided by the NIST*. Calibrated by an ISO 17025 calibration laboratory accredited by A2LA.

Description	Cat. No.	Each
Digital Humidity Meter Only	11-661-11	57.74
Digital Humidity/Temperature Meter		
Without Memory	11-661-12	61.31
With Temperature Readout and Dual Min./Max. Memory	11-661-13	65.20

Fisher Scientific* Traceable* Digital Hygrometer/Thermometer

Ideal for constantly monitoring labs, storage facilities, and plant areas



11-661-7D

Shows humidity and temperature readings at a glance on ½" (1.2cm) LED.

- Displays 25 to 95% RH with accuracy of ±2% at mid-range and ±4% at ends of range; resolution is 1% RH
- Displays temperatures from 0° to 50°C and 32° to 122°F with 0.1° resolution
- Temperature accuracy: ±1.0°C from 0° to 40°C (±2°C otherwise); ±1.8°F from 32° to 104°F (±3.6°F otherwise)
- Adjustment not necessary
- Hang on the wall or use included plastic stand
- Housed in rugged ABS case

ORDERING INFORMATION:
Measures ⅞L × 3½W × 5"H (2 × 9 × 13cm). Net weight: 6 oz. (170g).

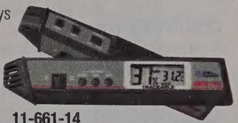
INCLUDES:
Plastic stand; "AA" battery for 1½ years of continuous operation

CERTIFICATIONS:
A certificate is provided to indicate instrument traceability to standards provided by the NIST*. Calibrated by an ISO 17025 calibration laboratory accredited by A2LA.

Cat. No.	Each
11-661-7D	68.05

Fisher Scientific* Traceable* Humidity/Temperature Pen with Memory

Ideal for monitoring RH in labs and plants



11-661-14

Continuously and simultaneously displays relative humidity and temperature (in Celsius and Fahrenheit) with dual-recall memories. Handy pocket clip makes it easy to carry.

- Relative humidity range: 25 to 98% with a resolution of 1% and an accuracy of ±3.5% (midrange) to ±5.5% (outside midrange)
- Temperature range: 0.0° to 50.0°C (32.0° to 122.0°F) with a resolution of 0.1° and an accuracy of ±1°C (±1.8°F)
- Memory displays highest and lowest readings achieved overnight or during any time period
- Display (¾" high) can be read at a glance, shows changes in less than 30 seconds, and is updated every second
- High-impact, chemical-resistant ABS plastic

ORDERING INFORMATION:
Measures ½L × 6⅝W × 1¼"H (1.2 × 17 × 3.2cm). Net weight: 1¾ oz. (50g).

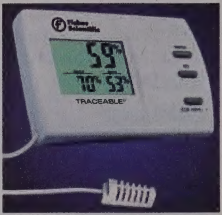
INCLUDES:
1.5V battery for continuous "always on" monitoring for one-half year

CERTIFICATIONS:
A certificate is provided to indicate instrument traceability to standards provided by the NIST*. Calibrated by an ISO 17025 calibration laboratory accredited by A2LA.

Cat. No.	Each
11-661-14	62.75

Fisher Scientific* Traceable* Remote Alarm RH/Temperature Monitor

Triple-display and remote control unit offers safety and convenience



14-649-84

For routine measurements, round-the-clock monitoring, quality control and critical experiments. Place sensor in hoods, cleanrooms, coolers, stockrooms, incubators, environmental chambers, and chemical storage areas.

- Temperature range: -50° to +70°C (-58.0° to +158.0°F) with 0.1° resolution and ±1°C accuracy
- Humidity range: 20 to 99% with 1% resolution and ±3% accuracy RH (midrange; otherwise ±5%)
- High-visibility ½" high digits simultaneously display High, Low and Current readings for temperature or humidity
- Minimum/maximum memory for temperature and humidity
- Alarm can be set in 1% RH and 1° increments; sounds when reading moves outside setpoints
- External sensor on 7' (2.13m) cable
- High-impact, chemical-resistant ABS plastic case

ORDERING INFORMATION:
Dimensions: 2¾L × 4¼W × ¾"H (7 × 10.8 × 1.9cm). Net weight: 4 oz. (113g).

INCLUDES:
Flip-open stand for benchtop; slot for wall mounting; external temperature/humidity sensor; "AAA" battery

CERTIFICATIONS:
A certificate is provided to indicate instrument traceability to standards provided by the NIST*. Calibrated by an ISO 17025 calibration laboratory accredited by A2LA.

Cat. No.	Each
14-649-84	61.20

Fisher Scientific* Traceable* Radio-Signal Hygrometer/Thermometer

Monitor humidity and temperature from up to 100' away—even outdoors

14-648-52 (right) with included remote sensor module (left)

Remote sensor displays current temperature and humidity; transmits readings over a range of 65 to 100' (20 to 30m)† to main unit. Jumbo display (1⅜" [3.5cm]) on main unit can be read up to 25' (7.6m) away.

- Temperature range: -20° to +60°C and -4° to +140°F, with 0.1° resolution and ±1°C (1.8°F)
- Relative humidity: 25 to 90% RH, with 1% resolution over entire range and accuracy of ±2% (mid-range), ±4% (ends of range)
- Readings are updated every 30 seconds
- Main unit can receive signals from up to three remote sensors on three user-selectable channels
- Trend indicators show rising or falling humidity and temperature
- Minimum and maximum memory display allows monitoring of conditions over a period of time
- An alarm can be set (in increments of 1% RH and 1°C/°F) to sound when humidity or temperature falls outside set parameters
- Manufactured from high-impact, chemical-resistant ABS plastic

ORDERING INFORMATION:
Main unit measures ¾L × 4¼W × 4½"H (2 × 11 × 11cm) and weighs 6 oz. (170g). Remote sensor module measures ¾L × 2⅓W × 3½"H (2 × 6 × 9cm) and weighs 3 oz. (85g). Operates continuously for eight months on two "AA" batteries and two "AAA" batteries.

INCLUDES:
One remote sensor module, flip-open stand, wall-mounting brackets, and Velcro* strips for attaching sensor to almost any surface, and batteries

REQUIRED ACCESSORIES:
Remote sensor unit (14-648-53); one included with meter; separate sensor required for each channel used

CERTIFICATIONS:
A certificate is provided to indicate instrument traceability to standards provided by the NIST*. Calibrated by an ISO 17025 calibration laboratory accredited by A2LA.

Cat. No.	Each
14-648-52	67.58

†*Depending on location.*

Remote Sensor Module

- Use with 14-648-52 to monitor humidity and temperature on additional channels
- Each channel requires separate remote sensor module

Cat. No.	Each
14-648-53	33.71

*Trademark. See Trademark Reference.

Fisher Scientific* Traceable* Jumbo Thermo-Humidity Meter

Fast-response, solid-state sensors show changes in relative humidity, ambient temperature, and (with probe) external temperature in under 30 seconds

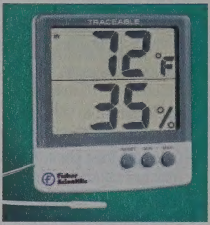
Display is updated once every second and shows temperatures in (user-settable) °F or °C. Jumbo (1⅛"H) display can be read from 35' (10.7m).

- Humidity range: 25 to 95% RH, with 1% resolution and ±2% (midrange) to ±4% (outside midrange) accuracy
- Ambient temperature range: -5° to +50°C (+23° to +122°F)
- External temperature probe (included) reads -50° to +70°C (-58° to +158°F)
- Resolution to 1° and accuracy ±1°C for both ambient and external temperature readings
- Dual-recall (minimum and maximum) memory can be displayed or cleared at the touch of a button
- Permits monitoring conditions overnight, weekends, or during any user-set time period
- External temperature sensor and cable perform accurately under water
- Unit is battery-operated, self-contained, stable, and accurate; requires no adjustment or maintenance

ORDERING INFORMATION:
Measures ¾L × 3⅞W × 4¼"H (2 × 9.8 × 10.8cm) and weighs 5.4 oz. (153g).

INCLUDES:
Chemical- and shock-resistant ABS plastic case, flip-open stand, wall mount, external temperature probe, 10' (3m) cable, and "AAA" alkaline battery

COMPLIANCE:
Meets federal requirements for CLIA specification 493.1207 for monitoring temperature and humidity



11-661-19 with supplied probe

CERTIFICATIONS:
A certificate is provided to indicate instrument traceability to standards provided by the NIST*. Calibrated by an ISO 17025 calibration laboratory accredited by A2LA.

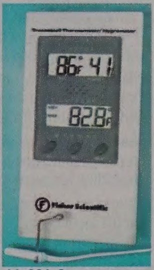
11-661-19	69.16

Fisher Scientific* Traceable* Temperature and Humidity Monitor

Constantly measures humidity and temperature



11-661-9

Read ambient temperature, probe temperature, and ambient relative humidity on bright LCD; digits are ½" high.

- External temperature sensor displays from -50° to +70°C and -58° to +158°F, with 0.1° resolution and ±1°C (±1.8°F) accuracy
- Internal sensor measures ambient temperature from 0° to 50°C and 32° to 122°F with 1° resolution
- Relative humidity range is 25 to 95%, with 1% resolution and ±2% (midrange) to ±4% (outside midrange) accuracy
- Low-battery indicator
- No ON/OFF switch
- Probe and cable can be submersed in water
- Rugged ABS plastic case

ORDERING INFORMATION:
Measures 5L × 3½W × ⅞"H (13 × 9 × 2cm). Probe cable length, 10' (3m).

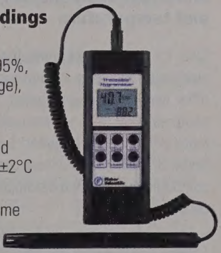
INCLUDES:
Two "AA" batteries, internal humidity sensor, external and internal temperature sensors and cable

CERTIFICATIONS:
A certificate is provided to indicate instrument traceability to standards provided by the NIST*. Calibrated by an ISO 17025 calibration laboratory accredited by A2LA.

Cat. No.	Each
11-661-9	105.21

Fisher Scientific* Traceable* Humidity Meter

Retains highest and lowest readings recorded over selected period



11-661-18

- Measures relative humidity from 10 to 95%, with 0.1% resolution and ±2% (mid-range), ±4% (ends of range) accuracy
- Reads temperatures from -18° to +93°C (0° to +199.9°F), with 0.1° resolution and accuracy of ±1°C (from 0° to 40°C) and ±2°C (at ends of range)
- Results appear on 1⅛" LCD; response time <10 seconds
- RS-232-C serial computer output
- Miniature probe
- Shockproof ABS plastic case

ORDERING INFORMATION:
Resistive-polymer probe measures 8½" (22cm). Case measures 7⅛L × 2¾W × 1¼"H (18 × 7 × 3cm). Net weight: 7.4 oz. (210g).

INCLUDES:
3' (0.9m) cable and 9V battery for 100 hours of continuous use

COMPLIANCE:
Meets Federal CLIA Requirement 493.1207

CERTIFICATIONS:
A certificate is provided to indicate instrument traceability to standards provided by the NIST*. Calibrated by an ISO 17025 calibration laboratory accredited by A2LA.

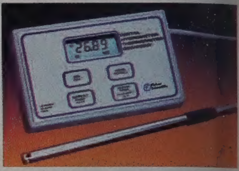
Cat. No.	Each
11-661-18	142.44

Fisher Scientific* Certified Traceable* Digital Hygrometer/Thermometers

Meet critical experimental requirements, perform routine measurements, and fulfill all quality control needs

Rugged handheld units are completely portable and designed specifically for lab, plant, and field use. Ideal for cleanrooms, hoods, environmental chambers, incubators, desiccators, and all inside/outside air monitoring.

- Temperature range: -40° to +104°C and -40° to +220°F, with ±0.4°C accuracy, 0.1°C resolution
- RH range: 10 to 95% (basic model), 5 to 95% (instant model); accuracy, ±1.5%; resolution, 0.01%
- Calculate frost point, latent heat, sensible heat, vapor pressure, moisture content, specific enthalpy, specific volume, specific humidity, mixing ratio, and vapor density from moist air
- Programmable high and low setpoints for temperature, humidity, and dew point sense out-of-specification condition, sound alarm, and flash display
- Built-in memory recalls highest and lowest readings; computer output capability† permits data to be captured, stored, and printed
- Instant model provides humidity readings in <10 seconds; basic model in up to 3½ minutes
- Bright, ½"-high, four-digit LCD is 10 times more readable than glass thermometer sling units or meter scales
- Microcomputer, solid-state construction eliminates glass breakage, mercury separation, and dial shock damage
- Tough ABS plastic cases ensure a long life—even in severe lab or harsh plant environments



11-661-7B

INCLUDES:

7" (18cm) combination probe, 54" (1.37m) cable, 9V alkaline battery (one year intermittent, 100 hour continuous), low-battery indicator, and ABS plastic carrying case.

CERTIFICATIONS:

A certificate is provided to indicate instrument traceability to standards provided by the National Institute of Standards and Technology (NIST*).

Description	Cat. No.	Each
Basic Model	**11-661-7A**	489.74
Instant Model	**11-661-7B**	589.23

† Computer output capability requires accessory data cable, available separately. Contact your Fisher Scientific Customer Service Representative for details.

Fisher Scientific* Traceable* Temperature/Humidity Meter

Simultaneously displays humidity, dew point and temperature

Ideal for use in cleanrooms, food-processing facilities, laboratories, and other humidity-sensitive areas. Datalogger captures 1000 readings manually or automatically when set between 1 and 3600 sec. Serial RS-232 output allows connection to a computer to download datalogger results for constant monitoring.

TRACEABLE
39.6

11-661-21

- Temperature range, 0° to 50°C (32° to 122°F), with 0.01° resolution, ±1°C accuracy
- Relative humidity range, 10 to 95% RH, with 0.1% resolution, 3% accuracy
- Memory recalls maximum, minimum, and average readings
- HOLD button freezes display for later reading
- Large display (1⅜"H) shows temperature and humidity simultaneously

ORDERING INFORMATION:

Measures 1¼L × 3W × 7"H (3.2 × 7.6 × 17.8cm); weighs 9.5 oz. (269g).

INCLUDES:

⅔ dia. × 8"L (1.7 × 20.3cm) probe, 40" (101.6cm) cable, and 9V alkaline battery.

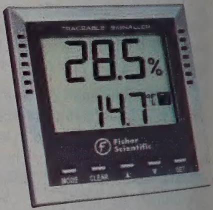
CERTIFICATIONS:

A certificate is provided to indicate instrument traceability to standards provided by the National Institute of Standards and Technology (NIST*). Calibration is performed in an ISO 17025 calibration laboratory certified by A2LA.

Cat. No.	Each
11-661-21	323.28

Fisher Scientific* Traceable* Dew-Point/ Wet-Bulb/Humidity Thermometer

Monitor shows current, minimum, and maximum displays



15-077-963

- Temperature range, -40° to +70°C (-40° to +158°F), with ±1°C accuracy and 0.1° resolution (below 100)
- Relative humidity range, 1 to 99%; accuracy, ±4% between 20 to 80% RH ; resolution, 0.1% RH
- Settable high/low alarm for all four readings (dew-point, wet-bulb, humidity, temperature)
- Alarm sounds and flashes; may be set in 0.1 increments
- Large LCD digits are 1" (2.5cm) high
- Case is high-impact, chemical-resistant ABS plastic

ORDERING INFORMATION:

Dimensions: 4⅛ × 4⅛ × 1" (10.5 × 10.5 × 2.5cm); weight: 4¼ oz.

INCLUDES:

Two "AA" alkaline batteries for continuous, one-year "always on" monitoring

COMPLIANCE:

Meets federal requirements for CLIA specification 493.1207 for monitoring temperature and humidity.

CERTIFICATIONS:

A certificate is provided to indicate instrument traceability to standards provided by the National Institute of Standards and Technology (NIST*). Calibrated by an ISO 17025 calibration laboratory accredited by A2LA.

Cat. No.	Each
15-077-963	52.43

Fisher Scientific* Traceable* Digital Humidity/Temperature Meter

Ideal for years of reliable service, even in severe lab or harsh plant environments

- Displays relative humidity from 10.0 to 95.0% with resolution of 0.1% and accuracy of 1.5%
- Temperature range: -40.0° to +104.4°C (-40.0° to +220.0°F) with resolution of 0.1° and accuracy of ±0.4°C
- Dew point range: -40.0° to +60.0°C (-40.0° to +140.0°F)
- Response time is from 30 seconds to 3½ minutes
- Reading is updated twice per second
- HOLD switch allows the display to be "frozen" to capture and record readings
- Extra-large LCD is ½" high and can be read from 10' (3m)
- Made from chemical- and shock-resistant ABS plastic and has a handy ABS carrying case

11-661-16

ORDERING INFORMATION:

Unit measures 1¼L × 5½W × 3½"H (3 × 14 × 9cm). Probe measures 1¹⁄₁₆ dia. × 7"L (1.8 × 18cm). Cable length: 54" (137cm). Net weight: 12 oz. (340g).

INCLUDES:

Precision, thin-film capacitance sensor, 9V alkaline battery, and instructions

CERTIFICATIONS:

A certificate is provided to indicate instrument traceability to standards provided by the National Institute of Standards and Technology (NIST*). Calibrated by an ISO 17025 calibration laboratory accredited by A2LA

Cat. No.	Each
11-661-16	344.68

Fisher Scientific* Traceable* Printing Hygrometer/Thermometer

Provides permanent hard copy results

Ideal for use in hoods, clean-rooms, food storage areas, drug manufacturing, all air analyses, and environmental chambers. Reliable unit monitors relative humidity and temperature in the lab, plant, and field. Printer provides hard copy for today's stringent QC documentation.

11-661-17A

- Automatically prints current humidity/temperature, temperature 2, dew point, date and time at any programmed interval or at the press of a button
- Printer can be programmed to automatically and repeatedly print any increment from 6 seconds to 59 minutes, 59 seconds
- Answers in less than 10 seconds
- Time displayed in 24-hr. military time to the minute
- Tough ABS plastic case is chemical- and shock-resistant

Relative Humidity

- Range: 10 to 95% RH
- Resolution of 0.1%
- Accuracy: ±2% to 5% RH elsewhere

T1 Temperature

- Range: -20° to +60°C (-4° to +140°F)
- Resolution of 0.1°
- Accuracy: ±1°C (±1.8°F)

T2 Temperature

- Range: -200° to +1333°C (-328° to 2431°F)
- Accuracy: ±0.2% of the reading plus 1.8°C
- Resolution: 0.1°C (from -200° to +999°C), 0.1°F (-328° to +999.9°F), otherwise 1.0°

ORDERING INFORMATION:

Measures 7½ × 3 × 1½" (19.1 × 7.6 × 3.8cm). Humidity probe, ¾" dia. × 6¼"L. Weight, 10 oz. Accessory adapter for continuous AC operation available (11-661-17C, order separately).

INCLUDES:

Humidity/T1 and T2 probes and cables, probe holder, paper, carrying case, and six "AAA" batteries.

COMPLIANCE:

Meets federal requirements for CLIA specifications.

CERTIFICATIONS:

A certificate is provided to indicate instrument traceability to standards provided by the National Institute of Standards and Technology (NIST*). Calibrated by an ISO 17025 calibration laboratory accredited by A2LA.

Description	Cat. No.	Price
Printing Hygrometer/Thermometer	11-661-17A	Ea./541.61
Printing Paper (rolls)	11-661-17B	Pk. of 6/32.57
AC Adapter	11-661-17C	Ea./34.39

Fisher Scientific* Certified Traceable* Digital Hygrometer/Thermometer

Ideal for cleanrooms, hoods, process control, and air monitoring

Completely portable, rugged, handheld, digital hygrometer and thermometer is designed for years of severe lab, field, or plant use.

- Measures relative humidity from 5.0 to 95.0%, with ±1.5% accuracy, 0.01% resolution
- Temperature range: 32.0° to 122.0°F, with ±0.4°F accurracy and resolution of 0.01°
- Simple to use: just set the selector switch, point, and read the ½" LCD
- No warmup, wicks, or swinging required
- Responds in as little as 30 seconds

11-661-8

ORDERING INFORMATION:

Measures 1½L × 2¾W × 8"H (4 × 7 × 20cm).
Net weight: 8 oz. (227g).

INCLUDES:

Integral humidity and temperature sensors, rugged ABS case, and one 9V alkaline battery for 6 months of intermittent use (about 100 hours continuous use).

CERTIFICATIONS:

A certificate is provided to indicate instrument traceability to standards provided by the National Institute of Standards and Technology (NIST*). Calibrated by an ISO 17025 calibration laboratory accredited by A2LA.

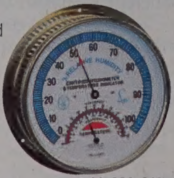
Cat. No.	Each
11-661-8	268.99

Fisher Scientific* Certified Dial Hygrometer/Thermometer

No calculations necessary; read temperature and relative humidity directly

Easy-to-read color-coded 5" (12.7cm) dial housed in a 6" (15.2cm) solid brass case.

- RH range of 0 to 100% with ±3% accuracy across the full range and 1% resolution
- RH displays with blue dial, red pointer, black numerals
- Temperature range of -20° to +100°C (-4° to +212°F) with ±1% accuracy across the full range and 1°C (1.8°F) resolution
- Temperature displays with red dial, blue pointer, black numerals



11-603-315

WARRANTY:
Five years

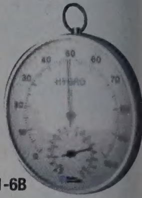
Cat. No.	Each
11-603-315	219.10

Fisher Scientific* Dial Hygrometer/ Thermometer

Ideal for use in labs, plant areas, and storage facilities

Unit is self-contained, stable and accurate without adjustment or maintenance.

- Relative humidity range: 0 to 100%, with ±2.5% accuracy at 50% RH, 1% resolution
- Temperature range: -40° to +50°C (-40° to +122°F) with ±1.5°C accuracy, 1°C/°F resolution
- Large analog display



11-661-6B

ORDERING INFORMATION:
Measures 6" dia. (15.2cm). Net weight: 8 oz. (227g).

INCLUDES:
Screw for wall mounting.

Cat. No.	Each
11-661-6B	70.14

Bacharach* Sling Psychrometer

No need to use tables or make calculations with this sling psychrometer

Thermometer holder telescopes into swivel handle, which has slide rule that lets you read relative humidity from wet-and dry-bulb temperatures.

- Built-in slide rule has wet-bulb and dry-bulb scales of 30° to 70°F and 50° to 110°F, and RH scale of 10 to 100%
- Matched 25° to 120°F mercury thermometers with 1°F scale division are mounted together in strong plastic frame with built-in water reservoir to keep wick wet
- Thermometers have magnifying front, deeply etched numerals, and thin bulbs for fast thermal response

11-664

ORDERING INFORMATION:
Instrument is 1 dia. × 7½"L (2.5 × 19cm); fits nicely in pocket. Replacemen wicks (11-664-4) and mercury thermometer (11-664-2) available separately at our Web site.

Fill Solution	Mfr. No.	Contains Mercury	Cat. No.	Eac

ICE/INSULATED CONTAINERS

AEROSOL COOLANT

*Fisherbrand** Super Friendly Freeze'It*

Aerosol for cooling liquid, semisolid, and solid samples

- Rapidly cools any material without CFCs or HCFCs
- Concentrates freezing power exactly where needed
- Capable of dropping sample temperature from room temperature to -60°F in three seconds

Fisherbrand
SUPER
FRIENDLY
FREEZE'IT
23-022-524

- Triple-filtered gas prevents sample contamination and enhances cooling ability
- Deters the water crystal formation that occurs with slower refrigerants

INCLUDES:
11 oz. (312g) of noncorrosive, nonflammable, odorless, completely volatile gas; 5" (12.7cm) polyethylene "snorkel"

Size	Cat. No.	Case of 6
11 oz. (312g)	**23-022-524**	124.05

Prices subject to change.

ICE BUCKETS AND PANS

*Fisherbrand** Polyurethane Ice Buckets

or use with liquid nitrogen, dry ice, water ice, and alt solutions

02-591-44, -45, -46

- Rigid polyurethane skinned-foam construction provides high durability and excellent insulating properties; buckets will not sweat or leak, and are unbreakable with normal use
- Resistant to acetone and easy to clean—can be chemically disinfected
- Withstand temperatures up to 95°C (203°F)
- Octagonal design will not deform; stable when full
- Molded handles enable safe handling and transport
- Flush lid with recessed handle allows stacking for convenient storage
- Internal dimensions: base diameter, 6" (15.5cm); rim diameter, 9⅝" (24.5cm); depth, 6" (15.5cm)
- External dimensions: base diameter, 7¼" (18.5cm); rim diameter (maximum, with handles), 12¾" (32.5cm); height, 7¼" (18.5cm).

apacity	Color	Cat. No.	Each

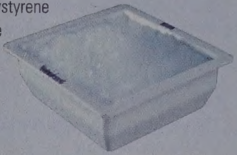
.5L	Blue	**02-591-45**	71.50
.5L	Red	**02-591-46**	71.50

*Fisherbrand** Cooling Systems

Hold temperature-sensitive microbiological samples in a bed of ice or dry ice



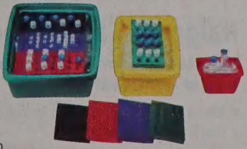
03-692 Series

- Low-profile, high-impact, white polystyrene
- Maintain storage temperature while working at lab bench
- Double-insulated tray wall is filled with expanded polystyrene
- Chemical resistant
- Easy to clean
- **Mini** tray accepts a single acrylic microcentrifuge tube rack
- **Midi** tray accommodates up to two tube racks
- **Maxi** tray will handle up to four tube racks

Description	Capacity	Exterior L × W × H	Cat. No.	Each
Mini tray	1L (1.1 qt.)	9⅝ × 6½ × 3⅛" (24.4 × 16.5 × 8cm)	**03-692-160**	190.00
Midi tray	1.6L (1.56 qt.)	10 × 9⅜ × 3⅛" (25.3 × 24 × 8cm)	**03-692-161**	286.00
Maxi tray	3L (3.2 qt.)	16¾ × 10 × 3⅛" (42.4 × 25.3 × 8cm)	**03-692-162**	364.00

agic Touch Icewares Insulated Lab Pans

r use with ice, dry ice, dry-ice alcohol slurry, and uid nitrogen



11-675 Series (rectangular test tube racks sold separately)

- xpanded polyvinyl chloride; nbreakable under normal conditions
- Vill not absorb odors
- hemically resistant to highly acidic nd basic solutions
- Vithstand temperatures from -196° to 93°C (-321° to +200°F) without weating or leaking
- arge enough to accommodate test tube racks, flasks, bottles, etc.
- tackable
- Vall thickness: ¾" (2cm)

Magic Touch Icewares Ice Buckets

For use with liquid nitrogen, salt, ice, dry ice, and dry-ice alcohol slurry

11-676 Series Buckets; 11-675 Series Racks

- Unbreakable, expanded PVC bucket with lid
- Leak resistant
- Inert to moisture, odors, acidic, and basic solutions
- Excellent insulator for both hot and cold materials
- Resistant to temperatures from -196° to +93°C (-321° to +200°F)
- Lid can easily be cut to make openings for thermometer, culture tubes, flasks, or inlet/outlet cooling coils

REQUIRED ACCESSORIES:

Round test tube racks (see next page)

Magic Touch Icewares Insulated Lab Pans, Contd.

ACCESSORIES

Round Test Tube Racks for Magic Touch Ice Buckets

Float in water baths, melted ice, dry-ice alcohol slurry, or liquid nitrogen

- Expanded PVC round test tube racks contoured to fit inside 2.5 and 4L ice buckets
- Diameter, 8 11/16" (22cm)

Thin Round Test Tube Racks

- Thickness, ⅜" (1cm)
- Hold up to 44 × 1.5mL microcentrifuge tubes

Thick Round Test Tube Racks

- Thickness, ⅝" (1.7cm)
- Hold up to 30 × 15mL conical or 30 × 14mL Falcon* tubes

LABTOP COOLERS

Fisher BioReagents* Cool Pak* Portable Cooler

Designed for microtube storage to -20°C (-4°F)

- Ideal for transporting temperature-sensitive samples or keeping dNTPs, primers, *Taq*, and restriction enzymes on the bench while setting up reactions
- Holds up to 12-1.5/2.0mL tubes
- Maintains temperature below 5°F (-15°C) for four hours when cover is tightly closed
- Lightweight
- Small footprint takes a minimal amount of freezer space

BP360915

Description	Cat. No.	Each
Cool Pak Portable Cooler	**BP360915**	85.00

Nalgene* Labtop Coolers, 0°C

Maintain enzymes and other solutions below 1°C (33.8°F)

15-350-53, 15-350-63

- Made of polycarbonate for break and crack resistance
- Stackable
- Lids are gridded for easy sample identification
- Rubber feet to prevent sliding
- Hold cryogenic vials
- Nonfilled clear lids except 15-350-54 which has white gel-filled lid
- Provide up to five hours of use except 15-350-53 which provides 3½ hours of use
- 15-350-63 accommodates 12 to 13mm dia. cryogenic vials; 15-350-64 holds 16 to 17mm dia. cryogenic vials

INCLUDES:

Sixteen inserts to convert holes to accept 0.2 to 0.5mL microcentrifuge tubes

L × W × H	No. of Tubes Held	Mfr. No.	Cat. No.	Each
6 3/16 × 9 9/16 × 5¾" (157 × 243 × 146mm)	32	DS5116-0032	**15-350-54**	220.32

Nalgene* Labtop Coolers, -20°C

Maintain enzymes and other solutions below -15°C (+5°F)

15-350-51

- Made of polycarbonate for break and crack resistance
- Stackable
- Lids are gridded for easy sample identification
- Rubber feet to prevent sliding
- Hold cryogenic vials and 0.2 to 2.0mL microcentrifuge tubes
- Usable to -135°C (-211°F)
- Cooler 15-350-51 has white gel-filled lid and provides two hours of use
- Cooler 15-350-61 has clear lid and provides one hour of use

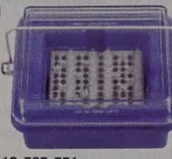
INCLUDES:

Adapters to convert holes to fit 0.2 or 0.5mL microcentrifuge tubes

L × W × H	No. of Tubes Held	Mfr. No.	Cat. No.	Each
6 3/16 × 9 9/16 × 5¾" (157 × 243 × 146mm)	32	5115-0032	**15-350-51**	160.25
4¼ × 5 15/16 × 4 15/16" (108 × 151 × 125mm)	12	5115-0012	**15-350-61**	86.75

lunc* Amplification Labtop Cooler

laintains freezer temperature on lab bench to rotect PCR and biochemical reagents



12-565-551

- Temperature is maintained between -20° and -15°C (-4° and +5°F) for two hours
- Aluminum block holds 1 to 96 Nunc 0.2mL tubes or a Nunc 96-well amplification plate
- Uses tubes individually or in 1 × 8 tube strips with matching strip caps
- Compatible with NucleoLink* and TopYield* Strips and accommodates Nunc Tube Tray
- Clear, keyed lid for proper tube orientation
- Stackable and constructed of durable polycarbonate

lfr. No.	Cat. No.	Each
55500	**12-565-551**	161.10

Nunc* -20°C Labtop Cooler

Designed specifically to protect enzymes, reagents, cells and solutions against extreme temperature fluctuations

09-740-72; vials not included.

- Maintains temperatures between -20° and -15°C (-4° to +5°F) up to four hours
- Break-resistant polycarbonate construction holds twenty 1.0 to 1.8mL microcentrifuge tubes or Nunc CryoTube* vials
- Inserts allow cooler to accept 0.2 to 0.5mL microcentrifuge tubes
- Locking handle provides safe and easy transport
- Stackable

Mfr. No.	Cat. No.	Each
355501	**09-740-72**	103.89

ppendorf* IsoTherm Systems

rotect temperature-sensitive biochemical and icrobiological samples while working at the lab bench

05-405-10

oSafe Transport Box

- Insulated
- Cover prevents frost formation on samples
- Maintains constant temperature

oPacks

- White IsoPack cold pack maintains 0°C (32°F) for over six hours
- Blue IsoPack maintains -21°C (+6°F) for up to three hours

oRack

- Holds 24 microcentrifuge tubes
- Each position is numbered for easy tube identification
- Autoclavable
- UV resistant
- Can be stored in temperatures to -200°C (-328°F)
- With lid attached, IsoRack floats in a water bath for thawing or incubating samples
- Can be used right from the freezer
- Fits 96-well rotors for centrifugation

ICLUDES:

tarter Sets include:

oSafe Transport Box, 0°C IsoPack, -21°C IsoPack, IsoRack for either 5mL tubes or 2.0 and 1.5mL tubes. Also available with just the IsoPack id IsoRack for samples that don't require the extended cooling time of e complete system.

Scienceware* Cryo-Safe* Cold Box

Maintains the low temperature required for safely storing and transporting enzymes and other critical samples

14-512-63

- Insulating gel keeps samples cold on the bench
- Holds twelve 1.5mL microcentrifuge tubes
- Chill unit in a -20°C (-4°F) freezer
- Maintains -15°C (+5°F) temperature for 1.5 hours
- Remains below 0°C (32°F) for four hours
- Weighs less than 1 lb. (0.45kg)

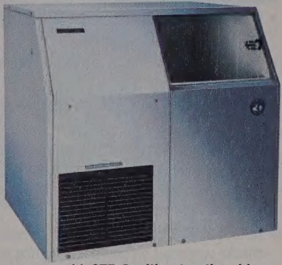
ICE MAKERS

oshizaki* Floor Model Ice Makers and Dispensers

movable, cleanable air filters for efficient operation and dependable performance



11-675-6 without optional legs.

- asy-to-clean stainless-steel exteriors
- lace directly on floor
- ircuit breaker protects gear motor from overload
- ermetically sealed motor runs for one minute after ice-making ends to clear ice from evaporator
- tainless-steel exterior and evaporator

odels F300BAF and 00BAF

- elf-contained units
- tore 110 lb. or 250 lb. of ice
- roduce up to 303 lb. or 478 lb. f fresh flaked ice or cubes very 24 hours

Model F450MAH/B300PF

- Two-part unit includes ice maker F450MAH and bin B300PF
- Store up to 300 lb. of ice
- Produce up to 476 lb. of cubelets or flaked ice within 24 hours

WARRANTY:
Two years parts and labor; five years on compressor

Scotsman* Modular Flaked Ice Maker and Storage Bin

NEW

Produces up to 550 lb. of flaked ice per day; bin holds up to 374 lb.

Dependable Ice Maker performs under most any conditions

- Continuous ice-making process—no harvest time delays
- Up to 66% more energy efficient than cube models
- Delivers steady flow of ice for fast recovery of ice supply
- Only one moving part under refrigeration
- Patented double-flight auger evenly distributes the load while heavy-duty direct-drive gearbox provides high reliability and long life
- AutoSentry* Monitoring System constantly checks workload on gearbox, shutting down system before a problem develops
- Freezing chamber clearing delay permits drive motor to start with no load
- Electric conductivity water sensor eliminates low- or no-water failures and cannot be affected by adverse water conditions
- Use multiple units side-by-side
- Stainless-steel construction
- Manufactured in a ISO9001:2000 approved facility

Big storage bin for ample ice reserve

- Holds 374 lb.
- NSF approved construction
- Attractive stainless steel finish
- Polyethylene liner

Scotsman* Floor Model Flake Ice Makers

Self-contained units that produce and store fresh-flaked ice

- Fit under most 40" counters
- Set directly on floor or mount on adjustable 6" legs
- Front ventilation
- Can be serviced completely from the front

36" Wide Stainless-Steel Model

- Sanitary polyethylene bin
- Heavy-duty flaker mechanism with stainless-steel auger
- Low-refrigerant safety switch
- Max. 24-hour production, up to 324 lb.
- Stores up to 140 lb.

24¼" Wide Rotocast Plastic Model

- Durable three-piece gray cabinet is completely removable from the front of the machine and won't rust
- Includes 7' power cord
- Max. 24-hour production, up to 395 lb.
- Stores up to 80 lb.

ceAssure* Water Filtration System

esigned to reduce issues associated with sediment, hlorine taste and odor, and scale buildup in :e cubers and flakers

NEW

- Premium activated carbon reduces corrosion and the chlorine smell commonly found in the ice bin
- Built-in, time-released scale inhibitor reduces the ability of calcium and magnesium to precipitate on the evaporator plates as hard scale
- The filtration media reduces sediment particles that can clog solenoid valves and distribution tubes
- Valve-in-head design simultaneously shuts off and vents water with a quarter turn for simple cartridge changes
- Cartridges are sanitary—no contact is made with the filter media during cartridge changes
- Pressure guage allows filter pressure to be monitored and indicates when cartridges are reaching the end of their service life
- FDA CFR-21 and/or NSF compliant materials make this product suitable for potable applications

IOTE:

ot recommended for high-turbidity water.

lodel	IA1-1

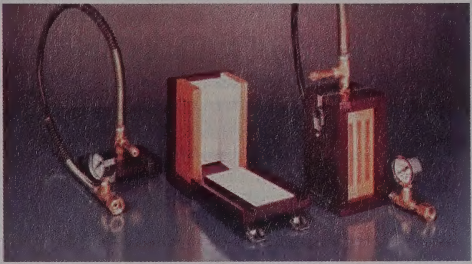
ThermoSafe* Dry Ice Machines

Solid, commercial-grade dry ice blocks in 60 seconds



11-675-56, shown open and closed.

- Connect machine hose to liquid CO_2 cylinder with a built-in siphon
- Vapor flows through vertical filter slots as dry-ice block forms
- When vapor discharges from space between lid and body of machine, block is complete
- Machine opens by loosening latches and folding down sides
- Ideal for tissue preservation, specimen shipping, industrial processes, and metal fabrication
- Need no electrical source

INCLUDES:

Dry-ice block mold, feed hose, CO_2 supply regulator valve connected inline, fitted brass safety release valve for automatically venting excess gas pressure.

IMMUNOCHEMISTRY

ANTIBODY PURIFICATION

Millipore* Montage* Antibody Purification Kits with Prosep*-A and Prosep-G Media

Provide a centrifugal method for fast and easy purification of antibodies from serum, ascites, or cell culture supernatants

The Prosep family of media has a long history of success for large-scale bioprocessing applications including Prosep-A for industrial monoclonal antibody purification. Montage Kits deliver that same level of performance and reliability for research-scale antibody purification.

- Purify up to 10mL of sample in less than 60 minutes
- Yield up to 20mg of purified antibody
- Utilize Prosep high-capacity media, which offers rapid transport and a very high dynamic capacity for IgG

ORDERING INFORMATION:

Montage Spin Columns with Prosep media plugs are also available separately in packs of six. Each column can perform 10 purifications.

INCLUDES:

Two Media plugs, two spin columns, four centrifuge tubes, four Steriflip* Devices, four Amicon* Ultra Centrifugal Devices, Optimized buffers

STORAGE CONDITIONS:

Store media plugs at 2° to 8°C.

Thermo Scientific* Pierce* Imject* Maleimide Activated Carrier Protein Kits

Fast and easy Immunogens

Imject Maleimide Activated Carrier Proteins are commonly used carriers that have been preactivated with a heterobifunctional crosslinker (Sulfo-SMCC). This activation results in a stable, sulfhydryl-reactive carrier protein. This enables the maleimide-activated carrier protein to conjugate with cysteine residues on any peptide or protein, making a complete immunogen.

- No need to preactivate the carrier with Sulfo-SMCC
- Conjugation can be performed directly in the vial (because of EDTA in the buffer, gel filtration or dialysis must be performed prior to immunization)
- A hapten-carrier conjugate is formed in just two hours
- Results in a stable, covalent thio-ether linkage
- Purified proteins, activated with sulfhydryl-reactive maleimide groups
- Lyophilized in PBS, pH 7.2, containing EDTA

Imject Maleimide Activated BSA Kit

- Imject Maleimide Activated BSA (5 × 2mg)
- All Conjugation and Purification Buffers
- Prepacked Gel Filtration Columns (5 × 5mL)

Imject Maleimide Activated OVA Kit

- Imject Maleimide Activated OVA (5 × 2mg)
- Sp Conjugation and Purification Buffers
- Prepacked Gel Filtration Columns (5 × 5mL)

Imject Maleimide Activated mcKLH Kit

- Sufficient materials for five conjugation reactions
- Imject Maleimide Activated mcKLH (5 × 2mg)
- Imject Maleimide Conjugation Buffer (30mL)
- D-Salt Dextran Desalting Columns (5 × 5mL)
- Imject Purification Buffer Salts (5 × 5mL)

hermo Scientific* Pierce* Melon Gel Monoclonal IgG Purification Kit

st, simple protocol provides a gentle approach antibody recovery and purification

proprietary combination of ligands on the support depletes antibody-ntaining samples of most contaminant proteins while allowing IgG to w through in a highly purified form. Antibody retains activity because it is t exposed to denaturing conditions.

- Replaces tedious bind-and-release antibody isolation methods
- Delivers mAbs with quality and purity equal to or better than that btained using classical Protein A or Protein G purification methods, n half the time
- Recovers mAbs ready for downstream applications, including antibody nodification or conjugation
- Purifies monoclonal IgG from up to 1L of cell culture supernatant serum-containing and serum-free) and up to 200mL ascites fluid
- Effective for antibodies known not to bind to Protein A or G
- Support can be used for up to six purifications
- Amine-free buffer does not require removal or neutralization
- Accommodates a broad range of sample volumes
- Spin columns can be used for purifications <30mL of supernatant; filter flasks can be used for bulk processing of samples up to 1L
- Ascites: spin columns can be used for purifications up to 6mL

Cat. No.	Each

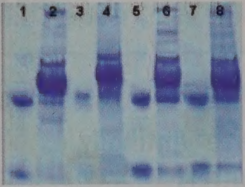
hermo Scientific* Pierce* Melon Gel IgG Purification Kits

ick and easy way to isolate IgG from serum

- ve time compared to classical Protein A or Protein G purifications without npromising the quality of the antibody.
- Simple, one-step protocol, antibodies are recovered ready-to-use without neutralizing or desalting
- Purifies antibodies from serum four to six times faster than Protein A or G methods, and antibodies retain more activity
- Antibodies from many species are recovered with greater than 90% yield and greater than 80% purity; works with a wide range of antibodies ncluding many that do not purify well on Protein A or Protein G
- The Melon Gel IgG Spin Purification Kit contains all necessary components (e.g., gel, ready-to-use purification buffer, spin columns and collection tubes) for rapid purification of up to 1mg of IgG from 100µL of Melon Gel
- The Melon Gel IgG Purification Kit contains the support, buffers and egenerant for larger scale IgG isolation applications
- This kit offers a wide range of flexibility in column volume and sample size requirements.



Purification of IgG from serum. Sera from several species were evaluated by electrophoretic separation of purification products (lanes 1, 3, 5, and 7) and eluted products (lanes 2, 4, 6, and 8) from human, goat, rabbit, and sheep serum, respectively.

- Melon Gel retains the component proteins typically found in serum and lets the IgG pass through. The resulting recovery and purity of the IgG isolated from serum rival that obtained from Protein A or Protein G

ANTIBODY LABELING

Thermo Scientific* Pierce* DyLight* Antibody Labeling Kits

For fast, efficient labeling and recovery of antibodies

Two convenient kit formats are available to accommodate varied labeling requirements. Antibody Labeling Kit contains sufficient reagents to label and purify 3 × 1mg of IgG or similar quantities of other proteins. Microscale kit contains sufficient reagents to label and purify 5 × 10µg of IgG.

- Label and purify antibodies in approximately one hour
- Amine-reactive dyes label virtually any protein
- Pre-measured fluorescent dye eliminates the time and waste associated with weighing dye
- High-performance spin desalting columns provide exceptional dye removal and antibody recovery

549 Antibody Labeling Kits

For fast, efficient labeling and recovery of antibodies

Antibody Labeling Kit includes:

- DyLight 549 NHS Ester, 3 vials
- Reaction buffer, 1mL
- Spin columns, 6 each
- Microcentrifuge collection tubes, 12 each
- Purification resin, 5mL

Microscale Kit includes:

- DyLight 549 NHS Ester, 5 vials
- Reaction buffer, 1mL
- Spin columns, 5 each
- Microcentrifuge collection tubes, 10 each
- Purification resin, 5mL

ıvitrogen* Qdot* Antibody Conjugation Kits

ɔr fast, easy conjugation of antibodies to Qdot anocrystals

- Utilize a well-known chemistry based on the fast and efficient coupling of thiols to maleimide groups
- For use with 300µg whole IgG molecule or $F(ab')_2$ derivative
- Use a procedure that can be completed in a few hours
- Produce antibody conjugates that can be used in immunohistochemistry, tissue staining, ELISA, Western blotting, flow cytometry, and other user-designed experiments
- May also be used to couple Qdot nanocrystals to other thiol-containing molecules such as proteins, thiolated oligonucleotides and peptides, and other small molecules

ICLUDES:

)0µL Qdot nanocrystals, 2 × 60µL SMCC stock solution, 50µL DTT stock lution, 1 vial dye-labeled marker for antibody elution, 50µL β-mercap-ethanol, 75mL exchange buffer, 8mL separation media, three columns for ıal purification, one syringe for final purification, Tubing for final purifica-ɔn, four desalting columns, four ultrafiltration devices, eight centrifuge tubes

Thermo Scientific* Pierce* Colorimetric ELISA Kits, Contd.

Mouse ELISA Kits

Test serum, plasma, and culture supernatant on the same plate using the same simple assay procedure

- All kits test serum and culture supernatant
- All kits except GM-CSF, TNFα, IFNα, IL-2, IL-4, IL-5, IL-10, and IL-12 (p70) test plasma; all kits except IFNγ and sICAM test sodium citrate plasma; all kits except sICAM test heparin plasma; and all kits except IFNγ test EDTA plasma

† Manufactured by PBL Biomedical Laboratories.

Thermo Scientific* Pierce* Human TNF-α Colorimetric ELISA Kit

Conserve samples using flexible, colorimetric ELISA

- Excellent sample recovery demonstrated for all sample types
- Test serum, plasma, and culture supernate on the same plate using a single standard curve and simple immunoassay procedure
- Small sample size generates more results and conserves precious samples
- Species: Human
- Analyte: TNF-α (tumor necrosis factor alpha)
- Format: 96-well strip plate
- Assay Range: 15.6 - 1000pg/mL
- Sensitivity: <2pg/mL
- Total Assay Time: 3 hours
- Sample Size: 50µL/well
- Sample Types: Serum; EDTA; Sodium Citrate and Heparin Plasma; Cell Culture Supernate

Description	Quantity	Cat. No.	Each
Colorimetric ELISA Kit	1 plates	**ENEH3TNFA2**	667.00
Human TNFα	2 plate	**ENEH3TNFA**	444.00
Human TNFα	5 plates	**ENEH3TNFA5**	1641.00

Thermo Scientific* Pierce* ELISA Standards

Ideal for generating standard curves in routine assays to ensure accurate and consistent results

- Calibrated to NIBSC/WHO, NIAID, NCI-BRB, or an internal reference standard when no international reference is available
- Lyophilized

Standard	Calibration	Cat. No.	Each
Human ELISA Standards			
GM-CSF	NIBSC reference lot 88/646	**ENSGMCSF**	100.50

HRP-BASED ASSAYS

romega* Emax* Immunoassay Systems

ptimized for the sensitive and specific detection of variety of neurotrophic and growth factors

-)etect picogram levels of factor per milliliter of sample using an ıntibody-sandwich format
- Jtilize a ready-to-use, single-component TMB substrate and horseradish peroxidase (HRP) conjugate formulations that provide increased stability and easier dilutions for final chromogenic detection
- Provide factor-specific detection with <3% cross-reactivity with other elated neurotrophic and growth factors, except TGFβ_2 which provides <5% cross-reactivity

CLUDES:

tibodies, HRP conjugate, Standard, Buffers, TMB solution

ORAGE CONDITIONS:

ɔre at -20°C for up to six months from the date of receipt before thawing

System	Sensitivity	Range of Standard	Size	Cat. No.	Each

INCUBATORS

CO_2

hermo Scientific* Napco* 8000 Series CO_2 Incubators

ater-Jacketed and Direct-Heat Models to cover a wide application range

ɔmplete Contamination Control

- Save time and money—protect your cultures from contamination
- Rapid HEPA filtration produces Class 100 air quality in under five minutes
- Coved corners throughout make for easy cleaning
- Shelves, supports and HEPA filter are easily removed without tools
- Intuitive Message Center user interface for quick and easy access to all functions
- Choice of T/C (thermal conductivity) or IR CO_2 sensors to match your requirements

ɜace of mind

- Made to highest standards of workmanship, thanks to many years of experience in manufacturing CO_2 incubators
- Unsurpassed service and technical support

odel Selection:

/ater-Jacketed (WJ) Models provide extra security

- Triple wall construction and large volume of water mean unsurpassed temperature stability and heat-loss protection
- Water-jacketed technology holds temperature for extended periods, critical during power failures, to ensure the safety of your cultures
- Fast temperature recovery keeps culture conditions very stable
- Heated, dual-pane glass inner door reduces heat loss and condensation

irect-Heat (DH) Models let you culture with confidence

- Safe, proven sterilization system ensures elimination of all microbial life inside chamber
- Automatic high-temperature decontamination cycle provides overnight sterilization and consistent sterilization time after time
- Light weight makes them easy to move to where you need them
- Advanced airflow and heating provide temperature uniformity and stability

RDERING INFORMATION:

lodels listed have 6.5 cu. ft. (184L) chamber volume, measure ɔL × 26H × 39-1/2W"H, operate on 115VAC.

Fisher Scientific* Isotemp* CO_2 incubators

Water-Jacketed and Direct Heat Models with T/C or IR sensors

Selection, high capacity, heavy-duty design

- Choice of Water-Jacketed (WJ) and Direct Heat (DH) technology
- Flexibility you can depend on for growing cells
- Select Thermal Conductivity (T/C) or Infrared (IR) sensors to serve your applications
- High-capacity 6.5 cu. ft. (184L) chamber
- Heavy-duty stainless-steel shelves support a full load of samples
- Precise temperature control and stability of all culture parameters

Peace of mind

- Provide stable temperature, humidity and CO_2 level for maximum cell growth
- Low and high CO_2 alarms, plus power interruption and temperature deviation alarms

Ease of Use

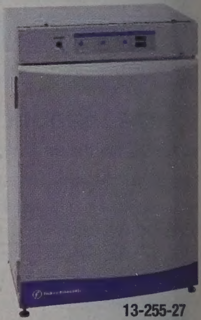
- Easy-to-clean polished stainless-steel interior with coved corners
- Shelves and supports are easily removed without tools
- Microbiological filters protect gas inlet and sample port
- Easy-to-use display and alarm settings

Water-Jacketed (WJ) Models surround cells with 12 gallons of 37°C water

- Triple wall construction and large water volume provide superb temperature stability and heat-loss protection
- Hold temperature for extended periods, critical during power failures
- Fast temperature recovery keeps culture conditions very stable
- Heated, dual-pane glass inner door reduces heat loss and condensation
- Interior door gasket is removable

Direct Heat (DH) Models let you culture with confidence

- Heating elements surround all sides of chamber wall
- Fiberglass insulation aids uniformity and fast recovery times
- Directed airflow keeps cells at optimum growth temperature
- Inner door gasket is removable
- Light weight makes them easy to move to where you need them



13-255-27

sher Scientific* Large-Capacity Dry-Wall CO_2 Incubators

ıoice of capacities, humidity system and decontamination, with capacities of 10 or 33 cu. ft.

- Programmable decontamination in 1- to 10-hour cycles
- aminar airflow ensures consistent circulation throughout chamber
- 'ush-button digital control with high/low temperature and CO_2 deviation alarms
- Set high/low temperature deviations from ±0.5° to ±5.0°C
- Nonvolatile memory and electronic security lockout effectively protect sample

ogrammable Decontamination

- Model 910 provides decontamination at 121°C, kills all vegetative bacteria and fungal spores; independent tests show that 99% of *B. stearothermophilus* spores are killed
- arge-volume Model 933 provides decontamination temperatures up to 90°C
- Models 910 and 933 offer programmable decontamination that can be set to run for 1- to 10-hour cycles
- Economy Model 810 and refrigerated Model 810R provide decontamination program of 10 hours at 90°C, which kills off vegetative bacteria

minar Airflow

- Ensures consistent circulation of heated, humidified air throughout chamber
- Temperature range: 35° to 60°C (10° to 60°C for refrigerated Model 810R) with 0.1°C resolution
- Chamber fan produces efficient mechanical convection for tight uniformity, rapid recovery of temperature, CO_2 and humidity; low airflow speed prevents culture desiccation
- CO_2 concentration can be set from 0 to 20%, within 0.1%

Humidity Generation[1]

- Steam generator allows RH control from 80 to 96% (±2%, 96% maximum achievable) for Model 910 and Model 933; no reservoir or water pan needed[2]
- Copper water pan in Economy Models 810 and 810R continuously provides saturated humidity to chamber; copper acts as bacterial growth inhibitor

Large Volume Model 933

- Provides up to 33 cu. ft. of culturing volume
- Inner temper glass doors preserve chamber conditions when outer door is opened

11-687-810

Refrigerated Model 810R

- Can be set as low as 10°C to provide low temperature, CO_2 enriched growth environments
- Uses CFC-free R-134A refrigerant

ORDERING INFORMATION:

All models feature stainless-steel interiors with four solid stainless-steel shelves and painted stainless-steel exteriors. All except Model 933 are stackable.

CERTIFICATIONS:

Models 910 and 933 are UL listed.

Steam generator requires deionized water with resistivity from 20K to 1megohm and a pH level above 6.5. For more information, contact your Fisher Scientific Customer Service Representative.

Models 910 and 933 require a gravity drainline or a condensate pump to eliminate possible accumulation of condensation on chamber floor. For more information, contact your Fisher Scientific Customer Service Representative.

Based on 20°C and 35% RH ambient.

Door open for 30 seconds at ambient temperature and humidity.

Maximum achievable RH is 96%.

This unit is suitable as an International Model.

SERVICE AGREEMENTS

Fisher Scientific offers several types of service agreements for the equipment featured here. For details on these agreements, equipment repairs and calibration services, see the Services section.

For immediate assistance, call 1-800-395-5442.

Fisher Scientific* Isotemp* CO_2 Incubator Microplate Stability Chamber

For use with Fisher Scientific Isotemp CO_2 Incubators

Reduces variations in cell-based assays by up to 50%.

Stability Chamber

- Uses incubator heat and atmosphere to create homogenous micro-environment
- High humidity within chamber eliminates evaporation from plates that creates uneven heating spots
- Thick aluminum shelf distributes heat evenly for temperature uniformity
- Includes fan

Stability Tray

- Fits inside stability chamber
- Anodized aluminum
- Capacity: six plates

INCLUDES:

Chamber and one stability tray

22-155-20

Description	Cat. No.	Each
Stability Chamber, 120V	22-155-20	720.00
Stability Chamber, 230V	22-155-21	772.00
Aluminum Tray	22-155-22	257.00

LOOKING FOR MICROPLATES?

DON'T SEE THE RIGHT PRODUCT?

Fisher Scientific* Isotemp* CO_2 Incubators are available in water-jacketed and direct heat models. See them on p. 978-979.

New Brunswick Scientific* Innova* CO-48 and CO-170 CO_2 Incubators

Exceptional design and performance

Choice of 1.7 cu. ft. (48L) or 6 cu. ft. (170L) capacities, with wide range of options and features.

- Six-sided direct convection heating eliminates ductwork and vibration, increases usable space, allows near-ambient operation
- Extra-large display and intuitive controls simplify operation
- Programmed with help text, real-time data graphing, programmable alarms and diagnostics
- Infrared (IR) CO_2 sensor provides superior accuracy and stability
- Ergonomically-positioned controls for convenient access on or under benchtop or when stacked

Extra convenience in operation

- 72-hour data storage of CO_2 concentration, temperature, alarms and door openings with on-screen display
- Optional RS-232 port and accessory software allows data download to PC
- User-programmable auto-zero function automatically adjusts IR sensor baseline for optimum accuracy and security; no need for manual measurements or operator intervention
- Built-in system diagnostics help identify operational status and expedite maintenance or service
- On-screen help guides operator through setup, programming and diagnostics
- Space-saving size and weight compared to jacketed designs; simplifies setup, maintenance and relocation
- Seamless, deep-drawn chamber
- Stainless wire rack shelf support allows easy shelf positioning and removal without tools
- Integrated viewing window in outer door allows sample viewing without disturbing chamber conditions

Dependability and safety

- Comprehensive two-level alarm system includes audio and on-screen alarms for system status, programmable alarms for CO_2 and temperature setpoints, delays, duration and more
- Password protection ensures setting integrity
- Overtemperature cutoff prevents overheating if controls fail
- Backup microprocessor verifies main processor operation
- Nonvolatile memory guarantees data integrity
- Alarm setpoints reset automatically to ±0.5°C and 0.5% above and below new temperature/CO_2 setpoints
- HEPA filter on CO_2 inlet protects against contamination

14-286-125

Innova CO-48: for customized cell growth

- Capacity of 1.7 cu. ft. (48L)
- Sophisticated control features in a compact design
- Measures $18\frac{11}{16}$L × $19\frac{1}{16}$W × $25\frac{3}{8}$"H (47.5 × 48.4 × 64.5cm)
- Net weight, 70.6 lb. (32kg)

Innova CO-170: for higher-volume cell-culturing

- Capacity of 6 cu. ft. (170L)
- Easy access to usable space in a convenient size
- Measures $25\frac{9}{16}$ × 27 × $33\frac{3}{8}$" (65 × 68.5 × 84.8cm)
- Net weight, 165.3 lb. (75kg)

ORDERING INFORMATION:

Useful options for both models increase versatility.

- High-temperature (HT) models simplify maintenance by decontaminating chamber, sensors and humidity pan at the touch of a button, using 120°C dry heat
- Three-gas control models provide crucial subambient oxygen control for studies requiring 1 to 19% oxygen levels
- Communications package allows three-way monitoring via RS-232 port (included with software), alarm relay contacts and access port
- Stacking Stands permit floor mounting of two stacked units; both kits include floor stand to raise bottom unit to convenient height; CO-48 kit includes stacking shelf to mount second CO-48 atop first (not required for CO-170 stacking)

hermo Scientific* Lab-Line* CO_2 Incubators

hoose from water- or air-jacketed designs, with automatic control systems

ecise temperature and CO_2 control in wide choice of pacities

- Ideal for clinical, pharmaceutical, biotechnology and general laboratory settings
- Precise microprocessor control of CO_2 and temperature
- Hydraulic-thermostat-controlled overtemperature protector maintains setpoint temperature if microprocessor fails
- Audible/visual alarms indicate temperature deviations of ±1°C or greater, CO_2 concentration deviations of 1% or greater, or when incubator door is open for more than five minutes
- CO_2 and fan shut off automatically when door is opened
- Easy-to-read LED display shows temperature and CO_2 levels
- Feature keypad programming and security password protection

Rugged and easy to clean

- Durable stainless-steel exteriors with a powder-coated finish
- Interior and shelves of corrosion-resistant, polished stainless steel
- Perforated shelves and shelf supports can be removed and reinstalled without tools for complete decontamination and easy cleaning
- Door gaskets are made of silicone

hermo Scientific* Lab-Line* Standard Air- and Water-Jacketed CO_2 Incubators

hoose from 6.2 or 12.4 cu. ft. capacities, single- or double-chamber models with automatic control system

- Feature exclusive Smartgas* system for fast recovery rates and accurate CO_2 control
- Temperature range: 5° above ambient to 60°C with T/C sensor; to 55°C with IR sensor
- ±0.1°C control; ±0.25°C uniformity
- CO_2 concentration: 0 to 20%; ±0.1% control
- Humidity range: above ambient to 98%
- Air-Jacketed T/C-sensor models feature decontamination cycle—set temperature to 100°C for 12 hours
- Temperature-adjustable heated outer door has separate control, is insulated with fiberglass and keeps tempered-glass inner door free of condensation
- Interior has rounded corners for easy cleaning

RDERING INFORMATION:

ouble-chamber models come with independent control systems. Options nclude HEPA filter and CO_2 autochange, which switches automatically from mpty to full tanks. Factory-installed RH display option is available for Air-Jacketed IR Model 11-688-21 and for all Water-Jacketed models; contact your Fisher Scientific Customer Service Representative for details.

INCLUDES:

Five adjustable nontip shelves; built-in RS-232-C port for output of temperature and CO_2 data

Thermo Scientific* Lab-Line* Compact Air-Jacketed Automatic CO_2 Incubator

Compact size saves valuable lab space

11-688-42

Exclusive Smartgas* system provides fast recovery rates and accurate CO_2 control.

- Temperature range: 5° above ambient to 60°C; ±0.1°C control and ±0.25°C uniformity
- CO_2 concentration: 0 to 20%; ±0.1% control
- Humidity range: above ambient to 98%
- Nonvolatile memory retains setpoints in the event of power interruption or failure
- Sample port on control panel allows for CO_2 testing with Fyrite* analyzers (10-884 and 10-884-1)
- Temperature-adjustable heated outer door has separate control, is insulated with fiberglass and protects tempered-glass inner door from condensation
- Interior has rounded corners for easy cleaning
- Includes two adjustable nontip shelves
- Each chamber can accommodate five shelves

INCLUDES:

Thermal conductivity (T/C) CO_2 sensor and built-in RS-232-C port. Optional CO_2 autochange is available.

STANDARD

isher Scientific* Isotemp* Forced-Air Incubators

uilt-in PID microprocessor-based controller delivers outstanding temperature niformity

ith average temperature uniformity of ±0.3°C (±0.5°C absolute),[1] these cubators operate within much tighter tolerances than gravity convection cubators. Choose from three models: 2.2, 3.4, and 4.5 cu. ft.

- Built-in PID microprocessor-based controller for close uniformity with set temperatures
- Can set temperatures up to 75°C in 0.1°C increments using the keys on the control panel
- Actual temperature is displayed (to the nearest 0.1°C) on the bright, three-digit LED display
- If actual temperature exceeds setpoint by 3°C, a visual alarm will signal on the control panel
- Tempered glass inner door to view samples
- Temperature recovery is within two minutes (three min. on 4.5 cu. ft. model)[2]
- Heavy-duty steel/aluminum exterior; stainless-steel interior surrounded by 3" thick (7.6cm) insulation in the walls and 1½" (3.8cm) in the door
- 5-amp electrical outlet to support other apparatus

INCLUDES:
The 2.2 and 3.4 cu. ft. models supplied with one adjustable shelf; the 4.5 cu. ft. model comes with two shelves. Additional shelves may be purchased separately. All models come with a line cord and grounded NEMA 5-15P plug.

ACCESSORIES

Extra Shelf for Fisher Scientific* Isotemp* Forced-Air Incubators

Fits all models

Description	Cat. No.	Each
Shelf with supports	**13-245-960**	77.44

Fisher Scientific* Isotemp* Standard Lab Incubators

30° to 75°C (86° to 167°F) range

Incubators with gravity flow circulation provide accurate, efficient heating for routine laboratory procedures: drying and staining of slides, paraffin embedding, tissue culture work, incubation of antibody tests, microbiological determinations, crystallization studies, and more. Electrical receptacle inside (5A at 120VAC) to plug in a stirrer, shaker, or other apparatus.

Easy to operate

- Microprocessor control
- Controls are conveniently located at the top of the incubator chamber
- Keypad with arrow keys to increase or decrease setpoint temperature in 0.1°C increments
- Overtemperature value is automatically set at 3°C above setpoint
- PID controller comes with fixed parameters so no tuning is required
- Circuit breaker protects incubator from power surges; battery backup
- Designed to stack two units

Big three-character LED display

- Digits display actual temperature to nearest 0.1°C
- Display shows current value for setpoint temperature
- HEAT indicator light cycles on and off to show when incubator heaters are on
- ALARM indicator lights up if temperature exceeds overtemperature limit; backup controller maintains temperature at 3°C above setpoint; safety backup built into software

Small, medium, and large workload capacities

- Available in three chamber capacities
- Mounting holes at 2" (5cm) intervals on the chamber walls for shelf placement
- Small incubator holds a maximum of five shelves, medium incubator holds eight, and large incubator holds 11 shelves

Low-maintenance incubators with inner and outer doors

- Cabinet has durable, enamel-coated steel exterior
- Extruded aluminum trim has acrylic powder coating
- Chamber is easy-to-clean stainless-steel
- Low-watt-density heater elements are designed for long life
- Silicone gasket on outer door and 3" thick (7.6cm) fiberglass insulation throughout prevent heat loss
- Outer door opens to 180° for unhindered access and features two grabber-type latches
- Inner door is tempered glass
- Steel shelves are 17⅜" wide and 16¾" front-to-back (44 × 42.5cm)
- Black synthetic rubber feet keep incubator from slipping and maintain a space between incubator and benchtop for ventilation

11-690-637D

Big LED display

ORDERING INFORMATION:
Available in 120V 60Hz or 240V 50/60Hz.[4]

INCLUDES:
Small (2.5 cu. ft.) and medium (3.75 cu. ft.) incubators each come with one plated-steel shelf; large (5.0 cu. ft.) incubator comes with two shelves.

WARRANTY:
One year

CERTIFICATIONS:
CSA approved.

ACCESSORIES

Extra Shelves for Fisher Scientific* Isotemp* Programmable, Premium, and Standard Lab Ovens

- Chrome-plated steel, wire-frame style
- No-tip design
- With shelf supports

Dimensions (L × W)	Cat. No.	Each
16¾ × 17⅜" (42.5 × 44cm)	**13-247S**	69.01

isher Scientific* Isotemp* Economy ab Incubators

ectronic control with safety backup

- These economical incubators provide dependable, trouble-free heating for many light-duty laboratory assignments.
- Perfect for biology classrooms or as a backup for overloads in microbiology labs
- Controls are located at top of chamber within easy reach, even if unit is on the floor
- Internal electrical receptacle (5A at 120V) allows you to use a shaker or stirrer inside of the chamber

mple heating controls

- Turn on power switch and set temperature dial for any temperature between 30° and 75°C; major dial divisions are at 5°C intervals
- Electronic controller is factory calibrated
- Built-in backup controller will maintain temperature at 3°C above setpoint temperature if primary controller should fail

asy-to-see illuminated status indicators

- Green POWER indicator shows power is on
- Red HEAT indicator cycles on and off to notify when incubator heaters are operating
- When lit, yellow ALARM light means incubator is operating under backup control

ravity flow convection

- Air inlet port supplies air to plenum below chamber
- As air is heated, it generates convection that causes air to circulate gently throughout chamber in a vertical pattern
- Used air is expelled through an exhaust port at the back of the incubator

lany convenient, easy-care features

- Incubator cabinet has durable enamel-coated steel exterior
- Extruded aluminum trim has an acrylic powder coating
- Chamber is easy-to-clean stainless steel
- Low-watt-density heater elements are designed for long life
- Tempered glass door opens to 180° for unhindered access
- Wire frame shelves of chrome-plated steel are 17⅜" wide and 16¾" front-to-back (44 × 42.5cm)
- Black synthetic rubber feet keep incubator from slipping and maintain a space between incubator and benchtop for ventilation
- To maximize valuable lab space, incubators can be easily stacked

11-690-537D

Easy-to-use controls

ORDERING INFORMATION:

Order additional shelves separately (13-247S).

INCLUDES:

- Small (2.5 cu. ft.) and medium (3.75 cu. ft.) incubators each come with one chrome-plated steel, no-tip wire shelf
- Large (5.0 cu. ft.) incubator comes with two shelves
- Mounting holes at 2" (5cm) intervals on chamber walls let you place shelves where you need them; small incubator holds up to five shelves, medium incubator holds eight, large incubator holds 11 shelves
- All three models come with clips for front edge of shelf to hold a thermometer

WARRANTY:

One year

CERTIFICATIONS:

CSA approved

Length includes thickness of door; does not include handle.

All incubators include internal accessory outlet that will increase current usage by 5 amps if utilized at its rating.

Fisher Scientific* Isotemp* Compact Incubators

Dependable, trouble-free incubation for tight budget or benchtops

- Compact, lightweight models with bottom-mounted controls for more space savings
- Ideal for biology classrooms or as backup for overloads in microbiology labs
- Handle all but the most critical laboratory incubation requirements
- Choose from two models: 0.67 and 1.3 cu. ft. (19 and 30L)

11-690-516DQ

Simple, safe operation

- Use gravity flow convection design
- Pilot light indicates when unit is turned on
- Reach maximum of 40°C or 65°C within half-hour of startup
- Set temperature on incubator dial to position that corresponds to desired thermometer temperature
- Measure chamber temperature using supplied red-spirit-filled thermometer

Built to last

- Cabinet is made of cold-rolled steel with gray powder-coated finish
- Double-wall construction with 1" (2.5cm) of impregnated fiberglass for enhanced temperature uniformity and consistency
- Aluminum inner chamber facilitates heat transfer
- Doors open 180° for unhindered access to chamber

INCLUDES:

- Both models are supplied with thermometer bracket and non-Mercury thermometer accurate to NIST* tolerances
- Small 0.67 cu. ft. model has one fixed shelf; 1.3 cu. ft. model has two adjustable perforated aluminum shelves
- 120V models come with line cord and grounded NEMA 5-15P plug and are CSA approved
- 240V models are supplied with line cord and NEMA 6-15P plug

Thermo Scientific* Precision* Economy Incubators

Reliable and accurate temperature stability

Select from five models offering a wide temperature range with excellent temperature sensitivity, stability, and uniformity. Ideal for applications involving microbiological determinations; pharmaceutical stability testing; paraffin embedding; crystallization studies; drying and staining procedures; tissue culturing; and coliform determinations.

13-255-7

- Provide 11½ sq. ft. (1m^2) of usable incubation area in no more than 3½ sq. ft. (0.33m^2) of space
- All models feature tough, durable powder-coated exteriors and stainless-steel interiors that resist corrosion and contamination
- Two nontip nickel-plated wire shelves are easy to clean and simplify loading and unloading
- Interior glass door allows for sample viewing without disturbing chamber environment
- Model 13-255-1 has hydraulic temperature control
- All other models feature electronic temperature controller and temperature sensor that maintain heating cycle and ensure temperature accuracy
- Grabber door securely latches for four-point positive seal
- Adjustable exhaust port controls amount of airflow from chamber

INCLUDES:

0° to 100°C thermometer, line cord, and plug

hermo Scientific* Lab-Line* L-C Benchtop Incubators

.3 and 5.1 cu. ft. capacities

conomical incubators are ideal for general laboratory incubations requiring temperature range from slightly above ambient to 65°C. Special low-watt-ensity heaters located on outside of chamber walls eliminate hazards ssociated with exposed wire heaters, create increased chamber work pace, and provide superior heat distribution to minimize temperature radient.

- Utilize radiant warm wall heating to achieve maximum temperature uniformity
- Sensitive hydraulic thermostat quickly reacts to sudden temperature changes
- Exterior walls are constructed of durable, enameled steel
- Aluminum interior provides corrosion resistance and excellent heat transfer
- Built-in pilot light indicates when unit is operating

INCLUDES:

Each model contains two removable, perforated aluminum shelves. Units are supplied with 3-wire line cord.

Thermo Scientific* Lab-Line* Laboratory Benchtop Incubators

Select from three compact sizes

Benchtop incubators are specially designed to meet the demands of teaching and clinical laboratories.

All models

- Adjustable air vent and thermometer holder (thermometer included)
- Adjustable bimetallic thermostat controls temperature
- Pilot light indicates when heaters are energized
- Metal-sheathed heaters minimize hazards of open wire internal heating elements
- Exterior walls are constructed of durable, enamel-coated, heavy-gauge steel

Models 100Q, 105Q, and 120Q

- Corrosion-resistant aluminum chamber with 1" (2.5cm) of fiberglass insulation for enhanced temperature uniformity
- Models 100Q and 105Q have a temperature range of slightly above ambient to 40°C
- Model 120Q offers a temperature range from slightly above ambient to 60°C
- Models 100Q and 120Q have insulated metal door with positive latch and vinyl gasket provides an excellent seal
- Model 105Q has clear Plexiglas door; permits unobstructed view of cultures without disturbing chamber atmosphere
- Model 120Q includes removable shelf

11-702-4Q

Models 150Q and 152Q

- Ideal for educational applications
- Temperature range is from slightly above ambient to 45°C
- Clear Plexiglas* door permits unobstructed view of cultures without disturbing chamber atmosphere
- Door includes positive latch for secure seal
- Both models include two perforated aluminum shelves

INCLUDES:
120V models are supplied with grounded, 3-wire line cord.

Thermo Scientific* Lab-Line* Imperial III Standard Incubators

2.6, 5.2, and 11.2 cu. ft. capacities

Gravity convection incubators combine the advantages of radiant warm wall heating with the convenience of LED temperature display. Single-chamber models (Models 302, 305) are available in two sizes, while dual-chamber Model 310 is available in one size—all designed for work requiring controlled temperatures up to 65°C.

- Hydraulic thermostat controls temperature with a second independent safety thermostat for added protection
- Temperature control ±0.2°C
- Fiberglass-insulated body and door prevent temperature fluctuations and heat loss
- Tempered glass inner door allows inspection of samples without disturbing chamber environment
- Interior walls are fabricated from easy-to-clean, corrosion-resistant aluminum
- All models come with sturdy, nontip, chrome-plated wire shelves, adjustable on ½" (1.3cm) centers
- Convenient top-mounted controls feature large, easy-to-read LED display that continuously indicates chamber temperature

ORDERING INFORMATION:
For added convenience, Models 305 and 310 allow use of shakers, stirrers and other lab appliances inside of chamber via internal electrical outlets. Model 305 features one outlet and Model 310 has two.

INCLUDES:
All models come equipped with resettable circuit breakers for electrical protection. 120V models are supplied with 3-wire line cord and molded plug.

CERTIFICATIONS:
Model 302 is CSA approved.
UL listed.

Boekel* Digital Incubator

With digital temperature display

or incubating cultures, test kits, eggs and other biologicals in physicians' ffices, or clinical, industrial and school laboratories.

- Compact size ideal for labs restricted by low-hanging cabinetry
- Features an LCD digital temperature display with 0.1°C resolution
- Has rugged metal door, magnetic door latch; provides excellent temperature stability and uniformity
- Supplied with an integral bottom shelf plus one adjustable shelf
- Capacity: 0.8 cu. ft. (22.7L)

- ▸ Maximum temperature: 60°C (140°F). Net weight, 19 lb. (8.6kg)
- ▸ For 120VAC

11-700-107

14 × 13 × 16¼" (35.6 × 33 × 41.3cm)	12 × 11½ × 10½" (30.5 × 29.2 × 26.7cm)	133000	**11-700-107**	602.48

DRY BATHS

Fisher Scientific* Isotemp* Digital and Analog Dry Bath Incubators

Provide controlled dry heat for a wide variety of clinical and general chemistry applications

Choice of 1- to 6-block Analog Models, 2- or 4-block Digital Models

- Exceptional temperature control and uniformity
- Temperature range of 5°C above ambient to 130°C
- Powder-coated steel body construction provides durability for demanding applications
- Compact design saves valuable bench space
- Choice of interchangeable heating blocks

Digital dry baths with microprocessor controller

- PID microprocessor control, digital temperature setting
- Just press up/down arrows to set temperature in 0.1° increments
- Effectively hold samples at constant, warm temperature
- 5°C above ambient to 130°C range; ±0.4° uniformity at 37°C; stability, ±0.2°C
- Bright LED display continuously shows actual temperature in °C
- Temperature probe in bottom of bath provides improved accuracy and control; free probe included
- Model 125DQ holds two heating blocks; Model 145DQ holds four heating blocks in 2 × 2 configuration

Analog Dry Baths with dual-thermostat controls

- Sloped control panel makes controls highly visible
- Dual bimetallic thermostat controls
- Stability is ±1.5°C, uniformity ±0.5°C at 37°C
- Use thermometer to read current temperature of blocks, then adjust control to reach desired setpoint
- Efficient design: operate at substantially lower external temperature than other models

APPLICATIONS:

deal for enzyme reactions, inactivation of sera, Rh studies, blood cross-matching and cholesterol determinations

Digital Dry Baths 11-715-125DQ, 11-715-145DQ

ORDERING INFORMATION:

All models accept 2 29⁄32L × 3¾W × 2"H (7.4 × 9.5 × 5.1cm) blocks, sold separately.

INCLUDES:

Digital Models come with temperature probe, line cord and plug. Analog Models include high and low thermostat, power switch, pilot light, line cord and plug.

REQUIRED ACCESSORIES:

Heating blocks, sold separately, hold regular tubes, microcentrifuge tubes, square cuvets, or microplates; see Fisher Scientific Isotemp Heating Blocks for Isotemp Analog and Digital Dry-Bath Incubators.

WARRANTY:

One year

CERTIFICATIONS:

Digital Models are CSA approved. Analog Models are UL listed.

Fisher Scientific* Isotemp* Digital and Analog Dry Bath Incubators, Contd.

ACCESSORIES

Heating Blocks for Fisher Scientific* Isotemp* Digital and Analog Dry-Bath Incubators

Fit Digital Models 125DQ, 145DQ and Analog Series

- Choose from blocks that hold 6 to 25mm O.D. standard tubes, 15 or 50mL conical-bottom tubes, microcentrifuge tubes
- Solid aluminum construction
- Sample wells are shaped so that heat is evenly transmitted to all parts of the sample tube
- Shape also eliminates the temperature gradient that may invalidate tests

ORDERING INFORMATION:
Dimensions: 2.9L × 3.75W × 2"H (9.5 × 7.4 × 5.1cm).

WARRANTY:
One year

‡ Microtiter Plate Block occupies space of two blocks.

Fisher Scientific* Isotemp* Model 147Q Dry-Bath Incubator

Holds single heating block in choice of nine well sizes

Ideal for hospitals with smaller volume of enzyme and cholesterol assays, Rh studies and dry incubations.

- Low-watt–density heater is mounted on a 3/32" thick (2.3mm) aluminum heat-distributor plate in the floor of the bath
- Aluminum blocks carry heat uniformly to all sample wells
- Tubes stay dry, minimizing cleanup problems
- Screwdriver-adjusted temperature control between ambient and 95°C; to set, observe thermometer placed in unused sample tube, adjust control through hole in front panel
- Maintains set temperature with constancy and uniformity of ±0.5°C
- Strong nylon case

11-715-102Q

ORDERING INFORMATION:
Dimensions: 6L × 6¾W × 3"H (15 × 17 × 7.6cm).

INCLUDES:
Thermostatically controlled heater, heat indicator lamp, line cord with plug, and instructions.

LOOKING FOR THERMOMETERS?

We have a large selection of Fisherbrand* digital, bimetal and mercury thermometers for virtually any application. See the Temperature section.

Thermo Scientific* Blood Bank Dri-Bath* Incubator

11-715-5Q

Blood Bank Model

Accommodates 12mm diameter tubes for tests requiring fine temperature control

- For crossmatches, indirect Coombs test, Rh titers, Du tests
- 37°C temperature (±0.5°C) is uniform from top to bottom of all 40 wells
- Dimensions: 4½L × 8¾W × 3¼"H (11.4 × 22.2 × 8.2cm)

INCLUDES:
Line cord and plug

CERTIFICATIONS:
UL listed

Eppendorf* ThermoStat Plus Interchangeable Block Heater

Compact, benchtop thermostat accurately maintains tube, microplate and vial temperatures between -5° and +99°C

05-400-210

Ideal for molecular biology, enzymatic testing, cell technology, immunological testing and general lab applications.

- Program temperature and run times individually
- 10 different exchangeable thermoblocks
- For special applications, program and store up to four temperature levels and four time phases in succession
- Clear keypad controls with digital display simplify the process
- To operate, select temperature and then press START to activate the time function
- Temperature control is accurate to ±1°C between -5° and +45°C, ±2°C between 45° and 99°C
- Unit heats up at a rate of 4°C/min.
- Cools down at 2°C/min. between 99° and 25°C, 1°C/min. between +25°C and -5°C
- Use accessory thermoblocks to incubate Eppendorf 15 or 50mL conical tubes or microplates
- For Erlenmeyer beakers and vials up to 60mm in height, use the CombiBox Universal Box

ORDERING INFORMATION:
Dimensions: 9⅞L × 8¾W × 4¾"H (25 × 22 × 12cm). Weight: 11 lb. (5kg). With RS-232-C interface. Electrical requirements: 100–240V 50/60Hz, 75w.

Boekel* TropiCooler* Benchtop Hot/Cold Block Incubator

Store frozen restriction enzymes and perform ligations and DNA hybridizations from the bench

05-450-7

- Temperature range: -19° to +69°C (-2° to +156°F)
- Easy temperature selection (settings in 1° increments) and rapid equilibration time
- Digital microprocessor controls Peltier thermoelectric heating and cooling device for efficient, low-maintenance operation
- Dry heat and cold make unit an attractive alternative to ice buckets and water baths

ORDERING INFORMATION:
Dimensions, 11¾L × 9¾W × 7¼"H (29.8 × 24.8 × 18.4cm). Weight, 13 lb. (6kg). For 115V 60Hz, 0.8A, 100w.

INCLUDES:
Two machined aluminum blocks, holding 14 microcentrifuge tubes (1.5mL size) each (additional block configurations available); smoked acrylic plastic lid

Mfr. No.	Cat. No.	Each
260014	**05-450-7**	1820.70

ACCESSORIES

TropiCooler* Incubator Blocks

Ideal for restriction enzymes and DNA libraries

- Machined aluminum blocks with anodized finish and self-contained recessed handle
- Hold 0.5 and 1.5mL microcentrifuge tubes (13-245-114 holds seven of each tube size)
- Dimensions, 2⅛L × 3¼W × 1½"H (5.4 × 8.3 × 3.8cm)

SERVICE AGREEMENTS

Fisher Scientific offers several types of service agreements for the equipment featured here. For details on these agreements, equipment repairs and calibration services, see the Services section.

For immediate assistance, call 1-800-395-5442.

LOOKING FOR SLIDES?

Clear, frosted, colored, and special-purpose microscope slides can be found in the Microscope Supplies section.

ENVIRONMENTAL TEST CHAMBERS

hermo Scientific* Revco* Steady-State Environmental Test Chambers

lanual or automatic control with digital input and display

ide range of applications

- deal for shelf life, stability, burn-in, and reliability testing
- For curing, controlled temperature storage, cleanroom and biomedical research testing and production processes
- Can be customized for specific laboratory needs
- Capacities of 10 and 32 cu. ft. available

eady environmental control system

- Accurate temperature and RH control from 0° to 99°C (32° to 210°F)
- Setpoint/actual temperature display offers resolution of 0.1°C (0.1°F)
- Operates from 20 to 96% RH under ambient conditions of 22°C and 50% RH; typical resolution of 0.1% RH and control to ±2% RH after stabilization
- Temperature uniformity of ±0.5°C throughout chamber is obtained with adjustable airflow ports
- Horizontal recirculating conditioning stream permits flexible shelf-loading patterns
- Includes various heating and cooling modes, making it ideal for multiple applications
- Process and deviation alarm modes, including audible and visual alarms
- Signals overtemperature conditions; high-limit control circuit prevents overheating
- Long-life sheathed heating elements and external power connections increase reliability
- Air-cooled, hermetic compressor provides optimal refrigeration
- CFC-free refrigerant; automatic defrost system kicks in when temperatures fall below 20°C

Sturdy cabinet construction

- Easy-to-clean powder-coated exterior
- Interior chamber of continuously welded, vapor-tight, stainless steel with rounded corners
- Chamber has 2" (51mm) access port on each side for ventilation and independent probe use
- No-tip stainless-steel shelves adjust in 3" (76mm) increments; hold up to 135 lb. (61kg)
- Solid outer door tightly seals with double silicone gasket system

HYBRIDIZATION

isherBiotech* Hybridization Incubators

eal for nucleic acid and protein hybridizations; eliminate need for water baths and heat sealers

fe and precise

- vailable in small, medium, and dual-chamber models
- ual-chamber model has independent controls, doubles capacity of edium model
- revent overheating: cut heater power in case of temperature runaway
- eat from ambient to 65°C in <20 min.
- ecovery time at 37°C, <2 min. (door open 30 sec.)
- orced-draft convection achieves ±0.5°C uniformity at 55°C
- ample-to-sample uniformity is ±0.25°C

ogram with menu-driven controls

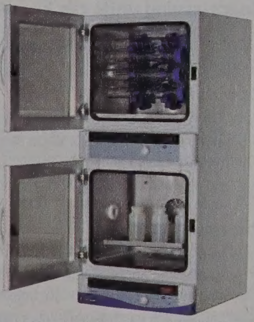
- icroprocessor-based PID controller guides programming
- et temperature from ambient +7.0° to 85.0°C via simple keypad; digital isplay shows your selection
- imple menu option lets you access temperature setpoint deviation uring run
- asy to calibrate: offset feature lets you manually adjust display to match ctual temperature

novative Rotisserie

- asy to load; accommodates tubes from 35 I.D. × 100 to 300mm long
- ual-chamber model comes with two rotisseries
- atented Gentle-Clip* grips hold tubes securely, open easily
- Variable speeds from <5 to 15rpm (±1rpm)
- Accessory rotisserie 13-247-26Q holds 70 × 300mm I.D. tubes

Built to Last

- Durable, light gray painted steel exterior; interior is stainless steel
- Tempered low-beta-emission glass window



Dual-chamber hybridization incubator 13-247-20Q, shown with accessory rocker assembly 13-247-28Q.

ORDERING INFORMATION:

Small- and medium-sized models can be stacked with accessory stacking plate. Optional under-counter mounting bracket available for small model. All models supplied with line cord and plug.

WARRANTY:

One year

70 × 300mm	**13-247-70**	63.47	----

ACCESSORIES

Rocker Assembly for Medium and Dual-Chamber Hybridization Incubators

- Rocks large sample containers or preheats bags of buffer
- Back-and-forth motion allows even heat distribution, keeping samples homogenized
- Speed variable from <5 to 15rpm (±1rpm)

For Use with	Cat. No.	Each
13-247-20Q Series and 13-247-30Q Series incubators	**13-247-28Q**	453.03

Thermo Scientific* Hybaid* Shake 'n' Stack Hybridization Ovens

Space-saving units can be safely stacked up to three units high

Excellent temperature uniformity provides reproducible results with low backgrounds.

Operating Features

- Digital temperature control, settable in 0.1°C increments
- Overtemperature control protects samples by pulsing power as the temperature approaches the setpoint, minimizing overshoot
- Variable-speed shaking platform provides linear rocking movement suitable for membrane washing and gel destaining

Rotisserie Features

- Adjustable-speed, Delrin* plastic rotisserie can be easily removed by hand
- Rotisserie and optional shaking platform can be used interchangeably, enabling one unit to be used for both hybridization and washing procedures
- Slipping clutch mechanism allows rotisserie to be stopped by hand, so bottles may be removed and inserted without switching off rotisserie
- Variable-axis rotisserie motion may be used with 35mm bottles for additional end-to-end fluid movement
- Rotisseries hold ten 35mm diameter hybridization bottles up to 300mm long or thirty 50mL plastic tubes up to 30mm in diameter

ORDERING INFORMATION:
120V 50/60Hz

INCLUDES:
10-bottle rotisserie and drip tray (both models); Model HBSNSRS adds shaking platform

Boekel* Jitterbug* Microplate Incubator Shaker

Accepts two standard microplates or strip trays

Ideal for a variety of immunoassay and research applications.

- Microprocessor allows independent control of temperature, shaking speed, and mixing duration
- Warmed inner aluminum bed with air circulation provides temperature uniformity better than ±0.4°C (with cover)
- Inner chamber cover insulates plates, reduces biohazard risk; outer tinted Plexiglas* cover adds insulation and protection from light
- Automatic circulating fan prevents condensation
- Rotating counterweight mixer offers continuous timed operation (575 to 1500rpm in 8 increments) or pulse operation (1500rpm for 3 sec.)
- Timer has 1-second resolution and range of 1 second to 99 minutes, 59 seconds
- Temperature range is ambient to 40°C with resolution of 0.1°C; warms up in 15 minutes
- ABS plastic enclosure with a metal base

11-701-13

ORDERING INFORMATION:
Dimensions: 10L × 10W × 4"H (25.4 × 25.4 × 10.2cm).
Net weight: 7 lb. (3.2kg). For 115V; supplied with 120VAC input, 12VAC 2A output adapter.

Mfr. No.	Cat. No.	Each
130000	**11-701-13**	1915.38

Boekel* InSlide Out* Hybridization Apparatus

Reduces sample prep time

- For microarray and in situ hybridization, immunohistochemistry applications, slide warming and drying
- Sealed chamber permits hybridization and single-slide temperature incubation procedures without need for sealed cover slips
- Reduces preparation time, avoids exposure to fumes from slide-sealing agents
- PID temperature controller ensures rapid heatup and temperature stability
- Temperature range: 5° above ambient to 75°C

ORDERING INFORMATION:
Overall dimensions: 17¾L × 18W × 6"H (45 × 46 × 15cm). Tray dimensions: 11½L × 7½W × ¾"H (29 × 19 × 1.9cm).

INCLUDES:
Stainless-steel slide rack holds up to twenty 1 × 3" slides; as well as various other size slides

WARRANTY:
Two years

Oven (05-450-50) shown with stainless-steel slide rack and cover and optional polycarbonate slide holder.

C2403765	**05-450-19**	384.30

Boekel* Incubator Shaker II

For prehybridization and hybridization of transfer membranes in Southern and Northern blotting techniques

- Eliminates mess of shaking water baths and shakers placed inside conventional incubators
- Three removable shelves each hold blots to 20 × 20cm, Tupperware*-type dishes or heat-sealed bags on supplied trays
- Microprocessor-controlled digital temperature selector; independent analog safety thermostat
- Easy-to-read LCD readout accurate to 1°C
- Shaking speed adjusts from 8 to 25 strokes/min.
- Range: 5° above ambient to 70°C; uniformity, ±1.0°C
- Accuracy: ±1.5°C at 65°C (no load); ±0.7°C at 65°C (dishes or bags)
- Gasket-sealed metal door; acrylic plastic see-through window
- Enameled steel exterior; polished aluminum interior

ORDERING INFORMATION:
Chamber dimensions, 11½D × 11½W × 10½"H (29 × 29 × 27cm). Outside dimensions, 14½L × 12½W × 16"H (36.8 × 31.7 × 40.6cm).Tray dimensions, 8L × 8½W × ½"H (20.3 × 21.6 × 1.3cm)

INCLUDES:
Three trays

Boekel* Slide Moat* Incubators

For in situ hybridization from 5° above ambient to 100°C

Versatile microscope slide incubator

- At home in clinical or basic research laboratory
- Designed for in situ hybridization or denaturation, plus all slide drying and warming procedures used in histology, cytology, or pathology
- Range: 5° above ambient to 100°C
- PID controller for easy temperature selection, rapid heating (ambient to 65°C in 20 minutes), and excellent stability (typically ±0.2°C or better throughout operating range)
- Tight-fitting tempered glass lid seals to integral gasket on heating base; airtight seal maintains saturated atmosphere overnight with only a few drops of water
- Accommodates up to 30 standard (1 × 3") microscope or specially designed in situ slides in three rows of 10 each

05-540-31

ORDERING INFORMATION:

Clearance between the lid and pedestal is ⅜" (1cm). Chamber dimensions: 13¾D × 16W × 5¾"H (34.9 × 40.6 × 14.6cm). Net weight: 18 lb. (8.7kg)

LOW TEMPERATURE

isher Scientific* Isotemp* Large-Capacity Refrigerated Incubators

xtra-large chamber holds up to 600 BOD bottles—33% more than standard capacity models

- 30.4 cu. ft. (860L) capacity
- Holds 368 BOD bottles; up to 600 with additional shelves
- Built-in safety thermostat and power-out alarm
- Temperature range: -15° to +50°C (5° to 122°F)
- Digital LED display on door indicates actual chamber temperature
- Microprocessor-based controller helps maintain chamber temperature within 1°C of setpoint
- Sensors monitor chamber temperatures; high- or low-temperature alarm warns of over- or under-temperature condition
- Runaway-temperature guard disables heater when temperature reaches 60°C; fan shuts off when door is opened to preserve atmosphere
- Refrigeration system includes R404A refrigerant, ⅓hp compressor and thick CFC-free urethane foam insulation

ugged and convenient

- Steel interior and exterior surfaces have baked-on white enamel finish: durable, corrosion resistant, easy to clean
- Adjustable 1-½" (3.8cm) stainless-steel legs and casters included
- Door has a keylock and magnetic full-perimeter gasket
- Shelves adjust on ½" (1.3cm) slots, are coated for resilience and corrosion resistance, hold up to 100 lb. (45.3kg) each
- Interior 40w light and 2A electrical outlet inside cabinet

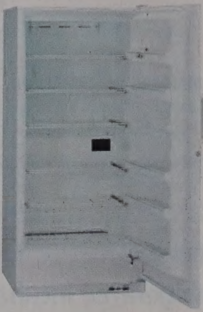
Fisher Scientific* Isotemp* Standard-Capacity Refrigerated Incubator

20.3 cu. ft. capacity—holds 300 BOD bottles



11-679-25CN

Safely maintains temperature within 0.5°C

- Microprocessor-based controller with LED display shows setpoint and actual temperature within 0.1°C; no fine tuning needed
- Temperature range: -10° to +60°C (14° to 140°F); uniformity, ±0.5°C; constancy, ±0.2°C
- Safety relay and alarm LED alert to over/under temperature
- Shielded heater and nonsparking fan: no accidental burns
- Zero switching means no RF interference

CFC-free refrigeration

- CFC-free R-134A refrigerant; 186w (¼hp) hermetically sealed compressor; compressor and fan never need lubrication
- Compressor includes energy conservation and overload relays, RTD temperature probe, protected setpoint mode to prevent accidental change
- Thermal dry-wall construction with foamed polyurethane insulation
- In-wall condenser coils distribute antifrost warmth to cabinet sides, top, and back; minimize frost buildup, avoid need for defroster

Durable construction

- Enameled steel exterior, white plastic interior resist rusting, chipping, staining; wipe clean easily
- Adjustable front feet for leveling

Door has magnetic gasket, molded ABS lining, lock and key

- Five fixed-position removable full-width chrome-plated wire shelves; six molded shelves on door
- 2A convenience outlet in chamber for auxiliary shakers, photosynthesis illuminators, recording thermometers
- Door-switched interior light, power switch in chamber, exterior pilot lamp

APPLICATIONS

BOD of sewage and waste flow (APHA method at 20°C incubation); overnight BOD sample preservation at 3° to 4°C; standard culturing at 37°C, vaccine storage at 15°C; fermentation studies, drug stability tests, entomological incubations

ORDERING INFORMATION:

Total storage area: 26 sq. ft. (2.4m^2); 8⅛" (20.6cm) distance between shelves. Dimensions: 28½L × 32W × 70"H (72.4 × 81.3 × 177.8cm). Shipping weight, 283 lb. (128kg).

INCLUDES:

Five removable shelves, one basket, six molded door shelves, moisture collection/evaporation tray, line cord and plug

hermo Scientific* Revco* BOD Refrigerated Incubators

rsatile environmental chambers in choice of two sizes

13-990-117

- grammable and nonprogrammable models available.
- deal for shelf life and life cycle testing
- seful for both general incubation and refrigerated storage
- eating/refrigeration systems offer microprocessor-based control, digital emperature display, and high-quality cabinet construction
- efrigeration system has air-cooled, hermetically sealed industrial ompressor; may be turned off when not in use
- orced-air circulation provides maximum temperature uniformity

atures:

- FC-free urethane-insulated cabinet
- orrosion-resistant seamless interior, scratch-resistant exterior acrylic inish
- eyed door lock (except BOD-10A), magnetic door gasket
- emote alarm contacts
- Auto defrost system with condensate evaporator: no drain needed
- Open-wire shelves on 10" (25.4cm) centers; over 20 square feet of shelf space plus utility basket

ogrammable Model BOD-50A features:

- ° to +60°C range with -20°C fixed-setpoint selector switch
- olid-state two-channel controller, seven-day timer programmable in wo-hour increments
- igital temperature display, keyed ON/OFF switch
- larm system: audible/visual warning on high-limit temperature deviation, isual warning on low limit deviation

Nonprogrammable Model BOD-10A features:

- Manual defrost
- 0° to +50°C temperature range

Nonprogrammable Model BOD-30A features:

- Automatic defrost
- -20° to +60°C temperature range

ORDERING INFORMATION:

For the BOD-50A and -30A, shipping weight is 300 lb. (136kg); electrical, 115V 60Hz, 10.6A. For the BOD-10A, shipping weight is 115 lb. (52kg); electrical, 115V 60Hz, 2.9A.

Thermo Scientific* Precision* Large-Capacity Incubators

Standard and low-temp models use mechanical convection for uniform heating or cooling of large loads

- 30 cu. ft. (849.5L) chamber volume
- Occupy less than 8 sq. ft. (0.7m^2) of floor space
- Hydraulic thermostat control
- Powder-coated steel exterior; aluminum interior
- Easy to clean and corrosion and chemical resistant
- Built-in, high-temperature safety feature

Standard Model 30M

- Operating range from 5° above ambient to 70°C, with ±0.5°C uniformity at 37°C
- Outside dimensions: 29¼L × 36W × 88½"H (74.3 × 91.4 × 224.8cm)
- Chamber dimensions: 24¼D × 30W × 72"H (61.6 × 76.2 × 182.9cm)
- Shipping weight: 685 lb. (311kg)

Model	Door	Mfr. No.	Cat. No.	Each
30M	Solid	51221095	**11-679-68**	7202.04
	Glass	51221098	**11-679-69**	7641.84
30MR	Solid	51221103	**11-679-71**	8153.06
	Glass	51221104	**11-679-70**	8538.78

Low-temp Model 30MR

- Uniformity of ±0.5°C at 37°C and ±0.4°C at 5°C
- Outside dimensions: 29¼L × 36W × 93½"H (74.3 × 91.4 × 237.5cm)
- Chamber dimensions: 24¼D × 30W × 72"H (61.6 × 76.2 × 182.9cm)
- Shipping weight: 760 lb. (344kg)

ORDERING INFORMATION:

Electrical: 120V 50/60Hz, 12.1A for 30M models; 120V 50/60Hz, 17.9A for 30MR model. Requires hardware installation.

INCLUDES:

Six rod-type cadmium-plated steel shelves, internal duplex outlet and terminal board (without line cord).

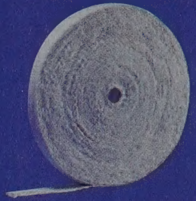
INSULATION

01-475



01-472A

Fiberglass cloth and tape insulate surfaces, distillation columns and other apparatus. Usable to 538°C (1000°F).

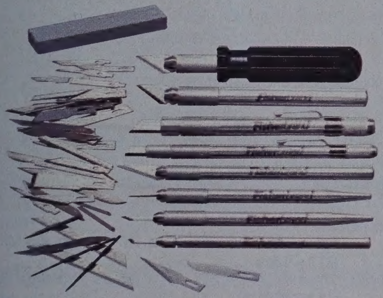
For more options, visit our Web site and search for "**Insulation**".

Description	Cat. No.	Each	Case of
Cloth	**01-475**	382.74	----
Tape, 25mm thickness	**01-472A**	70.14	36/2158.04
Tape, 51mm thickness	**01-472B**	111.28	24/2282.68

KNIVES

*Fisherbrand** General-Purpose Lab Knife Set

For slicing rubber tubing, corks, plant samples,



08-850-5

Blades
- Made of the highest-grade steel
- Ultramicro to heavy-duty cutting edges

Handles
- Eight different styles
